11. The loading of stores, provisions, etc. (either by crane or derrick) is not permitted on this berth. No restrictions on items being *carried* on board via the gangway, e.g. laundry. Necessary to anchor after discharging/ballasting to take on stores.
12. During severe weather conditions tug assistance was requested to stand by the vessel on the berth. Tugs cannot approach unless the spill boom is removed and this will only be removed if cargo discharge ceases and Chicksan arms disconnected.
13. A shore liberty boat was arranged through Agent. This service is to Yokohama, approx. 1 hour journey. A boat service to nearby Kawasaki is permitted and take 40 minutes. All boat services suspended when weather deteriorates. Shore passes issued by Immigration Authorities on board and must be collected in before vessel leaves berth.

AUTHORITY: Port & Harbour Bureau of Kawasaki City, 1 Miyamoto-cho, Kawasaki-ku, Kawasaki City, 210 Japan. *Tel:* 044 (200) 2111. *Contact:* Choshun Kikuchi, Director.
AGENT: See "Yokohama".

KIIRE: 31.23 N. 130.32 E. (See Plan)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
5 Crew Lists including Passport Numbers.
5 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore Ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: No particular regulations for navigating in Kagoshima Bay. Suggest enter Bay on course close to Osumi Peninsula. 3 Light Beacons South of oil piers for ships approaching and manoeuvring. Bay Pilots not provided but Mooring Master provided for assistance to Master for berthing without charge. No VHF available for ship-shore communication.
ANCHORAGES: Anchorage area ranges in depth from 30 m. to 60 m. Holding ground in these areas only fair; recommended vessels lie to long scope of chain. Locally tide rise approximately 3 m. in springs and 1.5 m. neaps. Maximum tide currents Northerly 0.32 knots, Southerly 0.47 knots. Ample anchorage and manoeuvring area N.E. of terminal.

Since the holding ground in Kagoshima Bay is not very good, most vessels prefer to proceed to the open sea, outside the bay, if a typhoon is predicted to pass nearby.
RESTRICTIONS: Night entry and departure permitted subject to weather conditions. However, Harbour Master will not permit vessels loaded with oil cargoes to berth between sunset and sunrise.

MAX. SIZE:

Berth	*Max. LOA* (m.)	*Max. Draft* (m.)	*D.W.T.* (tons)
1	300	16.2	33,000–150,000
2	300	16.2	33,000–150,000
3	400	25.2	33,000–450,000
4	450	30.6	up to 500,000

HEALTH: Radio Pratique available. Quarantine Officers board the vessel either at the Quarantine Anchorage or at the pier, depending on availability of berth.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.
TUGS: Mooring and unmooring assistance provided by 4×3,200 h.p. tugs.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.
MEDICAL: Advance notice required if arriving at weekend.
TANKERS: (Crude oil only).

Berth No.	*Connections*	*Discharge Rate*
1	4×12 in.	10,000 k/l (loading/unloading)
2	4×12 in.	10,000 k/l (loading/unloading)
3	6×16 in.	27,600 k/l (unloading)
		12,000 k/l (loading)
4	2×16 in.	9,200 k/l (loading/unloading)
	3×24 in.	30,000 k/l (unloading)
		12,000 k/l (loading)

Berthing Procedures and Mooring: The counter current in the bay is anti-clockwise and in the berthing area runs in a S.E. to South-Southeasterly direction, parallel to the berthing face of the berths, at a rate of about 0.5 knots. As a result, vessels always berth port side to.

The normal berthing procedure is to bring the vessel to a stop at a position about 150 m. off the berth, parallel to berthing face, and then to warp her alongside with tug assistance.

Since all berths are surrounded by submersible oil booms, anchors cannot be used when close to the berths.

Berth No. 4 has been designed to permit safe berthing of a 500,000 d.w.t. tanker with a berthing velocity of 20 cm./sec., but normally the berthing velocity is less than 10 cm./sec.

The sequence of bringing out mooring lines depends on tide and wind direction, but normally spring lines first (heaving lines first) and then the other lines (direct in the launch). 2 mooring launches attend (115 h.p. and 165 h.p.)

The usual mooring configuration at Berth No. 4 is forward: 4 headlines, 3 breast lines, 3 spring lines; aft: 4 stern lines, 3 breast lines, 3 spring lines. (A total of 20 lines). During the Winter Northwesterly storm periods, it is usual to add forward and aft each one breast line and one spring line, making a total of 24 lines. At Berth No. 3 under normal conditions, 18 lines are used and in Winter, 18 lines. During the Winter Northwesterly storm periods moorings at Berth No. 3 moorings are same as Berth No. 4.

Tension winches must be set to manual operation and the brakes must be securely applied.

All mooring lines will be inspected by the terminal prior to commencing cargo operations and they have to be in good condition. Also, regular inspections of moorings are carried out during the cargo operations.
DENSITY: 1025.
FRESH WATER: Water obtainable at berth on oil piers at rate of 30 t.p.h.
FUEL: Domestic oil is available from Kagoshima and bonded oil will be lightered from Moji area, when required.
FIRE PRECAUTIONS: Very strict Safety Regulations.

Disregard of regulations will result in stopping all loading or unloading operations and the vessel being ordered off berth for appropriate action to be taken.
CONSULS: None.
REPAIRS: Available Moji, Sasebo and Nagasaki.
DRY DOCKS: None.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
REPATRIATION: Possible.
AIRPORT: Distance from airport about 2 hours by car. ANA, JAL and JAS (TDA) airlines serve daily.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police station Tel: 110; Fire brigade station is located at terminal and Ambulance available at that station.
TELEPHONE: Telephone placed on board at Terminal free of charge for inter-office communication.
SERVICES: All services available.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.
AUTHORITY: Ibusuki Doboku (Public Works) Office, 301, 12-cho, Takanohara, Ibusuki City, Kagoshima Pref. *Tel:* (09932) 2-2171.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from 1 of 3 pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours' and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position: Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse. (Vessels transitting Bungo Channel). Position: Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot Station.

3. Mesaki, at East side of Kanmon (Shimonoseki) Straits. Position: Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: Lat. 34° 03′ N., Long. 132° 51′ E. Water depth: 15 – 30 m. Anchorage located about 350 m. off beach. Holding ground good and Port faces Iyo-Nada and located Bungo Channel. Current at berth and off shore very strong. During Winter months strong N.W. wind prevails.

RESTRICTIONS: Mooring and unmooring daytime only and to be carried out on flood tide.

MAX. SIZE: 88,450 d.w.t., LOA 237 m. and Max.Draft 16.0 m.

HEALTH: Closed port. Vessels should obtain Pratique at Matsuyama and Sekisaki, also Radio Pratique available in this port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to contact Choshi and North bound to contact Nagasaki Radio respectively.

TUGS: Join vessel at sea anchorage, always using tugs line without charge. 2 to 4 tugs are required for berthing, depending on size of vessel. 3 tugs are normally used for unberthing.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

MEDICAL: No advance notice required unless urgent.

TANKERS: *Taiyo Oil Co. Terminal.* 2 tanker berths available.

Berth	*Type Cargo & diameter/Number of shore pipes*	*Discharge rate t.p.h.*
Dolphin Berth	Crude oil 24 in.×1(12 in.×2)	4,500
	Motor Gasoline 18 in.×1(12 in.×1)	1,600
	Kerosene 12 in.×1 (10 in.×1)	800
	Gas Oil 8 in.×2 (10 in.×1)	800

DENSITY: Anchorage 1015. Berth 1015.

FRESH WATER: Fresh water not available but usually brought by barge from Onomichi (about 6 hours run to Kikuma). Rate of delivery 80 tons to 200 t.p.h. dependent on barge.

FUEL: Can only be supplied by barge from Hanshin and Kanmon area, provided 5 days notice is given. All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from nearest bunker stock ports at maximum 7 days prior notice.

CONSULS: No consuls. The nearest Consulates in Kobe.

REPAIRS: Only minor repairs.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

REPATRIATION: Possible. Nearest Immigration Office situated at Matsuyama.

AIRPORT: Nearest Matsuyama, distance 50 km.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.

TELEPHONES: No facilities for placing telephones on board.

SERVICES: See "Kobe".

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

GENERAL: As this port is a closed port, the undermentioned procedures required: In conformity with regulations vessel required to obtain special permission to enter from Shikoku Maritime Bureau.

Customs request vessel call at Kikuma to obtain special permissio for entering at preceding port, by paying the charge at the same rate o tonnage dues.

Prior to arrival of a vessel, the above procedures will be undertake by Agent.

No quarantine available, the nearest quarantine station is located a Matsuyama.

No Immigration Office at this port (coming from Matsuyama).

AUTHORITY: Taiyo Oil Company Ltd., Kikuma Refinery, Tane 4070-2 Kikuma-Cho, Ochi-Gun, Ehime-Prefecture, Japan. 799-23. *Tel:* 089 54-2500. *Telex:* 584-5542. *FAX:* 0898-54-4156. *Contact:* T. Osaw Assistant Manager of Oil Handling Section.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost.

MEDICAL: No advance notice required unless urgent.

DENSITY: About 1023–1027.

FRESH WATER: Available, but only 1 water barge – capacity 75 tons. When vessels alongside Public Wharves, water can be taken from shore. Delivery rate: 75 t.p.h. but if more than 75 tons required barge returns to shore to load, therefore 1 trip takes about 3 hours.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days' prior notice.

CONSULS: None.

REPAIRS: None.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

AIRPORT: None.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: 20th July.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

TELEPHONES: No telephones available to place on board.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

DOCUMENTS:

Customs:

Required upon vessel's arrival by:
Customs Officer: Okinawa Customs Branch, Henza Sub-Branch Office.
Location: 2972 Aza Henza Yonashiro-Son, Okinawa (Tel: 09897-7-8558).

1. When ship arrives direct from foreign port, Customs Officer will board vessel for search. Following documents to be submitted.

Crew List and Passenger List.
Stores List (please prepare Stores List stating ship's stores).
Manifest of crew personal effects.
(Please prepare manifest of crew personal effects list duly signed by each).
Parcel List.
Arms and Ammunition List.
Narcotics List.
Seal List.
List of ports of call on current voyage.
Ship's Registry.
Last Port Clearance.
Bill of Lading.

Ship's Agent will prepare Inward Declaration, one Cargo Manifest, Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

2. When ship comes from Japanese port, Customs Officer will not attend on board except special case. Agent to attend Customs House for entry formalities with following documents.

Crew List and Passenger List.
Stores List.
List of ports of call on current voyage.
(Last Port Clearance and Documents entrusted with the Master by Customs at previous port).

Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Immigration:

Required upon vessel's arrival by:
Immigration: Naha Immigration Kinwan Sub-Branch Office.
Location: 2628-2 Ishikawa City, Okinawa (Tel: 09896-4-2858).

1. When ship arrives direct from foreign port, Immigration Officer will board vessel for check. Following documents to be submitted.

Crew List.	2 copies
Passenger List.	2 copies

Please collect the crew Seaman's Book in order such as No. 1, No. 2 . . . till the end as per Crew List stated.

Please collect the passports in order such as No. 1, No. 2 . . . till the end as per Passenger List stated.

Ship's Agent will prepare Inward Vessel Declaration, one application for shore pass, one application for extension of the area of movement using specific forms.

2. When ship comes from Japanese port, Immigration Officer will not attend on board, except special cases. Agent to attend Immigration Office for entry formalities with following documents.

Crew List	2 copies
Passenger List	2 copies
Seamens' Books	
Passports	

Documents (Shore Passes) entrusted with the Master by Immigration at previous port. Ship's Agent will prepare Inward Declaration, one application for Shore Pass, one application for Extension of the Area of Movement using specific forms.

APPROACHES: See "Berthing" – Report dated 1983.

PILOTAGE: Also see "Approaches".

Berthing Masters will normally board from a tug having a blue hull and cream upperworks, with a tall mast bearing a number (1, 2, 3 or 4). Since the tugs have a fairly high freeboard, pilot ladders should be rigged with the bottom step about 6 ft. (2 m.) above the water level, otherwise the lower steps may be crushed or damaged. Vessels with a freeboard exceeding 30 ft. are requested to rig the pilot ladder in conjunction with an accommodation ladder in the approved manner.

Masters of calling vessels are reminded of their obligation to comply with statutory rules and are requested to comply with International recommendations concerning pilot ladders. If the ladder is not safe, the Berthing Master may refuse to board and thus cause unnecessary delay to the ship.

ANCHORAGES: Recommended anchorages: Also see "Berthing" – Report dated 1983.

For mammoths in order of arrival:
K1: Lat. 26° 24′ 00″ N., Long. 127° 57′ 48″ E.
K2: Lat. 26° 23′ 30″ N., Long. 127° 57′ 12″ E.
KE: Lat. 26° 25′ 00″ N., Long. 127° 58′ 10″ E.
(Subject Japanese Coastguard M.S.A. approval is obtained by Agent.)

For vessels 50,000 d.w.t. – 150,000 d.w.t.
KS: Lat. 26° 23′ 06″ N., Long. 127° 56′ 43″ E.
S1: Lat. 26° 22′ 30″ N., Long. 127° 56′ 48″ E.
S2: Lat. 26° 22′ 00″ N., Long. 127° 56′ 48″ E.

Products anchorage: The area bounded by a line joining the following positions:
1. Lat. 26° 22′ 00″ N., Long. 127° 56′ 29″ E.
2. Lat. 26° 22′ 13″ N., Long. 127° 56′ 33″ E.
3. Lat. 26° 22′ 00″ N., Long. 127° 57′ 19″ E.
4. Lat. 26° 21′ 51″ N., Long. 127° 57′ 05″ E.

The holding ground is good in anchorages, but depths in the first groups between 22 and 25 fathoms; it is therefore recommended that at least 1 shackle of chain be walked back on the windlass before letting go the anchor.

Depths in the product anchorage vary between 10 and 14 fathoms.

Prohibited Anchorage: Owing to the existence of underwater pipe-lines, telephone cables and obstructions, anchoring is prohibited anywhere S.E. of a line joining the following 2 positions:
1. Lat. 26° 22′ 31″ N., Long. 127° 58′ 08″ E. (i.e. the N.E. dolphin of the Sea Island)
2. Lat. 26° 21′ 37″ N., Long. 127° 56′ 44″ E. (i.e. the N.E. dolphin of No. 3 Berth on the Products Pier)

For berthing, Masters of vessels are requested to have the propeller submerged and vessel in a reasonable trim for ship-handling purposes (not exceeding 3.5 m.).

RESTRICTIONS: Berthing operation is permitted during daylight only. Unberthing operations take place throughout 24 hours.

There are no specific restrictions on draft, but in order to ensure safe handling characteristics it is recommended that vessels arriving in ballast arrange that the propeller is fully submerged, with a stern trim not exceeding about 10 ft. Vessels which do not meet this requirement may be delayed in berthing until additional ballast has been run in.

MAX. SIZE: 5 berths are available for calling tankers. No. 1 Berth can accommodate vessels up to 500,000 d.w.t., and No. 2 Berth vessels up to 150,000 d.w.t. These 2 berths are situated at the offshore platform. Berths No. 3, No. 4, No. 5 are situated at the Product Dock. (Also see "Berthing").

Berth No.	*Max. d.w.t.*	*Least depth of water below datum*	*Remarks*
Sea Berth 1	500,000	102 ft.	
Sea Berth 2	150,000	90 ft.	
Prod. Pier 3	60,000	50 ft.	Max. dist. stern to manifold 320 ft.
Prod. Pier 4	20,000	36 ft.	
Prod. Pier 5	10,000	30 ft.	

In addition to the above tanker berths a dry-cargo berth is also available. This berth is 110 m. in length and has a least depth of 22 ft. below Okinawa Datum.

HEALTH: Quarantine Office: Naha Quarantine Office.
Location: Naha Godo Chosha Bldg., 11-1, 2-chome, Minato-Machi, Naha, Okinawa (Tel: 0988-68-1674).

At first port of call in Japan, vessel may obtain Free Pratique.

Quarantine Officer will attend vessel only from daylight to sunset, and Master to show all vaccination cards and Derat Exemption Certificate. If vessel arrives from infected area crew and passengers' health condition to be cabled to Quarantine Officer through ship's Agent prior to arrival, and close all soil pipes before entering port.

(1) *Radio Pratique:* Free Radio Pratique Telegrams to Quarantine Station not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health condition on board. When Free Pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Officer on arrival.

Maritime Declaration of Health	1 copy
Crew List and Passenger List	1 copy
Vaccination List	1 copy

(2) The following vessels will not be able to obtain Radio Pratique.

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has onboard any case, or any suspected case, of infectious disease within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO: When on route to the Kin Wan Port at Okinawa a vessel's ETA must be communicated to his Agent, 72, 48 and 24 hours prior to arrival. If VHF is not available arrival information can also be passed to your Agent by "Ship Telephone Service". Naha: 09885-4-5155.

It is important that ETAs are confirmed 12 hours before expected arrivals and amendments communicated when known.

VHF station "Kin Wan Tug" located on Henza Island keeps a 24 hour listening watch on Channel 16 (156.800 MHz) and Channel 13 (156.65 MHz). Tel: 09897-7-8341 is also manned 24 hours per day.

RADAR: The port is not equipped with radar. Poor visibility may occur in heavy rain, but fog is rare. Coastlines and buoys within the bay give good echo returns on ship's radar. All tugs are fitted with radar, and on occasions vessels have been guided into the port by them in heavy rainstorms, the tug keeping close alongside within sight of the bridge and communicating by VHF.

TUGS: 4 tugboats are stationed at the Terminal. The Berthing Master in consultation with the Master will decide the number of tugs required for each berthing operation and as stand-by tugs during the vessel's stay in port.

Vessels are berthed with the assistance of up to 4 tugs according to the vessel's size and weather conditions. Such tugs will either secure alongside, "American style", or will secure forward or aft by their towing hooks. Tugs' lines are always used. The tugs are 2×3,400 h.p. Z-peller 2×2,600 h.p. Z-peller and 2 small twin-screw tugs 400 h.p., and are manned by highly skilled crews. It should be noted that the port charges for vessels are a fixed amount based on deadweight tonnage, and the charge is not affected by the number of tugs used or not used. Masters may thus follow the Berthing Master's recommendations regarding tug requirements without having to consider what may well be dangerous economies.

READINESS: A vessel is "arrived" for Notice of Readiness purposes when the Berthing Master boards or, if vessel proceeds to anchorage without a Berthing Master, when she drops her anchor.

MEDICAL: Agents should be given advance notice of medical or dental attention required. Clinic and hospital facilities are available, and in emergencies helicopter evacuation is possible. There is also a Company ambulance on Henza Island, for emergencies only. Tel: 119. If no answer, or at night, telephone 318. Or contact C.C.D. (Central Control Desk) on VHF Channel 16 or 13 or Tel: 580.

BERTHING: In normal circumstances no lines are run out until the vessel is alongside the berth and in position. Tugs will hold her there whilst the mooring takes place, springs usually being run first, followed by breastlines, then head- and stern-lines. On the larger berths all lines except springs are lowered to the water and taken to the dolphins by line-handling boats, where they are secured to quick-release hooks. Nothing is required in the way of pennants, tails or shackles. Springs are passed direct to the dolphins by heaving-lines.

Owing to the depth of water, anchors are not normally used when berthing at the sea-berth. However, the outboard anchor should in all cases be ready for emergency use.

Weather permitting, vessels secure starboard side alongside at No. 3 Berth. At Nos. 4 and 5 vessels can only berth starboard side to the pier, owing to the construction of the berths. Therefore if wind conditions do not permit of berthing in this way, the berthing will be delayed until the wind is suitable. At the sea-berth, mammoth vessels normally berth port side to the pier, but this is only to reduce the time taken for the operation, and they can be berthed starboard side to if conditions require it. Smaller vessels are berthed either way according to requirements and conditions.

The Marine Office is equipped with a Weather Facsimile Recorder and Masters can obtain the latest information regarding possible storm conditions by contacting the Berthing Master on VHF Channel 13 or by calling 580 on the internal telephone system from the berths. When typhoons are imminent all cargo operations cease and vessels are required to vacate the berths and are recommended to proceed to sea.

Berth No. 1: Also see "Report" dated 1983 (below).
Owners: Okinawa Terminal Company Ltd.
Position: Lat. 26° 22′ 25″ N., Long. 127° 58′ 01″ E.
Depth: 30 m. (MLWS).
Max. Size: 385 m. LOA, 70 m. beam, 26 m. draft. 500,000 d.w.t.
Services: Fresh water not available.
Loading Rates: Bunkers/HFO 3,000 kl/h, product 2,000 kl/h. Crude 12,000 kl/h., Ballast 4,000 kl/h. Max. pressure 250 p.s.i.

Berth No. 2: Also see "Report" dated 1983 (below).
Owners: Okinawa Terminal Company Ltd.
Position: Lat. 26° 22′ 25″ N., Long. 127° 58′ 01″ E.
Depth: 28 m. (MLWS).
Max. Size: 305 m. LOA, 45 m. beam, 20 m. draft. 150,000 d.w.t.
Services: See Berth No. 1.
Loading Rates: See Berth No. 1.

Berth No. 3
Owners: Okinawa Sekiyu Seisei K.K.
Position: Lat. 26° 21′ 34″ N., Long. 127° 56′ 40″ E.
Depth: 15.5 m. (MLWS).
Max. Size: 240 m. LOA, 35 m. beam, 13.5 m. draft.
Services: Fuel oil (bunkers) available, 70 kl/h. 6 in. hoses used. Fr water available, but not fit for drinking.
Loading Rates: Aviation, JP4 and Naphtha, 500 kl/h × 2 low sulph FO 1,000 kl/h × 3. Fuel oil and diesel 1,000 kl/h. Max. pressure 15 k sq.cm.

Vessels normally berth starboard side to.

Berth No. 4
Owners: Okinawa Sekiyu Seisei K.K.
Position: Lat. 26° 21′ 29″ N., Long. 127° 56′ 48″ E.
Depth: 11.5 m. (MLWS).
Max. Size: 175 m. LOA, 22 m. beam, 10 m. draft limiting condition 90 m. stern to manifold.
Services: Fuel oil available, rate 70 kl/h. Chicksan used. Fresh water available, but not fit for drinking.
Loading Rates: Aviation, JP4, JP1, kerosene 500 kl/h × 2. Low sulphur F.O. 600 kl/h. diesel 1,000 kl/h, fuel oil "A" 1,000 kl/h. Maximum pressure 15 kg./sq.cm.
Vessels berth starboard side to.

Berth No. 5
Owners: Okinawa Sekiyu Seisei K.K.
Position: Lat. 26° 21′ 28″ N., Long. 127° 56′ 58″ E.
Depth: 10 m. (MLWS).
Max. Size: 110 m. LOA, 17 m. beam, 8.5 m. draft limiting condition 10,000 d.w.t.
Services: Fuel oil, 6 in. hose, 70 kl/h diesel, 6 in. hose, 700 kl/h. Fresh water available, but not fit for drinking.
Loading Rates: JP4, JP1, kerosene, diesel and fuel oil "A" 700 kl/h. Max. pressure 20 kg./sq.cm. sulphur, 120 kl/h, max. pressure 15 kg./sq.cm. low sulphur fuel, 600 kl/h max. pressure 20 kg./sq.cm. LPG 200 kl/h max. pressure 27 kg./sq.cm.
Vessels berth port side to.

Operator's Report: 1983.
Okinawa Terminal Co. Ltd. (OTC) Sea Berth (Discharging and loading terminal): Operated by OTC.

Terminal operates 24 hours per day, 7 days a week. Ships moored and unmoored at anytime, weather or other circumstances permitting. Terminal will not be closed on any holidays.

Location: Lat. 26° 22′ 25″ N., Long. 127° 58′ 01″ E.
Pilotage: Compulsory.
Anchorage: (See "Plan") Anchorages are in the following positions. Approval of The Captain of the Port of Kim-Nakagusuku must be obtained through Agent prior to arrival
K1: Within a radius 700 m. Lat. 26° 24′ 00″ N., Long. 127° 57′ 48″ E. For vessels of 100,000 g.r.t. or over.
K2: Within a radius 700 m. Lat. 26° 23′ 30″ N., Long. 127° 57′ 12″ E. For vessels of 100,000 g.r.t. or over.
KE: Within a radius 700 m. Lat. 26° 25′ 00″ N., Long. 127° 58′ 10″ E. For vessels of 100,000 g.r.t. or over.
KW: Within a radius 700 m. Lat. 26° 25′ 12″ N., Long. 127° 55′ 24″ E. For vessels of 100,000 g.r.t. or over.
KS: Within a radius 600 m. Lat. 26° 23′ 06″ N., Long. 127° 56′ 43″ E. For vessels of maximum 100,000 g.r.t.
S1: Within a radius 400 m. Lat. 26° 22′ 30″ N., Long. 127° 56′ 48″ E. For vessels of maximum 10,000 g.r.t.
S2: Within a radius 400 m. Lat. 26° 22′ 00″ N., Long. 127° 56′ 48″ E. For vessels of maximum 10,000 g.r.t.

Approaches: For the purpose of Traffic Separation and Control, the approach to Kin Bay is divided by a channel centre line joining the following positions. Lat. 26° 26′ 00″ N., Long. 128° 02′ 00″ E. and Lat. 26° 24′ 47″ N., Long. 127° 59′ 26″ E.

Vessel should make for position Lat. 26° 26′ 00″ N., Long. 128° 04′ 00″ E. off the East coast of Okinawa and from there steer to the West, passing Menguisho light beacon abeam to port at a distant of about 1.25 miles. The Berthing Master will board VLCC's (150,000 d.w.t. or over) or any ship which is on a first visit to the port.

When vessels are abeam of the beacon (but if circumstances should prevent this, the ship should continue on the Western course for one mile past the beacon) alter course to 242°, after about 1.4 miles on this new course the ship will be at the inner pilot boarding area.

Berthing:
Maximum rate 4,000 kl/h
West side of sea berth (No. 1 berth)
Max. size 500,000 d.w.t., Max. draft 26.0 m.
East side of sea berth (No. 2 berth)
Max. size 150,000 d.w.t., Max. draft 20.0 m.

Ballast: Disposal of dirty ballast water over the side is strictly prohibited by the Authorities and any pollution of the sea will result in heavy claims and fines.

No ballast is to be taken from the bay unless required for the ship's segregated clean ballast system. Ballast for cargo tanks will be supplied by the terminal.

LOADING: Loading lines at the berths are as follows: *(Note:* Hoses are listed from N.E. to S.W.)

Berth No.	*Dia. (in.)*	*To handle*	*Type*
1	16	Products	Chicksan arm with Q/C
	16	Crude/HFO	Chicksan arm with Q/C
	16	Crude/ballast	Chicksan arm with Q/C
	16	Crude/ballast	Chicksan arm with Q/C
	16	Crude	Chicksan arm with Q/C
	16	Ballast	Chicksan arm with Q/C
2	16	Product	Chicksan arm with Q/C
	16	Crude/HFO	Chicksan arm with Q/C
	16	Crude/ballast	Chicksan arm with Q/C
	16	Crude/ballast	Chicksan arm with Q/C
	16	Crude	Chicksan arm with Q/C
3	4	Bunkers (DO, FO)	Flexible hose
	10	Ballast	Mechanical arm
	10	Naphtha/JP4/kero.	Mechanical arm
	10	Naphtha/JP4/kero.	Mechanical arm
	12	Ballast/LSFO	Mechanical arm
	12	Low sulphur fuel	Mechanical arm
	12	Low sulphur fuel	Mechanical arm
	6	Bunkers (DO, FO)	Flexible hose
4	10	Ballast	Mechanical arm
	10	JP4, Jet A1, kero., naph.	Mechanical arm
	10	JP4, Jet A1, kero., naph.	Mechanical arm
	10	Automotive or marine diesel	Mechanical arm
	10	Low Sulphur (FO)	
	6	Bunkers (DO, FO)	Flexible hose
5	6	Auto/marine diesel, kero.	Flexible hose
	4	LPG vapour return	Flexible hose
	6	LPG/propane/butane	Flexible hose
	6	Liquid sulphur	Mechanical arm
	6	Bunkers (FO, DO)	Flexible hose

During cargo transfer or ballast operation all vessels shall show signal flag "B" during the day, and a red light during the night.

Transfer operation shall not be started, or if started shall be discontinued by either the duty officer of the vessel or the Terminal supervisor, when any of the following conditions come to his attention:
(a) During severe electrical storms.
(b) If a fire occurs on the pier or on the vessel.
(c) If there is not sufficient competent personnel aboard the vessel or on the pier to safely handle cargo operation in progress.
(d) Should any condition develop which represents a hazard to the vessel or Terminal installation.

DENSITY: The bay is open to the sea, and normal density is 1025.

FRESH WATER: Available at Berth Nos. 3, 4 & 5, but not fit for drinking.

FUEL: All grades of bunkers are available at Nos. 3, 4 and 5.

FIRE PRECAUTIONS: Smoking and use of naked lights is strictly prohibited on board vessels alongside the berths, except in those enclosed spaces aboard ship specifically designated by the Master as "Smoking Areas".

Fire wires of steel must be hanging over the side of the offside bow and quarter whilst alongside to enable tugs to connect readily in an emergency situation. The towing eyes should be maintained at water level.

Boiler tubes must not be blown whilst vessel is alongside and every precaution must be taken to prevent sparks and soot particles escaping from the funnel.

Mooring of boats or craft with mechanical propulsion alongside a vessel loading/discharging crude oil or in the process of ballasting, is not allowed, unless special permission has been given by the Terminal.

In case of a fire aboard a vessel alongside the pier the following sequence of procedure should be adhered to:
(a) "Kin Wan Tug" to be informed immediately.
(b) All cargo operations to cease forthwith.
(c) MOV's and gate valves on loading arms, nitrogen and battery limit valves to be closed as soon as possible.
(d) Dock personnel to stand-by for disconnecting loading arms, unberthing or fire-fighting in accordance with instructions issued by the Berthing Master or "Kin Wan Tug".

During an emergency situation on board a vessel alongside, the Berthing Master will be in charge of organising the preliminary fire-fighting assisted by "Kin Wan Tug". He is to make use of all available means at his disposal, such as tugboats, launches, personnel, terminal equipment and other facilities to assist the vessel and protect lives and Terminal installations. Should the Berthing Master be unavailable or unable to communicate, "Kin Wan Tug" will direct the preliminary fire-fighting.

Kin Bay area comes under the jurisdiction of the 11th District of the Japanese Coast Guard and lies in Kin Nakagusuku Port. The telephone number of the Captain of the Port-Coast Guard Offices, 11th District is 098895-4874 or 5439.

CONSULS: At present the only Consulates on Okinawa are those of U.S.A., Korea and Philippines.

REPAIRS: Only minor repair facilities are available in Kin Wan, for such small components as can be sent ashore, e.g. repairing of valves or piping, re-winding of electric motors.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Shore gangways are fitted at Nos. 1, 2 and 3, and are supplied free of charge. Ship's gangways must be provided at Nos. 4 and 5. Watchmen are not required since access to the berths is controlled by the Company's security guards at the installation gates.

REPATRIATION: Crew changes and/or repatriation can be arranged by the Agent.

AIRPORT: Kin Wan Port is about 2 hours by car from Naha Airport (depending on traffic conditions) from where there are frequent services by several major airlines to all parts of the world via Tokyo, Honolulu, Taipei or Hong Kong.

TIME: Local time is 9 hours ahead of GMT, unchanged throughout the year.

HOLIDAYS: Local holidays do not normally affect operations in the port. Bank Holidays are now basically the same as those in other Japanese ports.

POLICE/AMBULANCE/FIRE: Ambulance 119 after hours or 580 (C.C.D.) or VHF 16; Fire 119 after hours or 580 (C.C.D.) or VHF 16; Police inform C.C.D. by VHF Ch. 16 or Tel: 580, or Berthing Master Tel: 578.

TELEPHONES: Telephones are not placed on board, but for urgent ship's business arrangements can be made for calls to be placed through the Company switchboard.

SERVICES: Tank-cleaning alongside is prohibited, but facilities for discharge of tank washings are available. See "Pollution Control".

SHORE LEAVE: For reason of safety the Terminal and the Off-Shore Platform are restricted areas. However, ship's personnel and visitors to ships are permitted to disembark and embark via the dolphins, which are also the personnel landing areas. Loitering at the loading platform will not be permitted.

Unauthorised or apparently intoxicated or disorderly persons shall be prohibited from entering the pier and the Terminal.

Shore passes will be issued by the Agent. These passes must be surrendered to the Agent prior to the ship's departure, unless the vessel is bound for another port in Japan when they can, after stamping, be used in the second port. The pass is sufficient, and no other means of identification need be carried when ashore.

POLLUTION CONTROL: Gas-freeing is not allowed on tankships alongside the pier.

To minimise the chances of pollution *all* ballast, whether clean or dirty, *must* be discharged ashore, except that which is contained in independent "permanent" ballast tanks. Also all ballast loaded into cargo tanks must be taken from ashore, and not from the Bay. The shore ballast tank has a capacity of 550,000 barrels and is connected to all tanker berths.

Caution: The sea berth is surrounded by a new type of sink/float oil fence to contain any oil that may be spilled on the sea. This fence is moored in place by 36 anchors and ropes. Vessels are therefore warned against approaching this fence or using any anchors in the vicinity of the sea berth. Nor should they throw overboard any old wires, ropes or other rubbish which may foul or damage the fence or its moorings.

The Terminal will, in case of an oil spill, take such steps as may be deemed necessary to fight the pollution before it spreads. If the spill is due to faulty equipment or materials on the vessel or to negligency on the part of ship's personnel, the Terminal shall be indemnified for any expenses incurred in connection with the preventive action taken.

No ballast is to be taken from the Bay unless required for the ship's clean permanent ballast system. Ballast for cargo tanks will be supplied by the Terminal.

AUTHORITY: Okinawa Prefectural Government, 1-2-32, Izumisaki, Naha, Japan 900. *Contact:* Nobuo Oshiro, Chief of Port Division.

AGENT: Kin Wan Port Service Co. Ltd., 6483 Aza-Heianza Yonashiro-Son, Okinawa, Japan. Tel: 09897-7-8226, 8341. Cable: Kinwan Port Koza, Okinawa.

KISARAZU (Kimitsu): 35.22 N. 139.52 E. (See Plan)

PORT LIMITS: Refer to Marine Chart No. 1067. Published by Surveys of the Hydrographic Department M.S.A., Japan.

DOCUMENTS: Arrival

Quarantine Service:
Maritime Declaration of Health – WHO Form, 1 copy.
Crew List – free form, 1 copy.
Passenger List (if any) – free form, 1 copy.
Vaccination Certificate (cholera), presentation.
Derat (Exemption) Certificate, presentation.
List of valid terms of Crew's Vaccination Certificate, presentation.

Immigration Service:
Crew List – free form, 1 copy.
Passenger List (if any), – free form, 1 copy.
Seamen's Ledger, presentation.
Passport or Seamen's Book (all of them), presentation.

Customs Inspection:
Ship's Register, presentation.
Last Port Clearance, presentation.
Crew List – free form, 1 or 2 copies.
Passenger List (if any) – free form, 1 copy.
Store List (Japanese Customs form required).
Declaration of Crew's Baggage, (Japanese Customs Form required) i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan.)
List of ports of call including last foreign port.

Ship's Agent will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: *Berthing Pilot:* Compulsory for foreign trade vessels over 10,000 g.w.t. Application to be made to Yokohama Pilot Office, via local Agent. Pilot boards on Kisarazu Quarantine Station or entrance of approaching passage. Available during daytime only.

Bay Pilot: Uraga & Nakanose on entering: Bay Pilot became compulsory in January 1977 for foreign trade vessels over 10,000 g.w.t. Application required 24 hours prior to entering by Cable to Anjin Yokosuku through Agent or direct. Pilot boarding position located on point 5.0 miles and 161° from Kannon Zaki L.H. Available any time, if any delay, change must be cabled to Anjin Yokosuka.

On leaving: Application same as on Entering. Pilot boarding on pier or off harbour.

ANCHORAGE: Refer to Japanese Chart No. 1062 (middle part of Tokyo Bay). Kisarazu Quarantine Anchorage boundary.

RESTRICTIONS: See "General".

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port. A vessel may be berthed without a stay at the anchorage if Radio Pratique system used and permission of Chief of Quarantine Office. If Pratique formalities carried out locally vessel anchors 1.5 miles off No. 1 Entrance Buoy in position: Lat. 35° 21′ 54″ N., Long. 139° 50′ 35″ E.

RADIO: Recommended Master communicates with Agent throug Choshi Radio or Nagasaki Radio which cover all ports in Japan. I specifically Westbound vessel, to contact Choshi, and Northbound t contact Nagasaki Radio respectively.

VHF: Port Radio Station at Yokohama works 24 hours. Channel 16. Ca sign "Yokohama Port Radio".

RADAR: Radar station at Kannonzaki which controls all vessels in Uraga Channel.

TUGS:

2 tug boats belonging to Kimitsu tug boat station.

3,200 h.p.	2 tugs

Another 16 tug boats listed belonging to Yokohama tug boat station.

2,000 h.p. – 2,500 h.p.	4 tugs
2,500 h.p. – 3,000 h.p.	8 tugs
3,000 h.p. – 3,500 h.p.	4 tugs

Tug boat's lines used free of charge.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by VHF.

Public: Kisarazu Quay E. Max. draft 7.5 m. at high tide. Length 260 m. Capacity 5,000 d.w.t.

Private: Kisarazu Lumber Association dolphin pier. Max. draft 10.0 m. Length 250 m. Capacity 15,000 d.w.t.

Kimitsu Works of Nippon Steel Corporation.

Centre Pier:

No. 1–4	Coastal chemical tanker, tug boat basin.
No. 5	Coastal Raw material discharging berth.
No. 6	Discharging berth of iron ore and coal. Max. draft 16.0 m. at high tide. Length of berth 304 m. Capacity 150,000 d.w.t. or 270,000 d.w.t. (Part load). Dischage rate for coal 25,000 tonnes per day.
No. 7	Discharging berth of iron ore and coal. Max. draft 18 m. a high tide. Length of berth 350 m. Capacity 200,000 d.w.t. Discharge rate for ore 30,000 tonnes per day.
No. 8	Discharging berth of iron ore and coal. Max. draft 18 m. a high tide. Length of berth 422 m. Capacity 270,000 d.w.t. Discharge rate for ore 30,000 tonnes per day.
No. 10	Coastal Limestone carrier berth.
No. 11, 12	Coastal tanker berth.

Centre Pier unloader at No. 6 & 7 – 4 units each capacity 1,500 t.p.h.
Centre Pier unloader at No. 8 – 1 unit capacity 2,500 t.p.h.

West Pier:

No. 1–6	Coastal small ships only.
No. 7	Loading berth of steel products. Max. draft 11 m. Length of berth 250 m. Capacity 30,000 d.w.t. Shore crane 1 unit 20 tons, 1 unit 30 tons.
No. 8	Loading berth of steel products. Max. draft 11 m. Length of berth 250 m. Capacity 30,000 d.w.t. Shore crane 1 unit 30 tons, 1 unit 20 tons.
No. 9	Loading berth of steel products. Max. draft 11 m. Length of berth 285 m. Capacity 30,000 d.w.t. Shore crane 1 unit 30 tons, 1 unit 35 tons.
No. 10	Loading berth of steel products. Max. draft 11 m. Length of berth 230 m. Capacity 40,000 d.w.t. Shore crane 2 units each 30 tons.

East Pier:

No. 2	Loading berth of steel pipes. Max. draft 11 m. Length of berth 240 m. Capacity 30,000 d.w.t. Shore crane 3 units on No. 2 & No. 3 berth 30 ton.
No. 3	Loading berth of steel pipes. Max. draft 11 m. Length of berth 240 m. Capacity 30,000 d.w.t. (See No. 2 Berth).
No. 4–13	Coastal ships only used for loading wire rod, angle bar, etc. and discharging materials.

CRANES: See "Berthing".

BULK CARGO FACILITIES: See "Berthing".

SPECIALISED CARGO-HANDLING FACILITIES: See "Berthing".

BRIDGES: None.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing stevedores will do same for ship's crew at additional cost.

Average loading rates:	Coils 75 t.p.h.
	Plates 50–60 t.p.h.
	Pipes 40 t.p.h.
	Angle 40 t.p.h.
	Wire rods 15–25 t.p.h.
Average discharging rates:	Coal 700 t.p.h.
	Iron ore 750–800 t.p.h. 1,500–1,600 t.p.h. (2,500 ton unloader)
	Manganese ore 600 t.p.h.
	Iron sand 900 t.p.h.
	Coke 700 t.p.h.

MEDICAL: No advance notice required unless urgent.

TANKERS: Only coastal tankers.

DENSITY: Summer 1020, Winter 1025·5.

FRESH WATER: Available from shore line. Rate of delivery 40-50 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay. Bunkers will be lightered from the nearest bunker stock ports (Yokohama and Chiba) at maximum 7 days' prior notice.

CONSULS: None.

REPAIRS: Minor repairs only.

DRY DOCKS: 500,000 d.w.t. dry dock at Chiba.

SURVEYORS: Nippon K.K.K., Kimitsu Branch.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

PENING/CLOSING HATCHES: Stevedores carry out opening and osing hatches except steel hatches. If any time lost by ship's crew oing this work, stevedores charge ship for waiting. Recommend request evedores for this work unless crew can complete it before berthing.
ARGO GEAR: Usually load/unload by shore cranes.
ERTIFICATES: Ship's Register to show Customs Inspector ship's gistered gross and nett tonnages. Valid Cargo Gear Certificates metimes required by stevedores when cargo gear's maintenance ppears to be poor.
USTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore ut no spirits.
EPATRIATION: Possible.
IRPORT: Narita (Tokyo) International Airport is about 2 hours by car r railway.
IME: GMT plus 9 hours. No alterations made to clocks during year.
OLIDAYS: No cargo loaded on January 1st. Cargo discharged on all olidays.
OLICE/AMBULANCE/FIRE: Kisarazu Police Station tel. 0438-23-011; Kisarazu Fire Brigade and Fire Station tel. 0438-23-7121.
ELEPHONES: No telephones installation direct to vessels alongside harf.
ERVICES: Provisions, laundry, ship's stores, garbage, hold cleaning, avigation aids. Special service are called from Chiba, Yokohama and Tokyo.
HORE LEAVE: Local Immigration Offices issue shore pass valid for nly 3 days, but 3 days' extension possible if ship stays longer.
DENTIFICATION CARDS: Shore Pass and Seaman's Book required.

REGULATIONS: See "General".
GENERAL: Notification to Maritime Safety Agency:

According to Maritime Traffic Safety Law, The Master of large vessel (over 200 m. in LOA and 10,000 g.w.t.) is required to give to Regional Maritime Safety Agency an advance report of estimated time passing the traffic route and other matters and also required to obey the instruction given by the Agencies.

Notification cable definitely to be given by 1200 hrs. (JST) on the day prior to entering, directly from Master or through local Agent. Any change in reported matters, to be reported 3 hours before the time of entering by radio communication or telephone.

Seaweed cultivation to be carried out in the vicinity of Nippon Steel Corporation Kimitsu Works so Master's co-operation with regards to the following items would be appreciated.

1. The discharge of oil or oily waste into the water is strictly prohibited by Marine Pollution Law and other related ordinance.
2. Proceeding to the cultivation area is prohibited.
3. Numerous buoys each exhibiting flashing yellow lights have been established to mark the outer side-line of the seaweed cultivation area.
4. Bunkering possible daytime only (sunrise to 1 hour before sunset) in the Port of Kimitsu.

AUTHORITY: Kisarazu Port Administration Office, 3-13-34, Kaifuti 3-chome, Kisarazu City, Chiba Pref. 292. *Tel:* (0438) 25-5141.
AGENT: Sub-agents of Dodwell & Co. Ltd. Toyko. Chiba Kaiun Sangyo Co. Ltd., Kimitsu Office, c/o Kaiun Centre Kimitsu Works of Nippon Steel Corporation, No. 1, Kimitsu, Kimitsu-shi, Chiba-ken. Tel: Kimitsu (04395) 2-0800. Cable Address: Chibamarine Kisarazu.

OBE: 34.40 N. 135.12 E. (See Plan)

OCUMENTS:
Ship's Register.
Last Port Clearance.
1 Stores List.
1 Declaration of Crew's Baggage.
4 Crew Lists.
4 Passenger Lists (if any).

Ship's Agents will prepare other documents such as Inward/Outward Declaration, Cargo Manifest, etc., using Japanese Custom's Forms.
PILOTAGE: *Tomogashima Channel Pilot (not compulsory but recommended):* Pilot boards 5 – 7 miles South of Tomogashima (approximately Lat. 34° 10′ N., Long. 135° 00′ E.). Cable address: "Baypilot Kobe". If Bay Pilot is required, inform them 24 hours prior to vessel's arrival at Tomogashima Pilot Station.
Harbour Pilot: Pilot boards at Quarantine Anchorage at Wada-Misaki Point. Cable address: "Pilot Kobe". 24 hours' prior notice is required. When vessel moors to buoy, chain cable should be prepared.
ANCHORAGES: Quarantine Anchorage: Lat. 34° 38′ N.; 34° 38.6′ N. Long. 135° 10′ E.; 135° 11′ E.

All vessels requiring anchorage for awaiting berth, repairs, bunkering, etc., must obtain anchoring position from Harbour Master.
RESTRICTIONS: Quarantine officials are available during daylight hours. Berthing is not permitted after 2130 hrs.
MAX. SIZE:

Name of Berth	*Max. LOA (m.)*	*Max. Safe Draft (m.)*	*Depth at Berth (m.)*
Showa Sangyo	213	10.35	12.60
Tomen Silo	223	10.35	12.40
Zenno Silo	223	10.35	12.20
Kohnan Silo	245	10.71	12.20
Hanshin Silo	210	10.26	11.60

Also see "Tankers".

HEALTH: Quarantine Officials board vessel from daylight to sunset at Quarantine Anchorage.

Radio Pratique is available. Vessels must be in possession of a valid Japanese Sanitary Inspection Certificate.
Documents Required: Derat Exemption Certificate, Crew List, Passenger List, Maritime Declaration of Health and Vaccination Cards.
RADIO: Recommend Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi, and Northbound to contact Nagasaki Radios respectively.
Kobe-Radio details:

	Security and Port message	*Port message*	*Public message*
Call sign	JGD	Kobe Port Radio	JCK
Name of Station	Coast Station or Special Service Station	Kobe Port Radio	Kobe Radio
Station Owner	5th Regional Maritime Safety Headquarters	Kobe Municipality (its Port & Telegraph Harbour Bureau)	Kobe Central Office
Frequency	444 kHz. 500 kHz. 500 kHz. 512 kHz.	International VHF Channels 16, 12, 11, 18, 20. 24-hour service.	134.9 kHz. 143 kHz. 416.5 kHz. 487.5 kHz. 500 kHz. 512 kHz. 425 kHz.
	International VHF Channels 12, 16		

TUGS: Join vessel at entrance of fairway. Tug's lines used without extra charge. 40 tugs available.
BERTHING: Chains must be used in mooring to a buoy. Ship must not drop anchor near a buoy when it is moored to one. Ship brought head in alongside pier except in special cases. Some berths impossible to reach after sunset,i.e. dolphin berths. This is why ships need to arrive outside breakwater before sunset.

BULK HANDLING FACILITIES: Hanshin Silo Company Berth, 11.60 m. depth alongside available for vessels up to 50,000 tons d.w.t. Discharge effected by 2 pneumatic unloaders with capacity 400 t.p.h. per unit.

Kobe Silo Berth, length 752 ft., depth alongside 41 ft. 2 mobile discharging units each with capacity of 500 t.p.h.

Kohan Silo Berth, length 214 m., depth alongside 12.2 m. equipped with 2 discharging units which can be used for grain, sugar, or general cargo, also 1 pnuematic unloader, with capacity 1,500 t.p.h. per unit.

Kobe Steel, Berth No. 3: Length 334 m., depth 13.0 m., max. LOA 300 m., beam 40.0 m., draft 12.5 m. 2 cranes available for coal and ore. Discharge rate 1,400 tonnes/p.h.

In the current development programme a total of 7 container berths are to be provided at Kobe.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores.

MEDICAL: No advance notice required unless urgent. Hospital facilities available.

TANKERS:

The Port Island receives bunker oil from tankers into the terminal and delivers Intermediate 15 and MDO by pipe-line to vessels moored at Kobe Port Island. This berth is equipped with loading arms and utilises a boom completely surrounding the discharging tanker to prevent the spread of any oil spill.

Storage facilities consist of 3 tanks of 36,000 kl (226 mb) for Intermediate 15 and 2 tanks of 5,000 kl (31 mb) for MDO.

Pumping facilities consist of 3 pumps of 700 kl/hour (4,400 b.p.h.) capacity for Intermediate 15 and 2 pumps of 200 kl/hour (1,258 b.p.h.) capacity for MDO.

Special features include an automatic control system from a central control board, remote valve operation, remote tank gauges, communication equipment at each bunkering berth, flow meters for all deliveries, a chemical fire engine, a crane and a lorry for recovery of waste oil.

The terminal is open between 0900 and 1700 hrs. and availability at other times involves overtime.

Name of Berth	Max. d.w.t. (approx.)	Max. LOA (m.)	Max. safe Draft (m.)	Mooring–Pipeline–discharging rate
Shell. Bunkers ex-barge only. No slop discharge facilities.	70,000	250	12.6	To 4 buoys. 1×24", 1×12" for F.O., D.O. Minas/Seria Waxy Residue. Average discharge rate (1 Pipe) 1,000 t.p.h. Max. (2 Pipe) 3,000 t.p.h. (mooring possible when tide runs towards West)
MKS. Bunkers ex-barge only.	40,000	234 (breadth 33)	11.20	To 3 buoys. 2×16" for F.O. and D.O. Average discharge rate 1,000 t.p.h. Max. 1,300 t.p.h. mooring possible when tide runs towards West)
Mitsubishi Shoji (for L.P.G.tankers). Bunkers available ex-wharf; ex-barge at anchorage. No slop discharge faciiities. Also see "Shipmasters Report".	45,000	240 m.	10.35 m.	Alongside Pier. 2×12" for F.O. and 1×12" for D.O. Average discharge 800 t.p.h. per pipe. Max. 2,000 t.p.h.
Port Island Oil Berth	70,000	240 m.	10.98 m.	2×16" for Fuel oil. Average discharge rate 2,000 t.p.h. Max. 3,500 t.p.h.

MKS Buoy Berth (Noda Terminal): When approaching the berth, the vessel heads straight for the middle of the berth, taking into account the direction and velocity of the tidal stream. Vessels can berth either heading East or West, depending on the direction of the tidal stream, and always use only 3 of the 4 buoys and 2 bow anchors. When heading East the manoeuvre is as follows: When the bow approaches the line connecting the 2 Southerly buoys, drop starboard anchor, swing to starboard paying out about 8 or 9 shackles. When the vessel is about half its length past the 2 Easterly buoys, drop port anchor. Then work vessel astern, paying out port chain and heave in starboard chain to about 4 shackles. Send ropes to 3 buoys, 2 or 3 ship ropes to each buoy, depending on weather and then secure the 40 mm. preventer wires. In this case the Southeasterly buoy is not used. 2 or 3 tugs attend. When heading West, the manoeuvre is similar, but first drop anchor, swing over to port, drop starboard anchor. In this case the Southeasterly buoy is not used. Normally 2 mooring launches are used.

TIDE: Mean height of tide 1.030 m. Some of tanker berths in West part of port affected by tide. Currents less than 1 knot inside harbour.

DENSITY: Winter: 1023 – 1026. Summer: 1018 – 1022.

FRESH WATER: Supplied from the quays at rates of 40 to 50 cu.m./hr. Three water barges available, largest with capacity 325 cu.m., can supply vessels at rates up to 300 cu.m./hr.

Possible to supply fresh water at anchorage weather permitting. 24 hours' prior notice is required.

FUEL: All grades are obtainable from major oil companies and supplied by barge.

FIRE PRECAUTIONS: LPG tankers instructed by Maritime Safety Headquarters to strictly observe safety rules. Example: checking on what is carried by those who go aboard; banning ship's stores to be loaded on to ship which is working.

CONSULS: The following countries are represented by Consuls in Kobe and Osaka area:

Argentina
Australia
Austria
Belgium
Bolivia
Brazil

(Number of docks in Kobe)

Kobe Dockyard Engine Works Co. Ltd.	3 floating docks
Ishihara Shipyard Co. Ltd.	1 floating dock
Arata Dockyard & Engine Works Co. Ltd.	1 floating dock
Shikase Dockyard Ltd	1 floating dock
Mitsubishi Heavy Industries Ltd.	3 floating docks 1 dry dock
Kawasaki Heavy Industries Ltd.	2 floating docks 2 dry docks

SURVEYORS: Lloyd's Register, Germanischer Lloyd, American Bureau of Shipping, Bureau Veritas, Norske Veritas, Nippon Kaiji Kyokai.

WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: By Stevedores or crew, ship's option.

CERTIFICATES: Ship's Register to show Customs Inspector for registered gross and nett tonnage. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Tobacco (per passenger or crew member). Temporary shore-leave up to 50 cigarettes (duty free); Disembarkation up to 200 cigarettes (duty free). Maximum allowable (only in case of disembarkation) up to 800 cigarettes duty free (however, 600 cigarettes – taxable).

Wines and/or Spirits: Crew member: When the ship at sea for more than 1 month, up to 6 bottles (1 bottle – duty free); less than 1 month up to 6 bottles (no duty free). Passengers: When a passenger travels for less than a fortnight up to 12 bottles (1 bottle – duty free); more than a fortnight up to 12 bottles (up to 3 bottles – duty free).

REPATRIATION: Possible.

AIRPORT: Osaka International Airport. Distance from Airport about 1 hour by car.

Domestic: Following regular airlines, Japan Air Lines, All Nippon Air Lines, Nihon Kokunai Koku, Toa Koku.

International: For Far East: Japan Air Lines 31 flights per a week, Thai International Air Lines 10 flights per a week, Cathay Pacific Air Lines 8 flights per a week, China Air Lines 11 flights per a week, Korean Air Lines 12 flights per a week, North-West Air Lines 7 flights per a week.

For Europe: Lufthansa 1 flight per week, British Airways 3 flights per week, Air France 2 flights per week.

For United States: Japan Air Lines 12 flights per week, Pan American 3 flights per week.

TIME: GMT plus 9 hours. No alteration to clocks throughout year.

HOLIDAYS: 1st January (New Year's Day); 15th January (Coming-of-Age Day); 11th February (National Founding Day); 21st March (Spring Equinox Day); 29th April (The Emperor's Birthday); 3rd May (The Constitution Day); 5th May (Children's Day); 15th September (Respec for the Aged Day); 23rd September (Autumn Equinox Day); 10th October (Health Sports Day); 3rd November (Culture Day); 23rd November (Labour Thanksgiving Day).

POLICE/AMBULANCE/FIRE: *Police:* 110; Water Police Station tel. 331–2351, 331–2354, Ikuta Police Station 331–0044, Fukiai Police Station 231–4441, Hyogo Police Station 551–0051.

Ambulance: 119.

Fire: 119; Water Fire Department 331–9951, Fukiai Fire Department 291–0401.

TELEPHONES: Possible to place telephone on board.

SERVICES: Compass adjusting, radio/radar services, etc.

SHORE LEAVE: Crew members free to go ashore with landing passes issued by Immigration Authorities.

DELAYS: 1. Weather condition (where strong wind prevents ships entering port). 2. Tide (berths in West part of port). 3. Berths where no ships permitted berth alongside at night. 4. Where a quarantine officer or Pilot being awaited. 5. Shortage of gangs, weather.

GENERAL: When typhoon approaching, Port Captain requires ships to proceed outside breakwater.

DEVELOPMENTS: 5 additional berths, each 350 m. length and depth 15 m. are planned for the Port Island in 1996.

2 additional berths (RC – 6 and RC – 7) under construction at Rokko Island.

3 additional berths, each 300 m. LOA and depth 12 m. planned for Maya Piers.

SHIPMASTER'S REPORT: February 1980.

Sakai to Kobe:

Transit: For LPG ships this can only be accomplished in daylight.

Pilots: In normal conditions Sakai Pilot will depart at about No.5 buoys Hamadera Passage and vessel proceed to Kobe No.6 Breakwater embarking Pilot at No.3 Buoy. In weather with poor visibility take 'Bay' Pilot, no movements with visibility less than 1 mile.

Kobe:

Pilot: For vessels proceeding to Mitsubishi Storage Terminal, Pilot is embarked at No.3 Buoy and leaves at same.

Anchorage: Outside Kobe Breakwaters in areas marked on Japanese Chart. We anchored in Lima 3 area, very congested.

Best to obtain up to date Japanese Hydrographic Office Charts of Kobe and Osaka Bay as frequent changes, also BA. charts do not have incidentals like anchorage areas, Tomogashima traffic routes, lava beds, etc.

VHF: Kobe Port Radio.

N.O.R.: 1st Line ashore.

Tugs: Two powerful tugs join vessel just inside No.7 Breakwater. Cost of one tug Yen 48,000 per hour.

Terminal:

Moorings: 3,2,2, each end, Line boat available.

Tanker type jetty with mooring dolphins each end connected by catwalks.

Berth situated West end of No.2 Industrial area.

Port side to.

Gangway can be difficult to land on narrow catwalk.

No transport near ship, about 5 minutes walk to gate.

Depth: 12.50 m.

Connections: Chicksans: 12 in. liquid, 8 in. vapour return. The forward vapour return line has a right angle elbow in it. Connection and disconnection by shore personnel, can take 1.5 to 2 hours.

Quite often a vapour mixture is returned to the vessel if discharging two grades, generally acceptable if propane and butane.

Max. Rate: About 700 tonnes/p.h. both grades.

Surveyor: NKKK in attendance.

Microbus: We hired microbus for 20 persons on contract hire for 9 hours at Yen 70,000 – about £125. Easy to arrange through Agent.

Doctor: Obtainable, about £40 per visit.

Fresh Water: From the pier through Mitsubishi – will only give what Master has ordered. At 20 t.p.h. Difficult to connect American couplings. Yen 500 per tonne.

Stores: Nil on berth.

Facilities: All repairs off berth.

Walport Film and Video exchange through Agent.

Safety: Normal requirements plus fire axes each end at moorings.

General: As usual the shore line is continually changing and care is required in taking positions.

BA. 2265: Kobe Ko. New breakwater marked by temporary light buoys from Breakwater No. 6 in position 34° 39.99′ N., 135° 14.86′ E. to 34° 39.63′ N., 135° 15.19′ E. in direction 324° – 144° for 830 m.

BA. 3614: Osaka Bay. New Osaka International Airport Buoy 34° 26.9′ N., 135° 16.15′ E. in a Southerly direction for 3.5 miles and Westerly direction for 2.5 miles with causeway to shore in approx. position 34° 24.5′ N., 135° 18.2′ E. Many barges crossing from Awa Shima.

AUTHORITY: Port and Harbour Bureau, Kobe City Government 5-1 Kano-Cho, 6 Chome, Chuo-Ku, Kobe, 650 Japan. *Tel:* 078-331- 8181. *Telex:* 78548 Kobeport. *Cables:* Japangate. *Contact:* Promotion Division.

AGENT: Dodweil Tramp Agencies, P.O.Box 557 Kobe Port, Kobe Mei Seimei Building 3–7, Isogami-dori 8-chome Fukiai-ku, Kobe. Tel. (078) 251-0021. Cable Address: Dodtramp Kobe. International Telex J 7880

KOKURA: 33.54 N. 130.53 E. (See "Kanmon-Ko") (See Plan)

Kokura situated between Moji and Tobata. On the East is contiguous to Moji Port, on the West to Tobata Port and on the North it opens to the Kanmon Straits.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address: "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: Anchorage not in use as the area is being dredged for the purpose of navigation fairway.

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards and Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi and Northbound to contact Nagasaki Radio respectively.

TUGS: See "Moji".

BERTHING:

*2 cranes – capacity 1,000 t.p.h. each.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

(a) Max. 6 gangs are available. Stevedores, regular employees 116, temporary labourers 109. Longshoremen 459.

(b) Lighters: Kokura Marine Transportation Co., lighters 25, tonnage 8,900 tons.

(c) Shore crane:

No.	*Capacity*		*Location*	*Owners*
2	10 tons		Sunatsu Wharf	Sumitomo Metal
1	6 tons		Sunatsu Wharf	Kokura Marine
3	12 tons	outreach 18 m.	Sumitomo Metal Wharf	Sumitomo Metal
3	35 tons		Hiagari Wharves Nos. 6 and 7	Shin Nihon Steel Corp.

(d) Floating crane: Arrangeable from Moji.

(e) Average performance of loading/discharging: Discharging: Iron ore 40/50 t.p.h./gang/hatch (by ship's gear). 200 t.p.h./gang/hatch (by shore crane). Coal 40/50 t.p.h./gang/hatch (by ship's gear). 100/150 t.p.h./gang/hatch (by shore cranes). Scrap steel, pressed 20 t.p.h./gang/hatch (by ship's gear). Ordinary 10 t.p.h./gang/hatch (by ship's gear). Bulky 5 t.p.h./gang/hatch (by ship's gear). Loading: Steel under 20 ft. long 25–30 t.p.h./gang/hatch, over 20 ft. long 15–20 t.p.h./gang/hatch.

(f) 2 shifts: 0800 to 1700 hrs. and 1700 to 0700 hrs. Normal working hours: 0800 to 1700 hrs. Refer to Moji for further information.

RESTRICTIONS: Vessel enters port only within 1 hour before and after slack tide in daytime. No night departure.

MAX. SIZE: See "Berthing".

TANKERS: Also see "Berthing". At Kanematsu-Goshi Oil Refinery 1×6 in. line, rate 900 t.p.h. (Fuel/diesel oil). No slop facilities available.

DENSITY: 1025.

FRESH WATER: From hydrants at Sunatsu and Sumitomo Metal wharves, the rate of delivery per hour: 30 tons per hydrant. Also delivered by barge.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. 7 days' prior notice.

CONSULS: See "Moji".

REPAIRS: See "Moji".

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

AIRPORT: Japan Air Lines, Fukuoka, and Cathay Pacific Air Lines, Fukuoka, about 1.5 hours by train and taxi from Kokura station to airport.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

SHIPMASTER'S REPORT: 1975. Vessel discharged iron ore at Sumitomo Metal Industries.

Pilotage: Arriving from East. He Saki: Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

Arriving from West. Mutsure: Lat. 33° 58′ 30″ N., Long. 130° 53′ 00″ E.

Anchorage:

He Saki: Lat. 33° 56.2′ N., Long. 131° 02.9′ E. Depth 11.4 m.
Mutsure: Lat. 34° 00.0′ N., Long. 130° 52.5′ E. Depth 19.0 m.

Departing from He Saki anchorage to arrive to port of destination in Kanmon Straits in Slack Water and only in daylight.

Normally Pilot boarding 1 hour before tide change. Allowable drafts to transit Kanmon Straits, max. 30 ft. anytime. Max. 32 ft. 10 in. at HW.

Radio Pratique: Obtained if in possession of valid Sanitary Certificate and all Certificates valid. Send cable to Agent with prefix RPM following the standard text.

Docking: Always starboard side.

Anchor: Port anchor ready for emergency.

Fenders: Prismatic rubber.

Gangway: Ship's accommodation ladder.

Discharging Facilities: 3 cranes – capacity 180 t.p.h. each.

Departure from Dock: Undocking only in daylight and about 1 hour before slack water. 3 tugs are necessary for turning the vessel in the narrow basin to head out.

Under construction 2 unloaders, cantilever bridge type, with capacity of 1200 t.p.h. each.

AUTHORITY: Kitakyushu Port and Harbour Bureau, 2-7 Nishi-Kaigan, 1-chome, Moji-ku, Kitakyushu City, 801 Japan. *Tel:* (093)-321-5941. *FAX:* (093) 321-5915.

KOMATSUSHIMA: 34.00 N. 134.36 E. (See Plan)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
6 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 5 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory. 3 authorised licensed Pilots available.

ANCHORAGES: Situated at Western corner of Komatsushima Bay and port protected by three breakwaters, North, East and South covering 396,700 sq. m. Depths of water at anchorages as follows:

(a) Inside Breakwater 8 m. – 10 m.,
(b) Outside Breakwater 8 m. – 13 m.,
(c) Wharf 8.50 m.

RESTRICTIONS: Vessels must get permission and instructions where to anchor from Port Captain before arrival. Wharf and Inner Harbour: Entering and sailing usually only during day-time regardless tide and current. Outer Harbour: Entry and sailing anytime.

MAX. SIZE: Anchorage inside breakwater: Length 175 m., breadth no limit, draft 8.50 m.

Anchorage outside breakwater: Length 200., breadth no limit, draft 10.0 m.

Shinko Wharf: (Suitable 10,000 d.w.t.) Length 175 m. Draft 8.5 m.

Kanaiso Wharf. (Suitable 10,000 d.w.t.) Length 170 m. Draft 8.5 m.

Kanaiso Wharf. (Suitable 15,000 d.w.t.) Length 200 m. Draft 10 m.

HEALTH: Pratique to be obtained at Shimotsu prior arrival Komatsushima. At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Wharf and Inner Harbour: Join vessel at Sea Anchorage, always using tug's line without charge. Outer Harbour: No tug required in normal conditions. 1 × 3,000 h.p. and 1 × 2,400 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent generally by telegram.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630 – 2130 hrs. 60% additional of basic stevedorage; 2130 – 0500 hrs. next morning special additional; Sundays/holidays 100% additional.

MEDICAL: No advance notice required unless urgent.

DENSITY: 1015.

FRESH WATER: Alongside berth: Can be supplied by shore line with capacity of 25 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock at maximum 7 days' prior notice.

CONSULS: None. Nearest consulates in Osaka.

REPAIRS: Only minor repairs up to 3,000 d.w.t.

DRY DOCKS: No dry dock. Nearest at Hitachi Shipbuilding & Engineering Co. Ltd., Chikko Works, Osaka; Kawasaki Heavy Industries Ltd., Kobe and Mitsubishi Heavy-Industries Reorganised Ltd., Kobe Shipyard & Engine Works.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

AIRPORT: Nearest airport Tokushima (10 miles North) where Japan Air System, have 10 flights to Osaka, and 5 to Tokyo.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police Tel: 110; Ambulance 119; Fire 119.

TELEPHONES: No facilities for placing telephones on board.

SERVICES: None.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

AUTHORITY: Komatsujima Port and Harbour Office, 37, Shinko, Komatsujima-cho, Komatsujima City, Tokushima Pref. *Tel:* (08853) 2-3422.

AGENT: See "Niihama".

KUDAMATSU: 34.00 N. 131.52 E. (See Plan)

DOCUMENTS:

Ship's Register.

Last Port Clearance.

3 Crew Lists including Passport Numbers.

3 Passenger Lists.

1 Store List.

1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from 1 of 3 Pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: Kudamatsu loading anchorage Lat. 33° 59′ 40″ N., Long. 131° 51′ 20″ E.

RESTRICTIONS: No restriction for entry into and/or departure from anchorage during night and daytime. But berthing/unberthing effected during daytime only.

MAX. SIZE: No restriction on length, breadth, and draft for any vessel entering port, but maximum safe draft for Nippon Oil Jetty 19 m., 178,000 d.w.t, Hitachi Seisakusho 9.5 m. and Toyo Kohan Wharf 11 m.

HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health condition on board. When Free Pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival at Quarantine Anchorage (Lat. 33° 56′ N., Long. 131° 51′ 30″ W.):

Maritime Declaration of Health.

Crew List.

Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or suspected case, of infectious disease within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.

TUGS: Tugs normally join vessel proceeding to Nippon Oil Refinery Wharf at Lat. 33° 58′ 20″ N., Long 131° 53′ 30″ E. and proceeding to Toyo Kohan Wharf at Lat. 33° 59′ 40″ N., Long. 131° 51′ 20″ E. Tug's line used and charges for line's use is included in tug-boat operation charge. 8 tugs available, 2,000 h.p. – 4,000 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

	LOA (m.)	*Depth* (m.)	*Capacity* (g.r.t.)	*Cargo*

Kudamatsu Public Wharf	130	7.5	5,000	General Cargo
Kudamatsu Public Wharf	185	10.0	15,000	General Cargo

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630–2130 hrs. 60% additional of basic stevedorage; 2130–0830 hrs. next morning 120% additional; Sundays/holidays 100% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: Nippon Oil Refinery:

Berth	*Max. d.w.t.*	*Max. LOA* (m.)	*Max. draft* (m.)
Nippon Petroleum East	178,000	420	19.0
Nippon Petroleum West	50,000	400 (6 buoy)	12.0

Berth	*Products*	*Shoreline*	*Discharge rate* (t.p.h.)	*Hoses*
Nippon Oil (East)	Crude Oil	34″×1	5,000	Pipeline
		16″×1		Chicksan Joint
Nippon Oil (West)	Crude Oil	10″×1 (on floating)	600/800	
		12″×1 (on shore)		

DENSITY: 1025.

FRESH WATER: At anchorage, Kudamatsu section II: water barges available from Tokuyama. Rate of delivery 50 t.p.h. At Nippon Oil Refinery and Toyo Kohan Wharf, hydrants are available. Rate of delivery 20 t.p.h.

FUEL: Major oil companies are represented and all grades of marine oil can be delivered, usually by barge.

CONSULS: None.

REPAIRS: Small repairs possible.

DRY DOCKS: Kasado Dockyard Co. Ltd.

Dry dock	*Length* (m.)	*Breadth* (m.)	*Depth* (m.)	*Docking capacity* (d.w.t.)
Building dock	255.0	50.0	11.0	90,000
Repair dock No. 1	153.6	22.2	8.0	16,000
Repair dock No. 3	227.0	37.0	11.0	70,000

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

REPATRIATION: Possible.

AIRPORT: Ube and Hiroshima airports: 20 minutes by Shinkansen and taxi 20 minutes, total 40 minutes to Ube Airport.

Shinkansen 40 minutes, taxi 10 minutes, total 50 minutes to Hiroshima Airport.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police: 110. Ambulance and Fire: 119.

TELEPHONES: No arrangements exist for placing telephones on board.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

AUTHORITY: Shunan Port Administration Office, 111, Chikko-cho, Tokuyama City, Yamaguchi Pref. *Tel:* (0834) 21-1787.

AGENT: Sub-agents of Dodwell & Co. Ltd., Sankyu Unyo Kiko K.K., 1379-14 Aza Yamzakiya, Oaza-Nishitoyoi, Kudamatsu-shi. Yamaguchi-Ken. Tel. Kudamatsu (0833) 43-0390. Cable Address: Sankyuunyu Kudamatsu. Telex: 6754-67.

KURE: 34.14 N. 132.32 E. (See Plan)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
5 Crew Lists including Passport Numbers.
5 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc., (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki/Choshi Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea Ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position 34° 34.09′ N., 135° 11′ E. Telegraphic Address: Anjin Kobe.

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo Channel). Position 33° 13′ N., 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki pilot station.

3. Mutsure, at West Entrance of Kanmon (Shimonoseki) Strait, Position: 33° 59′ N., 130° 53′ E. Telegraphic address "Anjin Moji".

Note: VHF communication with pilot stations available as follows:

Name of Station	*Call/Answer Channel*	*Communication Channel*	*Working*
Kobe Port Radio (For Wadamsaki)	Channel 16	Channel 12	24 hours
Shimonoseki Port Radio (For Mutsure)	Channel 16	Channel 14	24 hours
Oita Port Radio (For Sekisaki)	Channel 16	Channel 14	24 hours

Also see "Shipmaster's Report" before first port.

ANCHORAGES:

	Minimum Depth	*Minimum bottom width*	*Density of water*	*Nature of bottom*
Entrance Channel	20 m.	No limit	Summer Av. 1020	Sand, mud and rock
Harbour Channel(s)	20 m.	No limit	Winter Av. 1025	Mud and sand

Depths refer to M.W.L. Difference between datum quoted and chart datum: about 2 m. (to be added) Rise of tide: springs 3.4 m. neaps 2.6 m.

Also see "Berthing".

HEALTH: Radio Pratique available. Vessels usually anchor at the quarantine anchorage where the authorities board and grant Free Pratique. Quarantine anchorage (approx. 34° 13′ 45″ N., 132° 31′ 00″ E.)

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound/Eastbound to contact Nagasaki Radio respectively.

TUGS: Tugs normally join vessel at quarantine anchorage area. Tug's lines free of charge.

BERTHING: Harbour/Berthing Pilot available from Quarantine anchorage. Pilots do not agree to berth or unberth outside period from sunrise to sunset, according to their regulations. For berthing, at least 2 hours' advance arrival necessary to reach berth before sunset.

Harbour Anchorage: Following 2 anchorages with good ground (mud & sand) suitable vessels up to 80,000 d.w.t. LOA 300 m.

Name of Anchorage:	*Position:*	*Depth:*
Anchorage "C"	34° 13′ 51″ N., 132° 31′ 29″ E.	20 m.
Anchorage "D"	34° 13′ 29″ N., 132° 31′ 45″ E.	20 m.

Name of Berth	*Length* (m.)	*Depth* (m.)	*Permissible Draft* (m.)	*Capacity* (d.w.t.)
Showa Municipal Pier	170	9.0	7.0	10,000
Nisshin Steel Works Pier No. 3	270	18.0	18.0 (with Tide)	150,000
Kawaraishi Minami Municipal Pier	370	10.0	9.5	15,000

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep Agent advised of ETA. If stevedores cannot commence loading/unloading at time notifed by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630–2130 hrs. approx. 60% additional of basic stevedorage; 2130–0430 hrs. next morning 130% additional; Sundays/holidays approx. 100% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: No facilities.

FRESH WATER: Available by barge:

FUEL: Most grades of domestic oil are available, bonded bunkers will be brought by barges from Iwakuni, Tokuyama, Moji or Kobe with 72 hours' advance notice.

CONSULS: No consul available at Kure, but Marine Note of Protest can be attested by the local notary public.

REPAIRS: All types of deck and engine repairs are possible.

DRY DOCKS: Following dry docks are available at I.H.I. Kure Shipyard

No.	*Length*	*Width*	*Depth*	*Capacity*
2	343 m.	65 m.	11.0 m.	up to 400,000 tons
3	510 m.	80 m.	13.5 m.	up to 800,000 tons
4	334 m.	47 m.	17.0 m.	up to 160,000 tons

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Hatches usually opened by crew before berthing, however, hatches can be opened by stevedores if arrangements made.

CERTIFICATES: Ship's Register to show Customs Inspector for confirmation of ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.

AIRPORT: Hiroshima airport, distance from Kure approximately 35 km. – 40 km. and about 90 – 120 minutes by car. Only domestic regular airlines available. 6 flights to Tokyo and 2 flights to Kagoshima daily.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police (for emergency) 110; Ambulance 119.

TELEPHONES: No arrangements available for placing telephones aboard except in special cases.

SERVICES: All navigational apparatus can be serviced as required with minimum 24 hours' advance notice. Cargo hold/Tank cleaning services can be arranged from Kobe area.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for 72 hours only, but 72 hours' extension possible if ship stays longer.
GENERAL: Kure is a local port which makes it difficult to arrange all requirements. At least 72 hours' notice helpful.
AUTHORITY: Port and Harbour Dept. – Kure City, 1-6 Chuo 4-chome, Kure City, Hiroshima Pref. *Tel:* (0823) 25-3336.

AGENT: Sub-agents of Dodwell & Co. Tokyo. Naigai Unyu Co. Ltd., 1-7, 1-chome, Naka-dori, Kure-shi, Hiroshima-Pref. Tel. Kure (0823) 21-5181/7. Cable Address: Naigai Kure or Kurekanyu Naigaiunyu. Telex: 6623-40.

KUSHIRO: 42.58 N. 144.21 E.

DOCUMENTS: Ship's Register. Last Port Clearance. 4 Crew Lists including Passport Numbers. 4 Passenger Lists. 1 Stores List. 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: No telegraphic address. Previous advance notice, minimum 8 hours' advance notice ETA and any alterations. Contact pilot boat through Harbour Office/tug boats with wireless telephones. Pilot boat has no radio telephone. Pilot boat waits at Quarantine Anchorage (1,000 m. off and 280° from North Breakwater white light), and entrance of breakwater during winter period (December–March).
ANCHORAGE: Bottom sand and mud. Minimum depth 9 m. in passage and 7.5 m. in anchorage. Depth over 29.5 ft. 162,075 sq.m., Section 2; Depth over 24.5 ft. 690,000 sq.m., Section 2 and 3; Depth under 24.5 ft. 393,600 sq.m., Section 3. Tidal range, average high-tide plus 1.533 m., average low-tide plus 0.154 m., average tidal difference plus 0.953 m.
RESTRICTIONS: Vessel allowed to enter and sail day and night. Pilot assistance officially not compulsory but in practice necessary, and Pilot service available sunrise to sunset for entry and up to 2100 hrs. for sailing.
MAX. SIZE: See "Berthing".
HEALTH: Radio Pratique available. Formalities will be carried out at the anchorage. Quarantine Station 1,200 m. – 293° off Kushiro Breakwater Red Lighthouse.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.
TUGS: Usually join vessel at entrance of breakwater and ship's lines to be used.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio. All berths limited by depth in entrance channel.

MATSUSHIMA: 32.56 N. 129.36 E. (See Plan)

SHIPMASTER'S REPORT: May 1988.

PILOTAGE: Nagasaki pilot boarding ground is at position 32° 43.3′ N., 129° 46.7′ E. which is about one mile E.N.E. of Ma Hana lighthouse on Io Shima Island. The pilot station and pilot boat at Nagasaki do not have VHF so all communications must be made well in advance through the vessel's Nagasaki agent via telex or by cable via Sasebo Radio.

On arrival at Matsushima, the Pilot boards from a tug in position 32° 58.5′ N., 129° 35.2′ E.

ANCHORAGE: The recommended anchorage at Matsushima, but not authorised, is in position 32° 58.7′ N., 129° 35.6′ E.
RESTRICTIONS: Berthing and unberthing during daylight hours only.
HEALTH: If the vessel is in possession of the Japanese Sanitary Certificate, Radio Free Pratique can be obtained by sending a message to the Quarantine Office in Nagasaki via the vessel's Agent, after which the vessel can proceed directly to Matsushima. If vessel is not in possession of Japanese Sanitary Certificate it has to call at Nagasaki for ordinary quarantine service, Customs and Immigration formalities, etc.

If vessel is to proceed to Nagasaki for quarantine the Pilot will anchor the vessel at the outer roads (Anchorage A, Harbour Section No. 6) in position 32° 42′ N., 129° 48′ E. The mooring buoy with a red light on B.A. Chart No. 2815 in position 32° 41.8′ N., 129° 47.45′ E. is no longer in existence.

Quarantine formalities are possible between 0830 hrs. and 1600 hrs., therefore the vessel has to arrive at Nagasaki Roads before 1600 hrs., otherwise vessel will have to stay overnight in the roads. As soon as formalities are completed the vessel may sail for Matsushima without a Pilot.

VHF: Channels 16, 3 and 6.
TUGS: In general, vessels over 60,000 d.w.t. use 3 tugs and vessels under 60,000 d.w.t. use 2 tugs. On departure 2 tugs are used for unberthing. Tugs tow lines are used. The port tugs have a blue hull with white superstructure and orange mast.
BERTHING: Berth P1: Length 255 m., depth alongside 14.0 m.

Berths P2, P3 and P4: Each have a length of 114 m. and a depth alongside 8.0 m.

Matsushima is a small island with an electric plant of the Electric Power Development Co. Ltd. It is a well organised plant with its own port. The concrete berth is well fendered and there are ample mooring bollards and additional storm bollards. Off the Northern end of the wharf there is a dolphin joined to the shore by a 65 m. long catwalk. The Northern end of the berth will accept vessels over 60,000 d.w.t. The Southern end is for vessels of 5,000 d.w.t., 2,000 d.w.t. and 2,000 d.w.t. respectively.

It is the custom of the port to berth port side alongside, but if requested by the Master, vessel may berth starboard side alongside.

The berthing pilot, who is a Power Company employee, hands over a berthing plan when he arrives, which contains information about mooring lines, depth alongside and strength and number of bollards. All the bollards are painted and are numbered. The plant and the berth are always kept clean.

There is an approach velocity meter on the quay and tugs are fitted with receivers.

Moorings consisted of 5 head/stern lines and 1 spring line at each end. On approaching the berth, 2 headlines can be sent away at one time by the line boat.

On average 5 vessels a month call at Matsushima.

CARGO HANDLING FACILITIES: At Matsushima there is one unloader with 4 IHI cranes of 23 tonnes capacity each. The discharging rate with grabs is 700 t.p.h. maximum for each crane, or 2,800 t.p.h. in total. The average discharging rate is 1,600 t.p.h.

Normal working hours are from 0630 hrs. to 2130 hrs., 7 days a week, including holidays.

The only day not worked is January 1st (New Years Day).

MEDICAL: There is a hospital at Oseto Cho.
FRESH WATER: Available, rate 15 t.p.h.
FUEL: Bonded oil (fuel and diesel) will be brought from Seto Island ports.
GANGWAY/DECK WATCHMEN: It is compulsory to have one watchman on board to attend to the telephone which is placed on board on arrival. The watchman remains on board until vessel's departure.
REPATRIATION: Possible via Nagasaki or Sasebo.
SHORE LEAVE: Shore passes are issued for Matsushima and Oseto town only. Oseto town is opposite Matsushima Island. There is a ferry boat service between 0700 hrs. and 2210 hrs.
GENERAL: *Provisions:* It is possible to obtain stores at the port.
Tidal Range: Maximum +3.50 m. Minimum −0.50 m.
Hotels: There is no hotel accommodation at Matsushima or Oseto.
Tax Free Shop: Should crew wish to buy electrical goods, the Master should contact Kaijima Company in Sasebo City via the Agent. It is suggested that a cable/telex is sent well in advance in order that a salesman may be sent aboard on arrival.

MATSUYAMA: 33.52 N. 132.42 E. (See Plan)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from 1 of 3 pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.
Note: VHF communication available with Inland Sea Pilot stations. Also see "Shipmaster's Reports" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat: 34° 34.09′ N., Long: 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo Channel). Position Lat: 33° 13′ N., Long: 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat: 33° 56′ 24″ N., Long: 131° 03′ 12″ E.

ANCHORAGE: The port faces Iyo-Nada and located near Bungo Straits. Entrance open to Iyo-Nada towards West, but port protected by West breakwater and small island off Northern part of approaches where holding ground good. During Winter months strong N.W. wind prevails causing heavy swell at anchorage. Depth of water 17 m. – 25 m.
RESTRICTIONS: *Oil tanker berth:* Vessel drawing less than 12 m. can moor and unmoor at half-flood during daytime but vessels drawing 12 m. or more advised to await high water.

Dry cargo is logs only and cargo working carried out at anchorage of Umaiso and Yura Bay.
Yura Bay: Vessels no longer than 110 m. can berth. Daytime entry only regardless of tide and current.

MAX. SIZE: *Maruzen Oil Co. Ltd., Matsuyama Refinery, Genyu Sambashi:* Max. 50,000 d.w.t. Max. LOA, 240 m. Max. safe draft 12 m.

Umaiso Bay: Length of vessel 160 m.; breadth no limit; draft 15 m.
Yura Bay: Length 110 m.; breadth no limit; draft 10 m.

Also see "Berthing".

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: For tankers: Join vessel at Quarantine anchorage, using tug's lines without charge. For dry cargo vessel, no tug required for berthing and unberthing in normal conditions.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

General cargo to be loaded/discharged at the following wharves in Matsuyama.

Berth section	*Length*	*Depth*	*Max. size d.w.t.*
Wharf No. 1			
Sect. 1	380 m.	9.5 m.	15,000
Sect. 2	230 m.	5.5 m.	5,000

Imazu Port Wharf: New Wharf for log discharging only in position Lat: 33° 48′ 46.79″ N., Long: 132° 41′ 49.06″ E. Length 320 m. Depth 9.5 m.

Restrictions: Due to tidal condition (strong current) Pilot requires 2 tugs for mooring and unmooring, even if vessel is less than 5,000 g.r.t.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: No advance notice of diameter of load/discharge lines required. See "Max. Size".

Manifold: 1×12 in. (Fuel Oil) 600 t.p.h.; 1×12 in. (Crude Oil); 2,000 t.p.h. 1×12 in. (Diesel Oil) 800 t.p.h.

DENSITY: Anchorage 1015. Berth 1015.

FRESH WATER: *Maruzen Oil Co. Ltd., Matsuyama Refinery, Genyu Sambashi:* Can be supplied by shore line with capacity 25 t.p.h.
Anchorage: Can be supplied by 60 ton barge with capacity 60 t.p.h. Strong winds prevail during Winter months, when no water can be supplied.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days' prior notice. Also see "Moji, Fuel".

CONSULS: Consulates in Kobe.

REPAIRS: Only minor repairs.

DRY DOCKS: None. Nearest at Kawasaki Heavy Industries Ltd., Sakaide; Hitachi Shipbuilding & Engineering Co. Ltd., Innoshima and Mukaishima, dimensions of those docks as follows:

Kawasaki Heavy Industries Ltd., Sakaide. Dock No. 2 for 500,000 d.w.t. vessel 450 m.×72 m.×12.3 m. Only used presently for shipbuilding and after services.

Hitachi Shipbuilding & Engineering Co. Ltd., Innoshima Dockyard. Dock No. 1 for 20,000 d.w.t. vessel 175 m.×25 m.×25.62 m.×9.10 m. Dock No. 3 for 130,000 d.w.t. vessel 282.50 m.×47 m.×11.33 m.

Hitachi Shipbuilding & Engineering Co. Ltd., Mukaishima Dockyard. Dock No. 1 for 3,000 d.w.t. vessel 86.18 m.×13.60 m.×6.80 m. Dock No. 2 for 8,500 d.w.t. vessel 125 m.×18 m.×7.40 m. Dock No. 3 for 25,000 d.w.t. vessel 175 m.×29 m.×9 m.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless ship's crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

REPATRIATION: Possible.

AIRPORT: Domestic airport situated South of harbour. All Nippon Airways flights to Osaka and Tokyo.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.

TELEPHONES: No facilities for placing telephones on board.

SERVICES: Only at Kobe.

SHORE LEAVE: Immigration issue shore passes valid for 7 days if vessel only calling at one port in Japan or 15 days if vessel calling at more than 2 ports in Japan, further extension possible.

AUTHORITY: Matsuyama Marine Safety Agency, Kaikan-Dori, Matsuyama, Japan. *Tel:* (0899) 51-1197. *Contact:* Port Captain.

AGENT: See "Niihama".

MIIKE: 33.00 N. 130.23 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
5 Crew Lists including Passport Numbers.
2 Passenger Lists.
3 Ports of Call Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Compulsory; Pilots board at the point Lat. 32° 59′ N., Long. 130° 23′ E.

Shimabara Bay Pilot (Kuchinotsu Pilot) not compulsory. Pilots board 1 mile South of Kuchinotsu Lighthouse, Lat. 32° 35′ N., Long. 130° 12′ E. (Advise ETA Kuchinotsu 48 hours prior to arrival.)

Vessel should proceed to Miike Anchorage by itself in case of Pilot not being arranged.

ANCHORAGES: Lat. 32° 59′ N., Long. 130° 23′ E. Harbour limit within circle of 2,700 m. radius centring on lighthouse at West end of Northern Breakwater. Roadstead affords safe anchorage, mud and sand.

RESTRICTIONS: Vessel shall dock or depart on HW. Ebb stream begins about 30 mins. before HW and runs to South for 6 hours. Max. current 3 knots at entrance of channel. Flood stream begins at about LW time and runs to North for 6 hours max. 3 knots at lighthouse. Channel 1,800 m. long, 137 m. broad from jetty to jetty, 45.7 m. width at bottom. 7.3 m. depth at LWOST.

MAX. SIZE: No limitation for breadth and length, but max. drafts are as follows: 29 ft. 6 in. up to 20,000 d.w.t.; 26 ft. 4 in. up to 25,000 d.w.t.; 24 ft. 6 in. up to 30,000 d.w.t.

HEALTH: Formalities will be carried out 2 miles off the lighthouse (Lat. 33° 0′ 8″ N., Long. 130° 23′ 50″ E.). Radio Pratique available.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: 3 tugs available. 2×1,100 h.p.; 1×800 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Berth	*Length* (m.)	*Depth* (m.)	*Draft* (m.)	*Capacity*	*Shore cranes & pipe-lines*
North Quay (No. 6, 7, 8)	520	10.7	8.5	30,000	2×10 tons 1 unloader*
Dock Pier	114	8.5	8.2	1 × 8,000	
Dock Quay	421	8.5	8.2	2 × 8,000	2 coal loaders
Quay No. 5	91	10.7	10.0	1 × 8,000	1 coal loader
New Quay No. 5	68	10.7	10.0	1 × 6,000	1 coal loader

*One shore unloader at North Quay No. 8. Mainly used for vessels over 5,000 d.w.t.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 100% additional.

MEDICAL: No advance notice required unless urgent.

DENSITY: 1025.

FRESH WATER: Available at wharf only. Delivery 20 t.p.h. – 25 t.p.h.

FUEL: Domestic oil is available; Bonded oil will be brought from Moji or Tokuyama, when required.

CONSULS: Consuls at Osaka or Tokyo.

REPAIRS: Minor repairs only.

DRY DOCKS: See "Moji".

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches (according to charter party). Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gears' maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

SURVEYORS: (1) No cargo inspectors available. (2) Lloyd's Register, American Bureau and Bureau Veritas in Miike.

REPATRIATION: Possible.

AIRPORT: See "Moji".

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: 15th August, 1st January.

POLICE/AMBULANCE/FIRE: Tel: 110 and 119.

STORING: See "Prelims".

1. By truck.
2. Barge storing only when loading steel products.
3. Trucks can proceed alongside at berth.
4. Fork lift trucks available.
5. If any regulations in force agent will arrange documents.
6. Only a few riggers available. Extra riggers come from Moji or Kobe.

TELEPHONES: Available at Agent's office.
SHORE LEAVE: Local Immigration Offices issue crew permit valid for only 7 days, but 7 days' extension possible if ship stays longer.
AUTHORITY: Mitsui Mining Co., Ltd., Miike Port Office, 1 Shinkomachi, Omuta, Fukuoka 836, Japan. *Tel:* (0944) 57-3131. *Cables:* MPO Omuta. FAX: 0944-53-5914. *Contact:* General Manager.

MIYAKO: 39.39 N. 141.58 E. **(See Plan)**

DOCUMENTS:

For Quarantine
1 Statement by Ship's Master.
1 Crew List.
1 Passenger List (if any).
Yellow cards for all.
1 Derat Certificate.

For Immigration
1 Declaration of Inward Vessel.
Passport or Seamen's Book for all.
1 Crew List.
1 Application for shore pass.

For Customs
1 Last Port Clearance.
1 Declaration of Inward Vessel.
1 Crew List.
1 List of Crew's Baggage.
1 List of Ship's Store.
2 Cargo Manifest (Discharging).
1 Cargo Manifest (Through).
1 Certificate of Ship's Registry.

For Port Management Office
1 Declaration of Inward Vessel.

For Maritime Safety Base
1 Declaration of Inward Vessel.
1 Crew List.
1 Cargo Manifest (Discharging).
1 Cargo Manifest (Through).

Above documents to be prepared by Master before arrival.

Master to telegraph ETA and crew's health condition directly to Quarantine Miyako before arrival.

PILOTAGE: Not compulsory, but arrangeable at the Master's request. Pilot ordinarily boards at/around Quarantine anchorage, also available boarding at the Master's request at outer harbour which position is HeisaKi light Northward 1.5 miles (Lat. 39° 40.5′ N., Long. 142° 1.2′ E.).

ANCHORAGES: Quarantine anchorage located at Lat. 39° 37.82′ N., Long. 141° 59.3′ E. Depth 16 m. – 22 m. Bottom mud and sand. Outside breakwater, care should be taken not to foul fishing nets.

Depth in inner anchorage 12 m. – 15 m.

RESTRICTIONS: Night entry and departure permitted subject to weather conditions.

MAX. SIZE: Draft 12 m. and LOA 240 m., breadth no restrictions.

HEALTH: Radio Pratique available. Formalities carried out at anchorage.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. Westbound vessel, via Choshi Radio, and Northbound via Nagasaki Radio.

TUGS: Normally join vessel on passage from anchorage. Tug's line used. One tug available 2,400 h.p. Additional tugs available from Kamaishi.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Berth		*Max. LOA (m.)*	*Depth at LW (m.)*	*No. of wharf*	*Max. d.w.t.*

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: No facilities.

DENSITY: Average 1019.

FRESH WATER: Available from wharf about 50 t.p.h. but no water barge. In case vessel urgently requires water at anchorage, tug-boat arrangeable for this purpose.

FUEL: Domestic oil is available; Bonded oil will be brought from Tokyo or Sendai, when required.

CONSULS: None.

REPAIRS: Minor deck and engine repairs available.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Not especially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depends on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommended request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register, Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

AIRPORT: Hanamaki Airport distant 150 km. from Miyako (2.5 hours by car). 1 flight between Hanamaki/Tokyo Monday/Thursday/ Friday and Saturday and 2 flights Tuesday/Wednesday and Sunday by Toa Domestic Air Lines (TDA).

CUSTOMS ALLOWANCES: 60 cigarettes to take ashore but no spirit

REPATRIATION: Possible.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 2-5011 (Headquarters) and 2-6037 (Water Police Station); Ambulance 119; Fire 119.

TELEPHONES: No facilities for placing telephones on board.

SERVICES: Surveyor, Tally, Hold cleaning, Tank cleaning.

SHORE LEAVE: Local Immigration Office issues shore pass valid fo only 3 days; 3 days' extension possible if ship stays longer. If vesse advises longer stay in port on arrival, Immigration can issue shore pas for 9 days.

GENERAL: Discharging ex-gearless vessel at wharf not possible as n shore crane for discharge.

AUTHORITY: Miyako Port Administration Office, 114, Fujiwara 3-chome, Miyako City, Iwate Pref. *Tel:* (01936) 2-1471.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Miyako Kowan Uns Kaisha, Ltd. No. 1-12, Rinkodori Miyako-shi, Iwate-ken. Cable address Koun Miyako. Domestic Telex: 8344-08. Tel: (01936) 2-3501/5. Posta No.: 027.

MIZUSHIMA: 34.31 N. 133.45 E. **(See Plan**

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera wrist-watch, radio, firearms/swords, etc. (only at first port of call i Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Carg Manifest and Cargo Manifest in transit using specific forms. Therefor ship's Agent should be provided with necessary information about detai of cargoes in advance.

PILOTAGE: *(a)* Inland Sea pilotage should preferably be arrange through Agent by cable via Nagasaki Radio giving 72 hours' notice Urgent correction of ETA outside business hours should be cabled direc to pilot station. Inland Sea Pilot Association covers all Inland Sea ports Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained fro 1 of 3 pilot stations dependent upon vessel's last port of departure an at Master's discretion. Pilotage available throughout 24 hours and 7 hours' advance notice preferred, thereafter advising any alterations Most Inland Sea Pilots also act as Harbour Pilots up to berth o anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Stations. Als see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits Position Lat. 34° 34.09° N., Long. 135° 11′ E. Telegraphic address "Anj Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitti Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphi address "Anjin Saganoseki". In event bad weather, recommende vessels proceed for shelter as near as possible having due regard t safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Positio Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

(b) Vessels over 50,000 d.w.t. or of draft of more than 12.5 m. an unable to pass through Kurushima Strait and required to trans Wadamisaki.

There are very narrow and crooked channels, such as the Kurushim Strait, maximum tidal current amounting to 10 knots; the Bisan Stra maximum tidal current amounting to 4 knots, and the Akashi Stra maximum tidal current amounting to 6 knots.

(c) Harbour Pilot: Pilots of the Inland Sea Pilots Association are als employed for this pilotage if required, and Pilot boards at Mizushim Quarantine Anchorage (Lat. 34° 26′ 30″ N., Long. 133° 34′ 30″ E approximate centre position of quarantine area). However, if an Inlan Sea Pilot is employed at the above-mentioned pilot stations, the sam Pilot acts for harbour pilotage.

ANCHORAGES: Anchorages available for small size vessels only. I case of large vessels waiting for berthing, these vessels shall wait a Quarantine Anchorage, at around Nabeshima, at nearby Sakatewan o off Kobe.

Around "Q" Anchorage Depth	15 m. – 18 m.	
Around Nabeshima Depth	32 m. – 40 m.	(temporarily suspende
Nearby Sakatewan Depth	32 m. – 41 m.	
Off Kobe Depth	43 m. – 47 m.	

RESTRICTIONS: *(a)* Entering and departing from port shall be i accordance with instructions to be given by Signal Station.

(b) No restriction imposed upon entering or leaving port during nig time, nevertheless such movements are next to impossible i consideration of the nature of the structures of the port. In addition Pilo refuse to board during night-time.

(c) Super-sized vessels, unable to enter except at high tide.

Pilots should be consulted in advance for draft exceeding 14.80 m

MAX. SIZE: See "Berthing".

HEALTH: Radio Pratique available. Formalities will be carried out i Quarantine Anchorage Lat. 34° 26′ N., Long. 133° 44′ E.

RADIO: Recommended Master communicates with Agent throu Choshi Radio or Nagasaki Radio which covers all ports in Japa If specifically Westbound vessel to contact Choshi and Northbound t contact Nagasaki Radio respectively.

TUGS: Tugs normally join the vessel at the Quarantine Anchorage an Usually tug's lines used free of charge.

*N.B.—Some allowance may be granted by Pilot depending on tidal condition. Depth of water (14.80 m.) + tide = Ship's draft + keel allowance (ship's draft × 0.1 + 0.5 m.).

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 2100 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: See "Berthing".

DENSITY: Entrance channel Summer average 1020, Winter average 1023. Harbour channel Summer average 1019, Winter average 1025.

FRESH WATER: Available at berth, ex-pipe-line. Average delivery rate 20 k/t/hour. Water barges available, sent from Onomichi. Delivery rate approximately 50 k/tons per hour.

FUEL: Most grades available.

FIRE PRECAUTIONS: *(a)* Whenever necessary to repair vessel, the rule of "Strictly and Completely No Fire" is to be observed. *(b)* To keep sufficiently powered tugboat alongside vessel at all times when engine is under repair. *(c)* A written pledge to be submitted to Oil Company, promising to take full responsibility and to pay full indemnity by ship's Owners (in case of repairing vessel) if any accident has occurred by fault of the vessel.

CONSULS: No consul available, but marine note of protest can be attested by the local notary public.

REPAIRS: All types of deck and engine repairs possible by Mitsui Shipbuilding and Engineering Co. Ltd., Tamano Works. Minor repairs possible by Nojima Senpaku Co. Ltd., Mizushima Works, Sonkyo Nainenki Seisakusho Co.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

DRY DOCKS: *Sanoyasu Dockyard Co. Ltd., Mizushima Shipyard:* Dimensions of longest drydock. Length 675 m., width 63 m., depth 13 m. *Mitsui Shipbuilding and Engineering Co. Ltd., Tamano Dock:*
(a) Dimensions of largest dry dock No. 3 D. Dock (length 672 ft. × width 103 ft. 3 in. × depth 32 ft.). *(b)* Number of small docks: 2.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gears maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

AIRPORT: Okayama Airport is the nearest from Mizushima, distance approximately 40 km. and takes about 40 minutes by car. Only domestic regular airlines available. 3 flights to Tokyo, daily.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.

TELEPHONES: No telephone installation service on board.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

SERVICES: All navigational apparatus can be served, as requested, but technicians are to be sent from Kobe.

REGULATIONS: Quarantine Anchorage is outside harbour limits therefore (i) no persons allowed ashore from this anchorage, (ii) No supplies permitted to vessels and, (iii) No Agency services available.

REPORT: (Ship's Agent) 1984.

As you are aware, a vessel over 200 m. in length or 50,000 d.w.t. is not allowed to anchor off Mizushima whilst waiting for a berth or other purposes as the space in the Roads is narrow. Therefore, if a berth is not available at the expected time of ship's arrival, the ship has to anchor off Kobe, which is the nearest available place to wait for berthing turn. During vessel's stay in Kobe Roads, quarantine service from Kobe Quarantine Station is not available except in an emergency as this service is available at Mizushima. The Customs entry which requires payment of tonnage dues is not made at Kobe.

In the above circumstances, we, in order to protect the Owners interests, have been instructing the Masters of the vessels to tender Notice of Readiness when they arrived off Kobe for waiting berth although most Receivers or Charterers only accept the NOR when Free Pratique is granted at Mizushima if the vessel is not qualified to obtain Radio Pratique.

It is apparent that when calculation of laytime is made controversy arises between Shipowners and Charterers as to who is to bear the risk of waiting off Kobe for a discharging berth. The Charterers may contend that the Master is not allowed to tender NOR without Free Pratique and Customs clearance whilst the Owners rebut that the ship was lying at a place for waiting berth solely for Receivers/Charterers convenience, being her voyage ended.

In order to avoid a dispute of this kind, we would respectfully suggest modifying the charterparty clause for a vessel of the above category calling at Mizushima as follows:

Quote:

If berth is not available on arrival at discharging port, vessel shall be allowed to tender Notice of Readiness from place of anchorage ordered by Port Authorities whether in berth or not, whether in port or not, whether Customs cleared or not, whether in Free Pratique or not.

Laytime at second/third discharging port, if used, to commence on arrival, whether in berth or not, whether in port or not, whether Customs cleared or not. Time for shifting from a waiting anchorage to discharging berth not to count.

Unquote.

AUTHORITY: Mizushima Port & Urban Development Bureau, Okayama Pref. 1-12, Mizushima Fukuzaki-cho, Kurashiki City, Okayama Pref. *Tel:* (0864) 44-7141.

AGENT: Sub-agent of Dodwell & Co. Ltd., Tokyo. Naigai Unyu Co. Ltd., 1, 2 – chome, Kaigan-Dori Mizushima, Kurashiki-Shi Okayama-Ken. Cables: Naigai Kurashikimizushima. Tel: Kurashiki (0864) 44-5211.

MOJI (Kitakyushu): 33.54 N. 130.55 E. (See Plan) (See "Kanmon-Ko").

LOCATION: Moji port is located in the Kanmon Straits between Shimonoseki on Honshu Island and Moji at the Northeast tip of Kyushu and is well sheltered from the open sea by steep hills on all sides. According to the Harbour Regulations, the port is one of the sections in Kanmon Harbour which consists of Moji, Shimonoseki, Kokura and Dokai (Tobata, Wakamatsu and Yawata). In 1963, five cities, Moji, Kokura, Tobata, Wakamatsu and Yawata situated in North-Eastern part of Kyushu were combined in one city, as Kitakyushu.

Moji is now known as Moji-ku of Kitakyushu City.

DOCUMENTS: When ship arrives direct from foreign port, Customs Officials will board to search vessel. Following documents to be submitted:

Crew List.
Passenger List.
Stores List.
Manifest of crew personal effects (must be signed by individual crew member).
Arms and ammunition list.
Narcotics List.
List of ports of call on current voyage.
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration inward/outward (Form No. C2000).

The following will be checked on board:

Ship's Registry.
Last Port Clearance.

When ship comes from Japanese port, Customs Officials will not attend on board, except special case. Master or Agent to attend Custom House for entry formalities with following documents:

Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward.
Ship's Registry.
Last Port Clearance.

Documents entrusted with the Master by Customs at previous port. On ship's departure, clearance issued by Customs, after confirming payment of tonnage dues.

PILOTAGE: (1) *Harbour Pilotage:* Compulsory for entry, departure and when vessel passing through Straits if g.r.t. exceeds 10,000 tons. Pilots embark Eastbound vessels at Mutsure Quarantine Anchorage position half mile East Mutsure L.H. Lat. 33° 58′ 15″ N., Long. 130° 53′ 43″ E. and Westbound vessels at Hesaki Quarantine Anchorage position 125°, 1,500 m. from Hesaki L.H. Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E. Two Pilots embark vessels exceeding 30,000 gross tons for entry and departure charging double pilotage.

(2) *Sea Pilotage:* Vessels approaching from East can obtain Pilots by radio request made at least 24 hours in advance. Pilot embarks at position 3 miles South from Sekisaki L.H. Lat. 33° 13′ 00″ N., Long. 131° 54′ 00″ E.

(3) Pilots should be kept closely advised of vessel's accurate ETA at pilot station. If any change in vessel's movements, Master requested to immediately communicate by radio or VHF to pilot offices directly or through Agent reporting revised ETA. Cable addresses of pilot offices are: Harbour Pilot "Kanmonpilot Moji", Inland Sea Pilot "Anjin Moji".

(4) *VHF:* Vessels keep in direct contact with port authorities with regard to arrival, berthing instructions and Pilot's requirements through VHF as follows:

(a) Call sign: Kitakyushu Port Radio (or Shimonoseki Port Radio).
(b) Location of Radio facilities: Transmitting and receiving station located at the top of Mt. Hinoyama, Shimonoseki.
(c) Type of wave: Channel: Simplex 16 (calling, responding); Simplex 12 (communicating); Simplex 14 (communicating); Duplex 20 and 22 (communicating). Output 50 W.
(d) Operating hours: 0000 – 2400 hrs.
(e) Communicating range: Within a radius of 50 miles from the Hinoyama Station.
(f) Communicating language: Japanese/English.

ANCHORAGE:

Tanoura No. 1 anchorage (83° from Moji Saki Light Buoy, 1,340 m.). Draft 9.1 m.

Tanoura No. 2 anchorage (83° from Moji Saki Light Buoy, 1,770 m.). Draft 9.1 m.

Tanoura No. 3 anchorage (80° from Moji Saki Light Buoy, 2,300 m.). Draft 9.1 m.

WIND, TIDE: Easterly winds prevail in warm seasons. N.W. winds prevail in Winter season. Dense fog frequently prevails in Spring and Autumn.

Tidal range 3.07 m. Current near entrance of port runs Westward at flood and Eastward at ebb. Speed of current in vicinity of narrowest section of Straits sometimes reaches 7 – 8 knots. In stream of port, it is about 3 – 5 knots.

RESTRICTIONS: *(a)* Berthing: During daytime only. Swift tidal current prevails at buoy berths necessitating strong moorings, and in accordance with harbour rules, ships moor with anchor chains to buoy. Requisite chain preparations should be completed before ship leaving pilot station. Occasionally large vessels drawing deep draft made to await high water and/or suitable current to berth alongside wharves.

(b) Departure: With adequate notice, no restrictions from anchorage and/or buoys. Night departure from wharves generally practicable, except No. 7 Wharf and Nos. 8, 9, 10 Wharves, the latter 3 berths however only permitting vessel to sail against tide.

(c) Tug assistance may be required at Pilot's discretion for large vessel mooring to and/or unmooring from buoy, depending upon efficiency of engine and conditions of weather, tidal current, etc.

(d) Vessels with draft over 9.14 m. (30 ft.) but not exceeding 10 m. can pass through Kanmon Straits with favourable tide.

MAX. SIZE: *Tankers:* 1 tanker berth, Mitsui & Co. Berth "B". Max. d.w.t. 33,000 tons. Max. LOA, 200 m. Max. safe draft 9.10 m.

Also see "Berthing" and "Tankers".

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.

VHF: See "Pilotage".

TUGS: Normally join vessel at suitable position for mooring in judgment of Pilot and tug. In operation, tug's line to be used for mooring and unmooring without any charge. 10 tugs, 1,500 h.p. – 3,520 h.p.

HEALTH: Radio Agent for Free Pratique not less than 12 hours and n more than 36 hours before arrival, advising full details of vessel an health conditions on board. When Free Pratique is granted by rad vessel will be required to submit the following documents to Quarantin Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspecte infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectiou disease, within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemptio Certificate.

(a) Quarantine Station at Western entrance: half mile East fro Mutsure Lighthouse Lat. 33° 58′ 15″ N., Long. 130° 53′ 43″ E.

(b) Quarantine Station at Eastern entrance: 125°, 1,500 m. fro Hesaki Lighthouse Lat. 33° 56′ 24″ N., Long. 131° 30′ 12″ E.

(c) Quarantine inspection not allowed inside port except when weathe or other special reasons prevent quarantine boat from approaching shi at anchorage.

(d) "Q" flag should be hoisted until ship is in Free Pratique.

(e) Vessels exceeding 20,000 gross tonnage may undergo quarantin on application when they berth inside port.

(f) Quarantine service is rendered from sunrise to 1 hour befor sunset.

(g) When ship arrives from plague infected or suspected area withi 10 days after she left such place, a 24 hour special quarantine i required. All sanitary scuppers must be closed and garbage must n be thrown overboard after ship reaches 60 miles off Japanese coast.

(h) Radio Pratique is obtainable according to the Radio Pratiqu Regulations.

BERTHING: No specific requirements. Pilot boarding time will be notifie by ship's Agent mainly by radio.

Shinmoji: Shinmoji Wharf is equipped to handle raw materials and goods used in the Shinmoji marine industrial area. The second term reclaiming construction has been carried out, so that it will be able to function as an intensive centre for middle-distance and long-distance ferrying in the future. Depths alongside 4.5 m.–10.0 m.

Developments: See "Developments".

CONTAINER HANDLING FACILITIES:

Tanoura Container Terminal

Total area:	61,100 sq.m.
Area per berth:	One berth only Sea depth: 10 m. under low water level (LWL) Length of wharf: 300 m. Marshalling yard: 46,894 sq.m. CFS: 3,390 sq.m. Office, control tower: 596 sq.m.
Gantry crane:	Single/twin: Single Height of span above quay: 9.2 m. Max. outreach: 36 m. Max. backreach: 7.5 m. Lifting capacity: 37.5 tons Spreader sizes: Capable of handling containers of ISO-IS & IC also Matson type Width of rail: 30 m.
Reefer plugs:	220 V×12
Illumination:	3 (25 Lux) 1 kW×28
Track scale:	Scaling maximum 50 tons
Straddle carriers:	3

Tachinoura No. 1 Container Terminal:

Total area:	128,720 sq. m.
Area per berth:	Two berth Sea depth: 12 m. under low water level (LWL) Length of wharf: 620 m. Marshalling yard: 96,665 sq. m. CFS: 800 sq. m.
Gantry crane:	Single/Twin: Twin (three cranes) Height of span above quay: 10.8 m. Max outreach: 38 m. Max. backreach: 11 m. Lifting capacity: 48.6 tons Spreader sizes: Capable of handling containers of 180-ISO and IC, also Matson type Width of rail: 16 m.
Reefer plugs:	220 V×68
Illumination:	4 (25 Lux)
Track scale:	Scaling maximum 50 tons
Straddle carriers:	13

Tachinoura No. 2 Container Terminal

Total area:	119,080 sq.m.
Area per berth:	Three berth Sea depth: 10 m. under low water level (LWL) Length of wharf: 555 m. Marshalling yard: 108,110 sq.m.
Gantry crane:	Single/Twin: Single (in the future 3 cranes) Height of spain above quay: 10.8 m. Max. outreach: 37.2 m. Lifting capacity: 48.1 tons Spreader sizes: Capable of handling containers of 180–ISO and IC, also Matson type Width of rail: 16 m.
Reefer plugs:	220 V × 40
Illumination:	4 (25 Lux)
Straddle carriers:	13 (common use with Tachimoura No. 1 Container Terminal).

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Average loading/discharging:

Bulk cargo:	Coal	50	t.p.h./gang/hatch	(dis)
	Iron ore	45–50	t.p.h./gang/hatch	(dis)
	Grain	50	t.p.h./gang/hatch	(dis)
Baled cargo:	Cement	50	t.p.h./gang/hatch	(load)
	Fertilisers	40	t.p.h./gang/hatch	(load)
	Grain	30–50	t.p.h./gang/hatch	(dis)
	General	40	t.p.h./gang/hatch	(load)
Steel cargo:	Under 20 ft. long	25–30	t.p.h./gang/hatch	(load)
	Over 20 ft.	15–20	t.p.h./gang/hatch	(load)
Scrap steel:	Pressed	20	t.p.h./gang/hatch	(dis)
	Ordinary	10	t.p.h./gang/hatch	(dis)
	Bulky and awkward	5	t.p.h./gang/hatch	(dis)
Lumber/logs:	Lumber	15–20	t.p.h./gang/hatch	(dis)
	Logs	30	t.p.h. gang/hatch	(dis)

2 shifts; 0800 to 1700 hrs. and 1800 to 0500 hrs. Normal working hours 0800 to 1700 hrs. Overtime work is possible by applying to Customs. No work can be arranged on 31st December and during New Year holidays (1st to 3rd Jan.). No work on 1st and 3rd Sunday of each month.

TANKERS: No slop discharge facilities. Mobil Oil Berth situated at Okubo, near Tanoura. In the vicinity of the berth, the current runs towards West nearly all the time. Maximum rate of current 3 knots. Vessels berthed during period that tide sets to West, in daytime only. Mooring berth consists of 1 oil pier (length 80 m. width 5 m.) and 2 dolphins. Two 10 in. pipes connected to vessel; discharge rate 1,000 t.p.h. (Fuel and diesel oil).

Also see "Max. Size".

BRIDGE: Kanmon Bridge – Clearance 61 m.

MEDICAL: No advance notice required unless urgent.

FRESH WATER: Good fresh water supplied from water barges to vessels lying at buoys and/or anchorage; from hydrants to those alongside wharves. The rate of delivery per hour is 20 – 40 tons from hydrant and 50 tons from barge.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

Bonded bunker oil is supplied by oil barges. The rate of delivery: 80 t.p.h. – 100 t.p.h.

CONSULS: Honorary British Consulate concurrent with Honorary Swedish Consulate.

REPAIRS: Mitsubishi Heavy Industries, Ltd. Shimonoseki; Daiki Industries Co., Ltd. Moji; Kitakyushu Iron Works, Tobata.

DRY DOCKS: Refer "Shimonoseki".

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommended request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.

REPATRIATION: Possible.

AIRPORT: Fukuoka Airport 2 hours by train and taxi.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police station (tel. 110) and Fire/Ambulance (tel. 119).

TELEPHONE: Telephone placed on board.

SERVICES: All services available, including hold cleaning and grain fitting.

SHORE LEAVE: Immigration Officials board vessel on her arrival in port to examine passports, discharge books and/or other equivalent travel documents and provide 72-hour landing passes for crew members and passengers. One copy each of Crew List and Passenger List are required by them. Providing ship's Agent with a Crew List beforehand will be a great help in expediting Immigration business on ship's arrival. When ship stays in port more than 72 hours, the landing passes may be extended every 72 hours on application. In the event that crew members without entry visas are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men, has been booked, or unless the ships to which they are to be transferred arrive in Japan within 5 days.

DEVELOPMENTS: Dredging work is being carried out for deepening the draft to 13 m. and extending the Pier Aprons. This construction, dredging and reclaiming is expected to be completed by 1990.

Tachinoura District: (See "Plan"). New land of 106 ha. will be reclaimed to be used for a public quay for foreign trade, a container terminal and for green parks. The 5 berths on the container quays, the 10 berths on the quays for foreign trade and the 29 berths on the quays for domestic trade will be improved.

Nishikaigan District: In order to accept larger vessels, port will reclaim the land of 20 ha. for the wharf, port roads and green parks. The 6 berths on the foreign trade quays will also be improved. Nishikaigan Wharf will thus be modernised for foreign trade.

Shinmoji District: (See "Plan"). New land of 245 ha. will be reclaimed to be used for a car-ferry base, rearrangement space for factories, green parks and a yacht harbour. The 2 quays for foreign trade, 2 quays for domestic trade and the 2 berths on the ferry quay will be improved.

Shirashima District: As a part of the national plan for the storage of petroleum, a storage base with a capacity of 5.60 million Kl. will be constructed on the ocean. This will be the first of its kind in the world.

AUTHORITY: Kitakyushu Port and Harbour Bureau, 2-7 Nishi-Kaigan, 1-chome, Moji-ku, Kitakyushu City, 801 Japan. *Tel:* (093) 321-5941, (093)-321-5941. *FAX:* (093) 321-5915.

MURORAN: 42.20 N 140.58 E

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare 2 Inward/Outward Declarations, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Arranged by Agent subject receipt of ETA advice at least 24 hours prior arrival. Pilot boards vessel about 1 mile outside breakwater. Not compulsory.

ANCHORAGES: Outside harbour limits: Subject to notice having been given to Authorities prior arrival.

Inside harbour limits: Permitted in any part.

MAX. SIZE: *Nissei Pier (Nippon Petroleum):*

Max. d.w.t.	*Max. LOA*	*Max. Safe Draft*
*50,000 (*30,000 g.r.t.)	230 m.	11.00 m.
100,000 Sea Berth	250 m.	15.00 m.

*For vessels of deadweight tons, gross tons and LOA in excess of above limits it is necessary to obtain entry permission from the Harbour Master, Pilot and the Refinery in advance.

Ore Carriers: Max. LOA, 300 m., max. draft, 16.0 m.

HEALTH: Vessels usually anchor at the sea area within a circle of radius 1,000 m. – directed 290° 4,200 m. from Daikokujima Lighthouse, where the authorities board and grant Free Pratique. Radio Pratique also available.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: 10 tugs, up to 3,200 h.p. Usually meet vessel near Inner Harbour breakwater. 10% additional charge if tug's lines used.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Berth	*Length (m.)*	*Depth (m.)*	*Permissible Draft (m.)*	*Capacity (d.w.t.)*	*Shore Cranes*

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent. Hospital facilities available.

TANKERS: See "Max. Size". N.P.R.C. Muroran Refinery. Discharge berth. About 25% of deadweight required in ballast.

Berth	*Product*	*Pipe-line*	*Discharge Rate*
50,000 d.w.t.	Crude Oil	2×12 in.	2,400 k/l
100,000 d.w.t.	Crude Oil	4×12 in.	8,000 k/l

DENSITY/TIDE: Density 1025. Rise and fall of tide about 4 ft.

FRESH WATER: Delivery at piers: Average rate about 40 t.p.h. Delivery by barge: Rate about 60 t.p.h.

FUEL: Available.

CONSULS: None.

REPAIRS: Only minor repairs available, but Hakodate dockyard able undertake all grades repairs.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

AIRPORT: Domestic flights only from Chitose Airport – 100 km. from Muroran.

TIME: GMT plus 9 hours. Permanent.

POLICE/FIRE: Police Muroran 2-5191; Fire Muroran 2-2111.

TELEPHONES: May only be connected on board at No. 2–2 West Pier.

SHORE LEAVE: Local Immigration offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

AUTHORITY: Port & Harbour Bureau, Muroran City, Mubanchi, Kaigan-cho 1-chome, Muroran City, Hokkaido *Tel:* (0143) 22-3191.

AGENT: Sub-agent of Dodwell & Co., Tokyo. Narasaki Sangyo Co. Ltd. 3–2, 3-chome, Kaigan-Dori, Muroran-shi, Hokkaido. Tel. Muroran (0143) 24-1314/6. Cable Address: Narasaki Muroran. Telex: 0987781/2 Nsmur J.

NAGASAKI: 32.45 N. 129.52 E. (See Plan)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
5 Crew Lists including Passport/Seaman's Book Numbers.
5 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory, but necessary unless Master well acquainted with locality. Pilot embarks in vicinity of Ioshima Lighthouse, Lat. 32° 43′ 20″ N., 129° 46′ 43″ E. Pilot available any time, subject to adequate notice (no VHF system). All communication with Pilot through Agent. Pilot boat carries International signals. "G" flag in daytime and "Morse" signals at night to call Pilot. In event bad weather Pilot boards at anchorage off Megami.

ANCHORAGES: Megami Anchorage located in Harbour Division No. 3 (within line between Kagenoo Lighthouse and West end of Shirogashima) 60 ft. depth and capacity of 3 vessels of 20,000 d.w.t. Safe anchorage.

Megami Anchorage, Harbour Division No. 6: Located in line between Onata Seto Beacon and Tan Saki, having ample space with 140 ft. depth, accepting 500,000 d.w.t. tankers.

RESTRICTIONS: Berthing: During daytime only, except for emergency purposes. Entering into anchorage at Megami is generally permitted anytime with Harbour Master's permit. Departure: No restriction from buoy or wharf with adequate notice, but no night departure from Oil Terminals, except Hayashikane Oil Terminals of Dinokubi and Kozaki.

MAX. SIZE: Max. permissible length 1,200 ft., breadth 120 ft., draft 15.0 m.

Tankers:

Berth	*Max. d.w.t.*	*Max. LOA*	*Max. Safe Draft*
Zengyoren (Kozaki Depot)	60,000	230 m.	13.00 m.
Hayashikane Oil Co. (Dinokubi Depot)	60,000	230 m.	13.00 m.
Mobil Oil Co. (Kibachi Depot)	22,000	200 m.	11.00 m.
Idemitsu Kosan (Kibachi Depot)	22,000	200 m.	11.00 m.
General Sekiyu (Otao Depot)	20,000	230 m.	15.00 m.

HEALTH:
(a) Quarantine Station: Sea area surrounded by the following lines:
1. From Senbonyama Beacon to Megami Beacon.
2. From Megami Beacon to Naginata Lighthouse.
3. From Senbonyama Beacon to Takaboko Island.

(b) Quarantine service is rendered from sunrise to one hour before sunset.

(c) Radio Pratique is effective.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.

TUGS: Tugs normally join vessel at anchorage for swinging and/or at berth for assisting vessel. Tugs available: 3×3,200 h.p. owned by Dokai Tug Co.; 3,500 h.p., 3,000 h.p., 2,880 h.p. and 2,400 h.p. owned by Kowa Kogyo Co.; 2,200 h.p. owned by Nishi Kyushu Marine Co. Ltd.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Wharf	*Length*	*Depth*	*Capacity*	*Crane*
Dejima	413 m.	9 m.	10,000 g.r.t. × 2 vessels	3 tons × 2 2 tons × 1

NAGOYA: 35.05 N. 136.53 E. (See Plan)

LOCATION: Situated at Northern head of Ise Bay. Harbour protected by breakwater 8,250 m. in length stretching from Chita Peninsula to bank of Kiso River at opposite side of harbour.

DOCUMENTS:

(a) Quarantine (only when arriving from a foreign port); 1 Maritime Declaration of Health, 1 Crew List, 1 Cargo Manifest, 1 List of Passengers (if any on board), Log Book and Registry should be readily available.

(b) Customs: 1 Declaration Inward/Outward with ports of Call, 1 Ship's Registry, 1 Last Port Clearance, 1 Store List including arms and narcotics, 2 Manifests of Cargo for Discharge (prepared by Agents), 1 Manifest of Through Cargo, 1 Crew List, 1 List of Passengers, 1 List of Crew's Baggage (only necessary if crew-members have to land personal effects ashore).

(c) Immigration: 1 Crew List, 1 Notification of Arrival, 1 Application for Shore-passes, 1 List of Passengers, 1 Notification of Departure (to be returned through Agents after sailing).

(d) Harbour Master: 1 Crew List, 1 Declaration Inward/Outward with Ports of Call.

(e) Port Authority: 1 Declaration Inward/Outward with Ports of Call.

PILOTAGE: Request Pilot and other services to JHY (Nagoya Port Radio Station) at least 5 or 6 hours prior on frequency 500 kHz. JHY keeps watch also on 480 kHz. Pilot station near No. 1 and No. 2 channel buoys at entrance of harbour channel (1). When wind over 15 m./sec. Pilot boards inside High Tide Breakwater. When very rough, Pilot taken on board East side of Kinjo Signal Station. Pilotage compulsory for vessels over 10,000 g.r.t. Pilot boat white painted with white and red funnel and letters "Pilot" on hull.

Shipmaster's Report: January 1985.

Pilotage for "Irago Suido", entrance for Yokkaichi-Nagoya Bay, has become compulsory since beginning of 1984.

Pilot to be arranged through the Agents and boards at Lat. 34° 31′ N., Long. 137° 04′ E.

ETA to be confirmed 3 hours before arrival at No. 1 Buoy by VHF, and also to Nagoyahoan, which is the controlling body for the traffic in the Irago Strait.

Shipmaster's Report: January 1987.

All vessels must enter and leave Ise Bay through Irago Suido Traffic Route. Pilotage is compulsory for all foreign vessels and for all vessels of 10,000 g.r.t. or over operating N.W. of a line bearing 050° from Hansu Hana Lighthouse (Lat. 34° 26.5′ N., Long. 136° 55.6′ E.) to the coast of Atsumi Hanto.

ANCHORAGES: Quarantine Anchorage, located outside High Tide Breakwater offers safe anchorage for vessels awaiting Pilot or quarantine service. Depth of this anchorage area ranges from 10 m. to 20 m. Sea bed silty clay.

MAX. SIZE:

	Berth	*Capacity* (d.w.t.)	*Depth* (m.)	*Length* (m.)
Tanker	Isewan Sea Berth	250,000×2	25.5	500
Ore Carrier	Nippon Steel Corp.	100,000×1	14.0	350
Container Ship	Nagoya Container Berth	35,000×3	12.0	872
Car Carrier	Toyota	65,000×1	11.0	250
General Cargo	Nisshin Seifun	50,000×1	12.0	150
	Toyo Grain	50,000×1	12.0	255
	Oji Seishi	50,000×2	12.0	227 249

HEALTH: Radio Agent for Free Pratique within 36 hours before arrival, advising full details of vessel and health conditions on board. When Free Pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case, of infectious disease within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO:

JHY (Nagoya Port Radio Station). Service area: 100 miles. Frequency: 500 kHz. Working frequency: 429.5 kHz.

International VHF (Nagoya Port Radio). Service area: 100 miles. Frequency: Channel 16, working Channels 12 and 20.

To be given prior arrival: Name; Capacity; Draft and length; Port of departure; Last port; Time of arrival at outer port; Time of passing Kamishima Signal Station; Grade of cargo; Grade of dangerous cargo (if any); Health of crew.

TUGS: Usually join at point where vessel directs course toward allocated berth. Tug's lines normally used without charge.

DENSITY: 1020.

FRESH WATER: Water supplied direct from pier.

CONTAINER HANDLING FACILITIES: Nagoya Container Berth Co. Berths R1, R2 and R3. R1 equipped with 22 m. Ro/Ro ramp. Total length 872 m. Depth 12.0 m. Capacity 3×35,000 d.w.t. 6 cranes available.

Also see "Berthing" – "Private Berths".

REPAIRS: All types of repairs possible. Repairs by Ishikawajima-Harima Heavy Industries Co. Ltd., Aichi Works.

DRY DOCKS: Ishikawajima-Harima Heavy Industries Co. Ltd., Aichi Works. (IHI), length 810 m., width 92 m. Capacity: Repair 161,000 g.r.t. build 95,000 g.r.t.

BULK HANDLING FACILITIES: Coal Pier (Area No. 10 Wharf) can accommodate ships up to 15,000 tons. Depth of water 10.0 m.

Nippon Steel Corp., has 1 berth for handling of iron ore with 350 m. long wharf and a depth of water 14 m., 2 berths for ore and/or coal with a 500 m. long wharf and a depth of 13 m., 1 berth for scrap iron with 140 m. wharf and a depth of water 13 m.

Grain handling facilities include Wharf No. 8, 185 m. long and 10 m. deep. Nisshin Wharf 150 m. long and 12 m. deep. Toyo Grain Wharf 255 m. long and 12 m. deep. Chita Futo Wharf 160 m. long and 12 m. deep.

Also see "Berthing".

Ferry Terminals: Nagoya Ferry Berth Co. has 3 berths. Total length is 663 m. with 7.5 m. depth. Capacity is 1×7,000 g.r.t. and 2×10,000 g.r.t.

MEDICAL: Hospitals conveniently located near port.

TANKERS: 62 oil tanker berths over 1,000 tons including 2 off-shore berths (Sea Berth) of depth: 25.5 m. for 250,000 ton tankers.

Isewan Sea Berth	500	25.5	250,000	Offshore Facility

Operator's Report: 1983.

Ise Bay Sea Berth (Discharging Terminal) is operated by Isewan Sea Berth Co., Ltd.

Terminal operates 24 hours per day, 7 days a week. Ships moored and unmoored daytime, weather or other circumstances permitting. Terminal will not be closed due to any holidays.

Depth around the Sea Berth is 25.0 m. Berth direction alignment is North (360°) – South (180°).

Location: Lat. 33° 55′ 26″ N., Long. 136° 44′ 36″ E.

Pilotage: Sea Berth requires Pilot for berthing and unberthing.

Anchorage: South 1, 2, 3, miles off from South end of Ise Bay Sea Berth.

Berthing: East berth port side alongside. West berth starboard side alongside.

Cargo Handling: Maximum rate 18,000 Kl/hr. Minimum pressure 10.0 kg./sq.cm. at manifold.

FUEL: All grades fuel available. Delivered by barge only.

CONSULS: The following countries are represented in Nagoya: Korea, Singapore and U.S.A.

GANGWAY/DECK WATCHMEN: Not compulsory but available.

OPENING/CLOSING HATCHES: Normally carried out by crew. When stevedores do this work charges are made.

CUSTOMS ALLOWANCES: For crew (per landing): 60 cigarettes, 1 bottle of spirit when sailing period exceeds one month, 2 bottles over 3 months.

For passengers: 3 bottles of spirit; 200 cigarettes or 50 cigars; 2 ounces of perfume.

AIRPORT: Nagoya Airport, 20 km. from Port. Flights available to Bangkok, Brisbane, Cheju, Denpasar, Guam, Hong Kong, Honolulu, Pusan, Saipan, Seoul, Singapore, Sydney, Taipei, Toronto and Vancouver.

HOLIDAYS: Cargo handling not arranged on December 31st, January 1st, 2nd and 3rd, and July 20th (Maritime Day).

TIME: JST (Japan Standard Time), 9 hours ahead of GMT.

POLICE/AMBULANCE/FIRE: Police 110, Ambulance 119, Fire 119.

TELEPHONES: Telephone can be arranged on board ships berthed at most wharves. For application call 652-7581. Telegram 115, Time 117, Weather 177.

IDENTIFICATION CARDS: Required.

DEVELOPMENTS: Main Channel 14 m. deep and 350 m. wide will be enlarged to 17.5 m. deep. Secondary Channel 10 m. deep and 300 m. wide will be dredged to 12 m. deep and 400 m. wide.

Anchorage area 9 m. deep at present will be deepened to 10 m.

Kinjo Pier Development: 26 berths with 10 m. will be constructed.

Nippon Kokan K. K. to build large graving dock at Tsu. Length of dock 250 m. Width of gate 220 m.

New deep water berth to be built on the South side of the container berth with length 350 m. and depth 14.0 m. Completion expected during the first half of 1991.

AUTHORITY: Nagoya Port Authority, 8-21, Irifune, 1-Chome, Minato-Ku, Nagoya, 455-91 Japan. *Tel:* (052) 661-4111/4. *Telex:* 04463816 NPAJ. *FAX:* (052) 661-0155. *Contact:* Yoshiro Haraguchi, Executive Vice-President.

AGENT: Sub-agent of Dodwell & Co.. Goyo Kaiun Kaisha Ltd. 3-4 Irifune 2-chome Minato-ku, Nagoya-shi Aichi-ken. Cable Address "Shipgoyoh Nagoya". Domestic Telex: 446-3113 Spgoyo J.

NAHA, Okinawa: 26.12 N. 127.40 E. (See Plan)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wines/spirits, camera, wrist-watch, radio, firearms/swords, etc. (Only at first port of call in Japan.)

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest, Cargo Manifest in transit using specific forms. Therefore Ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilot services compulsory. Pilot boards in position Lat. 26° 13′ 49″ N., Long. 127° 38′ 20″ E. International Pilot Signals used.

RESTRICTIONS: Vessels entering Naha Port are controlled by the limiting depth in the entrance channel of 11 m. Entry possible 24 hours.

MAX. SIZE: Length and beam not limited. Max. draft 11 m.

HEALTH: Radio Pratique possible. Formalities will be carried out at the Quarantine Anchorage.

RADIO: Recommended communicate with Agent through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. If specifically Westbound vessel to contact Choshi, and Northbound to contact Nagasaki Radio, respectively.

TUGS: 3 tugs available, 2,000 h.p. – 2,400 h.p.

BERTHING:

AGENT: Sub-agent of Dodwell & Co., Connell Bros. Company, Ltd., P.O.Box 57, Naha, Okinawa. Cable Address: Seabsea Naha. Tel: J 79822. Tel: (0988) 63-3991.

NAKANOSEKI: 34.00 N. 131.34 W. (See Plan)

SHIPMASTER'S REPORT: December 1988.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
5 copies of Crew List, including Passport Numbers.
3 copies of Lists of Ports of Call.
1 copy Stores List.
1 copy Through Cargo Manifest.

Please note that Nakanoseki was not the first Port of Call in Japan. If such is the case then at least one Declaration of Crew's Baggage and one Maritime Declaration of Health will probably be required.

Officials:

Customs:	Stationed in Nakanoseki.
Maritime Safety Office:	Stationed in Nakanoseki.
Quarantine:	Not stationed in Nakanoseki. Free Pratique is to be obtained through Tokuyama, Ube and/or Mutsure Quarantine Station prior to proceeding to Nakanoseki.
Immigration:	Officials stationed at Tokuyama Office.
Port Authority:	Stationed in Nakanoseki.

Port Status: Open Port (Mitajiri – Nakanoseki Port).

PILOTAGE: Available, but not compulsory.

According to information received by the vessel prior to arrival off the port, Harbour Pilot boards in the vicinity of a 250 m. radius circle (true bearing 159°, 1,590 m. from Nakanoseki Lighthouse), depth of water approximately 11.10 m. This boarding area is used for vessels with a deadweight in excess of 10,000 tons or if the LOA exceeds 150 m.

Information was also received from the vessel's Agent prior to arrival regarding the pilot boarding area. They advised me that the Pilot would board in position Lat. 33° 58′ N., Long. 131° 33′ E. (090°, 2.0 miles from Saba Shima Lighthouse). In my opinion this is the more practical of the 2 boarding areas as it keeps the vessel well clear of the numerous fish havens in the vicinity of the channel entrance and allows plenty of room to manoeuvre to seaward should the vessel have to drift and await the Pilot during periods of high winds.

If required, Inland Sea Pilotage service is available either from Sekisaki, Kobe, Hesaki, Tokuyama and/or Kadamatsu Pilot Station.

The Pilot boarded the vessel using one of the local tugs.

The Pilot advised me that during flood tide a current of up to 1.2 knots can be experienced across the channel entrance, flowing from East to West. During ebb tide the flow is in the opposite direction.

ANCHORAGES: There is no suitable waiting anchorage for vessels of this size (PCC/Lumber Carrier, 33,000 g.r.t.). Vessels are requested to adjust their ETA so that they arrive at the Pilot Station without having to anchor. I questioned the Pilot as to why it was not permissible to anchor in the vicinity of the Pilot boarding ground and he advised me that it was because of the numerous fishing havens in the area and objections received from local fishermen.

Should the vessel be compelled to anchor for any reason, the Pilot advised a position 138°, 3,000 m. from Ryugu Saki Light. Care must be taken when anchoring in this position due to the close proximity of underwater cables.

RESTRICTIONS: Berthing is carried out between sunrise and sunset. Unberthing is carried out between sunrise and one hour before sunset.

MAX. SIZE: Dependent on height of tide. Vessel must have 10% under keel clearance in the approaches, where the depth of water is 10.50 m.

VHF: During the early morning approach to the port the vessel was unable to contact the Pilot by VHF.

TUGS: Available as required. Stationed at Tokuyama Port. This vessel used 2 tugs for berthing and 1 tug for unberthing. Vessel is equipped with bow thruster and was berthed starboard side to, head out.

BERTHING: Nakanoseki Wharf No. 3 (Owned/Controlled by Yamaguchi Prefecture).

The berth is used exclusively for Mazda vehicles/CKD but occasionally for Log/Plant carriers.

Depth of water in approaches:	10.50 m.
Depth of water alongside:	12.00 m.
Length of Wharf:	240 m.
Side alongside:	Basically port side to, but starboard side to is also acceptable.

The berth is very exposed to the W/N.W. and strong winds blowing from this direction could prove to be a problem for high-sided PCC type vessels.

STEVEDORES: For loading Mazda cars/CKD.
Nippon Express Company Limited, Hofu Branch.
Mazda Logistics Service Company Limited, Hofu Branch.
Naigai Unyu Company Limited, Hofu Branch.

Loading Rate: Approximately 80 units per gang hour, subject to stowage.
Labour: Basically 3 or 4 gangs, but a maximum of 6 gangs are available.

FRESH WATER: Available from shore hydrant, rate approximately 10 tonnes per hour. The basic charge is 275 Yen per tonne. Barge supply is also available, but this must be brought up from Tokuyama Port.

GENERAL: *Charts:* There is no large scale BA. Chart of the area available at present. For the purpose of our visit, Japanese Chart No. 1134 was purchased.

NAMIKATA: 34.07 N. 132.55 E. (See Plan)

Port Status – Closed Port.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station.

Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilot obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth.

1. Wadamisaki. (In this case Pilots compulsory if over 10,000 g.r.t.) Position: Lat. 34° 38′ N., Long. 135° 11′ E. Cable Address: "Anjin Kobe".
2. Sekisaki. Position: Lat. 33° 13′ N., Long. 131° 54′ E. Cable Address: "Anjin Saganoseki".
3. Hesaki. Position: Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E. Cable Address: "Anjin Moji".

ANCHORAGE: No anchorage at Namikata.

RESTRICTIONS: Mooring and unmooring daytime only.
MAX. SIZE: Oil tankers: 125,000 d.w.t. Gas tankers: 67,000 d.w.t.
HEALTH: Closed port. Vessels should obtain Pratique at Matsuyama.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio.
TUGS: Join vessel off Namikata, always using tug's line without charge. 2 to 4 tugs are required for berthing, depending on size of vessel.
BERTHING: Berthing time will be notified by ship's Agent by radio.
MEDICAL: No advance notice required unless urgent.
TANKERS: *Namikata Terminal Co. Ltd.* only. Located approximate position Lat. 34° 07′ 07″ N., Long. 132° 54′ 32″ E. See "Max. Size".
FRESH WATER: Available by shore line. Rate of delivery: 20 t.p.h.
FUEL: Not available.
REPAIRS: Not possible.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
REPATRIATION: Possible. Nearest Immigration Office situated at Niihama.
AIRPORT: Nearest at Matsuyama and Takamatsu.
TIME: GMT plus 9 hours.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.
TELEPHONE: No facilities for placing telephones on board.
SHORE LEAVE: Local Immigration Officer issues shore pass.
GENERAL: As this port is a closed port, the undermentioned procedures required to obtain special permission to enter from Shikoku Maritime Bureau:

Usually vessels call at Matsuyama to obtain special permission for entering closed port at Namikata, by paying the charge at the same rate as tonnage dues; the above procedures will be undertaken by Agent. No quarantine available, the nearest Quarantine Station at Matsuyama. No Immigration Office at this port (Officials come from Niihama).

The above procedures of Quarantine/Customs will be undertaken by Namikata Agent.

SHIPMASTER'S REPORT: May 1987.
Pilotage: Inland Sea Pilot from Seki Saki inwards who also undertakes berthing/unberthing, etc. Inland Sea can be traversed by day or night although daylight is preferable.

Pilot should be ordered in advance, telexes sent to "Oita Kyushu" via Moji MSA Radio and confirmed by VHF when within range of Oita Radio.
Restrictions: Berthing/unberthing daylight only when current is less than 0.5 knots for LPG tankers and 1.0 knots for other tankers.

Vessels must proceed to Matsuyama Anchorage for Immigration clearance and to await suitable berthing conditions.
Anchorage: No anchorage off Namikata, waiting vessels must anchor off Matsuyama.
Obstructions: There is a 10 m. patch just North West of Kazitori-No-Ha.
Tugs: 3 tugs used for berthing and 2 tugs used for unberthing with the usual guard tug in attendance inwards and outwards from Matsuyama and whilst vessel alongside.
Berth: Berth is of modern construction and design. Vessels usually berth starboard side to with 4 head/stern lines, 2 breast lines and 2 springs fore and aft. Arms: Liquid 2 × 12 in. ASA. Vapour return line 1 × 8 in. ASA. Discharge rate 1,800 tonnes/hour. Shore gangway provided. *Fuel:* No bunkering allowed at Namikata, however can be supplied off Matsuyama where additional tonnage dues must be paid.

AGENT: Kaiko Tanker Co. Ltd., Namikata Office. Address: Miyazaki-600, Namikata-cho, Ochigun, Ehime, Japan. Tel: 0898-52-2009. Telex: 5845554. FAX: 0898-52-2367. Cable Address: Kaiko Imabari.

Kaiko Tanker Co. Ltd., Matsuyama Office. Address: 6-12, 1-chome, Nakasuka, Matsuyama, Japan. Tel: 0899-51-0733. Telex: 5842011. FAX: 0899-51-0359. Cable Address: Kaiko Matsuyama.

NAOETSU: 37.11 N. 138.14 E.

DOCUMENTS:
- 1 Inward Declaration of Vessel.
- 1 Cargo Manifest.
- 1 Through Cargo Manifest.
- 1 List of Provisions and Stores.
- 1 List of Tobacco and Personal Effects.
- 7 Crew Lists (preferably airmailed in advance).
- 2 Passenger Lists.

PILOTAGE: Pilot embarks at Quarantine Anchorage to take vessel directly to berth during daytime. All transmitting and receiving through Niigata Radio Station (call sign JCF, Type of Wave: 438454) or Choshi Radio Station and/or Nagasaki Radio Station. Cable Agent 1 week's notice of ETA and accurate ETA 24 hours before arrival, thereafter advising any change in arrival time. No pilot boat. Pilot uses tug-boat.
ANCHORAGES: Half-circle drawn at a point of Lat. 37° 11′ 31″ N., Long. 138° 13′ 59″ E. (lighthouse) with radius 1,600 m.
RESTRICTIONS: Berthing and unberthing daytime only.
MAX. SIZE: LOA 160 m. draft 9.50 m. in Summer, and 9.00 m. in Winter.
HEALTH: Radio Pratique available. Formalities will be carried out at the anchorage. Quarantine Station 321° – 2,200 m. (Lat. 37° 11′ 45″ N., Long. 130° 14′ E. 700 m. radius) from Naoetsu Lighthouse.
RADIO: Niigata Radio Station: JCF. Nagasaki Radio Station: JOS. Choshi Radio Station: JCS.
VHF: Channel 16.
TUG: Normally joins vessel at entrance of port. Ship's lines used. One tug 750 h.p. One tug 1,800 h.p. will be brought from Niigata when required.

BERTHING:

Berth	*Length* (m.)	*Depth* (m.)	*Permissible Draft* (m.)	*Capacity* (d.w.t.)	*Remarks*

STEVEDORES: ETA, draft and hatch cargo quantities to be advise before arrival. Main bulk commodities: unloader crane (1) 150 t.p.h. tower cranes (3) 120 – 130 t.p.h. and equipment.
MEDICAL: No notice required except in emergency, and attendance o Sundays/holidays.
DENSITY: 1023 – 1025.
FRESH WATER: Available from shore. 30 t.p.h.
FUEL: Domestic oil is available. Bonded oil will be brought from Moji o Hakodate, with sufficient advance notice.
CONSULS: None.
REPAIRS: Minor repairs only.
GANGWAY/DECK WATCHMEN: No professional watchmen availabl
OPENING/CLOSING HATCHES: Stevedores if Owner guarantee payment of operation charges.
CUSTOMS ALLOWANCES: Tobacco: Each crew member allowed t retain for his private use 200 cigarettes, 50 cigars, 250 grams of tobacc etc. Wine/and/or Spirits: 1 bottle of liquor, to last 1 week.
REPATRIATION: Necessary documents to be submitted to Immigratio and Customs Authorities in Naoetsu.
AIRPORT: Niigata. 2.5 hours by train. One flight per day to Tokyo.
TIME: GMT plus 9 hours. Permanent.
HOLIDAYS: No work 31st December and 1st, 2nd and 3rd Januar Subject to gangs on other holidays.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.
TELEPHONE: No facilities for placing telephones on board.
SERVICES: Technicians for repair and/or adjustment of radar o wireless despatched from Niigata or Tokyo. Hold and/or tank cleanin operations by shorehands available, however gangs are from Niigata.
SHORE LEAVE: Crews allowed ashore within limit of Johetsu City.
IDENTIFICATION CARDS: Passport and/or Seaman's Book require
DELAYS: Due to port congestion.
GENERAL: During Winter and bad weather, hire of nylon rop (100 mm.) desirable in order to avoid hull damage. Rope owned b Naoetsu Agency Association. Charge made for use.
AUTHORITY: Naoetsu Port Administration Office, 6-8, Minato-machi 1-chome, Johetsu City, Niigata Pref. *Tel:* (0255) 43-4167.

AGENT: Sub-Agents of Dodwell & Co. Ltd., Tokyo. Niigata Rinko Kairik Unso K.K. 9-11, 2-Chome, Minato-cho, Johetsu-shi, Niigata-ken Tel: Naoetsu (0255) 43-4207. Cable address: "Rinko Naoetsu" Telex: 03252-468 Naoetsu Kaiun Unso.

NAOSHIMA: 34.28 N. 133.58 E.

PILOTAGE: Not compulsory. Inland-sea Pilots are available at Wada Misaki or Hesaki (off Moji).
RESTRICTIONS: Daylight berthing and unberthing only.
HEALTH: Radio Pratique not available. Vessels usually anchor a Wada-Misaki (off Kobe) or nearest quarantine port, where the authoritie board and grant Free Pratique.
TUGS: None. Tugs from Mizushima are available.
BERTHING: Mitsubishi Metal Wharf: Length 180 m. Depth 10.0 m Max. draft 10.0 m. Max. size 20,000 g.r.t.
FRESH WATER: Water barge will be brought from Okayama, whe required (1×50 tons).
FUEL: Domestic oil is available. Bonded oil will be brought from Kobe when required.
REPAIRS: Small repairs can be undertaken.
AUTHORITY: Port & Harbour Dept., Kagawa Pref., 1-10, Bancho 4 chome, Takamatsu City, Kagawa Pref. *Tel:* (0878) 31-1111, 62-365 34-9302.

AGENT: See "Uno".

NIIGATA: 37.54 N. 139.04 E.

DOCUMENTS:
- Ship's Register.
- Last Port Clearance.
- 3 Crew Lists including Passport Numbers.
- 3 Passenger Lists.
  - 1 Stores List.
  - 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, came wrist-watch, radio, firearms/swords, etc. (only at first port of cal Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory. Pilot embarks at Quarantine Anchorage (Lat. 37° 58′ N., Long. 139° 03′ E.) to take vessel directly to berth during daytime. All transmitting and receiving normally effected through Niigata Radio Station (call sign: JCF, Wave: 438454), or Choshi Radio Station and/or Nagasaki Radio Station. Radio ETA 1 week's notice and accurate ETA at least 24 hours before arrival. Notify any changes to ETA.

ANCHORAGES: Anchorage is a rectangle located N.W. of lighthouse at West Breakwater at a distance of 1,600 m. covering an area of about 160,000 sq.m. Lat. 37° 57′ 37″ N., Long. 139° 04′ 00″ E. Depth: 18-24 m. Bottom: fine sand.

Safe Anchoring: Warning and instructions have been given by Niigata Harbour Master to secure safety of vessels anchoring off Niigata Port especially in Winter season, when the port is greatly affected by N.W. gale.

1. Vessels anchoring outside the breakwater within the Harbour limit must maintain their position West side of N.W. line drawn from Niigata Lighthouse (Fl. R. sec. 13 m. 12 miles) and must avoid the vicinity of the mouth of the Shinano River or Showa Oil Co.'s Sea-berth (which is connected with shore facilities by submerged pipe-lines).

2. Vessels anchoring outside the breakwater must maintain their positions in the sea area where the depth of water is 25 m. or more. This rule does not apply to vessels waiting for quarantine inspection and/or Pilot. Vessels under 10,000 gross tons should also keep a sufficient distance from shore.

3. Vessels over 10,000 gross tons with dangerous cargoes or oil anchoring outside the breakwater must advise their positions to the Harbour Master by radio.

4. Vessels anchoring outside the breakwater must keep a bridge watch unless they are equipped with radio. (According to the governing law, any vessel staying outside the breakwater is treated as a navigating vessel even if she is within the harbour limit).

5. Vessels waiting at anchorage must keep watching weather forecast. In case bad weather is reported, the following necessary actions should be taken; namely, officers on duty, confirmation of ship's position, engines on standby, the use of extra anchors, sheltering, etc.

6. In case a vessel requires shelter from N.W. wind in Winter, it is suggested that such vessel proceed to Sado Island and anchor off Morotsu Port, Akadomari Port, Sado Island South Coast or Sado Channel.

7. When approaching the entrance of the port, a vessel can be drawn too close to the East Breakwater or the shallows existing East of the port entrance by force of N.W. gale, N.E. current and river flow. Therefore, vessel must enter from N.W. of Niigata Lighthouse, approaching from Quarantine Anchorage and alter course as West Breakwater Lighthouse and Niigata Port Light Beacon are seen in a line. It is dangerous for vessel to anchor at any areas East of Shinano River.

8. Prior to arrival, Japanese Charts No. 1155A, 122 and 1197 or substitutes should be provided on board. Charts 1181, 1198 may also be needed.

RESTRICTIONS: Berthing and unberthing daytime only. Entry and/or departure at time authorised by Port Authority. Shinano Fairway from port entrance to Rinko Wharves, depth 11 m. to 12 m.

MAX. SIZE: *Tankers:*

Berth	*Max. d.w.t.*	*Max. LOA*	*Max. Safe Draft*
Nisseki Dolphin	36,000	207 m.	10.60 m.
SBM (Sealine Buoy)	130,000	—	17.00 m.
Rinko "B" Pier	60,000	210 m.	10.60 m.
Rinko "C" Pier	60,000	210 m.	10.60 m.
Rinko "E" Pier	25,000	165 m.	10.00 m.
East 1 Wharf	45,000	220 m.	11.80 m.
East 3 Jetty	100,000	260 m.	11.80 m.

HEALTH: Radio Pratique available. Vessels usually anchor at the point Lat. 37° 58′ N., Long. 139° 03′ E., where the authorities board and grant Free Pratique.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. Westbound vessel to contact Choshi, and Northbound to contact Nagasaki Radio respectively. (Also see "Pilotage".)

TUGS: Tugs normally join vessel at position of fairway. Towing operations are done by ship's lines. 7 tugs, 150 h.p. – 1,800 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Niigata:

Berth	*Max. d.w.t.*	*Max. LOA (m.)*	*Max. Draft (m.)*	*Remarks*

Wharf "G"	10,000	180	7.50	Fertilisers

*Winter, 15th November – 31st March; Summer 1st April – 14th November.

**Concentrates (copper, zinc and lead) also handled.

Higashi: West Pier, depth alongside 12 m.

CRANES: 1×40 ton container crane.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: Slop (residues): No discharge facilities.

LNG Berth recently completed.

Berth	*Product*	*Shoreline*	*Discharge Rate (t.p.h.)*
Nisseki Dolphin	Crude Oil	1×8″, 1×10″	700/1,500
	Fuel Oil	1×8″, 1×10″	600/1,000
SBM (Showa)	Crude Oil	1×24″	3,000
Rinko "B"	Crude, Fuel	2×10″	600/1,500
Rinko "C"	Crude, Fuel	2×10″	800/1,000
Rinko "E"	Crude, Fuel	1×8″	600
East 1 Wharf	Crude	3×12″	2,000
	Fuel	3×12″	1,800
East 3 Jetty	Crude	1×28″	5,000
	Fuel	1×28″	2,000

DENSITY: Average in Rinko Wharves (approx.) 1006. Average in Municipal Wharves (approx.) 1005.

FRESH WATER: Available from all wharves. Cannot be supplied at anchorage during the Winter season.

FUEL: Domestic oil is available. Bonded oil will be brought from Hakodate or Moji with 7 days' advance notice.

CONSULS: None.

DRY DOCKS: No facilities for ocean going vessel.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.

REPATRIATION: Possible.

AIRPORT: 5 km. Round service Japan Domestic Air Line.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAY: 22nd August.

POLICE/AMBULANCE/FIRE: Water Police 44-2269; Ambulance Station 119; Fire Station 119; Main Police Station 110.

TELEPHONES: No facilities for telephones on board available.

SERVICES: Hold cleaning by longshoremen available.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

REGULATIONS: Oil carriers can receive bunker by oil barge and/or shoreline except when discharging cargo.

DEVELOPMENTS: An additional container berth will be available in 1992.

AUTHORITY: Niigata Port Administration Office, 6-3, Ryugashima 1-chome, Niigata City. *Tel:* (0252) 47-9131.

*To be prepared by Master before arrival. Others to be made up by Agent with assistance of Master on arrival.

Master to telegraph ETA and Crew's Health Condition directly to Quarantine Niihama before arrival.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

Inland/Sea Pilotage: Pilotage at Kurushima Channel/Bisan-Seto/Akashi Channel is compulsory for ships over 10,000 g.r.t. Pilot boarding position unchanged, namely, Sekisaki/Hesaki/Wada, even if ship requires only foregoing area's service.

ANCHORAGES: Approved anchorage area just inside harbour limit. A circle drawn at a point Lat. 33° 59′ 18″ N., Long. 133° 16′ 31″ E. with radius of 430 m. where holding ground good and depth of water 12 m. – 15 m. No buoy moorings. Harbour protected by breakwater.

TIDE: (Springs) Max. 263 cm.; min. –9 cm. (Neaps) max. 182 cm.; min. 136 cm.

RESTRICTIONS: Pilot does not take vessel in during darkness. Vessel has to wait if depth during LW 8.50 m. is insufficient to pass channel.

MAX. SIZE: See "Berthing".

HEALTH: Quarantine Inspectors go aboard during day. Master to keep waste until Quarantine inspected in event of any suspected disease or fever on board after entered Japan.

RADIO: Choshi Radio, Nagasaki Radio.

TUG: Joins vessel at Quarantine Anchorage or Section II, always using tug's lines without charge. "Niihama Maru" 700 h.p. If more powerful tugs required, can be obtained from Matsuyama or Mizushima.

BERTHING: Harbour Pilot operates during day.

Berth	*Length*	*Depth*	*Berthing Restrictions*
"A"	Anchorage	8.0 m.	Draft 8.0 m. LOA 120 m.

Juki	85 m.	5.0 m.	Draft 5.0 m. LOA 100 m.

Berth A: Public berth for general purposes, no buoy, just anchorage. However, vessel anchoring at this berth sometimes ordered by port authority to shift in order vessel approaching or leaving berth No. 4 may pass.

Berth B: Vessel moors stern to wharf with 2 anchors about 4 shackles each.

CRANES:

Berth "B3"	2× 5 tons
Berth "K4"	3× 5 tons
Berth "K6" 2×25 tons	One 250-ton and one 50-ton floating crane.

MEDICAL: Hospitals and medical facilities available weekdays only.

TANKERS: No facilities for oil carriers.

DENSITY: Entrance 1023 (rate of tide, 1 knot); channel 1022; anchorage 1021.

FRESH WATER: Water is available from the berths "K-4" and "K-6" only after normal working hours – 10 t.p.h. Water is not available from any other berths. A 70 ton barge is available, it can supply 300 tons per day.

FUEL: Bunkers in bond available from main ports or oil stations in tranship. 2 days' notice.

CONSULS: None. Nearest in Kobe.

REPAIRS: Minor repairs only. Main engine piston overhauling possible.

DRY DOCKS: None. For nearest see "Matsuyama".

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Stevedores.

LOADING/DISCHARGE RATES:

Average rate of Discharging Cargo:

Alumina	150 – 170 t.p.h. by pneumatic apparatus
Anthracite coal	50 – 70 t.p.h. by ship's gear
Bauxite	700 – 800 t.p.h. by 2 shore cranes
Chemical Oil	200 – 250 t.p.h. by ship's pump
Copper Concentrates	70 – 100 t.p.h. by ship's gear 130 – 150 t.p.h. by shore crane
Logs	600,000 – 800,000 BFM/day by ship's gear
Nickel Concentrates	70 – 90 t.p.h. by ship's gear 130 – 150 t.p.h. by shore crane
Phosphate	70 – 90 t.p.h. by ship's gear
Potash	40 – 60 t.p.h. by ship's gear
Salt in bulk	50 – 70 t.p.h. by ship's gear 80 – 100 t.p.h. by shore crane

Average Rate of Loading Cargo:

Alumina in bags	50 – 60 t.p.h. by ship's gear
Alumina in bulk	170 – 180 t.p.h. by pneumatic apparatus
Ammonium Nitrate	50 – 60 t.p.h. by ship's gear
Anode Paste	100 – 120 t.p.h. by shore crane
Fertiliser in bags	50 – 60 t.p.h. by ship's gear
Fertiliser in bulk	80 – 100 t.p.h. by ship's gear

CUSTOMS ALLOWANCES: Only 50 cigarettes to take ashore. No spirits.

CARGO GEAR: Valid Cargo Gear Certificate sometimes required b stevedores when cargo gear maintenance appears to be poor.

REPATRIATION: Arranged by Agent.

AIRPORT: None. Nearest at Matsuyama and Takamatsu. All Nippon Airways – 11 flights per day to Osaka and one to Tokyo.

TIME: GMT plus 9 hours. Permanent.

HOLIDAYS: National Holidays: New Year's Day, January 1st; Adult's Day, January 15th; Foundation Day, February 11th; Vernal Equinox Day, March 21st; Emperor's Birthday, April 29th; Constitution Memorial Day, May 3rd; Children's Day, May 5th; Respect-for-age Day, Septembe 15th; Autumnal Equinox Day, September 24th; Physical Culture Day, October 10th; Culture Day, November 3rd; Labour Thanksgiving Day, November 23rd.

Local holidays: New Year's Day (Lunar Calendar), January 30th; May Day, May 1st; Memorial Day of the Sea, July 20th; Bon Festival (Luna Calendar), August 8th; Autumnal Festival, October 16th-18th.

Vessels may enter/leave *except* January 1st, and cargo work can be done as usual at overtime rates on above national/local holidays *excep* for *Niihama* (December 31, January 1, 2, 3, and October 17, 18).

Vessels may enter/leave port at overtime rates and cargo work wi be done up to 1700 hrs. (daytime) against surcharges.

No cargo will be handled *Niihama* (December 31, January 1, 2, 3 and October 17, 18). No ship's movement (as well as cargo handling can be done on January 1st.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Crew allowed ashore with pass.

GENERAL: *Quarantine:* Hiroshima Quarantine Office, Niiham Detached Office, Nishibara-cho, Niihama, Tel: Niihama 32-3966.

Customs: Kobe Customs, Niihama Branch Customs, Nishibara-cho Niihama, Tel: Niihama 32-3405.

Immigration: Niihama Port Station, Takamatsu Immigration Office Nishibara-cho, Niihama, Tel: Niihama 32-2672.

Maritime Bureau: Sanbashi-dori, Niihama, Tel: Niihama 32-2855.

Maritime Safety Agency: Nishibara-cho, Niihama, Tel: Niihama 33-0055

Emergency Procedure: No Harbour Master radio available, therefor cable Agent. Telephone sub-agent since one person will be i attendance even during night, who in turn will contact person in charge

Salvage: No salvage tug stationed, nearest from Kure.

DEVELOPMENTS: Sumitomo Chemical Co. Ltd., Kikumoto Works intend to make another Bauxite berth available for large size vesse (suitable for vessels up to 50,000 d.w.t.).

Sumitomo Metal Mining Co. Ltd., Niihama reclaiming land adjacent t Western harbour limit of Port of Niihama to construct additional refiner for producing copper with a berth for 25,000 ton vessel to discharg copper concentrate. Final date of completion unknown.

AUTHORITY: Niihama Marine Safety Agency, Nishibara-Cho, Niihama *Tel:* (0897) 32-3405. *Contact:* Port Captain.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Sumitom Warehouse Co. Ltd., 2-5, Sobiraki-cho, Niihama-shi, Ehime-ken. Cabl Address: Sumitomosoko Niihama. Domestic Telex: 0584-4432. Te Niihama (0897) 37-1101.

NISHIHARA (Nakagusuku Wan), Okinawa: 26.14 N. 127.50 E. **(See Plan**

LOCATION: The Nansei Sekiyu Ltd. Refinery is located in Nishihar Town on the East coast of Okinawa, towards the Southern end o Nakagusuku Bay. Also see "Max. Size".

DOCUMENTS:

3 Manifests
6 Crew Lists
2 Passenger Lists
2 Stores Lists
2 Personal Effects Lists
2 Ports of Call Lists
(voyage memo...past 3 months)
2 Transit Cargo Manifests
2 International Health Declarations
Ship's Register
International Loadline Certificate
Safety Equipment Certificate
Derat Certificate
Last Port Clearance.

Each Crew member will be issued with an Official Pass, which mu be returned prior to vessel sailing.

PILOTAGE: Normally vessels will be expected to enter Nakagusuku Bay through entrance marked Tatsu Kuchi, and pick up Berthing Master inside bay – South of Tsuken Jima. Inside bay Berthing Master requests that vessel keeps South of buoy marking Chikunigaa Shoal. Berthing shall be carried out at day time only.

A safe convenient pilot ladder is to be provided for the Berthing Master. Berthing Master stays aboard vessel throughout discharge, except vessel berthed at the pier.

ANCHORAGES: Navigation and anchorage in the waters near the NSS Product Pier and Crude Berth will in so far as possible be restricted to those ships directed into these waters by Berthing Master. In the interests of safety, ships will not enter the restricted area unless so directed by Berthing Master.

MAX. SIZE: For crude vessels a single point mooring (SALM – Single Anchor Leg Type Mooring), capable of handling vessels from 90,000 d.w.t. to 270,000 d.w.t. is established in approximate position Lat. 26° 14′ N. Long. 127° 50′ E., about 2.5 miles offshore.

Products are shipped from a pier connected to the shore – the pier has 2 berths, one for vessels up to 97,000 d.w.t. and one for small vessels up to 4,000 d.w.t.

PRATIQUE: Port Officials will board the vessel after berthing.

RADIO: Crude vessels discharging at Nishihara should report ETA at pilot station (Lat. 26° 13′ N., Long. 127° 52′ E.) 72, 48, 24 and 12 hours prior arrival. Berthing instructions and time of Pilot boarding will be relayed by a telegraph appointed Agent. Refinery has no VHF radio.

Weather reports essential – particularly during typhoon season. Naha Radio – JCX medium wave 500 kHz. Traffic lists broadcast at odd hours GMT. Short wave 6470 kHz, traffic lists broadcast at even hours GMT.

TUGS: 2 tugs and a launch are available for assisting with mooring and unmooring. The Berthing Master in consultation with the Master will decide the number of tugs required for the berthing operation and for standby during the time at berth.

CRUDE BERTH: Single buoy mooring with vessel secured by 2 heavy polypropylene lines from buoy. Lines connected to chains through bow mooring lead and secured inboard. Chains secured direct to Brega Pin or by double mooring wire or mooring rope (polypropylene 8 in. or over) to bollards, port and starboard side of forecastle head. There is 72 ft. of water at buoy position. Vessels may remain in berth in winds of up to 50 m.p.h.

Floating Hoses: 2×24 in. into 2×20 in. connected to 2×16 in. are connected on vessel's port side. There is a 42 in. line from buoy to shore. The maximum pumping rate is 75,000 b.p.h.

PRODUCT PIER: A 110° – 290° orientated pier allows tankers to approach the berth in a ballasted condition in either of 2 opposite directions. Vessels of 4,000 d.w.t. size and above will be handled at Berth No. 1 and smaller vessels at Berth No. 2

The water depth at the pier is approximately 47 ft. The extreme tidal variation is +7.9 ft. to −1.0 ft. and maximum storm tide will add approximately 3 ft. The maximum current is less than 1 knot.

Berth No. 1 is equipped with 1×16 in. loading arm for clean products and 2×16 in. loading arms for dark products. Each of these all-metal hydraulically controlled loading arms is fitted with a remotely operated coupling device to connect to a nominal 10 in. ASA, DIN or BS flanged connection without bolting.

Berth No. 2 is equipped with 2×6 in. loading arm for dark and clean products. These arms are part metal, part hose and are fitted with flanges to be bolted to a nominal 6 in. ASA, DIN or BS flanged connection.

Each berth is provided with a gangway.

Vessels will deballast through the loading arms into a 24 in. ballast water line leading to refinery tankage. Under no circumstances should vessel discharge any ballast water directly into the bay.

Fire protection at the pier consists of a foam concentrate tank and proportioning pump, a fire water pump and distribution system, fixed combination water-foam monitors and air-foam play-pipes.

OIL POLLUTION WARNING: We wish to alert all vessels entering this port of the extreme sensitivity on the part of the community and governmental authorities regarding any incident involving oil pollution of the seas. Any oil spill, regardless of size, is considered a criminal act, and offenders are dealt with accordingly. We urge all vessels to make complete pre-arrival checks for cargo and ballast system tightness, and to strictly adhere to all pollution prevention practices, procedures and policies while discharging or deballasting at this port. Officers and crews should be extremely alert during all phases of vessel operation for potential oil spill risks and seek assistance from shore representatives should any unusual risk arise.

TIME: GMT plus 9 hours. Summertime is not used. All ETAs and other messages should be made in local time.

SHORE LEAVE: Shore leave is permitted – launch service may be arranged but is at vessel's expense.

No person will be given permission to enter the refinery unless they are in the microbus which will be provided by ship's Agent.

AUTHORITY: Nansei Sekiyu K.K., 858 Aza Onaha, Nishihara-Cho, Okinawa, 903-01 Japan. Postal Address: P.O.Box 525, Naha, Okinawa, 900-91 Japan. *Tel:* 098945-3332.

Captain of the Port: Kin-Nakagusuku, 46 Yagihamabara, Nakagusuku-Son, Okinawa, Japan. *Tel:* 098895 – 4999.

OFUNATO: 39.03 N. 141.44 E. (See Plan)

DOCUMENTS:
- Ship's Register.
- Last Port Clearance.
- 3 Crew Lists including Passport Numbers.
- 3 Passenger Lists.
- 1 Stores List.
- 1 Declaration Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory but recommended as many fishing obstructions in the harbour. Pilot boards about two miles from entrance of Ofunato Bay, Lat. 39° 00.2′ N., Long. 141° 45.5′ E. but for vessels less than 10,000 g.r.t. Pilot boards in Quarantine Anchorage where depth 35 m. (but not after dark). Master must radio vessel's Agent of ETA 24 hours in advance, because neither telegraphic address of pilot station nor VHF available.

ANCHORAGES: Not suitable in stormy weather. Depth of water at anchorage 30 m. to 40 m. Quarantine Anchorage located between radius 500 m. of Lat. 38° 59′ N., Long. 141° 48′ E.

RESTRICTIONS: Depth of water at entrance of passage 14 m., oil tanker's draft restricted to 9.0 m. and draft of log and coke carriers restricted to 8 m. Depth of water alongside wharf 9 m. at mean level.

MAX. SIZE: *Tankers:* Kamei Oil Piers: Max. d.w.t. 35,000. Max. LOA, 210 m. Max. Safe draft 9.0 m.

Log and Coke Carriers: Max. LOA 180 m., max. draft 8.0 m. Tidal range 1 m. – 1.4 m.

HEALTH: Radio Pratique available. Formalities carried out at the anchorage.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to contact Choshi and North bound to contact Nagasaki Radio respectively.

TUGS: Small tugs 800 h.p. and 600 h.p. available. Large tugs (2,400 h.p.) can be arranged from Kamaishi with advance notice, they usually join vessel about 400 m. in front of jetty and discharging wharf. Ship's lines used if necessary.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: One tanker berth. Product handled, Diesel Oil. Shoreline, 8″×2. Discharge rate, 800 t.p.h.

DENSITY: Average density 1020.

FRESH WATER: Available from shore. Supply 10 t.p.h. – 15 t.p.h.

FUEL: Domestic oil is available. Bonded oil will be brought from Yokohama or Hakodate, with sufficient advance notice.

CONSULS: None.

REPAIRS: Minor deck and engine repairs available.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.

REPATRIATION: Possible.

AIRPORT: Hanamaki Airport about 97 km. from Ofunato. TOA Domestic Air Lines (TDA); 2 flights between Hanamaki/Tokyo every day, 2 flights between Hanamaki/Osaka every day and 1 flight between Hanamaki/Sapparo every day.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

TELEPHONES: No facilities for placing telephones on board.

SERVICES: Surveyor: NKKK and Kentei Shin Nihonsha. Hold and tank cleaning. Provisions/laundry/water. Bunker: Domestic diesel available.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days; 3 days' extension possible if ship stays longer.

GENERAL: Discharging ex-gearless vessel at wharf not available, because no shore crane for discharge.

AUTHORITY: Port & Harbour Department, Iwate Prefecture Government, 10-1, Uchimari, Morioka City, Iwate Pref., 020 Japan. *Tel:* 0196-51-3111. *Contact:* Masanao Takeda, Director, Port & Harbour Department.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Morita & Co. Ltd., No. 108 Chayamae, Ofunato-cho, Ofunato-shi, Iwate-ken. Cable Address: Morita Ofunato. Domestic Telex: 8382-32. Tel.: (01922) 6-5131. Postal No. 022.

OITA: 33.17 N. 131.40 E. (See Plan)

DOCUMENTS: When ship arrives direct from foreign port, Customs Officials will board the vessel to search. The following documents are to be submitted:–

Crew List.
Passenger List.
Stores List
Declaration of Crew's baggage. (Must be signed by individual Crew member).
Arms and Ammunition List.
Narcotics List.
List of Ports of Call on Current Voyage.
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward (Form No. C2000).

The following will be checked on board:–

Ship's Registry.
Last Port Clearance.

When ship comes from Japanese port, Customs Officials will not attend on board, except special case. The Master or Agents are to attend at Customs House for entry formalities with the following documents:–

Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward.
Ship's Registry.
Last Port Clearance.
Documents entrusted with the Master by Customs at previous Port.
Store List.

On ship's departure, a clearance is issued by Customs, after confirming payment of tonnage dues.

No Customs house open outside office hours except when advance notice given.

Immigration: Immigration Officials board vessel on her arrival in port to examine passports, discharge books and or other equivalent travel documents and provide 72-hour landing passes for Crew members and passengers. 2 copies each of Crew List and Passenger List are required by them. Providing ship's Agents with a Crew List beforehand will be a great help in expediting Immigration business on ship's arrival. When ship stays in port more than 72 hours, the landing passes may be extended every 72 hours on application.

In the event that Crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men have been booked, or unless the ships to which they are to be transferred, arrive in Japan within 5 days.

Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

PILOTAGE: Harbour pilotage not compulsory. It is compulsory for vessels over 10,000 g.r.t. to take a Pilot in the Inland Sea.

Request must be made at least 24 hours in advance and Pilot should be kept closely advised of vessel's accurate ETA at pilot station. If there is any change in vessel's movements, the Master is requested to immediately radio to the pilot office directly or through Agents reporting the revised ETA. The cable address of the pilot office is "Anjin Moji".

Shipmaster's Report: April 1988.

Inland Sea Pilot not compulsory in the Inland Sea from Se Saki to Oita or from Oita to He Saki (entrance to Kanmon Kaikyo)

Nor is pilotage compulsory from Se Saki (Bungo Suido) to He Saki.

In the Inland Sea, pilotage is compulsory for vessels over 10,000 g.r.t. in Kurishima Kaikyo, Bisan Seto and Akashi Kaikyo.

At Oita, Harbour Pilot is not compulsory, however it is advisable to make use of the services of a Harbour Pilot as the tug Captains do not speak English, which might cause language problems if no Harbour Pilot is employed.

ANCHORAGES:

No.	*Depth* (m.)	*Capacity* (g.r.t.)	*Position*	*Remarks*
No. 1	37–38	Under 20,000	33° 16′ 26″ N. 131° 38′ 44″ E.	Within radius of 100 m.
(265°, 3,400 m. from Tsurusaki Hakuchi Breakwater East Lighthouse "A" point).				
No. 2	52–53	Over 100,000	33° 17′ 09″ N. 131° 42′ 00″ E.	680 m. to No. 3 Buoy
(59°, 1,960 m. from "A" point).				
No. 3	48–50	50,000/100,000	33° 17′ 04″ N. 131° 42′ 26″ E.	590 m. to No. 4 Buoy
(70°, 2,490 m. from "A" point).				
No. 4	45–46	20,000/50,000	33° 16′ 52″ N. 131° 42′ 44″ E.	630 m. to No. 5 Buoy Draft up to 15 m.
(80°, 2,870 m. from "A" point).				
No. 5	35–40	Under 30,000	33° 16′ 40″ N. 131° 43′ 03″ E.	580 m. to No. 6 Buoy Draft up to 13 m.
(88°, 3,300 m. from "A" point).				
No. 6	35	Under 30,000	33° 16′ 29″ N. 131° 43′ 22″ E.	Draft up to 10 m.
(93°, 3,800 m. from "A" point).				
Shin Nittetsu Anchorage 6 m. – 40 m.		5,000×3 3,000×3	The sea area circumscribed by the lines connecting the following points end to end: 1. The point "A", 278°, 1,310 m. from the Otozu Breakwater West light- house in Oita Harbour. 2. The point, 249°, 1,200 m. from "A". 3. The point, 219°, 170 m. from "A". 4. The point, 330°, 550 m. from "A".	
Quarantine Anchorage 25 m. – 43 m.			The sea area circumscribed by the following lines: The line that connects the point "A", 227°, 11,550 m. from the Sekisaki lighthouse with the point, 180°, 1,500 m. from "A"; a second line that connects the same with the point 260° 2,100 m. from it; a third that connects the same with the point, 0°, 1,300 m. from it and a fourth that connects the same with "A".	

*It is necessary to obtain permission from Harbour before vessel's arrival.

RESTRICTIONS:

Berthing: During daytime only.

Departure: Night departure from wharves is generally impracticable except vessels at Sea-Berth and Seihin Berth can depart up to 2000 hrs. However, this will depend upon condition of weather, etc.

MAX. SIZE: See "Berthing" and "Tankers".

HEALTH:

(a) Quarantine Station: Lat: 33° 16′ 00″ N., Long: 131° 46′ 00″ E.

(b) Quarantine inspection is not allowed inside port except when weather or other special reasons prevent the quarantine boat from approaching ship at anchorage.

Quarantine is effected in berth for a vessel more than 3,000 g.r.t., provided the vessel possesses valid (i) Derat Exemption Fumigation Certificate. (ii) all crew/passengers are healthy (Radio message from ship's Master for these items are required 2 days in advance).

(c) Quarantine service is rendered from sunrise to 1 hour before sunset.

(d) "Q" flag should be hoisted until ship has Free Pratique.

(e) When ship arrives from plague infected or suspected area within 10 days after she left such place, a 24 hour special quarantine is required.

All sanitary outlets must be closed and garbage must not be thrown overboard after ship reaches 60 miles off Japanese Coast.

(f) Radio Free Pratique possible.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. I specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

VHF: Vessel can keep in direct contact with port authorities in regard to their arrival, berthing instructions also Pilot's requirements, etc. through VHF, the details of which are as follows:–

(a) Call sign: Oita Port Radio.

(b) Location of radio facilities: The transmitting and receiving statio is located at the top of Mount Tohmiyama, Saganoseki (Sekisak

(c) Channel: Simplex 16 (Calling)
12 (Communicating)
14 (Communicating)
Antenna power: 50 W.

(d) Operating Hours: 0000–2400 hrs.

(e) Communicating range: Within a radius of 100 km. from the statio at sea.

TUGS: Operator: Oita Rinkai Kogyo.

Tug	*g.r.t.*	*H.P.*
*Yuhi Maru	276	3,200 Schneider
*Kakuho Maru	199	3,500 C.P.P. Kort Nozzle
*Ryusei Maru	199	2,400 Z-Peller.
Udo Maru	141	2,000
Morita Maru	177	2,000
*Hikita Maru	274	3,200 Z-Peller
*Daiho Maru	293	3,200 Z-Peller
Nagata Maru		3,000

It is a practice to use tug's line for berthing/unberthing.

*Fire extinguishing apparatus equipped.

Kyushu Oil Co. own a special boat equipped with an extinguishe system and station same when a tanker berthing/unberthing at the expense.

BERTHING:

Wharf	*Length berth* (m.)	*Max. LOA* (m.)	*Max. Safe Draft* (m.)	*Capacity* (d.w.t.)	*Public or Private*
Sumiyoshi					
No. 1	185	160	9.10	15,000×1	Public
No. 2	185	160	9.20	15,000×1	Public

(Larger size vessels can be accommodated at Nos. 1–2 wharves, usin 2 berths)

N–2	310 (plus 140 m. dolphin)	350	25	5,000/300,000	Private (N.S.C
N–3	350 (plus 140 m. dolphin)	350	22	50,000/100,000	Private (N.S.C
N–4	210	180	20	5,000/30,000	Private (N.S.C

STEVEDORES: *Stevedoring Companies:*

Nippon Express Co. – maximum 4 gangs are available. (at Sumiyoshi public wharves – Tsurusaki Kairiku Unyu – maximu gangs are available)

Hirohata Kaiun Kaisha – maximum 2 gangs are available for loadi steel products (for export) at Nippon Steel Corp.

Tsurusaki Kairiku Unyu – maximum 2 gangs are available for loading steel products (for export).

Nippon Express Co. – maximum 2 gangs are available for discharge steel scrap and pig iron.

Kamigumi Co. – 3 gangs are available for discharging iron ore/coal.

Working Hours:

(a) At Sumiyoshi public wharves: 0800 to 1700 hrs. (No work on Sundays and holidays. No work can be arranged New Year's holidays).

(b) At Nippon Steel Works (coal/iron ore) 3 shifts, 0600 – 1400, 1400 – 2200, 2200 – 0600 hrs.

At Nippon Steel Works (loading steel products) 3 shifts/actual nett working:

1. 0700 – 1100 hrs. meal 1100 – 1145 hrs.
   1145 – 1500 hrs. oiling crane: 0700 – 0715 hrs. 7.00 hrs.
2. 1500 – 1800 hrs. meal 1800 – 1845 hrs.
   1845 – 2215 hrs. oiling crane: 1500 – 1515 hrs. 6.15 hrs.
   2215 – 0200 hrs. meal 0200 – 0245 hrs.
3. 0245 – 0700 hrs. oiling crane: 2215 – 2230 hrs. 7.45 hrs.

21.00 hrs.

Average loading/discharging rates:

Bulk cargo:

Iron Ore (sinter)	1,600 t.p.h./crane/hatch (dis.)
Coal	1,300 t.p.h./crane/hatch (dis.)
Steel Scrap:	1,000 tons per day per crane (dis.)
Pig Iron:	2,700 tons per day per crane (dis.)
Logs:	30 t.p.h./gang/hatch (dis.)
Steel Cargo: HR. Coil	200 t.p.h./gang/hatch (load)

CRANES:

Shore cranes:

1. Sumiyoshi public wharves — No crane available.
2. N.S.C. loading wharves — 50 t×1, 30 t×3, 20 t×3: (for HR. Coil)
   — 50 t×1, 35 t×1: (for M.S. Plate)
3. N.S.C. Sea-Berth — 81 t×3

Floating Crane: 40 tons capacity available.

MEDICAL: Hospitals available. No advance notice required unless urgent.

TANKERS: Private berths: 24 hours operations. Berthing/unberthing during daylight only.

Kyushu Oil Jetty (Dolphin Style):

Length of berth 480 m., max. LOA 350 m., Max. draft 19.50 m. Capacity 60,000/270,000 d.w.t.

A submarine type rubber oil fence is stretched around the berth.

5 unloading arms are installed on the unloading platform and can be connected directly to ship's manifold. 4 of these unloading arms are 12 in. diameter and used for discharging crude oil.

The other arm is 12 in. in diameter and used for fuel/diesel oil. Nominal capacity for discharging crude oil is 10,000 Kl/hr. and for fuel/diesel oil, 1,000 Kl/hr.

Following information required 3 days before arrival: Manifolds, type, size, number and distance between, also pump capacity.

Showa Denko Naphtha Berth: (Dolphin) Length of berth 400 m. max. LOA 300 m. Max. draft 15 m. Capacity 5,000/70,000 d.w.t.. Product handled – Naphtha. Rubber oil fence provided at berth. 2×12 in. lines, rate 3,000 Kl/hr. LPG also handled.

DENSITY: (Average):

1023 in Summer season at Sumiyoshi.
1023 in Summer season at Sea-Berth.
1021/1023 in Summer season at Otozu Hakuchi.
1024 in Winter season at Sumiyoshi.
1025 in Winter season at Sea-Berth.
1021/1025 in Winter season at Otozu.

FRESH WATER: Good fresh water is supplied from hydrants to vessel alongside wharves. The rate of delivery:

At Sea-Berth 30/50 t.p.h. hydrants every 103 m. (12 hydrants).

At Otozu Wharf: 35/45 t.p.h. hydrants are every 50 m. (21 hydrants).

At Sumiyoshi Public Wharf: 25/30 t.p.h. hydrants every 100 m. (3 hydrants).

At Kyushu Oil Jetty: 25/30 t.p.h. only 1 hydrant is available. 1 day's advance notice required.

At Showa Yuka 70,000 d.w.t. Naphtha Berth: 25/30 t.p.h. 1 hydrant available. 1 day's advance notice required.

Oil barge (tank separated for fresh water) of 40 tons capacity available for emergency case.

FUEL: Bonded bunkers supplied by oil barges (except vessel at Kyushu Oil Jetty where rate of delivery is 450 Kl/hr).

The rate of delivery: 200/500 t.p.h.

REPATRIATION: See "Documents – Immigration".

AIRPORT: Oita Airport: approx. 56 km. to the airport via land. Approx. 16 miles to the airport via sea (hovercraft). Hovercraft run between Oita City and the New Oita airport. Domestic line only, Toa Domestic Airlines and All Nippon Airways.

TIME: GMT plus 9 hours. No alteration made to clocks during year.

POLICE/AMBULANCE/FIRE: Police tel. 110; Ambulance and Fire 119.

TELEPHONES: No telephones can be placed on board.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

According to new Customs regulation, ship's crew members are requested to land ashore by designated Micro bus or launch from ship at Sea-berth and by launch from ship at Seihin wharves via Customs house.

GENERAL: *Japan Maritime Disaster Prevention Centre:* Tsurusaki Kairiku Unyiu K.K. are appointed by the Japan Maritime Disaster Prevention Centre as base for stock piling and use of the materials for removal of discharged oil.

Restrictions: It is prohibited to pump out bilges, to throw overboard sweepings, waste or garbage of any kind and cleaning dust out of holds, whilst the vessel is in port or in pilotage waters according to regulations. Also, not permitted to wash ship's deck and painting ship's outside shell platings.

Services: The following are available: Laundry, hold cleaning, fumigation, deck and engine stores, provisions, dunnage, Japanese charts (HO and BA charts available from Yokohama and Kobe respectively with adequate notice.).

DEVELOPMENTS: Land reclamation continues in 3 areas. Public wharves as well as private wharves will be constructed.

AUTHORITY: Shin Sangyotoshi Kaihatsu-Kyoku, Ohita Pref., 3-33, Mukaibaru Nishi 1-chome, Ohita City *Tel:* (0975) 58-5111.

AGENT: Sub-Agents of Dodwell & Co. Ltd., Tokyo. Tsurusaki Kairiku Unyu K.K., 1000, Oaza Misa, Oita City, Japan. Postal Code 870-01. Tel. 0975–21–6111/9. Cables: Tsurukai Oita. Telex: 07723-89.

OMISHIMA (Ohmishima), Inokuchi Port: 34.16 N. 133.00 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat. 33° 56′ 24′ N. Long. 131° 03′ 12″ E.

ANCHORAGES: Omishima Island located at centre of the Inland Sea and lies between Ehime and Hiroshima prefectures. Eastern part of island, Inokuchi surrounded by deep water where holding ground good. Oil company located at Inokuchi. No strong winds.

RESTRICTIONS: No restriction on entry; however mooring and unmooring to be carried out during daytime, regardless of tide and current.

MAX. SIZE: *Tankers:* Maruzen Ohmishima Oil Jetty: Length 140 m. Depth 9.0 m. Coastal tankers of 3,000 g.r.t. allowed to berth. Berth designed to accept max. 7,000 d.w.t.

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from day-light to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Join vessel at sea anchorage, always using tug's line without charge.

TANKERS: No advance information of loading/discharge lines required. No loading facility. Only one berth available for discharge. Product handled, fuel oil. Shore line, 1×10 in. Discharge rate, 400 t.p.h.

DENSITY: Anchorage 1025. Berth 1025.

FRESH WATER: Not available but usually brought by barge from Onomichi (about 3 hours run to Omishima). Rate of delivery 80 tons to 200 tons per hour which depends on barge.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.

CONSULS: No consuls. Nearest Consulates are at Kobe.

REPAIRS: Minor repairs only.

REPATRIATION: Possible.

AIRPORT: Nearest at Matsuyama and Takamatsu.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.

TELEPHONES: Not available.

GENERAL: Closed port. To conform with regulations vessel obtains special permission from Maritime Bureau and Customs at Takamatsu to enter.

Customs request vessels calling Omishima to obtain permission to enter at preceding port of call by paying charge at same rate of tonnage dues prior to arrival. This procedure undertaken by Agent. No Quarantine Station, nearest at Matsuyama. Immigration Officer comes from Niihama.

SHORE LEAVE: Immigration issue shore passes valid for 7 days if vessel only calling at one port in Japan or 15 days if vessel calling at more than 2 ports in Japan, further extension possible.

AUTHORITY: Imabari Marine Safety Agency. *Tel:* (0898) 32-0708.

AGENT: See "Niihama".

ONAHAMA (Iwaki City): 36.56 N. 140.55 E.

The port is protected by breakwater, 7,910 m. long and is open to the South.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
4 Crew Lists including Passport Numbers.
4 Passenger Lists including Passport Numbers.
1 Stores List.
1 Declaration of Crew's baggage, i.e. tobacco wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnage. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

PILOTAGE: No means of communication with Pilots and vessels should arrange pilotage by advising Agent of ETA. Not compulsory; Pilots are available at the anchorage (Lat. 36° 53′ 05″ N., Long. 140° 54′ E.) for vessels requiring Pilot services.

For Tankers at Lat. 36° 52′ 05″ N., Long. 140° 54′ 00″ E.

ANCHORAGES: Just outside No. 1 West Breakwater. Depth of water 14 m. – 22 m.

RESTRICTIONS: Restriction only by ship's draft. Depths of water alongside wharves 9 m. and 10 m. at low tide, and rise of tide is about 1.40 m. highest. Berthing daylight only. Unberthing at Pilot's option.

MAX. SIZE: *Tankers:* Sea Berth: Max. 80,000 d.w.t. Depth 15.0 m Max. safe draft, 13.50 m. (Also see "Berthing").

HEALTH: Radio Pratique available. Formalities will be carried out a anchorage.

RADIO: Recommended Master communicates with Agent through Chos Radio or Nagasaki Radio which covers all ports in Japan. If specifical Westbound vessel to contact Chosi and Northbound to contact Nagasak Radio respectively.

TUGS: Normally join vessel on passage from anchorage. Vessel's lines used. 4 tugs available, 1×2,400 h.p., 1×2,100 h.p, 1×1,800 h.p. an 1×800 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notifie by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding 2nd and 5 Sundays and holidays required in order for Agent to arrange stevedore 1st, 3rd and 4th Sundays shall be non-working days. Vessel mu constantly keep her Agent advised of ETA. If stevedores cann commence loading/unloading at time notified by the Agent, the ordere must pay for waiting time. If cargo gear not rigged on berthing stevedores will do same for ship's crew at additional cost. Overtim surcharges 1630–2130 hrs. 60% additional of basic stevedorag 2130–0800 hrs. next morning 120% additional; Sundays/holidays 100 additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: Sea Berth: Product handled, Naphtha and Crude O Shoreline 16 in.×2. Discharge rate 9,000 k/l per hour. Bunkers n available ex-pipe-line.

DENSITY: 1025.

FRESH WATER: Available from shore lines, at about 30 t.p.h.

FUEL: Domestic oil is available. Bonded oil will be brought fro Yokohama with sufficient advance notice, when required.

CONSULS: None.

REPAIRS: Minor repairs only.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Not specially required unles passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening an closing hatches. If any time lost by ship's crew doing this wor stevedores charge ship for waiting. Recommend request stevedores t this work unless crew can complete it before berthing.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashor but no spirits.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Iwaki (0246); Police 54-1111; Ambulanc and Fire, 119.

TELEPHONES: No facilities for connecting on board.

SHIPMASTER'S REPORT: 1975.

The port is protected by breakwaters, 1 running North and N.E. 11,170 long and 1 running Westerly and W.S.W'ly 5,520 ft. long, the latter whi affords some protection from Southerly swell.

Pilotage: The Pilot boards at the main breakwater entrance. If possib obtain Japanese Port Chart No. 63 and approach Chart No. 68.

Anchorage: If awaiting Pilot anchor approximately 1 mile E.S.E. of th Southern extremity of the East breakwater.

Max. Size: Several new berths have recently opened, including No and No. 6.

Health: The centre of the Quarantine Anchorage is located 6 cables S from the Southern extremity of the East breakwater. Radio Pratique accepted if a Japanese Sanitary Inspection Certificate is held.

AUTHORITY: Onahama Port Construction Office, 38-1, Onaham Tatsumi-cho, Iwaki City, Fukushima Pref. *Tel:* (0246) 54-2411.

AGENT: Sub-agent of Dodwell & Co. Ltd., Tokyo. Onahama Kai Unso Kaisha, Ltd., 36 Tatsumi-cho, Onahama, Iwaki-shi, Fukushim ken. Cable Address: Kaiun Iwaki. Domestic Telex: 08922-80 Onaka Tel: (0246) 53-3221/6. Postal No.: 971.

ONOMICHI-ITOZAKI (incl. Mihara, Matsunaga): 34.20 N. 133.16 E. (See Plan)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
1 copy Voyage Memo (last 3 months).

Ship's Agent will prepare Inward/Outward Declarations, 1 Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea Ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea pilot stations. Also see 'Shipmaster's Report' before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position Lat: 34° 34.09′ N., Long: 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat: 33° 13′ N., Long: 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki pilot station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat: 33° 56′ 24″ N., Long: 131° 03′ 12″ E.

Inland Sea Pilot also berths vessels at anchorage berth (if Matsunaga Bay – logs), or pier in Itozaki district (Mihara section).

Pilot boards for berthing from 30 minutes after sunrise until 30 minutes before sunset.

ANCHORAGES: Draft limitations: Itozaki-Mihara 7.5 m. Matsunaga Bay 8.5 m. Tidal range: Maximum (+) 3.91 m. Minimum (−) 0.09 m. Capacity for 3×20,000 ton vessels.

HEALTH: Radio Pratique not available. Quarantine formalities normally carried out at Mutsure (off Moji) when vessel comes from West through Kanmon Strait, Matsuyama when vessel comes from West through Bungo Channel (Sekisaki Pilot Station) and Fukuyama when vessel comes from East (Wadamisaki Pilot Station).

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Tugs available at Onomichi at any time with 24 hours notice. 7 tugs of 2,000 h.p. – 3,000 h.p. available.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Berth	*Length* (m.)	*Depth* (m.)	*Permissible Draft and Length overall* (m.)	*Capacity* (g.r.t.)
Municipal Nishigosho Pier	404	6.5	5.0×130	2,000
Municipal Shinhama Pier	250	5.5	4.5×100	2,000
Matsunaga Bay (Anchorage)		5.0–10.0		1×10,000 1×6,000 1×3,000
Municipal Itozaki Pier	320	10.0	9.0×200	3,000

Itozaki Pier: Cargo handled from Mitsubishi and Hitachi Works, cement in bags, steel and logs.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: No facilities.

FRESH WATER: Available. Method of delivery (1) Barge. (2) Pier. Additional charge for overtime work and in event of bad weather.

FUEL: Domestic oil is available, Bonded oil will be brought from Kobe, Kanokawa, Hirohata or Moji.

CONSULS: None.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CUSTOMS ALLOWANCES: Only allowed 40 cigarettes to take ashore but no spirits.

REPAIRS: Repairs possible for vessels up to 100,000 g.r.t.

REPATRIATION: Possible.

AIRPORT: Nearest domestic airport at Hiroshima. Nearest international airport for crew joining/repatriation is Osaka International Airport.

TIME: GMT plus nine hours. Permanent.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

TELEPHONES: No arrangements for placing telephones on board.

SHORE LEAVE: Local Immigration Authority issue shore passes valid for 15 days if vessel calling at more than one port in Japan and 7 days if vessel only calling at a single port. (If only calling Onomichi-Itozaki, Immigration issue 7 day pass).

AUTHORITY: Port and Harbour Dept., Onomichi City, 27-13 Kohama-cho, Onomichi, Hiroshima Prefecture, Japan.

AGENT: Mihara Shipping Agency Ltd., 1903-22-501, Enichi-cho, Mihara, Hiroshima Prefecture, Japan 723. Tel: 08486-4-3342, 0848-25-2482 (Onomichi Office). Telex: 642220 Shipmi. FAX: 08486-4-6025. Cables: Miharaship Mihara.

OSAKA: 34.39 N. 135.26 E. (See Plan)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

PILOTAGE: Pilotage is compulsory for vessels of 10,000 gross tons or more. 24 hours' notice required. Telegraphic address: "Hanshinpilot Osaka". VHF contact with Osaka Port Radio on Channels 12, 16, 19, 20. Agents operate Channel 26. Three 15 ton Pilot boats with radio equipment to pilot office. Pilot boards anywhere within harbour limits. In event bad weather Pilot boards just inside breakwater when acknowledgement obtainable from Master. If awaiting Pilot, anchor inside harbour limits as near as possible to breakwater.

ANCHORAGES: Section Nos. 7 and 8. Section 7 is Quarantine Anchorage. Section 8 for other vessels. Captain of the Port allocates anchorage position prior vessel's arrival which radioed to Master by Agent. Max. draft about 14.0 m.

RESTRICTIONS: Vessels only permitted to enter from sunrise to 2100 hrs. Full container vessels permitted to enter from sunrise to 2400 hrs. and to depart at any time of the day. However, in order to avoid danger, some wharves (oil wharf, Nakayama Wharf and various shipyards where there is not enough space to conduct berthing operation), accept vessel only until sunset.

MAX. SIZE: Max. permissible length 250 m., draft 11.6 m. Also see "Tankers".

HEALTH: Vessel requiring Free Pratique requested cable directly to "Quarantine Station", Osaka informing ETA, date of departure from last port, name of last port, number of crew and health condition. At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

Radio Pratique is available only for a vessel which possesses Valid Sanitary Inspection Certificate issued by the Japanese Government.

RADIO: Osaka Port Radio, 24-hour port operation service on VHF Channels 16, 12, 19 and 20.

RADAR: Osaka Harbour Radar has 24-hour navigation aid and weather information service and supplies information on ship movements, etc. Contact by VHF Channels 16, 14 and 22.

TUGS: 10 Port Authority tugs. Tugs join vessel just before harbour entrance. Tug's lines used, no extra charge.

BERTHING: No specific requirements. Pilot boarding time will be notified by VHF or radio.

CONTAINER FACILITIES: Berths C1, C2, C3, C4, C5, R2, R3 and R4 each equipped with container handling gantry cranes. Berth C1 equipped to handle Ro/Ro.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1630 – 2130 hrs. 60% additional of basic stevedorage; 2130 – 0500 hrs. next morning 130% additional; Sundays/holidays 100% additional.

BRIDGES: 4 bridges under construction. Clearance 33.3 m. – 47.0 m Completion 1989-91.

MEDICAL: No advance notice required unless urgent. General an Seaman's hospitals available.

TANKERS: No slop discharge facilities. Wharf No. 49, Sakurajima O Wharf, max. LOA 250 m., max. safe draft 11.60 m. Product handled fuel oil, diesel oil, Minas Waxy. Shoreline 12 in. Discharge rat 1,000 t.p.h.

Shipmaster's Report: December 1985.

Tankers are only taken alongside between 0930 hrs. and 1500 hrs In Summer sometimes between 0900 hrs. and 1600 hrs. but it is no usual.

Sakurajima Wharf 49 has a max. safe draft of 11.60 m., however wit such a draft entering only possible during HW. If high water does no fall between 0930 hrs. and 1500 hrs. vessel has to wait a few days.

We discharged 5,000 tons of Ethylene Dichloride at Sakurajima Whar Only one connection of 8 in. Discharging rate 700 cu.m.p.h.

DENSITY: Outside anchorage: 1023 – 1025. Near breakwater: 1020 – 1022. Average density inside breakwater 1020. Wharves near estuaries (Aji River, Shirinashi River, Kizu River and etc.): 1016 – 1020.

FRESH WATER: Methods of delivery: by barges or pipe-line.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Ba Osaka Bay and Kanmon Port. At all other ports bunkers will be lightere from the nearest bunker stock ports at maximum 7 days prior notice.

CONSULS: The following consulates available in Osaka:

Austria
France
Singapore
Australia
Korea
Switzerland
China, People's Rep. of
New Zealand
U.S.A.

REPAIRS: All grades repairs possible.

DRY DOCKS: Hitachi Zosen Co. Ltd., Chikko Ship Yard. No. 1 Dock 247.5 m.×55.7 m., depth 11 m. No. 2 Dock: 355.0 m.×62.7 m., dept 11 m.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
5 Crew Lists including Passport Numbers.
5 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan). Each person's signature is necessary in it.

Ship's Agent will prepare 2 Inward/Outward Declarations. Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Certificates: Ship's Register to show Customs Inspector ship's gross and net registered tonnages.

PILOTAGE: Pilot station is 2 miles East from Togashira Island. Pilotage is not compulsory at this port but recommended to take pilotage by Toho Oil Co. Ltd.

ANCHORAGES: Quarantine Anchorage position is Lat. 34° 03′ 55″ N., Long. 136° 13′ 20″ E. Depth of water 60 m. – 80 m. Radius 500 m. However, it is not advisable for vessels to stay there for a long time as there are many fishing boats nearby.

RESTRICTIONS: According to Agreement between Fishery Association and Oil Refinery, ship's movement is prohibited at night. See "Berthing".

MAX. SIZE: See "Tankers".

HEALTH: Radio Pratique available. Formalities carried out after entering the port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Tugs usually join vessel at Outer Harbour (near Quarantine Anchorage) and tug's line is used. Tugs come from Nagoya. VHF Channel 16, 6, and 12.

BERTHING: Time limit of Pilot boarding for berthing to Toho Oil Terminal is 3 hours before sunset due to the agreement between Fisheries and Toho Oil Co. Ltd.

MEDICAL: No advance notice required unless urgent. Hospital facilities available.

TANKERS: Toho Oil Owase Pier: Depth of water, 17.3 m., Max. d.w.t. 150,000, Max. LOA, 275 m. Max. safe draft 16.00 m. Product handled crude oil. Shoreline 2×12″. Discharge rate, 4,500 k/l.p.h.

Toho Oil Sea Berth: Depth of water, 21.0 m. Max. d.w.t. 250,000. Max. LOA 350 m. Max. safe draft 19.00 m. Product handled, crude oil. Shoreline 2×20″. Discharge rate 7,000 k/l.p.h.

FRESH WATER: Fresh water can be supplied to the vessel from pipe at quay. Supply capacity 30 t.p.h.

FUEL: Domestic oils available. Bonded oil will be brought from Nagoya, Yokohama, Chiba or Kobe.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.

CONSULS/REPAIRS/AIRPORT: None.

TIME: GMT plus 9 hours. Permanent.

TELEPHONES: Emergency numbers, Owase Police Office (05972) 2-0004; Owase Fire Station (05972) 2-2020; Owase Hospital (05972) 2-2118. No facilities for placing telephones on board.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but extension possible if ship stays longer.

AUTHORITY: Owase Doboku (Public Works) Office, 2-11, Hayashi-machi, Owase City, Mie Pref. *Tel:* (05972) 2-2017.

AGENT: Nippon Express Co., Ltd., Owase Branch. Tel: (05972) 2-2217. Cable: "Nexco Owase". Uyeno Unyu Shokai, Yokkaich Branch. Tel: (0593) 45-2271. Cable: "Uyeno Shell Yokkaichi".

RUMOI: 43.57 N. 141.38 E. (See Plan)

SHIPMASTER'S REPORT: November, 1985.

DOCUMENTS:

5 Crew Lists on Japanese forms.
1 Stores List.
3 Passenger Lists (if carried).
Last Port Clearance.
Register.

PILOTAGE: 24 hours notice required. Boarding position at Quarantine Anchorage if fine weather or inside lee of new breakwater. Pilot boat is a small tug with a white hull.

ANCHORAGE: Lat. 43° 57′ 11″ N., Long. 143° 37′ 30″ E. – Very poor holding ground, rock bottom. Exposed from N.W. to S.W. Numerous fishing floats, nets, etc., in approach to anchorage to about 3 miles offshore.

RESTRICTIONS: Daylight entry only, sailing reportedly to be allowed up to 2 hours after sunset.

MAX. SIZE: Maximum ship size 150 m. LOA, 25 m. beam and 7.2 m. draft.

RADIO: *ETA:* Via Choisi Radio. This port has no VHF therefore ETA's can be given via Otaru Radio on VHF Channels 16 and 12 when coming from South.

TUGS: Two small tugs of approximately 450 h.p. Very expensive and poorly equipped and handled.

BERTHING: Depth alongside and in approaches 5.5 m. – 7.2 m.

STEVEDORES: Very good. Discharged boxes of frozen fish at average rate of 30 tons per working hour. Normal stevedoring hours 0800 – 1700 hrs. with overtime to 2100 hrs. if required.
MEDICAL: Hospital available.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Minor repairs possible.
GANGWAY/DECK WATCHMEN: Not compulsory.
OPENING/CLOSING HATCHES: Crew open and close hatches. Stevedores adjust derricks as required under ship's supervision.
REPATRIATION: Possible.
AIRPORT: Nearest airport 15 km. from town (subject to delays in winter) ice, snow, fog, etc.
TIME: GMT plus 9 hours all year round.
TELEPHONE: In Agent's office, adjacent to wharf.
DEVELOPMENTS: *Breakwaters:* New Western Breakwater under construction. It is marked by a red buoy at North end (position: Lat. 43° 58′ 28″ N., Long. 141° 37′ 52″ E.) which must be left to starboard on entering.
GENERAL: *Provisions/Laundry:* Available.

SAKAI (Including Senboku and Hannan Port): 34.34 N. 135.27 E. **(See Plan)**

DOCUMENTS:
Ship's Register.
Last Port Clearance.
7 Crew Lists including Passport Numbers.
2 Passenger Lists.
1 Stores List
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (if first port of call in Japan).

Ship's Agent will prepare inwards/outward Declaration, Cargo Manifest in transit using specific form. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
PILOTAGE: Cable address "Hanshinpilot Osaka". 24 hours' notice required. VHF (Osaka Port Radio), Channel 16, JBD Osaka Radio, Channels 25, 26 and 27. Three boats capacity 15 tons, 147 h.p. Pilot boards anywhere within harbour area, but preferably at Quarantine Anchorage – Sector No. 7. Bad weather: Unable to take Pilot. Boarding measures: Safe pilot ladder. Anchorage for vessel waiting Pilot: As Pilot Boarding Area.

Inland Sea Pilot cable address: "Anjin Kobe" can also be used for following wharves: Kansai Oil Co. Ltd., Sakai Wharf; Koa Oil Co. Ltd., Sakai Wharf.
ANCHORAGES: Quarantine inspection carried out at Quarantine Anchorage – Sector No. 7 where max. draft 12.5 m. Vessels with draft over 12.5 m. have to obtain Free Pratique at other ports.

Anchorage location for larger vessels is designated on a grid system by the Captain of the Port. The instructions will be passed to the Master via the Agent.
RESTRICTIONS: Entry not possible after sunset. Sailing possible anytime but Pilots not available after sunset.

(a) Arrival notice for ships over 500 tons gross must be given to Harbour Master 48 hours prior to arrival.

(b) Entrance passage draft limitation: 11.20 m.

There are many additional berths with depth of 2 m. – 4 m.
STEVEDORES: At least 24 hours prior notice excluding Sundays an holidays required in order for Agents to arrange stevedores. Vessel mus constantly keep her Agents advised of ETA. If stevedores canno commence loading/unloading at time notified by the Agents, the orderer must pay for waiting time. If cargo gear not rigged on berthin stevedores will do same for ship's crew at additional cost. Overtim surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 210 – 0500 hrs. next morning 130% additional; Sundays/holidays 60 additional.
MEDICAL: No advance notice required unless urgent.
TANKERS: *Berthing Procedure at General Wharf:* Vessels may ente the Hamadera Passage during daylight hours only, from 0700 hrs. unt about 2 hours before sunset. In addition, for mooring larger vessels telluromeţer is provided on bridge. No entry is made if wind speed 15 m./sec. or over (for VLCC's 10 m./sec.), or if a typhoon is forecas

Normally 4 tugs attend to a vessel of 160,000 d.w.t. and 6 tugs larger vessels. The local rule is that total tug power is from 8% to 10 of the vessel's deadweight, depending on weather conditions.

The berthing manoeuvre is carried out by the attending tugs with ve little assistance from the ship's engines. The vessel approaches th berth at a 5° angle until about 2 ship lengths away. Then, the vessel brought parallel to the berth, about 200 ft. to 300 ft. off, and ease alongside by the tugs and mooring lines. The approach speed approximately 0.5 knots until 1 ship length away. Currents in the bas are very weak.
Mooring: The 2 mooring launches have insufficient power to hand wires and consequently are slow. However, an additional large launc is made available to handle wires. The normal mooring sequence forward back spring, aft back spring, bow line, stern line, and brea lines. In view of the underpowered mooring launches, it is advisable use synthetic lines for the bow and stern lines. The normal moori configuration is 4 bow lines, 2 forward breast lines, 2 forward bac springs, 2 aft back springs, 2 aft breast lines and 4 stern lines. In vie of the limited space available in front of the bow, care should exercised not to overshoot the berth.

CONSULS: None.

REPAIRS: See "Osaka".

DRY DOCK: Hitachi Shipbuilding & Engineering Co. Ltd., Sakai Shipyard, Dock No. 2, length 455 m., width 63 m., depth 11 m., capacity 400,000 d.w.t.

GANGWAY/DECK WATCHMEN: Recommended and compulsory for tankers working cargo.

OPENING/CLOSING HATCHES: Stevedores open and close hatches with terms subject to charter party.

CUSTOMS ALLOWANCES: Each man allowed 200 cigarettes to take ashore but no spirits.

CARGO GEAR: See "Certificates" but no special requirements.

REPATRIATION: Possible.

AIRPORT: International Airport Osaka, 45 km. distant.

TIME: GMT plus 9 hours No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: See "Osaka".

TELEPHONES: Available except Nippon Steel Wharf and Public Wharf.

SHORE LEAVE: Local Immigration Officers issue shore leave pass valid for 3 days, but a 9 day pass is obtainable in case where a vessel stays in port for longer period.

DEVELOPMENTS: 29 berths under construction at Sakai-Senboku. Max. depth 12 m. 53 berths under construction at Hannan, depths from 4 m. – 12 m.

SHIPMASTER'S REPORT: February 1980. (L.P.G. Carrier).

Osaka Bay: Also see "Kobe" – "Shipmaster's Report".

Entry: No transit of Tomogashima Strait at night from Sunset to Sunrise. This is not a regulation but a Japanese Government request which for all intents and purposes is a requirement.

Pilotage: Bay Pilot is a recommendation for LPG carriers which again means a requirement. About 97% of overseas shipping and 60% of Japanese foreign going shipping use this service.

Lights: Flashing red over green to be permanently on day and night in Japanese waters if vessel over 200 m. length. Red is for dangerous cargo and flashes at 120 to 140 flashes per minute and green for vessels over 200 m. flashes at 180 to 200 flashes per minute.

Two black cylinders by day for over 200 m. length plus 1st substitute over 'B' for dangerous cargo.

Fire Wires/Mooring Line: To be rigged starboard side fore and aft, plus 1 mooring line at each end. In actual fact we kept the fire wires in during transit of Osaka Bay in case of slippage and getting caught in propellor. The Pilot approved.

Navigation: Sumoto – Oki Light Buoy: Lat. 34° 21.1′ N., Long. 135° 00′ E. must be left to port (North or South bound). This is not indicated on BA.3614 as a traffic separation buoy. The Pilot advised me that some foreign ships without Pilot leave this buoy on the wrong side, if JMSA catch any vessel doing this they are liable to prosecution. No navigation in visibility less than 1 mile and no berthing when wind speed exceeds 12 m./sec.

Pilot: Boards about 7 miles South of Tomogashima. Cable: 'Bay Pilot Kobe' 12 hours ETA, if any alteration cable 'Urgent Bay Pilot Kobe'.

Then by VHF through Kobe Port Radio – range 80 miles. Pilot nearly always starboard side. Boards from 3 fairly fast purpose built red hulled cutters based at Sumoto on Awaji Shima Island.

Pilot disembarks about 1 mile South of Tomogashima Strait.

Entry: For LPG carriers and certain other dangerous classification ships there is no night passage of Tomogashima Straits or Osaka Bay which means from about 1600 hrs. to 0600 hrs. there is no transit. Further complications are:

(1) At the berths themselves at Sakai and Kobe, LPG movements and berthing during darkness prohibited.

(2) If vessel has no Sanitary Certificate Free Pratique cannot be given which means anchoring at Osaka Quarantine anchorage for Pratique.

(3) The cost of an escort tug whilst vessel is at anchor is fairly costly about £100 per hour.

Therefore if Pratique is required (No Sanitary Certificate) and berthing that day is undertaken, arrival at Tomogashima pilot station can only be between 0600 to 0930 hrs. as the Quarantine service finishes for lunch time and if Pratique is not granted before lunch, entry is unlikely to take place that day.

If Sanitary Certificate is held, Pilot boarding at Tomogashima can be between 0600 to 1200 hrs.

Pratique: Free Pratique can only be given on proper notification by Radio 24 hours before arrival to Quarantine Service, prefixed by RPM through Agent. Current Sanitary Certificate must be held.

Pratique is granted whether or not Sanitary Certificate held but as above delay will be entailed. Granted at Osaka Anchorage between 0830 to 1200 hrs. and 1300 to 1700 hrs. Sanitary Certificate costs about £100 and is valid for 1 year. Application is made through Agent who arranges prior inspection by 'Rentokil' agency (£100) for any debugging and water testing and then followed by Government inspection which takes about 1.5 hours. Storerooms, fridges, galley, toilets, garbage bins, drinking water, etc., etc., all checked. This certificate entitles vessel to Free Pratique.

If the ship is not calling at Japan again within the 12 month period it is of little value, otherwise if likely to call, for an LPG ship with restricted entry the £200 could be well spent.

For Pratique, vessel anchors in Osaka Quarantine anchorage position Lat: 34° 37′ N., Long: 135° 21.5′ E. (approx.).

Escort Boat: A fire-fighting escort tug is required for Loaded LPG ships in port limits. An escort boat of smaller capabilities is required for LPG ships in Vapour taking on bunkers or Lub oil in port limits.

Approximate cost of firefighting tug is £100 per hour.

Therefore to anchor overnight to await berthing in loaded condition will require escort tug costing in region of £1,500. During cargo operations instant communication must be maintained with escort tug by VHF or Walkie Talkie.

Sakai:

Notice of Readiness: On anchoring at Quarantine anchorage or when Harbour Pilot boarding, whichever first.

Agent suggests tendering Tomogashima Pilot and seeing if receiver accepts.

Pilot: Harbour Pilot boards at Quarantine anchorage or at No. 1 and 2 Buoys Hamadera Passage channel as indicated on BA.3614.

Depth: Minimum depth in channel found to be 18 m.

V.H.F.: Kobe Port Radio, very powerful station – 80 miles range. Osaka Radio used for public correspondence.

Tugs: Two tugs join about half way down buoyed channel. Usual powerful Japanese type, tug's lines.

Berth: Mitsui Toatsu – Fertiliser berth: Position Lat: 34° 32.45′ N., Long: 135° 25.6′ E.

Port Side to.

Depth: 14.5 m.

Stern overhangs end of quay.

Gangway can be easily landed.

No stores on quay.

If wind speed exceeds 15 m./sec. no berthing and instant disconnection.

Vessel must be connected and have commenced pumping by sunset.

Solid concrete pile quay wall with ample fenders.

Lines: 3, 2, 2, each end. Line boat available, about 1.5 hours to tie up.

Connections: Rubber hoses for liquid and Vapour Return.

Propane line 12 in., Butane line 12 in. connection ASA 150.

Vapour 8 in. for both.

Shore labour with shore reducers.

Takes about 1.5 hours to connect.

Rate: Maximum able to accept: Propane: 800 m.t.p.h. Butane: 1,300 m.t.p.h.

We were pumping at very close to this figure all the time with 3 pumps on each grade – shore restriction.

Cargo General: Little back pressure.

We had no surveyor, all tonnages on shore figures.

Plant capacity: Propane: 1 tank of 20,000 metric tons. Butane: 3 tanks 12,000 metric tons. 1 tank 24,000 metric tons.

Approximately 15 m. of hose is used from shore manifold.

Fire axe required for moorings each end.

Watchman: English speaking watchman with telephone on board throughout 24 hours.

Departure/Arrival: Latest 1700 hrs.

Arrival: Hoses must be connected and discharge commenced before sunset.

Facilities: No stores alongside.

Water available, about Yen 700 per tonne.

Doctor will board vessel at minimum charge of Yen 20,000.

STD telephone to U.K. very expensive.

Crew changes: Via Osaka International Airport – no difficulties.

Repairs – Diawa (Company accredited Japan repair company). Kobe H. Kajita (Konishi now in general office). 078–681–6001 Telex 5622–849 Daiwindus.

Documents: 1st Port:

1 Health Declaration

1 Vaccination List.

1 Application for Shore Pass.

3 Crew Manifests (Crew Declaration) – Japanese Form.

7 Crew List – Ship.

1 Declaration (Ship Information) – Japanese Form.

3 Ship's Stores.

If any crew changes new personnel must be added onto original crew list (Manifest).

Seal Bond only, leave Beer Room open.

Usual procedure with shore passes – all handed in on departure, bottom torn off if calling at 2nd port and re-application made.

For 2nd Port:

7 Crew Lists.

1 List Ship's Stores.

1 Application Shore Passes.

AUTHORITY: Sakai Port Administration Office, 1, Shiohama-cho, Sakai City, Osaka. *Tel:* (0722) 38-5241.

AGENT: See "Osaka".

SAKAIDE: 34.19 N. 133.51 E. (See Plan)

DOCUMENTS:

1 Voyage Memorandum (List of Ports of Call).

Ship's Register.

Last Port Clearance.

5 Crew Lists including Passport Numbers.

3 Passenger Lists.

1 Stores List.

1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificate sometimes required by stevedores when cargo gear maintenance appears to be poor.

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio or Choshi Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage is compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGES: Port located on North coast at East part of Shikoku Island in Inland Sea.

Boundaries and Areas. Area bounded by line joined with three points, East corner of Sosha river mouth, Mamako-Hana of Semi Jima and Tako-Saki of Shotsuji-Yama.

Depth of water inside harbour limit: 9 m. Outside harbour limit: 13 m.

RESTRICTIONS: Vessels entering and/or leaving during daytime only at wharves; but no restrictions day and night at sea anchorage provided favourable weather conditions prevail.

MAX. SIZE: See "Berthing".

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from Cholera infected area within 10 days, Master must advise crew and passengers health condition prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

VHF: Sakaide Port Radio is located on top of Seijima (Lat. 34° 21′ N., Long. 133° 51′ E.). Watch is kept from 0600 to 2000 hrs. each day on Channel 16.

TUGS: Wharves: Join vessel at Sea Anchorage, using tug's line without charge. Sea Anchorage: No tug required in normal conditions.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

Berth	*Max. Size* (d.w.t.)	*Max. LOA* (m.)	*Max. draft* (m.)	*Remarks*
Mitsubishi "A"	70,000	275	13.00	Coal
Mitsubishi "B"	20,000	200	13.00	Coal
Mitsubishi "C"	55,000	220	11.50	Coke loading
Centre Pier	20,000	175	9.00	Fertiliser, grain

East section of Centre Pier, length 160 m., breadth no limit, depth 9 m.

West section of Centre Pier, length 110 m., breadth no limit, depth 7.5 m.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: Asia Kyoseki Refinery No. 2 Pier. Max. size 50,000 d.w.t. Max. LOA 230 m. Max. draft 12.40 m. 2×24 in. for crude (4,000 kl.p.h.); 1× 16 in. for fuel (1,000 kl.p.h.); 2×14 in. for chemical products (10,000 kl.p.h.).

Asia Kyoseki Pier No. 1 (Sea Berth) max. size 100,000 d.w.t., depth alongside 19.6 m.; 2×16 in. connections for crude. Max. unloading rate 10,000 kl.p.h.

DENSITY: Inside harbour limit 1025. Outside harbour limit 1025.

FRESH WATER: Sea anchorage. No water barge available but usually brought from Onomichi (about 4 hours run to Sakaide). Rate of delivery 80 to 200 t.p.h. dependent on barge.

Centre Pier: Can be supplied by shore line with capacity 25 t.p.h.

Mitsubishi Chemical Industries Wharf: Can be supplied by shore line with capacity 60 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo, Ise Bay, Osaka and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

FIRE PRECAUTIONS: No specific precautions.

CONSULS: None. See "Kobe".

REPAIRS: Only minor repairs.

DRY DOCKS: Kawasaki Heavy Industries Ltd., Sakaide, which is suitable to dry dock. Dock No. 2 for 500,000 d.w.t. vessel. 450 m.×72 m.×12.3 m. Not yet in action for ship repairs. Only used at present for ship building and after services.

Floating dock with capacity 80,000 d.w.t. under construction.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per gang per hour depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take asho but no spirits.

CARGO GEAR: See "Certificates", but no special requirements.

SURVEYORS:

1. Nippon Kaiji Kentei Kyokai is stationed at Sakaide.

2. Nippon Kaiji Kyokai (NK Class) and Lloyd's Register are station at Sakaide.

REPATRIATION: Possible.

AIRPORT: No airport. Nearest Takamatsu, All Nippon Airways 11 flig to Osaka and one to Tokyo and TOA domestic airlines to Toky Fukuoka.

TIME: GMT plus 9 hours. No alterations made to clocks during yea

HOLIDAYS: National Holidays – see "Niihama". Local Holidays: Ne Year's Day (Lunar Calendar) January 30th; May Day May 1st; Memor Day of the Sea July 20th; Bon Festival August 8th.

No ship's movement can be effected on January 1st, 2nd and 3 August 8th and October 15th.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 11 Sakaide Maritime Safety Base, 6-2858.

TELEPHONES: No facilities for placing telephones on board.

BANKS: No American/European banks. But it is possible to colle foreign currency, especially U.S. Dollars, at The 114th Bank, Lt Takamatsu.

STORING: See "Prelims".

1. Available by both, however, for Asia Kyoseki by barge.
2. Available during cargo operations.
3. Available, however at Mitsubishi "A" or "B" berth – by barge f heavyweight goods.
4. No, however, at Centre Pier East/West they are available.
5. No special regulations.
6. Yes.

SHORE LEAVE: Local Immigration Offices issue shore pass valid f only 7 days, but extension for next 7 days possible if ship stays long

GENERAL: Mitsubishi Chemical Industries Co. Ltd., Sakaide Works. A wharf of above works located outer harbour limit of Sakaide port, th undermentioned procedures required: In conformity with regulation vessel required to get special permission for entering into closed po which will be given from Shikoku Maritime Bureau.

Customs request vessel calls Mitsubishi Chemicals Wharf to obta special permission for entering. If tonnage dues paid prior arrival, th procedure will be attended to by Agent.

Waiting anchorage: Avoid Bisan Seto Boundary according to speci water zone navigation order. Imperative to exclude water surfaces wi established Fishery Privilege.

Vessels waiting to berth at centre pier are lightened at anchor.

AUTHORITY: Sakaide Port Administration Office, 5-32 Irifune-ch Sakaide, Pref. of Kagawa, Japan. *Tel:* 08774-6-2858. *Contact:* P Captain.

AGENT: Asia Marine Agency Ltd., 1-3-2, Irifune-cho, Sakaide-s Kagawa-ken. Cable Address: Asiamarine Sakaide. Telex: 058256 Asimar J. Tel.: (08774) 6-6209/6215.

SAKATA: 38.55 N. 139.48 E. (See Pla

Located at mouth of Mogami River. Strong wind blows from Jap Sea November to March.

In Winter season, wave height between 3 m. to 5 m., length 70 m. t 80 m. and period 7 to 10 seconds. Current South to North alon coastline.

TIDAL RANGE:

Higher high water	+61 cm.
Spring tide high water	+45 cm.
Neap tide high water	+41 cm.
Mean sea level	+39 cm.
Neap tide low water	+35 cm.
Spring tide low water	+31 cm.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camer wrist-watch, radio, firearms/swords, etc., (only at first port of ca in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Car Manifest and Cargo Manifest in transit using specific forms. Therefo ship's Agent should be provided with necessary information about detai of cargoes in advance.

Certificates: Ship's Register to show Customs Inspector shi registered gross and nett tonnages.

Valid Cargo Gear Certificates sometimes required by stevedo when cargo gear maintenance appears to be poor.

PILOTAGE: Order Pilot through Agent. In bad weather, wait instructions from Agent.

ANCHORAGES: All sea areas (except waterway) available for anchorage. No prohibited anchorage areas. Pilot station and quarantine anchorage position is the area in the 500 m. radius circle centre of which is 260° – 3,100 m. from Sakata Light Station.

RESTRICTIONS: Ship movements in daytime only.

MAX. SIZE:

Name	*No. of Berths*	*Length (m.)*	*Depth (m.)*
Kominato Wharf	1	270	−13.0
Sumikei Wharf (Private)	1	270	−13.0

HEALTH: At first port of call Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Niigata Radio. Call sign JCF. Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan.

If specifically Westbound, vessel to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: 2×2,000 h.p.

BERTHING: No particular requirements.

Agent communicates by means of ship's radio with respect to the exact time when the Pilot has to be taken on board.

1	12 tons	Nishi-Nippon Harbor Services Co.
1	10 tons	Nishi-Nippon Harbor Services Co.

AIRPORT: Itazuke Airport, Fukuoka, about 120 km. (about 180 minutes by taxi). Served by regular airlines. Nagasaki Airport, Nagasaki, about 50 km. (about 70 minutes by taxi). 10 flights daily (All Nippon Airways).
TIME: GMT plus 9 hours. No alterations to clocks throughout year.
POLICE/AMBULANCE/FIRE: Police Station: Sasebo 23-7161 (if emergency: 110). Ambulance Sasebo 23-5121 (Sasebo Fire Station). Fire Sasebo 119 (Sasebo Fire Station).
TELEPHONES: No facilities exist for placing telephones on board.
SERVICES: Hold cleaning. Compass adjusting. Fumigation.
IDENTIFICATION CARDS: See "General – Immigration".
WEATHER: Southwesterly winds prevail in Summer, while Northerly blows frequently in other seasons. Max. wind velocity recorded 26.1 m./sec. In early Spring dense fog prevails, but renders navigation impossible only for 7 days or so.

Tidal range 2.6 m. Current rate max. 1.5 knots in vicinity of harbour entrance at rising tide. At ebb tide, it flows in opposite direction and is faster than during flood, but not so strong as to hinder navigation.

GENERAL: *Customs:* When vessel arrives direct from foreign port, Customs Officials board for search. Following documents to be submitted. Crew List, Passenger List, Store List, Manifest of Crew Personal Effects (must be signed by individual crew member). Arms and Ammunition List, Narcotics List, List of Port of Call on current voyage, Discharging Cargo Manifest, Through Cargo Manifest, Declaration inward/outward (Form No. C2000). Following will be checked on board. Ship's Registry, Last Port Clearance.

When vessel comes from Japanese port, Customs Officals will not attend on board, except special case. Master or Agents to attend at Customs House for entry formalities with following documents. Discharging Cargo Manifest, Through Cargo Manifest, Declaration inward/outward, Ship's Registry, Last Port Clearance, documents entrusted with the Master by Customs at previous port.

On vessel's departure, clearance issued by Customs after confirming payment of tonnage dues.

Immigration: Immigration Officials board vessel on arrival to examine passports, discharge books and/or other equivalent travel documents and provide a 72 hour landing pass for crew members and passengers. Two copies each of Crew List and Passenger List are required by them. Providing vessel's Agent with these documents beforehand will help in expediting Immigration business on arrival. When vessel in port more than 72 hours, landing passes will be extended every 72 hours on application.

In event that crew members, without entry visas, to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring prompt departure from Japan (within 72 hours) of these men has been booked, or unless vessels to which they are to be transferred, arrive in Japan within 5 days. Services are rendered from 0900 hrs. to 1700 hrs.

AUTHORITY: Port & Harbour Bureau, Sasebo City, 3-5, Yorozu-cho, Sasebo City, Nagasaki Pref. *Tel:* (0956) 22-6128.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Nishikyushu Warehouse Co. Ltd., Tategami-cho, Sasebo-shi, Nagasaki-ken. Tel: Sasebo (0956) 24-6161. Cable Address: Soko Sasebo. Telex: 748227 Soko J.

SHIBUSHI: 31.28 N. 131.07 E.

SHIPMASTER'S REPORT: April 1990.

PORT LIMITS: An arc of one mile radius from position Lat. 31° 28.2 Long. 131° 06.7′ E.
DOCUMENTS: As per other Japanese ports.
PILOTAGE: At present it is arranged by Kagoshima Port Authority a only during daytime. Boarding position Lat. 31° 24′ N., Long 131° 5.5
ANCHORAGE: No fixed locations, anchorage is safe in the bay.
RESTRICTIONS: None. Berthing and unberthing during daylight ho only.
MAX. SIZE: LOA 240 m., draft 11.5 m.
HEALTH: Normal pratique procedure.
RADIO: As for Kagoshima.
VHF: No VHF watch maintained.
TUGS: Two tugs available at port for berthing and unberthing.
BERTHING: Four berths available for medium sized ships, of whic berths are for ships carrying bulk grain, which is discharged with sh cranes assisted by conveyor belts into silos built for the purpose. O berth – Wakahama Central No.1, without installed shore cranes available for general cargo. The fourth berth is for local passen vessels which call at the port daily.

Mobile cranes are available locally to assist discharge if required

STEVEDORES:
(a) Working hours are 0830 hrs. to 1630 hrs.
(b) Overtime normally only for finishing cargo.
(c) No work on Sundays.
(d) Discharge rate: Bagged cargo – 300 tonnes per gang/day.
Bulk cargo – 700 tonnes per gang/day.

DENSITY: 1025.
FRESH WATER: Available through hydrants on the jetty.
CONSULS: None.
REPAIRS: No facilities available.
DRY DOCKS: None.
SURVEYORS: None available.
GANGWAY/DECK WATCHMAN: Not required.
HATCHES: Opening/closing normally by crew.
CUSTOM ALLOWANCE: As per other Japanese ports.
CARGO GEAR: Optional.
REPATRIATION: Possible but inconvenient.
AIRPORT: See "Kagoshima".
TIME: GMT plus 9 hours.
HOLIDAYS: As in other Japanese ports.
TELEPHONES: Not available on board.
BANKS: Bank of Kagoshima, daily working hours 0900 to 15 Saturday 0900 to 1200.
STORING: Passenger jetty and general cargo berth have plenty of op space available alongside for storing by trucks. Fork lifts available a can work on jetty.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Shore passes issued by immigration.
GENERAL: *Charts:* Japanese charts: Kyusyu East Coast – Sibusi W No.185 and Sibusi – Ko No.5850.
AUTHORITY: Local port authority not yet established. Port operatio controlled from Kagoshima.

SHIMIZU: 35.00 N. 138.30 E. (See Plan)

DOCUMENTS: *Quarantine* (only when arriving from a foreign port):
1 Maritime Declaration of Health.
1 Crew List.
1 List of Passengers (if any on board).
Log Book and Registry, Certificate of Vaccination and Derat Certificate (or Derat Exemption Certificate) should be readily available.

Customs:
1 Declaration Inward/Outward of vessel.
1 Ship's Registry.
1 Last Port Clearance.
1 Stores List, including arms and narcotics.
2 Manifests of Cargo for discharge (prepared by Agents).
1 Manifest of Through Cargo.
1 Crew List.
1 List of Passengers.
1 Declaration of Crew's Baggage (only necessary if crew members have to land personal effects ashore).
1 Parcel List.

Immigration:
2 Crew Lists.
1 Application for Shore-passes.
2 Lists of Passengers.
1 Declaration Inward/Outward of vessel.

Harbour Master:
1 Declaration Inward/Outward of vessel.

Port Authority:
1 Declaration Inward/Outward of vessel.

Certificates: Ship's Register, Radio and Safety equipment Certificate, Derat Exemption Certificate, etc.

PILOTAGE: Pilotage should be arranged through Agent by VHF (Shimizu Port Radio, Channels 16, 12, 14, 20), or vessels requiring Pilot should hoist signal flag "G". Pilot Station: on the point 043° – 1500 m. from Shimizu Lighthouse (the lighthouse: Lat. 35° 00′ 24″ N., Long. 138° 32′ 00″ E.)

ANCHORAGES: See Section 3 on Chart of Shimizu.

MAX. SIZE: Dry-cargo: Max. draft 12 m. Length and breadth no restriction.

HEALTH: Free Pratique automatic calling at another Japanese port. Radio Pratique available.

VHF:

SHIMONOSEKI (including Mutsure): 33.57 N. 130.58 E. (See Plan)

(See "Kanmon-Ko")

DOCUMENTS:
- Ship's Register.
- Last Port Clearance.
- 3 Crew Lists including Passport Numbers.
- 3 Passenger Lists.
- 1 Stores List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
PILOTAGE: *Nissin Tanker Pier – Mutsure:* Pilotage is not compulsory but all vessels should take a Pilot. The Pilots reportedly are experienced, qualified and well organised.

If the vessel is coming from Westwards, the Pilot will board at the anchorage position N.N.E. of Mutsure-Sima.

If the vessel is coming from Eastwards, the same Pilot who navigated the vessel through the Kanmon Passage will bring the vessel to the berth if the tidal conditions are favourable and the berth is not occupied. Otherwise, the vessel should anchor off the terminal in an authorised anchorage.

Pilots meet vessels arriving from Eastward near the entrance approaches of Kanmon Passage off the Hesaki Lighthouse. However, this is not applicable when the vessel is coming from Seto Naikai.

Pilots have available heavy launches or tugs which generally have black and white superstructure.

The Port of Kanmon Ko is divided into several Districts, the mo important of which are Shimomoseki, Moji and Wakamatsu. T anchorage is quite congested and the traffic is heavy. Also, a lot fishing boats, barges on tow, and other craft may be encountered, extreme caution should be exercised.

Also see "Moji".
ANCHORAGES: Mutsure Anchorage: Undermentioned area is op port. The sea area surrounded by:
- *(a)* Line connecting Daibahana on Takenoko Island and top Wagora Island.
- *(b)* Line connecting top of Wagora Island and Udonohama Mutsure Island.
- *(c)* Coastline between Udonohama and Unoishibana on Mutsu Island.
- *(d)* Line connecting Unoishibana and Anse-no-Shiri in Shimonose
- *(e)* Line connecting Anse-no-Shiri and point at 370 m. fro Daibahana on the line connecting Daibahana and top of Wago Island.
- *(f)* Line Long. 130° 54′ E.

Anchorage includes a part of Quarantine Anchorage and Mutsure O Berth; depth 10 m. – 25 m.
RESTRICTIONS: See "Moji".
MAX. SIZE:

HEALTH: See "Moji".
RADIO: Recommended Master communicates with Agent throu Choshi Radio or Nagasaki Radio which cover all ports in Japan. specifically Westbound vessel to contact Choshi and Northbound contact Nagasaki Radio respectively.
VHF: Shimonoseki Port Radio Station on Channels 16, 12, 14, 20 a 22. Pilots on Channel 13.
TUGS: See "Moji".
BERTHING: No specific requirements. Pilot boarding time will be notifie by ship's Agent mainly by radio.
Mitsui Kinzoku Dolphin Pier: Max. d.w.t. 60,000. Max. LOA 230 Max. draft 11.90 m. 1 shore crane. Bauxite and phosphate handled.
BRIDGES: Kanmon Suspension Bridge was built in 1973 acro Hayatomo Channel (narrowest place in Kanmon Strait, width of fairwa 530 m.) between Shimonoseki and Moji. The height of the bridge fro sea level is 61 m.
STEVEDORES: At least 24 hours' prior notice excluding Sundays a holidays required in order for Agents to arrange stevedores. Vessel mu constantly keep her Agent advised of ETA. If stevedores cann commence loading/unloading at time notified by the Agent, the order must pay for waiting time. If cargo gear not rigged on berthi stevedores will do same for ship's crew. Overtime surcharges 1700 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. ne morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: It is recommended that advance notice be given if treatme required.
TANKERS: Shell Oil Berth situated at Hikoshima, on Southwestern e of Honshu, facing Moji across Kanmon Strait. In vicinity of berth, flo tide sets to East, ebb tide to West, current about 5-6 knots. Moori berth consists of 4 buoys, approximately 140 m. offshore, spa between buoys being approximately 270 m.

Max. dimensions of vessel which can be safely accommodated 18,000 d.w.t., LOA 170 m., breadth unlimited, draft 9 m. Produ handled, fuel oil. Shoreline 1×8 in. Discharge rate 500 t.p.h.

Vessels only berthed or unberthed when tide sets to West dur daytime only. In approaching berth, as vessel comes against tide, engine power and tug assistance required. One 10 in. pipe connec to vessel; discharge efficiency per hour 500-600 kl.

Nissin Tanker Pier No. 1 located about 610 m. South of Muts Lighthouse. At this berth, West-going current stronger than East-go and ship taken to berth only on Westerly current, with stern towa South. Most suitable berthing time is 2 – 3 hours after commencem of West-going current. Max. dimension of vessel which can accommodated at this berth is 95,000 d.w.t., LOA 246 m., draft 15 Product handled, fuel oil. Shoreline 3×12 in. Discharge rate 2,000 t. Berth Nos. 2 and 3 handle coastal tankers only.
DENSITY: 1025.
FRESH WATER: Good fresh water supplied either from water barg from hydrants alongside wharves. Rate of delivery from water ba 50 t.p.h. and from hydrants 40-50 tons.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice. Also see "Moji – Fuel".
CONSULS: Korean Consul, Tel. (66) 5341.
REPAIRS: All types of repairs possible.
DRY DOCKS: Mitsubishi Heavy Industries Ltd. 4 dockyards (Nos. 3 & 4 for smaller vessels).
Hayashikane Shipbuilding K.K. 3 dockyards (Max. 1,100 g.t.).
Towa Shipbuilding K.K. 1 dockyard (Max. 1,000 g.t.).
Mitsubishi Heavy Industries Ltd.
Dimensions of Docks:

	Length (m.)	*Breadth* (m.)	*Draft* (m.)
No. 1 Dock	164.13	25.0	7.04
No. 2 Dock	150.10	20.0	6.88

Max. Size of Vessel for Docking:

	Length (m.)	*Breadth* (m.)	*Draft* (m.)
No. 1 Dock	160.00	22.50	5.50
No. 2 Dock	143.00	19.30	5.00

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.
CARGO GEAR: See "Certificates", but no special requirements.
REPATRIATION: Possible.
AIRPORT: Approx. 80 km. to Fukuoka Airport; about 1.5 hours by train. Approx. 18 km. to Kitakyushu Airport; 40 minutes by taxi.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police Station 110; Ambulance/Fire Station 119.
TELEPHONE: Possible to place telephone on board.
SERVICES: All services available.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.
DEVELOPMENTS: Nishiyama lumber discharge wharves (depth of water 12 m.) and a lumber pool for larger vessels are under construction at Western centre of Hikoshima Island, facing Kanmon Straits.
AUTHORITY: Shimonoseki Port Authority, (750) 1-1 Nabe-cho, Shimonoseki City, Japan 750. *Tel:* (0832) 31-1111. *FAX:* (0832) 23 1300.
Contact: Takao Ito, General Manager.

AGENT: See "Moji".

SHIMOTSU (including Kainan): 34.06 N. 135.08 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.
Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
PILOTAGE: Pilot request to be given to pilot station through Agent. Advance notice of ETA: 72 hours and 24 hours before arrival. No VHF available. Pilot usually attends by tug boat. No special pilot boat. Pilot boards Lat. 34° 07′ 25″ N., Long. 135° 06′ 45″ E. No alternative area in event of bad weather. Location of anchorage for awaiting pilot – Lat. 34° 07′ 25″ N., Long. 135° 06′ 45″ E., as pilot station.
ANCHORAGES: Quarantine Anchorage, 20 m. depth.
RESTRICTIONS: Entry daytime only.
Yura Bay: Vessels no longer than 110 m. berth. Daytime entrance only regardless of tide and current.

MAX. SIZE:	*Max. d.w.t.*	*Length*	*Draft*
Tonen O-1	236,000	480 m.	18.50 m.
Tonen E-1	70,000	400 m.	12.50 m.
Maruzen Buoy Berth	35,000	230 m.	9.50 m.
Maruzen Jetty 5	50,000	392 m.	11.60 m.
Fuji Kosan Jetty 9 (Kainan)	70,000	250 m.	12.50 m.
Fuji Kosan Ohsaki Sea Berth	245,000	—	24.00 m.

Also see "Tankers".
HEALTH: Radio Pratique available.
Formalities will be carried out at the undermentioned positions which will be specified by Harbour Master.
1. Lat. 34° 07′ 09″ N., Long. 135° 06′ 20″ E.
2. Lat. 34° 08′ 09″ N., Long. 135° 06′ 28″ E.
3. Lat. 34° 08′ 25″ N., Long. 135° 05′ 47″ E.
4. Lat. 34° 08′ 33″ N., Long. 135° 06′ 49″ E.
5. Lat. 34° 09′ 00″ N., Long. 135° 06′ 29″ E.
6. Lat. 34° 08′ 48″ N., Long. 135° 07′ 30″ E.
7. Lat. 34° 09′ 14″ N., Long. 135° 07′ 27″ E.

RADIO: Recommended Masters communicate with Agents through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound, to contact Choshi, and Northbound, to contact Nagasaki Radio respectively.
TUGS: Tugs join at Quarantine Anchorage, tug lines used.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.
MEDICAL: No advance notice required unless urgent.
TANKERS: There are no slop facilities.

Berth	*Product*	*Shorelines*	*Discharge Rate* (t.p.h.)
Tonen O–1 Jetty	Crude Oil	2×12 in.	4,500
		3×16 in.	12,000
Tonen E–1 Jetty	Crude Oil	2×12 in.	2,500
	Fuel Oil	1×10 in.	2,000
Maruzen No. 5 Jetty	Crude Oil	2× 8 in.	1,500
Maruzen Buoy Berth	Fuel Oil	1× 8 in.	500
	Lube Oil	2× 6 in.	500
Fuji Kosan Jetty 9 (Kainan)	Crude Oil	3×16 in.	13,000

Tonen O-1 Jetty: This berth consists of an unfendered central platform with access way and pipe trestle to the shore, having on each side 1 flexible and 2 rigid breasting dolphins with catwalk connected to the central platform. There are 2 more rigid mooring dolphins for breasting lines located in a backward position relative to the breasting frontage and accessible by catwalk.

The spring lines are secured to either one of the rigid breasting dolphins at each side of the central platform.

The original mooring buoys have been replaced with mooring dolphins standing off the central platform 251 m. and 241 m. thus extending the total mooring frontage to 492 m. All mooring and breasting dolphins are fitted with capstans and remotely operated quick release hooks.

Currents run parallel to the berthing face, maximum 2 knots each way.

The berth has been approved for accommodating tankers of about 236,000 d.w.t. Depth alongside the berth is about 20 m. below C.D.

Berthing Procedures and Mooring: The vessel is turned about 1 mile North of the berth and then backed down to the berth. The reason for this procedure is twofold. First, there is insufficient room at the berth for turning. Second, in the port of Shimotsu vessels are normally berthed heading out so that in case of an emergency they can depart with the least possible delay. Furthermore the passage South of Zi-no-Shima inland is very often obstructed with fishing nets.

The vessel is brought parallel to the berth, about 150 ft. – 300 ft. off, and then pushed alongside by the attending tugs. Mooring lines are only led when the vessel is very close in or resting against breasting dolphins. The normal sequence for handling ship's ropes is: spring lines, bow and stern lines, and then the forward and aft breasting lines.

The mooring configuration for vessels less than 100,000 d.w.t. is: 3 bow lines, 3 stern lines, 2 forward breasting lines, 2 aft breasting lines, 2 forward back springs, 2 aft back springs. For vessels up to 200,000 d.w.t., an additional bow line and stern line is required. For vessels over 200,000 d.w.t., an additional breast line fore and aft is necessary. 2 mooring launches are used. The berth is equipped with a sonar docking system.

When very strong Southerly winds are experienced, the vessel will go port side to. This rarely happens.
DENSITY: Average density 1012.
FRESH WATER: Available at every berth except Fuji Kosan Sea Berth, by shore lines, rate about 25 tonnes per hour. Also available by barge.
FUEL: Most grades of domestic and bonded oil are available. If bunkering is carried out at anchorage, guard boat and oil fence will be required by harbour regulations.
CONSULS: None.
REPAIRS: Only minor deck and engine repairs.
DRY DOCKS:
Yura Dockyard: Mitsui Shipping & Engineering Co. Ltd. have constructed a 350,000 d.w.t. new dockyard in Yura, 50 nautical miles South of Kobe Lat. 33° 57′ 30″ N., Long. 135° 07′ 00″ E. Vessels calling at Yura port are requested to note the following information:

Tonnage dues should be paid at Wakayama since Yura is closed port.

Dock Master boards at position 280° – 2,000 m. from Arijima Lighthouse for entering Yura and Pilot is not required.

Vessel is requested to wait at Wakayama Anchorage if dry dock or wet basin is not available.

Vessel is requested to call at Shimotsu for Free Pratique if necessary.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.
REPATRIATION: Possible.
AIRPORT: Osaka International Airport.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 110 and Ambulance/Fire 119 (in case of emergency).
TELEPHONES: No facilities for placing telephones on board.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.
IDENTIFICATION CARDS: Not required.
AUTHORITY: Wakayama Shimotsu Port Administration Office, 22, Chikko 6-chome, Wakayama City. *Tel:* (0734) 31-7266.

AGENT: Sub-Agents of Dodwell & Co., Tokyo: Shimamoto Kaiun K.K., Kowan Kaikan, 3066, Shimotsu, Shimotsu-cho, Kaiso-gun, Wakayama-ken. Cable address: Shimamoto Wakayama Shimotsu. Domestic Telex: 05542-749 Shimast. J. Tel: (07349) 2-0141.

SHIOGAMA (Including Sendai): 38.20 N. 141.03 E. (See Plan)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Personal Effects.

Agent should be provided with necessary information to prepare Inward/Outward Declarations and Cargo Manifests.

PILOTAGE: Not compulsory but can be arranged at request of Master. Pilot not available after dark. Pilot boards at Fairway Buoy "A", position Lat. 38° 13′ 15″ N., Long. 141° 08′ 15″ E.

ANCHORAGES: Depth: 28 m. Bottom: Rock and sand. Anchorage not suitable in rough weather and as no sheltered anchorage nearby it is advisable for vessels to proceed offshore.

RESTRICTIONS: *For Vessels Entry Into and Sailing from Sendai:* Priority of entry and sailing from the port is given to ferries. Entry and sailing of other vessels is restricted to times outside ferry schedules. Entry of tankers controlled by Tohoku Oil Refinery Co. Ltd. under supervision of Harbour Master.

MAX. SIZE: See "Berthing".

HEALTH: Radio Pratique available.

Sendai: Formalities will be carried out at the Quarantine Anchorage (Lat. 38° 13′ 03″ N., Long. 141° 06′ 42″ E.)

Shiogama: Formalities will be carried out at the Quarantine Anchorage.

RADIO: Choshi Radio or Nagasaki Radio.

DOCUMENTS:

Harbour Master: Report of arrival and departure.

Shimotsu Customs Office (Tanabe Branch): 1 copy each of following.

Ship's Register
Last Port Clearance
Crew List
Passenger List
Stores List
Declaration of Crew's Baggage (First port only)
Cargo Manifest (Discharge & through cargo)
Declaration Inward of vessel
Parcel List.

Osaka Immigration Office (Shimotsu Branch):

1. Before ship's arrival: "Notice of Ship's Arrival" is to be submitted 24 hours before ship's arrival with Crew List (Name, Nationality, Date of Birth, Number of Passport or Seaman's Book, Rank).

2. On ship's arrival: "Report of Ship's Arrival" is to be submitted with Crew and Passenger Lists (if already submitted before ship's arrival, not required).

3. On Ship's Departure: "Report of Ship's Departure" to be submitted with Crew List if any changes.

Note: It is required that ship's Agent is able to guarantee the identification of crew.

Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

PILOTAGE: Not compulsory, but if required Agent to be advised 72 hours prior arrival. No pilotage sunset to sunrise. Anchorage waiting for Pilot Lat. 33° 42′ N., Long. 135° 19′ E. Pilot station 2,200 m. 315° from Banshono-hana Lighthouse. Depth 38 m.

ANCHORAGES: Waiting anchorage, 1,900 m. 40° from Banshono-hana Lighthouse. Depth 19 m. Bottom, sand and mud.

In Tanabe Port, there are many rocks, and therefore it is required to investigate the port passage sufficiently, according to the Chart of Tanabe Port which is issued by Maritime Agencies (Chart No. 74).

RESTRICTIONS: Max. draft 9.5 m. (31ft.), high tide. Usual draft, under 8.5 m. (28 ft.).

When a vessel loaded with explosives or dangerous cargo is entering the port, she must obey the instructions issued by Port Master when outside the port.

There is no restriction for night arrival.

HEALTH: Vessels usually anchor in the port of Owase or Shimotsu, where the authorities board and grant Free Pratique.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

Tanabe Maritime Safety Office, call sign: JNH.

The contents of communications must be concerned with ship's arrival and departure, and maritime safety.

VHF: Call: "Tanabe Hoan".

Communication to be concerned with ship's arrival and departure arrangements and port safety affairs.

Telephone number of Maritime Agencies: 0739-22-2000.

TUGS: None available.

BERTHING: 2 buoy berths, depth 10 m. and 7.5 m.

STEVEDORES: Available through Kinan Port Transport Union.

MEDICAL: No advance notice required unless urgent. In an emergency contact Maritime Agencies.

TANKERS: Proceed to Shimotsu.

DENSITY: About 1030.

TIDE: Tidal range: Maximum plus 2.13 m. Minimum minus 0.21 m.

FRESH WATER: Available by water barge, capacity 30 tons. Daytime delivery only to buoy berths. 48 hours' notice required.

FUEL: Bonded oil will be brought from Shimotsu or Kobe, when required.

CONSULS: None.

REPAIRS: No facilities available.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.

AIRPORT: Nanki Shirahama Airport about 25 km. distant. 2 Domestic flights daily to Tokyo.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Tanabe police office, tel. 0739-22-1226; Ambulance, tel. 0739-22-0931; Fire department, tel. 0739-22-0931.

SERVICES: None available locally but obtainable from Osaka.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

AUTHORITY: Tanabe Doboku (Public Works) Office, 23-1, Asahigaoka, Tanabe City, Wakayama Pref. *Tel:* (0739) 22-1200.

TOBATA: 33.55 N. 130.51 E. (See "Kanmon-Ko")

(See Plan)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

PILOTAGE: Compulsory. Harbour Pilots and Inland Sea Pilots are available at the pilot station or quarantine anchorage. Mutsure pilot station. Lat. 33° 59′ 30″ N., Long. 130° 53′ 00″ E.

ANCHORAGES: No. 5 Section, Wakamatsu. Depth: 9 m.– 11 m. Capacity 15,000 g.r.t. × 2. Quarantine Anchorages also used when necessary.

RESTRICTIONS:

(a) Vessels exceeding 20,000 tons gross may berth only within 1 hour before and/or after slack tide. Vessels under 20,000 tons gross may berth regardless of current, if it does not exceed 5 knots.

(b) Night entry: Vessels under 10,000 gross tons may berth at Nos. 1, 2, 3 and 8 wharves until 2200 hrs. in Summer season and 2100 hrs. in Winter season, subject to Harbour Master's permission and Pilot's agreement.

(c) Night departure: Vessels under 20,000 gross tons allowed to sail from Nos. 1, 2, 3, 8 wharves and Nos. "A", "B", "C" buoys until 2200 hrs., regardless of current, provided they are moored with bow outward.

(d) Least depth in channel, 17.0 m.

MAX. SIZE: No. 4 Ore Pier: 160,000 d.w.t. or 250,000 d.w.t. with part load.

HEALTH: Formalities will be carried out at the anchorage. Quarantine station 105° – 2,800 m., (800 m. square) from Mutsure Lighthouse.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Two tugs join vessel at entrance of harbour (in front of harbour signal station). Vessels exceeding 20,000 tons gross require 3 tugs. One of them will join vessel at Mutsure leading into main harbour and 2 join vessel at entrance of port (in front of harbour signal station).

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700 – 1900 hrs. (50% additional of basic stevedorage), 2100 – 0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).

MEDICAL: Kinjyo Hospital, Yawata; Shimada Surgical Hospital, Yawata. No advance notice required unless urgent.

TANKERS: *Kitakyushu LNG. Co.:* Max. size 125,000 d.w.t. Max. LOA 286 m. Max. draft 12.0 m. 3×16 in. (LNG) discharge rate 12,000 kl.; 1×16 in. (boil off oil) discharge rate 12,000 kl.

DENSITY: Average density in the port is about 1019 – 1021 in Summer season, 1025 – 1026 in Winter season.

FRESH WATER: Available in connecting lines from shore side at Wharf Nos. 1, 2, 3, 8 and 9. No. of hydrants 5, 4, 5, 5, 5. At buoys: from barges, arranged from Wakamatsu. Rate of delivery: 55 – 70 t.p.h., ex-hydrant, 60 t.p.h., barge. Overtime (0500 – 0800 hrs.) (1700 – 2200 hrs.), 50% add.; (2200 – 0500 hrs.), 100% add.; bad weather, 50% add.; Sundays and holidays, 50% add.; minimum quantity at Tobata, 30 tons; minimum quantity at Mutsure, 50 tons.

FUEL: Domestic oil is available. Bonded oil will be brought from Moji, Ube or Oita with sufficient advance notice, when required.

FIRE PRECAUTIONS: No tanker berth. Each tugboat equipped with fire extinguishing system for attending emergencies on request.

CONSULS: See "Yawata".

REPAIRS: All types of deck and engine repairs possible afloat.

DRY DOCK: No dry dock.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo aboard.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

REPATRIATION: Possible.

AIRPORT: See "Yawata".
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Tobata Police Office, Tel: 093-871-4321; Wakamatsu Water Police, Tobata Branch, Tel: 093-861-0284; Ambulance/Fire: Tobata Fire Department, Tel: 093-871-2621.
TELEPHONES: See "Yawata".
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.
WIND/TIDE: South-easterly winds prevail in the warm seasons and North-westerly winds in the Winter season. The maximum velocity recorded in the past being 18 m./sec. The tidal range is 2.145 m. The current at the channel leading to new port runs Southward at the flood and Northward at the ebb. The maximum speed of the current is about 3 knots. There is no current in the dock.
AUTHORITY: Kitakyushu Port and Harbor Bureau, 2-7 Nishi-Kaigan, 1-chome, Moji-ku, Kitakyushu-City, 801 Japan. *Tel:* (093) 321-5941, (093) 321-5941. *FAX:* (093) 321-5915.

TOKUYAMA (including Tonda): 34.02 N. 131.48 E.

Port situated in Yamaguchi Prefecture on Western part of mainland, facing Seto Inland Sea. Surrounded by Oshima Peninsula on the East, by Otsu-Shima and Uma-Shima (islands) on the S.W. and by the land on the North forms a large bay with deep water suitable for shelter. Sen-Shima and Kurokami-Shima (islands) lying in harbour, divide it into Tokuyama Section and Tonda Section.
DOCUMENTS:
(a) Customs. When vessel arrives direct from foreign port, Customs Officials will board to search. The following documents are to be submitted:
Crew List.
Passenger List.
Stores List.
Manifest of Crew Personal Effects (must be signed by individual crew member).
Arms and Ammunition List.
Narcotics List.
List of Ports of Call on current voyage.
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward (Form No. 02000).
The following will be checked on board: Ship's Registry, Last Port Clearance. When vessel comes from Japanese port, Customs Officials will not attend on board, except special case. Master or Agent are to attend at Custom House for entry formalities with the following documents:
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward.
Ship's Registry.
Last Port Clearance.
Documents entrusted with Master by Customs at previous port.
On vessel's departure a clearance is issued by Customs, after confirming payment of tonnage dues. Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
(b) Immigration. Immigration Officials attend from Tokuyama. They board vessel on arrival to examine passports, Discharge Books and/or other equivalent travel documents, and provide 72 hour landing passes for crew members and passengers. One copy each of Crew List and Passenger List are required by them. Providing ship's Agent with a Crew List beforehand will be a great help in expediting Immigration business on vessel's arrival. When vessel stays in port more than 72 hours, the landing passes will be extended every 72 hours on application. In event that crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men has been booked, or unless vessels to which they are to be transferred, arrive in Japan within 5 days. Also see "Shipmaster's Report".
Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
PILOTAGE:
Inland Sea Pilot (Sekisaki/Tokuyama): Not compulsory. Agent gives 24 hours' notice to Pilot Association Moji, and advise if ETA changed. (Master to cable "Anjin Moji" in case ETA changed and believes that his advice, if relayed by Agent, will not reach in good time; for example, at night before date of arrival at Sekisaki). Location: 3 miles South of Sekisaki Lighthouse (Lat. 33° 13′ N., Long. 131° 54′ E.). Pilot boards on vessel's arrival at pilot station day and night. No alternative area in event of bad weather. No VHF.
Harbour Pilot (Tokuyama Harbour or Tokuyama-wan): Not compulsory. Pilot boards in Tokuyama-wan at Quarantine Anchorage, or other anchorage to pilot to berth. Master who has not taken Pilot at Sekisaki should enter harbour without Pilot (no pilot station at entrance). Master to inquire position for anchoring from Agent prior arrival. Agent will advise Master in consideration of vessel's size, draft or number of other vessels, especially supertankers in port.

ANCHORAGES: Quarantine Anchorage, 34° 01′ N., 131° 46′ E., dep water 36 ft. Deeper water of more than 60 ft. about 2 miles S.W. Quarantine Anchorage where Quarantine board supertankers. If harbo congested, vessels, especially supertankers, anchor Outer Harbour, this case Quarantine go to Outer Harbour if advised by Master or Age In emergency or unable contact Agent, vessel can talk with Harbo Master by VHF, Channel 16, calling "Tokuyama Hoan". No restricti for entry into and/or departure from the anchorages after nightfall.
MAX. SIZE: Largest recorded vessel to enter 275,000 d.w. 19.5 m. draft.

Tankers: *Berth*	*Max.* *d.w.t.*	*Max.* *LOA* (m.)	*Max.* *Safe Draft* (m.)
Idemitsu Sea Berth	275,000	340	19.50
Idemitsu Ohura No. 3	50,000	250	12.00
Idemitsu Ohura No. 5	70,000	300	12.00
Idemitsu Ohura No. 7 (L.P.G. Terminal)	50,000	250	12.00
Idemitsu Center	35,000	220	11.00
Nippon Seiro Jetty	30,000	200	11.00

HEALTH: Radio Agent for Free Pratique not less than 12 hours and n more than 36 hours before arrival, advising full details of vessel a health conditions on board. When Free Pratique is granted by rad vessel will be required to submit the following documents to Quarant Officer on arrival:
Maritime Declaration of Health.
Crew List.
Passenger List.
The following vessels will not be able to get Radio Pratique:
A vessel that has been in contact with an infected area or a suspecte infected area within 15 days of arrival.
If a vessel has on board any case, or any suspected case of infectio disease, within 15 days of arrival.
If a vessel does not possess a valid Derat or Derat Exemptio Certificate.
RADIO: Recommended Master communicates with Agent throug Choshi Radio or Nagasaki Radio which cover all ports in Japa If specifically Westbound vessel, to contact Choshi, and Northbou to contact Nagasaki Radio respectively.
TUGS: Join inside harbour. For supertankers outer harbour if requeste Tugs' lines used. 8 tugs available, up to 4,000 h.p.

BERTHING: Also see "Tankers". No specific requirements. Pi boarding time will be notified by ship's Agent mainly by radio.

Idemitsu Sea Berth: Located in Tokuyama Bay at the position of Lat. 33° 59.5′ N., Long. 131° 46.1′ E., consisting of 7 mooring buoys. 275,000 d.w.t. tanker can be accommodated at this berth, being moored to buoys fore and aft. 4 powerful tug boats and 2 line boats are engaged in berthing/unberthing. Depth of water 20 m. Also see "Report" below.

Nippon Seiro Refinery: The mooring berth consists of 1 oil pier and 2 mooring buoys, to which vessel is moored fore and aft, port side alongside pier, there are also dolphins fore and aft.

Nippon Zeon Wharf (25 ft.) for LPG only.

Operator's Report: 1983.

Idemitsu Kosan Tokuyama Sea Berth (Discharging terminal):

Multiple buoy mooring system berth with 1 or 2 anchors.

Berth operates 24 hours per day, 7 days a week. Ships moored and unmoored at daytime, weather or other circumstances permitting. Berth will not be closed due to any holidays.

Location: Lat. 33° 59′ 12″ N., Long. 131° 46′ 00″ E.

Pilotage: Not compulsory.

Approaches: In order to make use of slack water berthing operations should be commenced 2 hours before slack water.

Berth is to be approached on a course of 075° after passing N.W. of Iwa Island, anchorage position visible from ship's bridge just after passing Sukumo Island abeam to starboard.

After letting go anchor (port), turn anti-clockwise with tug's assistance and let out 3 shackles and approach berthing position and take in slack anchor chain.

In Winter (from November-March) monsoons prevail, let go starboard anchor when heading about 320° and port anchor is out to 5 shackles then let out both chains, and move astern into berth.

1st line out should be taken to either No. 1 or No. 2 mooring buoy, whichever is the nearest.

Berthing:

(a) Vessel must not proceed to starboard of yellow buoy, because North of transit line No. 2 and 3 buoys area becomes shallow with depths 17 m. – 19 m.

(b) If port anchor let out too fast or too much, ship cannot return to manifold position, as anchor position designed for 8 – 9 shackles on port anchor when ship made fast.

(c) When Berthing Master comes on board, please advise him of number of shackles on each anchor and length from bow to manifold.

(d) Wire mooring lines are better than hawsers especially in case of No. 1, 2, 3, 4, 5, 7 buoys where wire should be used (each using 2 wires) as these wires are used to adjust the manifold position.

(e) Mooring arrangement:
Port anchor 8 – 9 shackles
Starboard anchor 2 – 3 shackles
No. 1 – 7 buoys 2 lines to each

DENSITY: 1025.

FRESH WATER: Water barges available, 1 each of 450 tons, 350 tons and 160 tons. Hydrants at Harumi Public Pier, Idemitsu Central Pier, Toyo Soda Wharf. The rate of delivery: 50 t.p.h. from barge, 20 t.p.h. from hydrant. (Public hydrant 30 t.p.h.).

FUEL: Major oil companies are represented and all grades of marine oil can be delivered usually by barge.

CONSULS: None.

REPAIRS: Minor repairs only.

DRY DOCKS: Kasado Dockyard in Kudamatsu-wan, entrance 3 miles East of Tokuyama-wan entrance. Largest dry dock for 90,000 tonners and two other dry docks/building docks.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

AIRPORT: Hiroshima (about 40 minutes by Shinkansen), Ube (about 40 minutes by Shinkansen and taxi).

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police, tel. 110; Ambulance and Fire, tel. 119.

TELEPHONES: No facilities for placing on board.

SERVICES: From Moji, Kobe or Osaka.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

SHIPMASTER'S REPORT: June, 1983.

Toya Soda Salt Pier at Tonda.

Documents/Immigration: Landing Passes are now valid for 1 week but restricted to the immediate Port Area (Tokuyama) only. This restriction is enforced and the Agent must make written, individual application for any crew member required or desiring to leave the Tokuyama area. There are severe penalties (Y100,000) for being found ashore by the Authorities without a Landing Pass.

Pilotage: The Inland Sea Pilot who boarded at Seki Saki also acted as Harbour Pilot, boarding from a fast launch with the vessel making about 4 knots. Oita Port Radio, in the first Western bay of the Inland Sea after passing through the Hayasui Seto entrance, called on VHF Channel 16 to confirm the vessel's nationality and ETA.

For a vessel of our size (see "Berthing"), pilotage is at daylight High Water only, using 3 tugs and the Eastern dredged channel into Tonda Port. Departure is during daylight hours only (pilot available apparently 0630 – 1830 hrs. during June, although ours wasn't ordered by the Charterers' Agents until 0800 hrs.). Vessel was swung off the berth by 2 tugs and proceeded to sea, again by the Eastern Channel, there being a substantial 'corner' to negotiate in the dredged channel on the Tokuyama section of the port.

Health: We could not get Radio Pratique as the Authorities required the number of the vessel's Sanitary Certificate. However, after berthing, we were unable to ascertain just what this Certificate was. The number of our Derat Exemption and type and make of the sewage system did not satisfy this question either.

Berthing: We were probably one of the larger vessels to berth at the Toyo Soda Salt Pier, discharging 31,536 metric tons of coal on dimensions – length 177 m., beam 27.8 m., draft 10.5 m. and of 20,096 gross tons. With large, engines-aft, bulk carriers there are problems with landing the gangway on the end of the jetty. A shore gangway cannot be used because of the travel of the Portainer-type discharging crane. Stevedores use a vertical steel ladder clipped over the sheer strake for access.

Access ashore through the Toyo Soda Cement Factory is prohibited to ship's crew and a Launch Service (Sampan) must be engaged, with the requisite timetable, for transport to Tokuyama, 15 minutes distant, the launch berthing at the Customs Pier.

This launch is also used for the Agent, watchmen, etc. and it may well be preferable to lower the off-side gangway to near the water as a means of access. The only permitted access to and from the launch via the vessel's gangway onto the wharf is by a badly bent vertical steel ladder at the end of the jetty.

Fresh Water: Not available from Toyo Soda Salt Pier, delivery can only be made by lighter.

Storing: Mobile cranes are not allowed onto the wharf to work ship's stores, E/R spares, etc. and if these cannot be coped with by the vessel's own gear or stores crane, floating plant would have to be hired.

AUTHORITY: Shunan Port Administration Office, 111, Chikko-cho, Tokuyama City, Yamaguchi Pref. *Tel:* (0834) 21-1787.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Holme Ringer & Co. Ltd., c/o Sankyu Transportation & Engineering Co. Ltd., Shunan Branch, 12-7 Chikko-cho, Tokuyama-shi, Yamaguchi-ken. Cable address: Ringer Tokuyama. Domestic Telex: 6765-93 Sankyu J. Tel.: Tokuyama (0834) 22-0039.

TOKYO: 35.43 N. 139.46 E. (See Plan)

DOCUMENTS:

4 copies Inward/Outward Declaration – (Form C.2000 prepared by Agent).
1 copy Berth Application (normally prepared by Agent).
3 Cargo Manifest (Form C.2030 prepared by Agent).
1 List Ship's Stores (Form C.2040).
2 Parcel List.
5 Passenger Manifest (Form C.2070).
5 Crew Manifest (Form C.2060).
1 Statement by Master (Form C.2020).
1 Declaration for Payment Tonnage Dues (prepared by Agent).
1 Maritime Declaration of Health.
1 Application for Shore Passes (prepared by Agent).
2 Baggage Lists (Form 5370).

PILOTAGE: 12 hours advance notice of ETA required. Pilot boats named Musashi, Takao, Tsukuba and Ayase. No light or sound signals, use ship's radio in case necessity arises. Address: Tokyo Pilot Association, 3-26-82 Kaigan, Minato-ku, Tokyo (at the Southern tip of the Shibaura Wharf). Tel: 453-1691.

Pilot boards vessel outside harbour. Vessel awaits Pilot around "Quarantine Anchorage".

Vessels requiring a Pilot for the Uraga Channel should radio request to Anjin Yokosuka advising ship's details and arriving time at No. 1 Uraga Channel Light Buoy. Uraga Channel Pilot embarks 3 – 5 miles S.S.E. of Kannonsaki Lighthouse, and will disembark on arrival at destination port limits. Applications for Uraga Channel Pilot should reach pilot office 24 hours before vessels arrival at No. 1 Uraga Channel Light Buoy.

Vessels of 10,000 gross tons or more should give "Notification of Traffic" to ensure safety of their navigation in or near Uraga Suido and Nakanose traffic routes (normally by Agent).

AIRPORT: See "Yawata".
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Tobata Police Office, Tel: 093-871-4321; Wakamatsu Water Police, Tobata Branch, Tel: 093-861-0284; Ambulance/Fire: Tobata Fire Department, Tel: 093-871-2621.
TELEPHONES: See "Yawata".
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.
WIND/TIDE: South-easterly winds prevail in the warm seasons and North-westerly winds in the Winter season. The maximum velocity recorded in the past being 18 m./sec. The tidal range is 2.145 m. The current at the channel leading to new port runs Southward at the flood and Northward at the ebb. The maximum speed of the current is about 3 knots. There is no current in the dock.
AUTHORITY: Kitakyushu Port and Harbor Bureau, 2-7 Nishi-Kaigan, 1-chome, Moji-ku, Kitakyushu-City, 801 Japan. *Tel:* (093) 321-5941, (093) 321-5941. *FAX:* (093) 321-5915.

TOKUYAMA (including Tonda): 34.02 N. 131.48 E.

Port situated in Yamaguchi Prefecture on Western part of mainland, facing Seto Inland Sea. Surrounded by Oshima Peninsula on the East, by Otsu-Shima and Uma-Shima (islands) on the S.W. and by the land on the North forms a large bay with deep water suitable for shelter. Sen-Shima and Kurokami-Shima (islands) lying in harbour, divide it into Tokuyama Section and Tonda Section.
DOCUMENTS:
(a) Customs. When vessel arrives direct from foreign port, Customs Officials will board to search. The following documents are to be submitted:

Crew List.
Passenger List.
Stores List.
Manifest of Crew Personal Effects (must be signed by individual crew member).
Arms and Ammunition List.
Narcotics List.
List of Ports of Call on current voyage.
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward (Form No. 02000).

The following will be checked on board: Ship's Registry, Last Port Clearance. When vessel comes from Japanese port, Customs Officials will not attend on board, except special case. Master or Agent are to attend at Custom House for entry formalities with the following documents:

Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward.
Ship's Registry.
Last Port Clearance.

Documents entrusted with Master by Customs at previous port.

On vessel's departure a clearance is issued by Customs, after confirming payment of tonnage dues. Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

(b) Immigration. Immigration Officials attend from Tokuyama. They board vessel on arrival to examine passports, Discharge Books and/or other equivalent travel documents, and provide 72 hour landing passes for crew members and passengers. One copy each of Crew List and Passenger List are required by them. Providing ship's Agent with a Crew List beforehand will be a great help in expediting Immigration business on vessel's arrival. When vessel stays in port more than 72 hours, the landing passes will be extended every 72 hours on application. In event that crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men has been booked, or unless vessels to which they are to be transferred, arrive in Japan within 5 days. Also see "Shipmaster's Report".
Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
PILOTAGE:
Inland Sea Pilot (Sekisaki/Tokuyama): Not compulsory. Agent gives 24 hours' notice to Pilot Association Moji, and advise if ETA changed. (Master to cable "Anjin Moji" in case ETA changed and believes that his advice, if relayed by Agent, will not reach in good time; for example, at night before date of arrival at Sekisaki). Location: 3 miles South of Sekisaki Lighthouse (Lat. 33° 13′ N., Long. 131° 54′ E.). Pilot boards on vessel's arrival at pilot station day and night. No alternative area in event of bad weather. No VHF.
Harbour Pilot (Tokuyama Harbour or Tokuyama-wan): Not compulsory. Pilot boards in Tokuyama-wan at Quarantine Anchorage, or other anchorage to pilot to berth. Master who has not taken Pilot at Sekisaki should enter harbour without Pilot (no pilot station at entrance). Master to inquire position for anchoring from Agent prior arrival. Agent will advise Master in consideration of vessel's size, draft or number of other vessels, especially supertankers in port.

ANCHORAGES: Quarantine Anchorage, 34° 01′ N., 131° 46′ E., dep water 36 ft. Deeper water of more than 60 ft. about 2 miles S.W. Quarantine Anchorage where Quarantine board supertankers. If harbo congested, vessels, especially supertankers, anchor Outer Harbour this case Quarantine go to Outer Harbour if advised by Master or Age In emergency or unable contact Agent, vessel can talk with Harbo Master by VHF, Channel 16, calling "Tokuyama Hoan". No restrictio for entry into and/or departure from the anchorages after nightfall.
MAX. SIZE: Largest recorded vessel to enter 275,000 d.w 19.5 m. draft.

Tankers: *Berth*	*Max.* *d.w.t.*	*Max.* *LOA* (m.)	*Max.* *Safe Draft* (m.)
Idemitsu Sea Berth	275,000	340	19.50
Idemitsu Ohura No. 3	50,000	250	12.00
Idemitsu Ohura No. 5	70,000	300	12.00
Idemitsu Ohura No. 7 (L.P.G. Terminal)	50,000	250	12.00
Idemitsu Center	35,000	220	11.00
Nippon Seiro Jetty	30,000	200	11.00

HEALTH: Radio Agent for Free Pratique not less than 12 hours and n more than 36 hours before arrival, advising full details of vessel a health conditions on board. When Free Pratique is granted by rad vessel will be required to submit the following documents to Quarantin Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspecte infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectio disease, within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemptio Certificate.

RADIO: Recommended Master communicates with Agent throu Choshi Radio or Nagasaki Radio which cover all ports in Japa If specifically Westbound vessel, to contact Choshi, and Northbou to contact Nagasaki Radio respectively.
TUGS: Join inside harbour. For supertankers outer harbour if requeste Tugs' lines used. 8 tugs available, up to 4,000 h.p.

BERTHING: Also see "Tankers". No specific requirements. Pi boarding time will be notified by ship's Agent mainly by radio.

(a) *Wharf*	*Length* (m.)	*Depth* (m.)	*Capacity* (g/t)	*Cargo*
Tokuyama Soda Salt Pier	117	10.0	15,000×1	Salt/Cement Clinke

STEVEDORES: At least 24 hours prior notice excluding Sundays a holidays required in order for Agent to arrange stevedores. Vessel mu constantly keep her Agent advised of ETA. If stevedores cann commence loading/unloading at time notified by the Agent, the ordere must pay for waiting time. If cargo gear not rigged on berthin stevedores will do same for ship's crew. Overtime surcharg 1630–2130 hrs. (60% additional on basic stevedorage), 2130–0830 h next morning (120% additional on basic stevedorage), Sundays/holida (100% additional on basic stevedorage).
Loading/Unloading Facilities:
(a) Gangs: Maximum 40 gangs are available.

Classification	*Regular Employees*	*Temporary labourers*
Stevedores	200	230
Longshoremen	110	80

Stevedoring Companies: Tokuyama Kairiku Unso Kabushiki Kaish Kamigumi & Co. Ltd.; Toyo Koun Co. Ltd.; Sankyu Unyo Kiko C and Nippon Express Co. Ltd.

(b) Lighters: No lighter is available, but coastal boat available for u as substitute for lighters. 8,000 d.w.t. arrangeable with notice of 2 wee in advance.
(c) Shore Crane:

Wharf	*Capacity grab* (tons)	*Max. discharge rate* (t.p.h.)
Tokuyama Soda Salt Pier	10	500
Toyo Soda Salt Pier	12	550

(d) Floating crane: Capacity, 100 tons available from Kudamatsu.
(e) Average performance of loading/unloading: Loading: Cement bags, 55 – 65 t.p.h./gang; Soda ash in bags, 40 – 50 t.p.h./ga Fertiliser in bags, 55 – 65 t.p.h./gang. Salt in bulk, 500 – 550 t.p.h./s Clinker in bulk, 180 – 200 t.p.h./ship. Chrome Ore in bulk, 65 – 75 t.p gang.
Working Hours: 1 labour shift. Normal working hours: 0800 – 1700 h Overtime is possible by applying to Customs. No work can be arran for during New Year Holiday (1st to 3rd January) and Holiday (14t 16th August).
MEDICAL: No advance notice required unless urgent.
Hospitals: Asanoumi Hospital, Asami Hospital, Ishikai Hospital, Ch Hospital, Ono Dental, Ishida Dental.

TANKERS: No slop facilities.

Berth	Product	Shoreline	Discharge Rate (t.p.h.)	Hoses
Idemitsu Sea Berth	Crude Oil	36″×1 30″×1	10,000	16″×2 Flexible, 8 ton derrick for each hose.

	Butane	8″×2		8″×2 (vapour gas)
	Naphtha	24″×1	3,000	
Idemitsu Centre	Fuel Oil	18″×1	2,000	8″×2 Chicksan Joint.
Nippon Seiro Jetty	Raw Oil	12″×1	700	8″×1 Flexible
	Fuel Oil	10″×1	500	8″×1 Flexible

Idemitsu Sea Berth: Located in Tokuyama Bay at the position of Lat. 33° 59.5′ N., Long. 131° 46.1′ E., consisting of 7 mooring buoys. 275,000 d.w.t. tanker can be accommodated at this berth, being moored to buoys fore and aft. 4 powerful tug boats and 2 line boats are engaged in berthing/unberthing. Depth of water 20 m. Also see "Report" below.

Nippon Seiro Refinery: The mooring berth consists of 1 oil pier and 2 mooring buoys, to which vessel is moored fore and aft, port side alongside pier, there are also dolphins fore and aft.

Nippon Zeon Wharf (25 ft.) for LPG only.

Operator's Report: 1983.

Idemitsu Kosan Tokuyama Sea Berth (Discharging terminal):

Multiple buoy mooring system berth with 1 or 2 anchors.

Berth operates 24 hours per day, 7 days a week. Ships moored and unmoored at daytime, weather or other circumstances permitting. Berth will not be closed due to any holidays.

Location: Lat. 33° 59′ 12″ N., Long. 131° 46′ 00″ E.

Pilotage: Not compulsory.

Approaches: In order to make use of slack water berthing operations should be commenced 2 hours before slack water.

Berth is to be approached on a course of 075° after passing N.W. of Iwa Island, anchorage position visible from ship's bridge just after passing Sukumo Island abeam to starboard.

After letting go anchor (port), turn anti-clockwise with tug's assistance and let out 3 shackles and approach berthing position and take in slack anchor chain.

In Winter (from November-March) monsoons prevail, let go starboard anchor when heading about 320° and port anchor is out to 5 shackles then let out both chains, and move astern into berth.

1st line out should be taken to either No. 1 or No. 2 mooring buoy, whichever is the nearest.

Berthing:

(a) Vessel must not proceed to starboard of yellow buoy, because North of transit line No. 2 and 3 buoys area becomes shallow with depths 17 m. – 19 m.

(b) If port anchor let out too fast or too much, ship cannot return to manifold position, as anchor position designed for 8 – 9 shackles on port anchor when ship made fast.

(c) When Berthing Master comes on board, please advise him of number of shackles on each anchor and length from bow to manifold.

(d) Wire mooring lines are better than hawsers especially in case of No. 1, 2, 3, 4, 5, 7 buoys where wire should be used (each using 2 wires) as these wires are used to adjust the manifold position.

(e) Mooring arrangement:
Port anchor 8 – 9 shackles
Starboard anchor 2 – 3 shackles
No. 1 – 7 buoys 2 lines to each

DENSITY: 1025.

FRESH WATER: Water barges available, 1 each of 450 tons, 350 tons and 160 tons. Hydrants at Harumi Public Pier, Idemitsu Central Pier, Toyo Soda Wharf. The rate of delivery: 50 t.p.h. from barge, 20 t.p.h. from hydrant. (Public hydrant 30 t.p.h.).

FUEL: Major oil companies are represented and all grades of marine oil can be delivered usually by barge.

CONSULS: None.

REPAIRS: Minor repairs only.

DRY DOCKS: Kasado Dockyard in Kudamatsu-wan, entrance 3 miles East of Tokuyama-wan entrance. Largest dry dock for 90,000 tonners and two other dry docks/building docks.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

AIRPORT: Hiroshima (about 40 minutes by Shinkansen), Ube (about 40 minutes by Shinkansen and taxi).

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police, tel. 110; Ambulance and Fire, tel. 119.

TELEPHONES: No facilities for placing on board.

SERVICES: From Moji, Kobe or Osaka.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

SHIPMASTER'S REPORT: June, 1983.

Toya Soda Salt Pier at Tonda.

Documents/Immigration: Landing Passes are now valid for 1 week but restricted to the immediate Port Area (Tokuyama) only. This restriction is enforced and the Agent must make written, individual application for any crew member required or desiring to leave the Tokuyama area. There are severe penalties (Y100,000) for being found ashore by the Authorities without a Landing Pass.

Pilotage: The Inland Sea Pilot who boarded at Seki Saki also acted as Harbour Pilot, boarding from a fast launch with the vessel making about 4 knots. Oita Port Radio, in the first Western bay of the Inland Sea after passing through the Hayasui Seto entrance, called on VHF Channel 16 to confirm the vessel's nationality and ETA.

For a vessel of our size (see "Berthing"), pilotage is at daylight High Water only, using 3 tugs and the Eastern dredged channel into Tonda Port. Departure is during daylight hours only (pilot available apparently 0630 – 1830 hrs. during June, although ours wasn't ordered by the Charterers' Agents until 0800 hrs.). Vessel was swung off the berth by 2 tugs and proceeded to sea, again by the Eastern Channel, there being a substantial 'corner' to negotiate in the dredged channel on the Tokuyama section of the port.

Health: We could not get Radio Pratique as the Authorities required the number of the vessel's Sanitary Certificate. However, after berthing, we were unable to ascertain just what this Certificate was. The number of our Derat Exemption and type and make of the sewage system did not satisfy this question either.

Berthing: We were probably one of the larger vessels to berth at the Toyo Soda Salt Pier, discharging 31,536 metric tons of coal on dimensions – length 177 m., beam 27.8 m., draft 10.5 m. and of 20,096 gross tons. With large, engines-aft, bulk carriers there are problems with landing the gangway on the end of the jetty. A shore gangway cannot be used because of the travel of the Portainer-type discharging crane. Stevedores use a vertical steel ladder clipped over the sheer strake for access.

Access ashore through the Toyo Soda Cement Factory is prohibited to ship's crew and a Launch Service (Sampan) must be engaged, with the requisite timetable, for transport to Tokuyama, 15 minutes distant, the launch berthing at the Customs Pier.

This launch is also used for the Agent, watchmen, etc. and it may well be preferable to lower the off-side gangway to near the water as a means of access. The only permitted access to and from the launch via the vessel's gangway onto the wharf is by a badly bent vertical steel ladder at the end of the jetty.

Fresh Water: Not available from Toyo Soda Salt Pier, delivery can only be made by lighter.

Storing: Mobile cranes are not allowed onto the wharf to work ship's stores, E/R spares, etc. and if these cannot be coped with by the vessel's own gear or stores crane, floating plant would have to be hired.

AUTHORITY: Shunan Port Administration Office, 111, Chikko-cho, Tokuyama City, Yamaguchi Pref. *Tel:* (0834) 21-1787.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Holme Ringer & Co. Ltd., c/o Sankyu Transportation & Engineering Co. Ltd., Shunan Branch, 12-7 Chikko-cho, Tokuyama-shi, Yamaguchi-ken. Cable address: Ringer Tokuyama. Domestic Telex: 6765-93 Sankyu J. Tel.: Tokuyama (0834) 22-0039.

TOKYO: 35.43 N. 139.46 E. (See Plan)

DOCUMENTS:
4 copies Inward/Outward Declaration – (Form C.2000 prepared by Agent).
1 copy Berth Application (normally prepared by Agent).
3 Cargo Manifest (Form C.2030 prepared by Agent).
1 List Ship's Stores (Form C.2040).
2 Parcel List.
5 Passenger Manifest (Form C.2070).
5 Crew Manifest (Form C.2060).
1 Statement by Master (Form C.2020).
1 Declaration for Payment Tonnage Dues (prepared by Agent).
1 Maritime Declaration of Health.
1 Application for Shore Passes (prepared by Agent).
2 Baggage Lists (Form 5370).

PILOTAGE: 12 hours advance notice of ETA required. Pilot boats named Musashi, Takao, Tsukuba and Ayase. No light or sound signals, use ship's radio in case necessity arises. Address: Tokyo Pilot Association, 3-26-82 Kaigan, Minato-ku, Tokyo (at the Southern tip of the Shibaura Wharf). Tel: 453-1691.

Pilot boards vessel outside harbour. Vessel awaits Pilot around "Quarantine Anchorage".

Vessels requiring a Pilot for the Uraga Channel should radio request to Anjin Yokosuka advising ship's details and arriving time at No. 1 Uraga Channel Light Buoy. Uraga Channel Pilot embarks 3 – 5 miles S.S.E. of Kannonsaki Lighthouse, and will disembark on arrival at destination port limits. Applications for Uraga Channel Pilot should reach pilot office 24 hours before vessels arrival at No. 1 Uraga Channel Light Buoy.

Vessels of 10,000 gross tons or more should give "Notification of Traffic" to ensure safety of their navigation in or near Uraga Suido and Nakanose traffic routes (normally by Agent).

ADVANCE APPLICATIONS: Passenger ships and large vessels using mooring facilities must submit applications for use of facilities to port managers (the Port and Harbour Bureau of Tokyo Metropolitan Government) through shipping firms or Agents 3 days before entry into port so that they may have berths designated.

When they want to use anchorage facilities, they must submit applications for use of anchorage areas to Tokyo-Yokohama Port Director (the Port and Harbour Section of the Tokyo Maritime Safety Agency) to have anchorage sites designated. Small vessels of less than 300 gross tons do not need to submit anchorage application.

When ships of over 500 gross tons want to enter port at night (from sunset to sunrise), must submit applications in advance to Port Director and receive permission. Copy of written permission given to captain of ship when ship has entered port.

A ship carrying explosives or any other dangerous cargo must submit 2 copies of application in advance for permission to use port to Port Director. Such ships required to stay outside port in No. 3 Area. However, they will be allowed to enter port when Port Director considers it allowable.

ANCHORAGES: See "Advance Applications".

Quarantine Anchorage on starboard hand of No. 1 Fairway.

Sector "A" is a triangular sea area formed by line passing through point 180° and 400 m. from Light Buoy No. 16 and point 105° and 240 m. from same light buoy. Accommodates one 1,000 ton class ship or 2 ships of 500 ton class or smaller.

Sector "C" (263,330 sq.m.) is a space between Harumi Wharf and Toyosu Wharf. Accommodates five 2,000 ton class vessels.

Sector "D" (141,350 sq.m.) sea area enclosed by line drawn from point 217° and 400 m. from Northwestern tip of Tsukishima Fishery Base through No. 8 Mooring Buoy. No. 15 Buoy and Southern tip of Tsukishima Fishery Base. Accommodates 5 vessels smaller than 1,000 tons, but 2 if vessels larger than 700 tons.

RESTRICTIONS: No. 1 Fairway is long and narrow (4,200 m. × 300 m.) and carries considerable traffic. Vessels under 500 tons not permitted use Fairway when vessel over 5,000 tons is in transit. Depth 12 m.

Container Vessels: May enter from sunrise till 2400 hrs. and may leave at any time.

HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health condition on board. When Free Pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or suspected case, of infectious disease within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

Medical inspection of plants: When a report is received in advance from a ship by telegraph or other means of communication, Tokyo Office of the Yokohama Plant Disease Prevention Station must be notified by telephone or verbally in request for an on-the-spot inspection of plant in question.

Medical inspection of animals: When a report is received from a ship in advance by telegraph or other means of communication, the Tokyo Branch or the Haneda Branch of Animal Disease Prevention Station must be notified by telephone or verbally in request for an on-the-spot inspection of the animals.

RADIO: Vessels entering are watched at all times at Torigasaki, the entrance gate to Tokyo Bay, and record of passing the point is taken. As each ship passes point, this is immediately communicated by VHF radio telephone to head office of Tokyo Signal Communications Company. From here news communicated on normal telephone or on exclusive direct call telephone to interested parties (also see "VHF").

Recommended Master communicates with Agents through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

MAX. SIZE: Draft: General/Bulk: 7.0 m. for Toyosu; 10.0 m. Shinagawa, Harumi and buoys; 10.0 m. for Land-lot No. 13 and 12.0 m. for Oh-i and Aomi.

Tide: These drafts are at low water. The difference between high a low water level is about 2 m.

Tankers: Tokyo Gas Wharf (Toyosu) Max. d.w.t. 23,000. Max. dra 11.0 m.

VHF:

A. Transmitting antenna:	Located 39° 26′ N. 139° 39′ E.
B. Type:	Single communication – Yagi type. Plural communication – Corner reflecto type.
C. Direction:	Southern part of entrance to Tokyo Ba and Port of Tokyo.
D. Frequency class:	F3.
E. Frequency:	Simplex communication – 156.6 MHz, Channel 12 156.7 MHz, Channel 14 156.8 MHz, Channel 16 (for calling, answering and safety) Duplex communications – 161.6 MHz, Channel 20 161.7 MHz, Channel 22
F. Antenna power:	50 W.
G. Call sign:	Tokyo Port Radio.
H. Range:	Approx. 100 km. (straight range) S.E. side – About 20 nautical miles Sout of Nojimazaki. S.W. side – About 5 nautical miles Nort of Oshima Island. North side – Tokyo Port and Chiba Por
I. Operating time:	All times.

Ship Telephone: Uses VHF and is a service between navigating anchored ships and subscriber telephones on land, and between ship connected via base station on land. Communicating sphe approximately 50 km. to 100 km. from base station. Base station located so as to allow communication with any ship sailing alon Japanese coasts.

BERTHING: Any vessel entering port required to:

(1) Submit 1 each of "Declarations Inward/Outward of Vessels" t TMG and TMSA. See "Documents".

(2) Submit "Application for Berth" to TMG. See "Documents".

(3) Submit "Application for Designation of Anchoring Site" to TMS (Form No. 13) regarding anchoring area.

Berthing will be in order of arrival, passenger and special carg vessels excepted.

Name of Wharf	*Length* (m.)	*Depth* (m.)	*No. of Berths*
Shinagawa (Foreign Trade)	585	10.0	3
Shinagawa (Domestic Trade)	476	8.0	3
Shinagawa Container Terminal	558	10.0	3
Shibaura	910	7.8	7
Hinode	564	6.7	6
Takeshiba	309	6.7	3
Tsukishima	260	7.5	2
Harumi	1,444	9 – 10.0	8
Toyosu	800	7 – 10.0	8
Ariake Terminal	750	5.0	10
Oh-i Marine Products Wharf	450	12.0	2
No. 15 Lumber Wharf	720	10.0–12.0	3
Oh-i Container Terminal	2,300	12.0	8
Odaiba Terminal	1,800	10.0	9
Aomi Container Terminal (Berth C-1)	300	12.0	1

There are many private wharves and other smaller public wharves use and under construction.

CARGO HANDLING FACILITIES:

Wharf/Terminal	*Equipment*	*Capacity*	*Cargo Handled*	*Remarks*
Oh-i Terminal	16 container gantries	30.5 tons	Containers	Straddle carriers and transtaine available.
Shinagawa Container Terminal	1 container gantry 2 container gantries	24.5 tons 30.5 tons	Containers	Ro-Ro facilities, Straddle carrie available.
Shinagawa (Foreign Trade)	2 unloaders 1 belt conveyor	6.4 tons 600 t.p.h.	Machinery, sugar, fruit.	3 transit sheds (18,118 sq.m.) Open storage 14,451 sq.m.
Shibaura (Foreign Trade)			Paper, cement, fertiliser, feed grain	2 transit sheds (4,665 sq.m.) Open storage 2,104 sq.m.
Hinode Terminal			Salt, paper, soda ash.	9 transit sheds (19,583 sq.m.) Open storage 6,806 sq.m.
Tsukishima Terminal			Marine products	
Harumi Terminal	4 portal jib cranes	5 tons	Sugar, wheat, fruit, marine products.	Passenger ship terminal at Berth "HL"
Toyosu Energy Terminal			Gas, steel, coal, general cargo.	
Ariake Terminal			Gravel, sand, lumber, construction materials.	Open storage 92,163 sq.m.
Odaiba Terminal	2 gantry cranes at Berth "AB"	10 tons	General cargo, steel, timber, fruit.	9 warehouses (64,766 sq.m.)
Terminal 15			Timber.	Storage capacity 400,000 tons Open storage yard 254,246 sq.m
Aomi Container Terminal	2 gantry cranes		Containers	6 straddle carriers

TUGS: The port has 2 tug companies: (i) Toko Service Co. Ltd., 3-25-8, Kaigan, Minato-ku, Tokyo. Tel: (452) 4781. (ii) Shibaura Tsusen Kaisha Ltd., 3-1-3, Kaigan, Minato-ku, Tokyo. Tel: (455) 1461. Upon notification to either, tugs will be waiting in neighbourhood of scheduled berth. Ship's lines to be used.

STEVEDORES: Advance advices should be made 24 hours at latest before vessel's arrival order arrange necessary gangs.

Discharge rates (approx.):
(a) Iron, steel and scrap, using crane or magnet, about 1,000 tons/day.
(b) Coal, crane and bucket, 1,500/2,000 tons/day.
(c) Ores, grabs and bulldozers, 1,000 tons/day.
(d) Timber, 1,000 tons/day.
(e) Grain, crane with bucket or suction, 1,000 tons/day.

MEDICAL: Hospitals, clinics and all specified facilities. Advance notice not necessary.

TANKERS: No slop discharge facilities (see "Services"). One tanker berth only. Products handled, Naphtha and crude oil. Shorelines, one 12 in. for each product. Discharge rates 1,000 t.p.h. (Naphtha) 900 – 1,000 t.p.h. (Crude).

FRESH WATER: Water supply from hydrant by Tokyo Metropolis, and waterboat by private management.

(a) Water supply on wharves		
Application	Bureau of Port and Harbour Offices in charge of each wharf.	
Work of water supply	Tokyo Port Service Association.	
(b) Water supply by water boat		
Extra charge	Overtime from 0600 to 0800	50%
	from 1700 to 2200	50%
	from 2200 to 0600	100%
	Special district	50%
	Festival day	50%

In the case of less than 20 tons per time, it will be considered 15 tons supply.

FUEL: All grades available. 24 hours' notice required.

FIRE PRECAUTIONS: (Tankers).
1. Must enter port at dead slow speed preceded by patrol boat of TMSA, 1 tug boat each side of vessel and followed by fire patrol boat.
2. Engine to be kept ready for immediate use in case of emergency.
3. Tow lines to be placed over bow and stern with eyes close to water surface.

Note: No vessels allowed alongside a tanker during loading or discharging.

DEPARTURE PROCEDURE: Ship over 300 tons departing must hoist signal in daytime and 2 white lamps at night and make 2 prolonged blasts of whistles or siren 30 minutes before starts to move and then act according to signals given by signal station on Shibaura Quay. Departure notice must be submitted to Maritime Safety Agency and port managers (operations Section of Port and Harbour Bureau). Foreign ships must submit required documents in addition to above notice to Tokyo Custom House, Immigration Control Office.

CONSULS: Most countries have embassies and consuls in Tokyo.

REPAIRS: *Ship Repairer:* Ishikawajima-Harima-Juko Co. Ltd. Tel: 03(244) 5670, Telex: J22232 (Ichico), has 2 dry docks for vessels of 11,000 and 23,000 d.w.t. and slipways from 8,000 to 60,000 d.w.t. capacity.

DRY DOCKS: Largest dry dock: length 180 m.; width 24 m.; depth 7.27 m. Capable of accommodating vessel of 16,750 gross tons.

Also 1 other dry dock for ocean-going vessels.

GANGWAY/DECK WATCHMEN: Necessary only in the case of valuable cargo.

OPENING/CLOSING HATCHES: Normally by crew.

CUSTOMS ALLOWANCES: (Tobacco) 200 cigarettes a week. (Wine and/or spirits) 760 cc's per crew member per week.

Report:
Idemitsu Hokkaido Sea Berth (Discharging Terminal):
Location: Lat. 42° 36′ 10″ N., Long. 141° 38′ 50″ E.
Operator: Idemitsu Kosan Co. Ltd.

Terminal operates 24 hours per day, 7 days a week. Ships moored and unmoored daytime weather or other circumstances permitting. Terminal will not be closed on any holidays.

Approaches: Clear and unimpeded from South. White and red striped high chimney (approx. position: Lat. 42° 38.1′ N., Long. 141° 35.6′ E.) makes a most conspicuous landfall. In poor visibility, in heavy fog or rain, radar reflector fitted at centre of Sea Berth can be located first by ship's radar and after that Sea Berth will be seen in direction from N.W. to S.E.

Westward of Sea Berth, there are many cargo vessels anchored.

Ships berthing starboard side alongside at the Sea Berth, proceed on course 314° observing transit of chimney and East Breakwater Lighthouse.

Anchorage: No strict boundary areas for anchorage but Master recommended to anchor 1 mile to 2 miles S.E. from Sea Berth.

Holding ground is good and depth about 27 m. – 30 m.

Pilotage: Sea Berth requires Pilot for berthing, no strict locatio anchorage for ships awaiting Pilot in Tomakomai area, but should as close as possible to port in accordance with harbour draft a communications.

2 Pilots will board ships over 30,000 g.r.t. Pilot uses tug boat boarding.

Important Features: Ships arriving in Winter season (November-Ma should pay special attention to the cold, as average temperature in season ranges from −3°C to 5°C.

MEDICAL: Hospitals, doctors and dentists available.
FUEL: Domestic oil is available. Bonded oil will be brought Hakodate with sufficient advance notice, when required.
FRESH WATER: (Public).

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 15 days, but 15 days' extension possible if ship stays longer.

AUTHORITY: Toyama Port Administration Office, 5, Kaigan-dori, Higashi-Iwasemachi, Toyama City. *Tel:* (0764) 37-7131. *Telex:* 5152256 Nextoy J. *Cables:* Nexco Toyamako. *FAX:* 0764-37-9945.

AGENT: Nippon Express Co. Ltd., (Toyama Port Branch) No. 61 Higashi-Iwasemachi, Toyama-City, Toyama-Pref, Japan. Tel: 0764-37-7111. Telex: 5152256 Nextoy J. Fax: 0764-37-9945. Cables: Nexco Toyamako.

TOYAMA SHINKO: 36.47 N. 137.10 E.

DOCUMENTS:

- Ship's Register.
- Last Port Clearance.
- 6 Crew Lists including Passport Numbers.
- 3 Passenger Lists.
- 1 Stores List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 2 Cargo Manifests and 1 Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

ANCHORAGES: No anchorage at Toyama-Shinko, therefore, if vessel required to await for berth or some other reason, use Fushiki Outer Anchorage ground where safe at all seasons with depth from 8 m. to 11 m. Sand and clay bottom. Room at anchorage for at least 6 vessels over 5,000 gross tons.

PILOTAGE: Pilot available any time during daylight. Not compulsory. No telegraphic address of pilot station, therefore, direct advice to local Agent always required. Pilot meets vessels 209° 2 miles off leading light of Fushiki Port, thence takes vessel to Fushiki Quarantine Anchorage ground, due to many fishing-nets on both sides of fairway. No Quarantine Anchorage ground established presently at Toyama-Shinko, therefore, every vessel obtains free pratique at Fushiki. If requiring to come into Quarantine Anchorage without taking Pilot, necessary to advise Agent in advance. In case of bad weather and need to await outside port, recommend cruising in Toyama Bay until sea abates. Bay area too deep to anchor and also danger of fishing-nets. When approaching position for Pilot, give exact ETA to Agent by using Niigata Radio and/or VHF to Fushiki Harbour Master. Small wooden pilot-boat painted yellow. No particular light or sound signals required. Even if the vessel already obtained Free Pratique in other port, need to approach the aforesaid position for Pilot, because of no Pilot position located in Toyama-Shinko.

RESTRICTIONS: Pilot not available during darkness. No restrictions on tide, because small tide in all seasons. If draft over port limitation, vessel enters port after making adjustment by lightening in Outer Harbour in Fushiki.

MAX. SIZE: Length 200 m., draft 34 ft. Tidal range is max. 0.45 m.

HEALTH: Formalities will be carried out at Fushiki quarantine anchorage.

RADIO: (also see "Pilotage"). Recommend Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Tugs normally join vessel at port entrance, but sometimes in Fushiki Outer Harbour for larger vessels. Maritia-Maru (2,060 h.p.) and Nihonkai-Maru (1,800 h.p.) provide lines, free of charge and Raicho-Maru (760 h.p.) uses ship's line. In case public tug, i.e. Nihonkai-Maru and Raicho-Maru used, always require Pilot on board.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Koike Mokuzai	171	10.0	9.0	15,000

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700 –1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

DENSITY: Average density between 1015 and 1019 in all seasons.

FRESH WATER: Available, from wharves No. 1, 2, 3, 4, 5 and 6 average 10 t.p.h. In other berths, to be supplied by barge, average 50 t.p.h.

FUEL: Domestic oil is available. Bonded oil will be brought from Kanmon area, with 1 week advance notice, when required.

CONSULS: None.

REPAIRS: Minor repairs only.

DRY DOCKS: No dry docks. Nearest available in Toyama.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

ADVANCE APPLICATIONS: Passenger ships and large vessels using mooring facilities must submit applications for use of facilities to port managers (the Port and Harbour Bureau of Tokyo Metropolitan Government) through shipping firms or Agents 3 days before entry into port so that they may have berths designated.

When they want to use anchorage facilities, they must submit applications for use of anchorage areas to Tokyo-Yokohama Port Director (the Port and Harbour Section of the Tokyo Maritime Safety Agency) to have anchorage sites designated. Small vessels of less than 300 gross tons do not need to submit anchorage application.

When ships of over 500 gross tons want to enter port at night (from sunset to sunrise), must submit applications in advance to Port Director and receive permission. Copy of written permission given to captain of ship when ship has entered port.

A ship carrying explosives or any other dangerous cargo must submit 2 copies of application in advance for permission to use port to Port Director. Such ships required to stay outside port in No. 3 Area. However, they will be allowed to enter port when Port Director considers it allowable.

ANCHORAGES: See "Advance Applications".

Quarantine Anchorage on starboard hand of No. 1 Fairway.

Sector "A" is a triangular sea area formed by line passing through point 180° and 400 m. from Light Buoy No. 16 and point 105° and 240 m. from same light buoy. Accommodates one 1,000 ton class ship or 2 ships of 500 ton class or smaller.

Sector "C" (263,330 sq.m.) is a space between Harumi Wharf and Toyosu Wharf. Accommodates five 2,000 ton class vessels.

Sector "D" (141,350 sq.m.) sea area enclosed by line drawn from point 217° and 400 m. from Northwestern tip of Tsukishima Fishery Base through No. 8 Mooring Buoy. No. 15 Buoy and Southern tip of Tsukishima Fishery Base. Accommodates 5 vessels smaller than 1,000 tons, but 2 if vessels larger than 700 tons.

RESTRICTIONS: No. 1 Fairway is long and narrow (4,200 m. × 300 m.) and carries considerable traffic. Vessels under 500 tons not permitted use Fairway when vessel over 5,000 tons is in transit. Depth 12 m.

Container Vessels: May enter from sunrise till 2400 hrs. and may leave at any time.

HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health condition on board. When Free Pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or suspected case, of infectious disease within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

Medical inspection of plants: When a report is received in advance from a ship by telegraph or other means of communication, Tokyo Office of the Yokohama Plant Disease Prevention Station must be notified by telephone or verbally in request for an on-the-spot inspection of plant in question.

Medical inspection of animals: When a report is received from a ship in advance by telegraph or other means of communication, the Tokyo Branch or the Haneda Branch of Animal Disease Prevention Station must be notified by telephone or verbally in request for an on-the-spot inspection of the animals.

RADIO: Vessels entering are watched at all times at Torigasaki, the entrance gate to Tokyo Bay, and record of passing the point is taken. As each ship passes point, this is immediately communicated by VHF radio telephone to head office of Tokyo Signal Communications Company. From here news communicated on normal telephone or on exclusive direct call telephone to interested parties (also see "VHF").

Recommended Master communicates with Agents through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

MAX. SIZE: Draft: General/Bulk: 7.0 m. for Toyosu; 10.0 m. f Shinagawa, Harumi and buoys; 10.0 m. for Land-lot No. 13 and 1 12.0 m. for Oh-i and Aomi.

Tide: These drafts are at low water. The difference between high a low water level is about 2 m.

Tankers: Tokyo Gas Wharf (Toyosu) Max. d.w.t. 23,000. Max. dr 11.0 m.

VHF:

A. Transmitting antenna:	Located 39° 26′ N. 139° 39′ E.
B. Type:	Single communication – Yagi type. Plural communication – Corner reflect type.
C. Direction:	Southern part of entrance to Tokyo Ba and Port of Tokyo.
D. Frequency class:	F3.
E. Frequency:	Simplex communication – 156.6 MHz, Channel 12 156.7 MHz, Channel 14 156.8 MHz, Channel 16 (for calling, answering and safety) Duplex communications – 161.6 MHz, Channel 20 161.7 MHz, Channel 22
F. Antenna power:	50 W.
G. Call sign:	Tokyo Port Radio.
H. Range:	Approx. 100 km. (straight range) S.E. side – About 20 nautical miles Sou of Nojimazaki. S.W. side – About 5 nautical miles Nor of Oshima Island. North side – Tokyo Port and Chiba Por
I. Operating time:	All times.

Ship Telephone: Uses VHF and is a service between navigating anchored ships and subscriber telephones on land, and between ship connected via base station on land. Communicating sphe approximately 50 km. to 100 km. from base station. Base station located so as to allow communication with any ship sailing alo Japanese coasts.

BERTHING: Any vessel entering port required to:

(1) Submit 1 each of "Declarations Inward/Outward of Vessels' I TMG and TMSA. See "Documents".

(2) Submit "Application for Berth" to TMG. See "Documents".

(3) Submit "Application for Designation of Anchoring Site" to TMS (Form No. 13) regarding anchoring area.

Berthing will be in order of arrival, passenger and special carg vessels excepted.

Name of Wharf	*Length* (m.)	*Depth* (m.)	*No. of Berths*

There are many private wharves and other smaller public wharves use and under construction.

CARGO HANDLING FACILITIES:

Wharf/Terminal	*Equipment*	*Capacity*	*Cargo Handled*	*Remarks*
Oh-i Terminal	16 container gantries	30.5 tons	Containers	Straddle carriers and transtaine available.
Shinagawa Container Terminal	1 container gantry 2 container gantries	24.5 tons 30.5 tons	Containers	Ro-Ro facilities, Straddle carrier available.
Shinagawa (Foreign Trade)	2 unloaders 1 belt conveyor	6.4 tons 600 t.p.h.	Machinery, sugar, fruit.	3 transit sheds (18,118 sq.m.) Open storage 14,451 sq.m.
Shibaura (Foreign Trade)			Paper, cement, fertiliser, feed grain	2 transit sheds (4,665 sq.m.) Open storage 2,104 sq.m.
Hinode Terminal			Salt, paper, soda ash.	9 transit sheds (19,583 sq.m.) Open storage 6,806 sq.m.
Tsukishima Terminal			Marine products	
Harumi Terminal	4 portal jib cranes	5 tons	Sugar, wheat, fruit, marine products.	Passenger ship terminal at Berth "HL"
Toyosu Energy Terminal			Gas, steel, coal, general cargo.	
Ariake Terminal			Gravel, sand, lumber, construction materials.	Open storage 92,163 sq.m.
Odaiba Terminal	2 gantry cranes at Berth "AB"	10 tons	General cargo, steel, timber, fruit.	9 warehouses (64,766 sq.m.)
Terminal 15			Timber.	Storage capacity 400,000 tons Open storage yard 254,246 sq.m
Aomi Container Terminal	2 gantry cranes		Containers	6 straddle carriers

TUGS: The port has 2 tug companies: (i) Toko Service Co. Ltd., 5-8, Kaigan, Minato-ku, Tokyo. Tel: (452) 4781. (ii) Shibaura Tsusen Kaisha Ltd., 3-1-3, Kaigan, Minato-ku, Tokyo. Tel: (455) 1461. Upon notification to either, tugs will be waiting in neighbourhood of scheduled berth. Ship's lines to be used.

STEVEDORES: Advance advices should be made 24 hours at latest before vessel's arrival order arrange necessary gangs.

Discharge rates (approx.):

(a) Iron, steel and scrap, using crane or magnet, about 1,000 tons/day.

(b) Coal, crane and bucket, 1,500/2,000 tons/day.

(c) Ores, grabs and bulldozers, 1,000 tons/day.

(d) Timber, 1,000 tons/day.

(e) Grain, crane with bucket or suction, 1,000 tons/day.

MEDICAL: Hospitals, clinics and all specified facilities. Advance notice not necessary.

TANKERS: No slop discharge facilities (see "Services"). One tanker berth only. Products handled, Naphtha and crude oil. Shorelines, one 12 in. for each product. Discharge rates 1,000 t.p.h. (Naphtha) 900 – 1,000 t.p.h. (Crude).

FRESH WATER: Water supply from hydrant by Tokyo Metropolis, and waterboat by private management.

(a) Water supply on wharves		
Application	Bureau of Port and Harbour Offices in charge of each wharf.	
Work of water supply	Tokyo Port Service Association.	
(b) Water supply by water boat		
Extra charge	Overtime from 0600 to 0800	50%
	from 1700 to 2200	50%
	from 2200 to 0600	100%
	Special district	50%
	Festival day	50%

In the case of less than 20 tons per time, it will be considered 15 tons supply.

FUEL: All grades available. 24 hours' notice required.

FIRE PRECAUTIONS: (Tankers).

1. Must enter port at dead slow speed preceded by patrol boat of TMSA, 1 tug boat each side of vessel and followed by fire patrol boat.
2. Engine to be kept ready for immediate use in case of emergency.
3. Tow lines to be placed over bow and stern with eyes close to water surface.

Note: No vessels allowed alongside a tanker during loading or discharging.

DEPARTURE PROCEDURE: Ship over 300 tons departing must hoist signal in daytime and 2 white lamps at night and make 2 prolonged blasts of whistles or siren 30 minutes before starts to move and then act according to signals given by signal station on Shibaura Quay. Departure notice must be submitted to Maritime Safety Agency and port managers (operations Section of Port and Harbour Bureau). Foreign ships must submit required documents in addition to above notice to Tokyo Custom House, Immigration Control Office.

CONSULS: Most countries have embassies and consuls in Tokyo.

REPAIRS: *Ship Repairer:* Ishikawajima-Harima-Juko Co. Ltd. Tel: 03(244) 5670, Telex: J22232 (Ichico), has 2 dry docks for vessels of 11,000 and 23,000 d.w.t. and slipways from 8,000 to 60,000 d.w.t. capacity.

DRY DOCKS: Largest dry dock: length 180 m.; width 24 m.; depth 7.27 m. Capable of accommodating vessel of 16,750 gross tons.

Also 1 other dry dock for ocean-going vessels.

GANGWAY/DECK WATCHMEN: Necessary only in the case of valuable cargo.

OPENING/CLOSING HATCHES: Normally by crew.

CUSTOMS ALLOWANCES: (Tobacco) 200 cigarettes a week. (Wine and/or spirits) 760 cc's per crew member per week.

SURVEYORS:

American Bureau of Shipping, Nihon Bldg., 6-2 Ootemachi 2, Chiyoda-ku, Tokyo 100. Tel: 279-7992/6.

WIND/TIDE: South-easterly winds prevail in the warm seasons and North-westerly winds in the Winter season. The maximum velocity recorded in the past being 18 m./sec. The tidal range is 2.145 m. The current at the channel leading to new port runs Southward at the flood and Northward at the ebb. The maximum speed of the current is about 3 knots. There is no current in the dock.
AUTHORITY: Kitakyushu Port and Harbor Bureau, 2-7 Nishi-Kaigan, 1-chome, Moji-ku, Kitakyushu-City, 801 Japan. *Tel:* (093) 321-5941, (093) 321-5941. *FAX:* (093) 321-5915.

TOKUYAMA (including Tonda): 34.02 N. 131.48 E.

Port situated in Yamaguchi Prefecture on Western part of mainland, facing Seto Inland Sea. Surrounded by Oshima Peninsula on the East, by Otsu-Shima and Uma-Shima (islands) on the S.W. and by the land on the North forms a large bay with deep water suitable for shelter. Sen-Shima and Kurokami-Shima (islands) lying in harbour, divide it into Tokuyama Section and Tonda Section.
DOCUMENTS:
(a) Customs. When vessel arrives direct from foreign port, Customs Officials will board to search. The following documents are to be submitted:
Crew List.
Passenger List.
Stores List.
Manifest of Crew Personal Effects (must be signed by individual crew member).
Arms and Ammunition List.
Narcotics List.
List of Ports of Call on current voyage.
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward (Form No. 02000).
The following will be checked on board: Ship's Registry, Last Port Clearance. When vessel comes from Japanese port, Customs Officials will not attend on board, except special case. Master or Agent are to attend at Custom House for entry formalities with the following documents:
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward.
Ship's Registry.
Last Port Clearance.
Documents entrusted with Master by Customs at previous port.
On vessel's departure a clearance is issued by Customs, after confirming payment of tonnage dues. Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
(b) Immigration. Immigration Officials attend from Tokuyama. They board vessel on arrival to examine passports, Discharge Books and/or other equivalent travel documents, and provide 72 hour landing passes for crew members and passengers. One copy each of Crew List and Passenger List are required by them. Providing ship's Agent with a Crew List beforehand will be a great help in expediting Immigration business on vessel's arrival. When vessel stays in port more than 72 hours, the landing passes will be extended every 72 hours on application. In event that crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men has been booked, or unless vessels to which they are to be transferred, arrive in Japan within 5 days. Also see "Shipmaster's Report".
Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
PILOTAGE:
Inland Sea Pilot (Sekisaki/Tokuyama): Not compulsory. Agent gives 24 hours' notice to Pilot Association Moji, and advise if ETA changed. (Master to cable "Anjin Moji" in case ETA changed and believes that his advice, if relayed by Agent, will not reach in good time; for example, at night before date of arrival at Sekisaki). Location: 3 miles South of Sekisaki Lighthouse (Lat. 33° 13′ N., Long. 131° 54′ E.). Pilot boards on vessel's arrival at pilot station day and night. No alternative area in event of bad weather. No VHF.
Harbour Pilot (Tokuyama Harbour or Tokuyama-wan): Not compulsory. Pilot boards in Tokuyama-wan at Quarantine Anchorage, or other anchorage to pilot to berth. Master who has not taken Pilot at Sekisaki should enter harbour without Pilot (no pilot station at entrance). Master to inquire position for anchoring from Agent prior arrival. Agent will advise Master in consideration of vessel's size, draft or number of other vessels, especially supertankers in port.

ANCHORAGES: Quarantine Anchorage, 34° 01′ N., 131° 46′ E., de water 36 ft. Deeper water of more than 60 ft. about 2 miles S.W. Quarantine Anchorage where Quarantine board supertankers. If harbo congested, vessels, especially supertankers, anchor Outer Harbour this case Quarantine go to Outer Harbour if advised by Master or Age In emergency or unable contact Agent, vessel can talk with Harbo Master by VHF, Channel 16, calling "Tokuyama Hoan". No restrictio for entry into and/or departure from the anchorages after nightfall.
MAX. SIZE: Largest recorded vessel to enter 275,000 d.w 19.5 m. draft.

Tankers: *Berth*	*Max.* *d.w.t.*	*Max.* *LOA* (m.)	*Max.* *Safe Draft* (m.)
Idemitsu Sea Berth	275,000	340	19.50
Idemitsu Ohura No. 3	50,000	250	12.00
Idemitsu Ohura No. 5	70,000	300	12.00
Idemitsu Ohura No. 7 (L.P.G. Terminal)	50,000	250	12.00
Idemitsu Center	35,000	220	11.00
Nippon Seiro Jetty	30,000	200	11.00

HEALTH: Radio Agent for Free Pratique not less than 12 hours and n more than 36 hours before arrival, advising full details of vessel a health conditions on board. When Free Pratique is granted by rad vessel will be required to submit the following documents to Quarant Officer on arrival:
Maritime Declaration of Health.
Crew List.
Passenger List.
The following vessels will not be able to get Radio Pratique:
A vessel that has been in contact with an infected area or a suspecte infected area within 15 days of arrival.
If a vessel has on board any case, or any suspected case of infectio disease, within 15 days of arrival.
If a vessel does not possess a valid Derat or Derat Exempti Certificate.
RADIO: Recommended Master communicates with Agent throu Choshi Radio or Nagasaki Radio which cover all ports in Japa If specifically Westbound vessel, to contact Choshi, and Northboun to contact Nagasaki Radio respectively.
TUGS: Join inside harbour. For supertankers outer harbour if requeste Tugs' lines used. 8 tugs available, up to 4,000 h.p.

BERTHING: Also see "Tankers". No specific requirements. Pi boarding time will be notified by ship's Agent mainly by radio.

(a) *Wharf*	*Length* (m.)	*Depth* (m.)	*Capacity* (g/t)	*Cargo*
Tokuyama Soda Salt Pier	117	10.0	15,000×1	Salt/Cement Clink

STEVEDORES: At least 24 hours prior notice excluding Sundays a holidays required in order for Agent to arrange stevedores. Vessel mu constantly keep her Agent advised of ETA. If stevedores cann commence loading/unloading at time notified by the Agent, the ordere must pay for waiting time. If cargo gear not rigged on berthin stevedores will do same for ship's crew. Overtime surcharg 1630–2130 hrs. (60% additional on basic stevedorage), 2130–0830 h next morning (120% additional on basic stevedorage), Sundays/holida (100% additional on basic stevedorage).
Loading/Unloading Facilities:
(a) Gangs: Maximum 40 gangs are available.

Classification	*Regular Employees*	*Temporary labourers*
Stevedores	200	230
Longshoremen	110	80

Stevedoring Companies: Tokuyama Kairiku Unso Kabushiki Kaish Kamigumi & Co. Ltd.; Toyo Koun Co. Ltd.; Sankyu Unyo Kiko C and Nippon Express Co. Ltd.
(b) Lighters: No lighter is available, but coastal boat available for u as substitute for lighters. 8,000 d.w.t. arrangeable with notice of 2 wee in advance.
(c) Shore Crane:

Wharf	*Capacity grab* (tons)	*Max. discharge rate* (t.p.h.)
Tokuyama Soda Salt Pier	10	500
Toyo Soda Salt Pier	12	550

(d) Floating crane: Capacity, 100 tons available from Kudamatsu.
(e) Average performance of loading/unloading: Loading: Cement bags, 55 – 65 t.p.h./gang; Soda ash in bags, 40 – 50 t.p.h./ga Fertiliser in bags, 55 – 65 t.p.h./gang. Salt in bulk, 500 – 550 t.p.h./sh Clinker in bulk, 180 – 200 t.p.h./ship. Chrome Ore in bulk, 65 – 75 t.p gang.
Working Hours: 1 labour shift. Normal working hours: 0800 – 1700 h Overtime is possible by applying to Customs. No work can be arran for during New Year Holiday (1st to 3rd January) and Holiday (14th 16th August).
MEDICAL: No advance notice required unless urgent.
Hospitals: Asanoumi Hospital, Asami Hospital, Ishikai Hospital, Ch Hospital, Ono Dental, Ishida Dental.

TANKERS: No slop facilities.

Berth	Product	Shoreline	Discharge Rate (t.p.h.)	Hoses
Idemitsu Sea Berth	Crude Oil	36″×1 30″×1	10,000	16″×2 Flexible, 8 ton derrick for each hose.

	Naphtha	24″×1	3,000	
Idemitsu Centre	Fuel Oil	18″×1	2,000	8″×2 Chicksan Joint.
Nippon Seiro Jetty	Raw Oil	12″×1	700	8″×1 Flexible
	Fuel Oil	10″×1	500	8″×1 Flexible

Idemitsu Sea Berth: Located in Tokuyama Bay at the position of Lat. 33° 59.5′ N., Long. 131° 46.1′ E., consisting of 7 mooring buoys. 275,000 d.w.t. tanker can be accommodated at this berth, being moored to buoys fore and aft. 4 powerful tug boats and 2 line boats are engaged in berthing/unberthing. Depth of water 20 m. Also see "Report" below.

Nippon Seiro Refinery: The mooring berth consists of 1 oil pier and 2 mooring buoys, to which vessel is moored fore and aft, port side alongside pier, there are also dolphins fore and aft.

Nippon Zeon Wharf (25 ft.) for LPG only.

Operator's Report: 1983.

Idemitsu Kosan Tokuyama Sea Berth (Discharging terminal):

Multiple buoy mooring system berth with 1 or 2 anchors.

Berth operates 24 hours per day, 7 days a week. Ships moored and unmoored at daytime, weather or other circumstances permitting. Berth will not be closed due to any holidays.

Location: Lat. 33° 59′ 12″ N., Long. 131° 46′ 00″ E.

Pilotage: Not compulsory.

Approaches: In order to make use of slack water berthing operations should be commenced 2 hours before slack water.

Berth is to be approached on a course of 075° after passing N.W. of wa Island, anchorage position visible from ship's bridge just after passing Sukumo Island abeam to starboard.

After letting go anchor (port), turn anti-clockwise with tug's assistance and let out 3 shackles and approach berthing position and take in slack anchor chain.

In Winter (from November-March) monsoons prevail, let go starboard anchor when heading about 320° and port anchor is out to 5 shackles then let out both chains, and move astern into berth.

1st line out should be taken to either No. 1 or No. 2 mooring buoy, whichever is the nearest.

Berthing:

(a) Vessel must not proceed to starboard of yellow buoy, because North of transit line No. 2 and 3 buoys area becomes shallow with depths 17 m. – 19 m.

(b) If port anchor let out too fast or too much, ship cannot return to manifold position, as anchor position designed for 8 – 9 shackles on port anchor when ship made fast.

(c) When Berthing Master comes on board, please advise him of number of shackles on each anchor and length from bow to manifold.

(d) Wire mooring lines are better than hawsers especially in case of No. 1, 2, 3, 4, 5, 7 buoys where wire should be used (each using 2 wires) as these wires are used to adjust the manifold position.

(e) Mooring arrangement:
Port anchor 8 – 9 shackles
Starboard anchor 2 – 3 shackles
No. 1 – 7 buoys 2 lines to each

DENSITY: 1025.

FRESH WATER: Water barges available, 1 each of 450 tons, 350 tons and 160 tons. Hydrants at Harumi Public Pier, Idemitsu Central Pier, Toyo Soda Wharf. The rate of delivery: 50 t.p.h. from barge, 20 t.p.h. from hydrant. (Public hydrant 30 t.p.h.).

FUEL: Major oil companies are represented and all grades of marine oil can be delivered usually by barge.

CONSULS: None.

REPAIRS: Minor repairs only.

DRY DOCKS: Kasado Dockyard in Kudamatsu-wan, entrance 3 miles East of Tokuyama-wan entrance. Largest dry dock for 90,000 tonners and two other dry docks/building docks.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

AIRPORT: Hiroshima (about 40 minutes by Shinkansen), Ube (about 40 minutes by Shinkansen and taxi).

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police, tel. 110; Ambulance and Fire, tel. 119.

TELEPHONES: No facilities for placing on board.

SERVICES: From Moji, Kobe or Osaka.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

SHIPMASTER'S REPORT: June, 1983.

Toya Soda Salt Pier at Tonda.

Documents/Immigration: Landing Passes are now valid for 1 week but restricted to the immediate Port Area (Tokuyama) only. This restriction is enforced and the Agent must make written, individual application for any crew member required or desiring to leave the Tokuyama area. There are severe penalties (Y100,000) for being found ashore by the Authorities without a Landing Pass.

Pilotage: The Inland Sea Pilot who boarded at Seki Saki also acted as Harbour Pilot, boarding from a fast launch with the vessel making about 4 knots. Oita Port Radio, in the first Western bay of the Inland Sea after passing through the Hayasui Seto entrance, called on VHF Channel 16 to confirm the vessel's nationality and ETA.

For a vessel of our size (see "Berthing"), pilotage is at daylight High Water only, using 3 tugs and the Eastern dredged channel into Tonda Port. Departure is during daylight hours only (pilot available apparently 0630 – 1830 hrs. during June, although ours wasn't ordered by the Charterers' Agents until 0800 hrs.). Vessel was swung off the berth by 2 tugs and proceeded to sea, again by the Eastern Channel, there being a substantial 'corner' to negotiate in the dredged channel on the Tokuyama section of the port.

Health: We could not get Radio Pratique as the Authorities required the number of the vessel's Sanitary Certificate. However, after berthing, we were unable to ascertain just what this Certificate was. The number of our Derat Exemption and type and make of the sewage system did not satisfy this question either.

Berthing: We were probably one of the larger vessels to berth at the Toyo Soda Salt Pier, discharging 31,536 metric tons of coal on dimensions – length 177 m., beam 27.8 m., draft 10.5 m. and of 20,096 gross tons. With large, engines-aft, bulk carriers there are problems with landing the gangway on the end of the jetty. A shore gangway cannot be used because of the travel of the Portainer-type discharging crane. Stevedores use a vertical steel ladder clipped over the sheer strake for access.

Access ashore through the Toyo Soda Cement Factory is prohibited to ship's crew and a Launch Service (Sampan) must be engaged, with the requisite timetable, for transport to Tokuyama, 15 minutes distant, the launch berthing at the Customs Pier.

This launch is also used for the Agent, watchmen, etc. and it may well be preferable to lower the off-side gangway to near the water as a means of access. The only permitted access to and from the launch via the vessel's gangway onto the wharf is by a badly bent vertical steel ladder at the end of the jetty.

Fresh Water: Not available from Toyo Soda Salt Pier, delivery can only be made by lighter.

Storing: Mobile cranes are not allowed onto the wharf to work ship's stores, E/R spares, etc. and if these cannot be coped with by the vessel's own gear or stores crane, floating plant would have to be hired.

AUTHORITY: Shunan Port Administration Office, 111, Chikko-cho, Tokuyama City, Yamaguchi Pref. *Tel:* (0834) 21-1787.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Holme Ringer & Co. Ltd., c/o Sankyu Transportation & Engineering Co. Ltd., Shunan Branch, 12-7 Chikko-cho, Tokuyama-shi, Yamaguchi-ken. Cable address: Ringer Tokuyama. Domestic Telex: 6765-93 Sankyu J. Tel.: Tokuyama (0834) 22-0039.

TOKYO: 35.43 N. 139.46 E. (See Plan)

DOCUMENTS:

4 copies Inward/Outward Declaration – (Form C.2000 prepared by Agent).
1 copy Berth Application (normally prepared by Agent).
3 Cargo Manifest (Form C.2030 prepared by Agent).
1 List Ship's Stores (Form C.2040).
2 Parcel List.
5 Passenger Manifest (Form C.2070).
5 Crew Manifest (Form C.2060).
1 Statement by Master (Form C.2020).
1 Declaration for Payment Tonnage Dues (prepared by Agent).
1 Maritime Declaration of Health.
1 Application for Shore Passes (prepared by Agent).
2 Baggage Lists (Form 5370).

PILOTAGE: 12 hours advance notice of ETA required. Pilot boats named Musashi, Takao, Tsukuba and Ayase. No light or sound signals, use ship's radio in case necessity arises. Address: Tokyo Pilot Association, 3-26-82 Kaigan, Minato-ku, Tokyo (at the Southern tip of the Shibaura Wharf). Tel: 453-1691.

Pilot boards vessel outside harbour. Vessel awaits Pilot around "Quarantine Anchorage".

Vessels requiring a Pilot for the Uraga Channel should radio request to Anjin Yokosuka advising ship's details and arriving time at No. 1 Uraga Channel Light Buoy. Uraga Channel Pilot embarks 3 – 5 miles S.S.E. of Kannonsaki Lighthouse, and will disembark on arrival at destination port limits. Applications for Uraga Channel Pilot should reach pilot office 24 hours before vessels arrival at No. 1 Uraga Channel Light Buoy.

Vessels of 10,000 gross tons or more should give "Notification of Traffic" to ensure safety of their navigation in or near Uraga Suido and Nakanose traffic routes (normally by Agent).

ADVANCE APPLICATIONS: Passenger ships and large vessels using mooring facilities must submit applications for use of facilities to port managers (the Port and Harbour Bureau of Tokyo Metropolitan Government) through shipping firms or Agents 3 days before entry into port so that they may have berths designated.

When they want to use anchorage facilities, they must submit applications for use of anchorage areas to Tokyo-Yokohama Port Director (the Port and Harbour Section of the Tokyo Maritime Safety Agency) to have anchorage sites designated. Small vessels of less than 300 gross tons do not need to submit anchorage application.

When ships of over 500 gross tons want to enter port at night (from sunset to sunrise), must submit applications in advance to Port Director and receive permission. Copy of written permission given to captain of ship when ship has entered port.

A ship carrying explosives or any other dangerous cargo must submit 2 copies of application in advance for permission to use port to Port Director. Such ships required to stay outside port in No. 3 Area. However, they will be allowed to enter port when Port Director considers it allowable.

ANCHORAGES: See "Advance Applications".

Quarantine Anchorage on starboard hand of No. 1 Fairway.

Sector "A" is a triangular sea area formed by line passing through point 180° and 400 m. from Light Buoy No. 16 and point 105° and 240 m. from same light buoy. Accommodates one 1,000 ton class ship or 2 ships of 500 ton class or smaller.

Sector "C" (263,330 sq.m.) is a space between Harumi Wharf and Toyosu Wharf. Accommodates five 2,000 ton class vessels.

Sector "D" (141,350 sq.m.) sea area enclosed by line drawn from point 217° and 400 m. from Northwestern tip of Tsukishima Fishery Base through No. 8 Mooring Buoy. No. 15 Buoy and Southern tip of Tsukishima Fishery Base. Accommodates 5 vessels smaller than 1,000 tons, but 2 if vessels larger than 700 tons.

RESTRICTIONS: No. 1 Fairway is long and narrow (4,200 m. × 300 m.) and carries considerable traffic. Vessels under 500 tons not permitted use Fairway when vessel over 5,000 tons is in transit. Depth 12 m.

Container Vessels: May enter from sunrise till 2400 hrs. and may leave at any time.

HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health condition on board. When Free Pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or suspected case, of infectious disease within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

Medical inspection of plants: When a report is received in advance from a ship by telegraph or other means of communication, Tokyo Office of the Yokohama Plant Disease Prevention Station must be notified by telephone or verbally in request for an on-the-spot inspection of plant in question.

Medical inspection of animals: When a report is received from a ship in advance by telegraph or other means of communication, the Tokyo Branch or the Haneda Branch of Animal Disease Prevention Station must be notified by telephone or verbally in request for an on-the-spot inspection of the animals.

RADIO: Vessels entering are watched at all times at Torigasaki, the entrance gate to Tokyo Bay, and record of passing the point is taken. As each ship passes point, this is immediately communicated by VHF radio telephone to head office of Tokyo Signal Communications Company. From here news communicated on normal telephone or on exclusive direct call telephone to interested parties (also see "VHF").

Recommended Master communicates with Agents through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

MAX. SIZE: Draft: General/Bulk: 7.0 m. for Toyosu; 10.0 m. Shinagawa, Harumi and buoys; 10.0 m. for Land-lot No. 13 and 12.0 m. for Oh-i and Aomi.

Tide: These drafts are at low water. The difference between high a low water level is about 2 m.

Tankers: Tokyo Gas Wharf (Toyosu) Max. d.w.t. 23,000. Max. dr 11.0 m.

VHF:

A. Transmitting antenna:	Located 39° 26′ N. 139° 39′ E.
B. Type:	Single communication – Yagi type. Plural communication – Corner reflec type.
C. Direction:	Southern part of entrance to Tokyo Ba and Port of Tokyo.
D. Frequency class:	F3.
E. Frequency:	Simplex communication – 156.6 MHz, Channel 12 156.7 MHz, Channel 14 156.8 MHz, Channel 16 (for calling, answering and safety) Duplex communications – 161.6 MHz, Channel 20 161.7 MHz, Channel 22
F. Antenna power:	50 W.
G. Call sign:	Tokyo Port Radio.
H. Range:	Approx. 100 km. (straight range) S.E. side – About 20 nautical miles Sou of Nojimazaki. S.W. side – About 5 nautical miles Nor of Oshima Island. North side – Tokyo Port and Chiba Po
I. Operating time:	All times.

Ship Telephone: Uses VHF and is a service between navigating anchored ships and subscriber telephones on land, and between shi connected via base station on land. Communicating sphe approximately 50 km. to 100 km. from base station. Base statio located so as to allow communication with any ship sailing alo Japanese coasts.

BERTHING: Any vessel entering port required to:

(1) Submit 1 each of "Declarations Inward/Outward of Vessels" TMG and TMSA. See "Documents".

(2) Submit "Application for Berth" to TMG. See "Documents".

(3) Submit "Application for Designation of Anchoring Site" to TMS (Form No. 13) regarding anchoring area.

Berthing will be in order of arrival, passenger and special car vessels excepted.

Name of Wharf	*Length* (m.)	*Depth* (m.)	*No. of Berths*
Shinagawa (Foreign Trade)	585	10.0	3
Shinagawa (Domestic Trade)	476	8.0	3
Shinagawa Container Terminal	558	10.0	3
Shibaura	910	7.8	7
Hinode	564	6.7	6
Takeshiba	309	6.7	3
Tsukishima	260	7.5	2
Harumi	1,444	9 – 10.0	8
Toyosu	800	7 – 10.0	8
Ariake Terminal	750	5.0	10
Oh-i Marine Products Wharf	450	12.0	2
No. 15 Lumber Wharf	720	10.0–12.0	3
Oh-i Container Terminal	2,300	12.0	8
Odaiba Terminal	1,800	10.0	9
Aomi Container Terminal (Berth C-1)	300	12.0	1

There are many private wharves and other smaller public wharves use and under construction.

CARGO HANDLING FACILITIES:

Wharf/Terminal	*Equipment*	*Capacity*	*Cargo Handled*	*Remarks*
Oh-i Terminal	16 container gantries	30.5 tons	Containers	Straddle carriers and transtaine available.
Shinagawa Container Terminal	1 container gantry 2 container gantries	24.5 tons 30.5 tons	Containers	Ro-Ro facilities, Straddle carrie available.
Shinagawa (Foreign Trade)	2 unloaders 1 belt conveyor	6.4 tons 600 t.p.h.	Machinery, sugar, fruit.	3 transit sheds (18,118 sq.m.) Open storage 14,451 sq.m.
Shibaura (Foreign Trade)			Paper, cement, fertiliser, feed grain	2 transit sheds (4,665 sq.m.) Open storage 2,104 sq.m.
Hinode Terminal			Salt, paper, soda ash.	9 transit sheds (19,583 sq.m.) Open storage 6,806 sq.m.
Tsukishima Terminal			Marine products	
Harumi Terminal	4 portal jib cranes	5 tons	Sugar, wheat, fruit, marine products.	Passenger ship terminal at Berth "HL"
Toyosu Energy Terminal			Gas, steel, coal, general cargo.	
Ariake Terminal			Gravel, sand, lumber, construction materials.	Open storage 92,163 sq.m.
Odaiba Terminal	2 gantry cranes at Berth "AB"	10 tons	General cargo, steel, timber, fruit.	9 warehouses (64,766 sq.m.)
Terminal 15			Timber.	Storage capacity 400,000 tons Open storage yard 254,246 sq.m
Aomi Container Terminal	2 gantry cranes		Containers	6 straddle carriers

TUGS: The port has 2 tug companies: (i) Toko Service Co. Ltd., 3-25-8, Kaigan, Minato-ku, Tokyo. Tel: (452) 4781. (ii) Shibaura Tsusen Kaisha Ltd., 3-1-3, Kaigan, Minato-ku, Tokyo. Tel: (455) 1461. Upon notification to either, tugs will be waiting in neighbourhood of scheduled berth. Ship's lines to be used.

STEVEDORES: Advance advices should be made 24 hours at latest before vessel's arrival order arrange necessary gangs.

Discharge rates (approx.):

(a) Iron, steel and scrap, using crane or magnet, about 1,000 tons/day.
(b) Coal, crane and bucket, 1,500/2,000 tons/day.
(c) Ores, grabs and bulldozers, 1,000 tons/day.
(d) Timber, 1,000 tons/day.
(e) Grain, crane with bucket or suction, 1,000 tons/day.

MEDICAL: Hospitals, clinics and all specified facilities. Advance notice not necessary.

TANKERS: No slop discharge facilities (see "Services"). One tanker berth only. Products handled, Naphtha and crude oil. Shorelines, one 12 in. for each product. Discharge rates 1,000 t.p.h. (Naphtha) 900 – 1,000 t.p.h. (Crude).

FRESH WATER: Water supply from hydrant by Tokyo Metropolis, and waterboat by private management.

(a) Water supply on wharves		
Application	Bureau of Port and Harbour Offices in charge of each wharf.	
Work of water supply	Tokyo Port Service Association.	
(b) Water supply by water boat		
Extra charge	Overtime from 0600 to 0800	50%
	from 1700 to 2200	50%
	from 2200 to 0600	100%
	Special district	50%
	Festival day	50%

In the case of less than 20 tons per time, it will be considered 15 tons supply.

FUEL: All grades available. 24 hours' notice required.

FIRE PRECAUTIONS: (Tankers).

1. Must enter port at dead slow speed preceded by patrol boat of TMSA, 1 tug boat each side of vessel and followed by fire patrol boat.
2. Engine to be kept ready for immediate use in case of emergency.
3. Tow lines to be placed over bow and stern with eyes close to water surface.

Note: No vessels allowed alongside a tanker during loading or discharging.

DEPARTURE PROCEDURE: Ship over 300 tons departing must hoist signal in daytime and 2 white lamps at night and make 2 prolonged blasts of whistles or siren 30 minutes before starts to move and then act according to signals given by signal station on Shibaura Quay. Departure notice must be submitted to Maritime Safety Agency and port managers (operations Section of Port and Harbour Bureau). Foreign ships must submit required documents in addition to above notice to Tokyo Custom House, Immigration Control Office.

CONSULS: Most countries have embassies and consuls in Tokyo.

REPAIRS: *Ship Repairer:* Ishikawajima-Harima-Juko Co. Ltd. Tel: 03(244) 5670, Telex: J22232 (Ichico), has 2 dry docks for vessels of 11,000 and 23,000 d.w.t. and slipways from 8,000 to 60,000 d.w.t. capacity.

DRY DOCKS: Largest dry dock: length 180 m.; width 24 m.; depth 7.27 m. Capable of accommodating vessel of 16,750 gross tons.

Also 1 other dry dock for ocean-going vessels.

GANGWAY/DECK WATCHMEN: Necessary only in the case of valuable cargo.

OPENING/CLOSING HATCHES: Normally by crew.

CUSTOMS ALLOWANCES: (Tobacco) 200 cigarettes a week. (Wine and/or spirits) 760 cc's per crew member per week.

SURVEYORS:

American Bureau of Shipping, Nihon Bldg., 6-2 Ootemachi 2, Chiyoda-ku, Tokyo 100. Tel: 279-7992/6.

TOKUYAMA (including Tonda): 34.02 N. 131.48 E.

Port situated in Yamaguchi Prefecture on Western part of mainland, facing Seto Inland Sea. Surrounded by Oshima Peninsula on the East, by Otsu-Shima and Uma-Shima (islands) on the S.W. and by the land on the North forms a large bay with deep water suitable for shelter. Sen-Shima and Kurokami-Shima (islands) lying in harbour, divide it into Tokuyama Section and Tonda Section.

DOCUMENTS:

(a) Customs. When vessel arrives direct from foreign port, Customs Officials will board to search. The following documents are to be submitted:

Crew List.
Passenger List.
Stores List.
Manifest of Crew Personal Effects (must be signed by individual crew member).
Arms and Ammunition List.
Narcotics List.
List of Ports of Call on current voyage.
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward (Form No. 02000).

The following will be checked on board: Ship's Registry, Last Port Clearance. When vessel comes from Japanese port, Customs Officials will not attend on board, except special case. Master or Agent are to attend at Custom House for entry formalities with the following documents:

Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward.
Ship's Registry.
Last Port Clearance.

Documents entrusted with Master by Customs at previous port.

On vessel's departure a clearance is issued by Customs, after confirming payment of tonnage dues. Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

(b) Immigration. Immigration Officials attend from Tokuyama. They board vessel on arrival to examine passports, Discharge Books and/or other equivalent travel documents, and provide 72 hour landing passes for crew members and passengers. One copy each of Crew List and Passenger List are required by them. Providing ship's Agent with a Crew List beforehand will be a great help in expediting Immigration business on vessel's arrival. When vessel stays in port more than 72 hours, the landing passes will be extended every 72 hours on application. In event that crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men has been booked, or unless vessels to which they are to be transferred, arrive in Japan within 5 days. Also see "Shipmaster's Report".

Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

PILOTAGE:

Inland Sea Pilot (Sekisaki/Tokuyama): Not compulsory. Agent gives 24 hours' notice to Pilot Association Moji, and advise if ETA changed. (Master to cable "Anjin Moji" in case ETA changed and believes that his advice, if relayed by Agent, will not reach in good time; for example, at night before date of arrival at Sekisaki). Location: 3 miles South of Sekisaki Lighthouse (Lat. 33° 13′ N., Long. 131° 54′ E.). Pilot boards on vessel's arrival at pilot station day and night. No alternative area in event of bad weather. No VHF.

Harbour Pilot (Tokuyama Harbour or Tokuyama-wan): Not compulsory. Pilot boards in Tokuyama-wan at Quarantine Anchorage, or other anchorage to pilot to berth. Master who has not taken Pilot at Sekisaki should enter harbour without Pilot (no pilot station at entrance). Master to inquire position for anchoring from Agent prior arrival. Agent will advise Master in consideration of vessel's size, draft or number of other vessels, especially supertankers in port.

ANCHORAGES: Quarantine Anchorage, 34° 01′ N., 131° 46′ E., de water 36 ft. Deeper water of more than 60 ft. about 2 miles S.W. Quarantine Anchorage where Quarantine board supertankers. If harbo congested, vessels, especially supertankers, anchor Outer Harbour this case Quarantine go to Outer Harbour if advised by Master or Age In emergency or unable contact Agent, vessel can talk with Harbo Master by VHF, Channel 16, calling "Tokuyama Hoan". No restrictio for entry into and/or departure from the anchorages after nightfall.

MAX. SIZE: Largest recorded vessel to enter 275,000 d.w 19.5 m. draft.

Tankers: *Berth*	*Max.* *d.w.t.*	*Max.* *LOA* (m.)	*Max.* *Safe Draft* (m.)
Idemitsu Sea Berth	275,000	340	19.50
Idemitsu Ohura No. 3	50,000	250	12.00
Idemitsu Ohura No. 5	70,000	300	12.00
Idemitsu Ohura No. 7 (L.P.G. Terminal)	50,000	250	12.00
Idemitsu Center	35,000	220	11.00
Nippon Seiro Jetty	30,000	200	11.00

HEALTH: Radio Agent for Free Pratique not less than 12 hours and n more than 36 hours before arrival, advising full details of vessel an health conditions on board. When Free Pratique is granted by rad vessel will be required to submit the following documents to Quarantin Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspecte infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectio disease, within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exempti Certificate.

RADIO: Recommended Master communicates with Agent throug Choshi Radio or Nagasaki Radio which cover all ports in Japa If specifically Westbound vessel, to contact Choshi, and Northbou to contact Nagasaki Radio respectively.

TUGS: Join inside harbour. For supertankers outer harbour if requeste Tugs' lines used. 8 tugs available, up to 4,000 h.p.

BERTHING: Also see "Tankers". No specific requirements. Pi boarding time will be notified by ship's Agent mainly by radio.

(a) Wharf	*Length* (m.)	*Depth* (m.)	*Capacity* (g/t)	*Cargo*
Tokuyama Soda Salt Pier	117	10.0	15,000×1	Salt/Cement Clinke

STEVEDORES: At least 24 hours prior notice excluding Sundays an holidays required in order for Agent to arrange stevedores. Vessel mu constantly keep her Agent advised of ETA. If stevedores cann commence loading/unloading at time notified by the Agent, the ordere must pay for waiting time. If cargo gear not rigged on berthin stevedores will do same for ship's crew. Overtime surcharg 1630–2130 hrs. (60% additional on basic stevedorage), 2130–0830 hr next morning (120% additional on basic stevedorage), Sundays/holida (100% additional on basic stevedorage).

Loading/Unloading Facilities:

(a) Gangs: Maximum 40 gangs are available.

Classification	*Regular Employees*	*Temporary labourers*
Stevedores	200	230
Longshoremen	110	80

Stevedoring Companies: Tokuyama Kairiku Unso Kabushiki Kaish Kamigumi & Co. Ltd.; Toyo Koun Co. Ltd.; Sankyu Unyo Kiko C and Nippon Express Co. Ltd.

(b) Lighters: No lighter is available, but coastal boat available for us as substitute for lighters. 8,000 d.w.t. arrangeable with notice of 2 wee in advance.

(c) Shore Crane:

Wharf	*Capacity grab* (tons)	*Max. discharge rate* (t.p.h.)
Tokuyama Soda Salt Pier	10	500
Toyo Soda Salt Pier	12	550

(d) Floating crane: Capacity, 100 tons available from Kudamatsu.

(e) Average performance of loading/unloading: Loading: Cemen bags, 55 – 65 t.p.h./gang; Soda ash in bags, 40 – 50 t.p.h./gan Fertiliser in bags, 55 – 65 t.p.h./gang. Salt in bulk, 500 – 550 t.p.h./shi Clinker in bulk, 180 – 200 t.p.h./ship. Chrome Ore in bulk, 65 – 75 t.p gang.

Working Hours: 1 labour shift. Normal working hours: 0800 – 1700 h Overtime is possible by applying to Customs. No work can be arran for during New Year Holiday (1st to 3rd January) and Holiday (14th 16th August).

MEDICAL: No advance notice required unless urgent.

Hospitals: Asanoumi Hospital, Asami Hospital, Ishikai Hospital, Ch Hospital, Ono Dental, Ishida Dental.

TANKERS: No slop facilities.

Berth	Product	Shoreline	Discharge Rate (t.p.h.)	Hoses
Idemitsu Sea Berth	Crude Oil	36″×1 30″×1	10,000	16″×2 Flexible, 8 ton derrick for each hose.

	Fuel Oil	10″×1	500	8″×1 Flexible

Idemitsu Sea Berth: Located in Tokuyama Bay at the position of Lat. 33° 59.5′ N., Long. 131° 46.1′ E., consisting of 7 mooring buoys. 275,000 d.w.t. tanker can be accommodated at this berth, being moored to buoys fore and aft. 4 powerful tug boats and 2 line boats are engaged in berthing/unberthing. Depth of water 20 m. Also see "Report" below.

Nippon Seiro Refinery: The mooring berth consists of 1 oil pier and 2 mooring buoys, to which vessel is moored fore and aft, port side alongside pier, there are also dolphins fore and aft.

Nippon Zeon Wharf (25 ft.) for LPG only.

Operator's Report: 1983.

Idemitsu Kosan Tokuyama Sea Berth (Discharging terminal):

Multiple buoy mooring system berth with 1 or 2 anchors.

Berth operates 24 hours per day, 7 days a week. Ships moored and unmoored at daytime, weather or other circumstances permitting. Berth will not be closed due to any holidays.

Location: Lat. 33° 59′ 12″ N., Long. 131° 46′ 00″ E.

Pilotage: Not compulsory.

Approaches: In order to make use of slack water berthing operations should be commenced 2 hours before slack water.

Berth is to be approached on a course of 075° after passing N.W. of Iwa Island, anchorage position visible from ship's bridge just after passing Sukumo Island abeam to starboard.

After letting go anchor (port), turn anti-clockwise with tug's assistance and let out 3 shackles and approach berthing position and take in slack anchor chain.

In Winter (from November-March) monsoons prevail, let go starboard anchor when heading about 320° and port anchor is out to 5 shackles then let out both chains, and move astern into berth.

1st line out should be taken to either No. 1 or No. 2 mooring buoy, whichever is the nearest.

Berthing:

(a) Vessel must not proceed to starboard of yellow buoy, because North of transit line No. 2 and 3 buoys area becomes shallow with depths 17 m. – 19 m.

(b) If port anchor let out too fast or too much, ship cannot return to manifold position, as anchor position designed for 8 – 9 shackles on port anchor when ship made fast.

(c) When Berthing Master comes on board, please advise him of number of shackles on each anchor and length from bow to manifold.

(d) Wire mooring lines are better than hawsers especially in case of No. 1, 2, 3, 4, 5, 7 buoys where wire should be used (each using 2 wires) as these wires are used to adjust the manifold position.

(e) Mooring arrangement:
Port anchor 8 – 9 shackles
Starboard anchor 2 – 3 shackles
No. 1 – 7 buoys 2 lines to each

DENSITY: 1025.

FRESH WATER: Water barges available, 1 each of 450 tons, 350 tons and 160 tons. Hydrants at Harumi Public Pier, Idemitsu Central Pier, Toyo Soda Wharf. The rate of delivery: 50 t.p.h. from barge, 20 t.p.h. from hydrant. (Public hydrant 30 t.p.h.).

FUEL: Major oil companies are represented and all grades of marine oil can be delivered usually by barge.

CONSULS: None.

REPAIRS: Minor repairs only.

DRY DOCKS: Kasado Dockyard in Kudamatsu-wan, entrance 3 miles East of Tokuyama-wan entrance. Largest dry dock for 90,000 tonners and two other dry docks/building docks.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

AIRPORT: Hiroshima (about 40 minutes by Shinkansen), Ube (about 40 minutes by Shinkansen and taxi).

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police, tel. 110; Ambulance and Fire, tel. 119.

TELEPHONES: No facilities for placing on board.

SERVICES: From Moji, Kobe or Osaka.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

SHIPMASTER'S REPORT: June, 1983.

Toya Soda Salt Pier at Tonda.

Documents/Immigration: Landing Passes are now valid for 1 week but restricted to the immediate Port Area (Tokuyama) only. This restriction is enforced and the Agent must make written, individual application for any crew member required or desiring to leave the Tokuyama area. There are severe penalties (Y100,000) for being found ashore by the Authorities without a Landing Pass.

Pilotage: The Inland Sea Pilot who boarded at Seki Saki also acted as Harbour Pilot, boarding from a fast launch with the vessel making about 4 knots. Oita Port Radio, in the first Western bay of the Inland Sea after passing through the Hayasui Seto entrance, called on VHF Channel 16 to confirm the vessel's nationality and ETA.

For a vessel of our size (see "Berthing"), pilotage is at daylight High Water only, using 3 tugs and the Eastern dredged channel into Tonda Port. Departure is during daylight hours only (pilot available apparently 0630 – 1830 hrs. during June, although ours wasn't ordered by the Charterers' Agents until 0800 hrs.). Vessel was swung off the berth by 2 tugs and proceeded to sea, again by the Eastern Channel, there being a substantial 'corner' to negotiate in the dredged channel on the Tokuyama section of the port.

Health: We could not get Radio Pratique as the Authorities required the number of the vessel's Sanitary Certificate. However, after berthing, we were unable to ascertain just what this Certificate was. The number of our Derat Exemption and type and make of the sewage system did not satisfy this question either.

Berthing: We were probably one of the larger vessels to berth at the Toyo Soda Salt Pier, discharging 31,536 metric tons of coal on dimensions – length 177 m., beam 27.8 m., draft 10.5 m. and of 20,096 gross tons. With large, engines-aft, bulk carriers there are problems with landing the gangway on the end of the jetty. A shore gangway cannot be used because of the travel of the Portainer-type discharging crane. Stevedores use a vertical steel ladder clipped over the sheer strake for access.

Access ashore through the Toyo Soda Cement Factory is prohibited to ship's crew and a Launch Service (Sampan) must be engaged, with the requisite timetable, for transport to Tokuyama, 15 minutes distant, the launch berthing at the Customs Pier.

This launch is also used for the Agent, watchmen, etc. and it may well be preferable to lower the off-side gangway to near the water as a means of access. The only permitted access to and from the launch via the vessel's gangway onto the wharf is by a badly bent vertical steel ladder at the end of the jetty.

Fresh Water: Not available from Toyo Soda Salt Pier, delivery can only be made by lighter.

Storing: Mobile cranes are not allowed onto the wharf to work ship's stores, E/R spares, etc. and if these cannot be coped with by the vessel's own gear or stores crane, floating plant would have to be hired.

AUTHORITY: Shunan Port Administration Office, 111, Chikko-cho, Tokuyama City, Yamaguchi Pref. *Tel:* (0834) 21-1787.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Holme Ringer & Co. Ltd., c/o Sankyu Transportation & Engineering Co. Ltd., Shunan Branch, 12-7 Chikko-cho, Tokuyama-shi, Yamaguchi-ken. Cable address: Ringer Tokuyama. Domestic Telex: 6765-93 Sankyu J. Tel.: Tokuyama (0834) 22-0039.

TOKYO: 35.43 N. 139.46 E. (See Plan)

DOCUMENTS:

4 copies Inward/Outward Declaration – (Form C.2000 prepared by Agent).
1 copy Berth Application (normally prepared by Agent).
3 Cargo Manifest (Form C.2030 prepared by Agent).
1 List Ship's Stores (Form C.2040).
2 Parcel List.
5 Passenger Manifest (Form C.2070).
5 Crew Manifest (Form C.2060).
1 Statement by Master (Form C.2020).
1 Declaration for Payment Tonnage Dues (prepared by Agent).
1 Maritime Declaration of Health.
1 Application for Shore Passes (prepared by Agent).
2 Baggage Lists (Form 5370).

PILOTAGE: 12 hours advance notice of ETA required. Pilot boats named Musashi, Takao, Tsukuba and Ayase. No light or sound signals, use ship's radio in case necessity arises. Address: Tokyo Pilot Association, 3-26-82 Kaigan, Minato-ku, Tokyo (at the Southern tip of the Shibaura Wharf). Tel: 453-1691.

Pilot boards vessel outside harbour. Vessel awaits Pilot around "Quarantine Anchorage".

Vessels requiring a Pilot for the Uraga Channel should radio request to Anjin Yokosuka advising ship's details and arriving time at No. 1 Uraga Channel Light Buoy. Uraga Channel Pilot embarks 3 – 5 miles S.S.E. of Kannonsaki Lighthouse, and will disembark on arrival at destination port limits. Applications for Uraga Channel Pilot should reach pilot office 24 hours before vessels arrival at No. 1 Uraga Channel Light Buoy.

Vessels of 10,000 gross tons or more should give "Notification of Traffic" to ensure safety of their navigation in or near Uraga Suido and Nakanose traffic routes (normally by Agent).

ADVANCE APPLICATIONS: Passenger ships and large vessels using mooring facilities must submit applications for use of facilities to port managers (the Port and Harbour Bureau of Tokyo Metropolitan Government) through shipping firms or Agents 3 days before entry into port so that they may have berths designated.

When they want to use anchorage facilities, they must submit applications for use of anchorage areas to Tokyo-Yokohama Port Director (the Port and Harbour Section of the Tokyo Maritime Safety Agency) to have anchorage sites designated. Small vessels of less than 300 gross tons do not need to submit anchorage application.

When ships of over 500 gross tons want to enter port at night (from sunset to sunrise), must submit applications in advance to Port Director and receive permission. Copy of written permission given to captain of ship when ship has entered port.

A ship carrying explosives or any other dangerous cargo must submit 2 copies of application in advance for permission to use port to Port Director. Such ships required to stay outside port in No. 3 Area. However, they will be allowed to enter port when Port Director considers it allowable.

ANCHORAGES: See "Advance Applications".

Quarantine Anchorage on starboard hand of No. 1 Fairway.

Sector "A" is a triangular sea area formed by line passing through point 180° and 400 m. from Light Buoy No. 16 and point 105° and 240 m. from same light buoy. Accommodates one 1,000 ton class ship or 2 ships of 500 ton class or smaller.

Sector "C" (263,330 sq.m.) is a space between Harumi Wharf and Toyosu Wharf. Accommodates five 2,000 ton class vessels.

Sector "D" (141,350 sq.m.) sea area enclosed by line drawn from point 217° and 400 m. from Northwestern tip of Tsukishima Fishery Base through No. 8 Mooring Buoy. No. 15 Buoy and Southern tip of Tsukishima Fishery Base. Accommodates 5 vessels smaller than 1,000 tons, but 2 if vessels larger than 700 tons.

RESTRICTIONS: No. 1 Fairway is long and narrow (4,200 m. × 300 m.) and carries considerable traffic. Vessels under 500 tons not permitted use Fairway when vessel over 5,000 tons is in transit. Depth 12 m.

Container Vessels: May enter from sunrise till 2400 hrs. and may leave at any time.

HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health condition on board. When Free Pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or suspected case, of infectious disease within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

Medical inspection of plants: When a report is received in advance from a ship by telegraph or other means of communication, Tokyo Office of the Yokohama Plant Disease Prevention Station must be notified by telephone or verbally in request for an on-the-spot inspection of plant in question.

Medical inspection of animals: When a report is received from a ship in advance by telegraph or other means of communication, the Tokyo Branch or the Haneda Branch of Animal Disease Prevention Station must be notified by telephone or verbally in request for an on-the-spot inspection of the animals.

RADIO: Vessels entering are watched at all times at Torigasaki, the entrance gate to Tokyo Bay, and record of passing the point is taken. As each ship passes point, this is immediately communicated by VHF radio telephone to head office of Tokyo Signal Communications Company. From here news communicated on normal telephone or on exclusive direct call telephone to interested parties (also see "VHF").

Recommended Master communicates with Agents through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

MAX. SIZE: Draft: General/Bulk: 7.0 m. for Toyosu; 10.0 m. Shinagawa, Harumi and buoys; 10.0 m. for Land-lot No. 13 and 12.0 m. for Oh-i and Aomi.

Tide: These drafts are at low water. The difference between high a low water level is about 2 m.

Tankers: Tokyo Gas Wharf (Toyosu) Max. d.w.t. 23,000. Max. dra 11.0 m.

VHF:

A. Transmitting antenna:	Located 39° 26′ N. 139° 39′ E.
B. Type:	Single communication – Yagi type. Plural communication – Corner reflecto type.
C. Direction:	Southern part of entrance to Tokyo Ba and Port of Tokyo.
D. Frequency class:	F3.
E. Frequency:	Simplex communication – 156.6 MHz, Channel 12 156.7 MHz, Channel 14 156.8 MHz, Channel 16 (for calling, answering and safety) Duplex communications – 161.6 MHz, Channel 20 161.7 MHz, Channel 22
F. Antenna power:	50 W.
G. Call sign:	Tokyo Port Radio.
H. Range:	Approx. 100 km. (straight range) S.E. side – About 20 nautical miles Sou of Nojimazaki. S.W. side – About 5 nautical miles Nor of Oshima Island. North side – Tokyo Port and Chiba Por
I. Operating time:	All times.

Ship Telephone: Uses VHF and is a service between navigating anchored ships and subscriber telephones on land, and between ship connected via base station on land. Communicating sphe approximately 50 km. to 100 km. from base station. Base station located so as to allow communication with any ship sailing alon Japanese coasts.

BERTHING: Any vessel entering port required to:

(1) Submit 1 each of "Declarations Inward/Outward of Vessels" t TMG and TMSA. See "Documents".

(2) Submit "Application for Berth" to TMG. See "Documents".

(3) Submit "Application for Designation of Anchoring Site" to TMS (Form No. 13) regarding anchoring area.

Berthing will be in order of arrival, passenger and special carg vessels excepted.

Name of Wharf	*Length* (m.)	*Depth* (m.)	*No. of Berths*
Shinagawa (Foreign Trade)	585	10.0	3
Shinagawa (Domestic Trade)	476	8.0	3
Shinagawa Container Terminal	558	10.0	3
Shibaura	910	7.8	7
Hinode	564	6.7	6

No. 15 Lumber Wharf	720	10.0–12.0	3
Oh-i Container Terminal	2,300	12.0	8
Odaiba Terminal	1,800	10.0	9
Aomi Container Terminal (Berth C-1)	300	12.0	1

There are many private wharves and other smaller public wharves use and under construction.

CARGO HANDLING FACILITIES:

Wharf/Terminal	*Equipment*	*Capacity*	*Cargo Handled*	*Remarks*
Oh-i Terminal	16 container gantries	30.5 tons	Containers	Straddle carriers and transtaine available.
Shinagawa Container Terminal	1 container gantry 2 container gantries	24.5 tons 30.5 tons	Containers	Ro-Ro facilities, Straddle carrie available.
Shinagawa (Foreign Trade)	2 unloaders 1 belt conveyor	6.4 tons 600 t.p.h.	Machinery, sugar, fruit.	3 transit sheds (18,118 sq.m.) Open storage 14,451 sq.m.
Shibaura (Foreign Trade)			Paper, cement, fertiliser, feed grain	2 transit sheds (4,665 sq.m.) Open storage 2,104 sq.m.
Hinode Terminal			Salt, paper, soda ash.	9 transit sheds (19,583 sq.m.) Open storage 6,806 sq.m.
Tsukishima Terminal			Marine products	
Harumi Terminal	4 portal jib cranes	5 tons	Sugar, wheat, fruit, marine products.	Passenger ship terminal at Berth "HL"
Toyosu Energy Terminal			Gas, steel, coal, general cargo.	
Ariake Terminal			Gravel, sand, lumber, construction materials.	Open storage 92,163 sq.m.
Odaiba Terminal	2 gantry cranes at Berth "AB"	10 tons	General cargo, steel, timber, fruit.	9 warehouses (64,766 sq.m.)
Terminal 15			Timber.	Storage capacity 400,000 tons Open storage yard 254,246 sq.m
Aomi Container Terminal	2 gantry cranes		Containers	6 straddle carriers

TUGS: The port has 2 tug companies: (i) Toko Service Co. Ltd., 3-25-8, Kaigan, Minato-ku, Tokyo. Tel: (452) 4781. (ii) Shibaura Tsusen Kaisha Ltd., 3-1-3, Kaigan, Minato-ku, Tokyo. Tel: (455) 1461. Upon notification to either, tugs will be waiting in neighbourhood of scheduled berth. Ship's lines to be used.

STEVEDORES: Advance advices should be made 24 hours at latest before vessel's arrival order arrange necessary gangs.

Discharge rates (approx.):

(a) Iron, steel and scrap, using crane or magnet, about 1,000 tons/day.
(b) Coal, crane and bucket, 1,500/2,000 tons/day.
(c) Ores, grabs and bulldozers, 1,000 tons/day.
(d) Timber, 1,000 tons/day.
(e) Grain, crane with bucket or suction, 1,000 tons/day.

MEDICAL: Hospitals, clinics and all specified facilities. Advance notice not necessary.

TANKERS: No slop discharge facilities (see "Services"). One tanker berth only. Products handled, Naphtha and crude oil. Shorelines, one 12 in. for each product. Discharge rates 1,000 t.p.h. (Naphtha) 900 – 1,000 t.p.h. (Crude).

FRESH WATER: Water supply from hydrant by Tokyo Metropolis, and waterboat by private management.

(a) Water supply on wharves		
Application	Bureau of Port and Harbour Offices in charge of each wharf.	
Work of water supply	Tokyo Port Service Association.	
(b) Water supply by water boat		
Extra charge	Overtime from 0600 to 0800	50%
	from 1700 to 2200	50%
	from 2200 to 0600	100%
	Special district	50%
	Festival day	50%

In the case of less than 20 tons per time, it will be considered 15 tons supply.

FUEL: All grades available. 24 hours' notice required.

FIRE PRECAUTIONS: (Tankers).

1. Must enter port at dead slow speed preceded by patrol boat of TMSA, 1 tug boat each side of vessel and followed by fire patrol boat.
2. Engine to be kept ready for immediate use in case of emergency.
3. Tow lines to be placed over bow and stern with eyes close to water surface.

Note: No vessels allowed alongside a tanker during loading or discharging.

DEPARTURE PROCEDURE: Ship over 300 tons departing must hoist signal in daytime and 2 white lamps at night and make 2 prolonged blasts of whistles or siren 30 minutes before starts to move and then act according to signals given by signal station on Shibaura Quay. Departure notice must be submitted to Maritime Safety Agency and port managers (operations Section of Port and Harbour Bureau). Foreign ships must submit required documents in addition to above notice to Tokyo Custom House, Immigration Control Office.

CONSULS: Most countries have embassies and consuls in Tokyo.

REPAIRS: *Ship Repairer:* Ishikawajima-Harima-Juko Co. Ltd. Tel: 03(244) 5670, Telex: J22232 (Ichico), has 2 dry docks for vessels of 11,000 and 23,000 d.w.t. and slipways from 8,000 to 60,000 d.w.t. capacity.

DRY DOCKS: Largest dry dock: length 180 m.; width 24 m.; depth 7.27 m. Capable of accommodating vessel of 16,750 gross tons.

Also 1 other dry dock for ocean-going vessels.

GANGWAY/DECK WATCHMEN: Necessary only in the case of valuable cargo.

OPENING/CLOSING HATCHES: Normally by crew.

CUSTOMS ALLOWANCES: (Tobacco) 200 cigarettes a week. (Wine and/or spirits) 760 cc's per crew member per week.

SURVEYORS:

American Bureau of Shipping, Nihon Bldg., 6-2 Ootemachi 2, Chiyoda-ku, Tokyo 100. Tel: 279-7992/6.

Report:

Idemitsu Hokkaido Sea Berth (Discharging Terminal):

Location: Lat. 42° 36′ 10″ N., Long. 141° 38′ 50″ E.

Operator: Idemitsu Kosan Co. Ltd.

Terminal operates 24 hours per day, 7 days a week. Ships moored and unmoored daytime weather or other circumstances permitting. Terminal will not be closed on any holidays.

Approaches: Clear and unimpeded from South. White and red striped high chimney (approx. position: Lat. 42° 38.1′ N., Long. 141° 35.6′ E.) makes a most conspicuous landfall. In poor visibility, in heavy fog or rain, radar reflector fitted at centre of Sea Berth can be located first by ship's radar and after that Sea Berth will be seen in direction from N.W. to S.E.

Westward of Sea Berth, there are many cargo vessels anchored.

Ships berthing starboard side alongside at the Sea Berth, proceed on course 314° observing transit of chimney and East Breakwater Lighthouse.

Anchorage: No strict boundary areas for anchorage but Master recommended to anchor 1 mile to 2 miles S.E. from Sea Berth.

Holding ground is good and depth about 27 m. – 30 m.

Pilotage: Sea Berth requires Pilot for berthing, no strict locatio anchorage for ships awaiting Pilot in Tomakomai area, but shoul as close as possible to port in accordance with harbour draft communications.

2 Pilots will board ships over 30,000 g.r.t. Pilot uses tug boat boarding.

Important Features: Ships arriving in Winter season (November-Ma should pay special attention to the cold, as average temperature in season ranges from −3°C to 5°C.

MEDICAL: Hospitals, doctors and dentists available.

FUEL: Domestic oil is available. Bonded oil will be brought Hakodate with sufficient advance notice, when required.

FRESH WATER: (Public).

TOYAMA: 36.46 N. 137.13 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
6 Crew Lists, including Passport Numbers.
6 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, came wrist-watch, radio, firearms/swords, etc. (only at first port of ca Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Ca Manifest and Cargo Manifest in transit using specific forms. There ship's Agent should be provided with necessary information about de of cargoes in advance.

Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

PILOTAGE: Not compulsory. No telegraphic address for pilot station, but Pilot arranged through Agent whom keep advised ETA which may be sent through Niigata Radio. Pilot boards about 1 mile off East Breakwater from small tug. In event bad weather recommend remain outside port until weather clears. Pilot available daytime only from sunrise to sunset.

ANCHORAGES: The harbour at the Jintsu river mouth is always calm. Covers about 125 acres, with depths of from 16.5 ft. to 33 ft. over mud and sand. Room at anchorage for at least 4 vessels over 5,000 gross tons. Anchoring position for ocean tankers is Lat. 36° 46.6′ N., Long. 137° 14.4′ E.

MAX. SIZE: Max. LOA 175 m., but may be extended by 2.0 m. – 3.0 m. if Pilot agrees.

Also see "Tankers".

HEALTH: Radio Pratique available. Formalities carried out at Quarantine Anchorage.

RADIO: (Also see "Pilotage"): Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Usually join vessel at port entrance but can join outside harbour for large vessels. Used only when Pilot aboard.

"Nagata Maru" – 3,000 h.p. uses own lines free of charge.

"Nihonkai Maru" – 1,800 h.p. uses own lines free of charge.

"Raicho" – 2,600 h.p. uses own lines free of charge.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

TANKERS: Max. size: 200,000 d.w.t., max. LOA, no limit, and max. safe draft 19 m. for Sea Berth of Nihonkai Sekiyu K.K., Toyama. Two lines, diameter 16 in. Reducing pieces supplied as necessary. Discharge rate 7,500 t.p.h.

DENSITY: 1015–1019 min./max.

FRESH WATER: Available ex-wharf at Nos. 1, 2, 3, 4 and 5 Wharves; average 40 t.p.h. Other berthing positions supplied by barge which ordered from Fushiki and is filled up at Toyama.

FUEL: Domestic oil is available. Bonded oil will be brought from Moji with sufficient advance notice when required.

FIRE PRECAUTIONS: Nihonkai Oil Co., Toyama, issue Safety Regulations to Master on arrival tanker sea berth.

CONSULS: None.

REPAIRS: Minor repairs only.

DRY DOCKS: Nihonkai Juko Co. Ltd., Toyama. No. 1 dock, used for construction. No. 2 dock, ship-building capacity: length, 104 m.; width 15 m.; depth, 1.8 m. Size of dock: length, 112 m.; width, 14.6 m.; depth, 4 m. Maximum building capacity, 4,000 g.r.t. No. 3 dock, ship-building capacity: length, 150 m.; width, 20.8 m.; depth, 5 m. Size of dock: length 168.2 m.; width, 21.88 m.; depth, 9.2 m. Maximum building capacity, 10,750 g.r.t.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

AIRPORT: Toyama Airport, distance about 10 km. Five daily flights.

TIME: GMT plus 9 hours. Permanent.

POLICE/AMBULANCE/FIRE: Police, Toyama North Police Station, Toyama (0764) 37–7171; Ambulance, Toyama Iwase Fire Station, Toyama (0764) 37–7141 or 119; Fire, Toyama Fire Station, Toyama (0764) 37–7141.

TELEPHONES: No facilities for placing on board.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 15 days, but 15 days' extension possible if ship stays longer.

AUTHORITY: Toyama Port Administration Office, 5, Kaigan-dori, Higashi-Iwasemachi, Toyama City. *Tel:* (0764) 37-7131. *Telex:* 5152256 Nextoy J. *Cables:* Nexco Toyamako. *FAX:* 0764-37-9945.

TOYAMA SHINKO: 36.47 N. 137.10 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
6 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 2 Cargo Manifests and 1 Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

ANCHORAGES: No anchorage at Toyama-Shinko, therefore, if vessel required to await for berth or some other reason, use Fushiki Outer Anchorage ground where safe at all seasons with depth from 8 m. to 11 m. Sand and clay bottom. Room at anchorage for at least 6 vessels over 5,000 gross tons.

PILOTAGE: Pilot available any time during daylight. Not compulsory. No telegraphic address of pilot station, therefore, direct advice to local Agent always required. Pilot meets vessels 209° 2 miles off leading light of Fushiki Port, thence takes vessel to Fushiki Quarantine Anchorage ground, due to many fishing-nets on both sides of fairway. No Quarantine Anchorage ground established presently at Toyama-Shinko, therefore, every vessel obtains free pratique at Fushiki. If requiring to come into Quarantine Anchorage without taking Pilot, necessary to advise Agent in advance. In case of bad weather and need to await outside port, recommend cruising in Toyama Bay until sea abates. Bay area too deep to anchor and also danger of fishing-nets. When approaching position for Pilot, give exact ETA to Agent by using Niigata Radio and/or VHF to Fushiki Harbour Master. Small wooden pilot-boat painted yellow. No particular light or sound signals required. Even if the vessel already obtained Free Pratique in other port, need to approach the aforesaid position for Pilot, because of no Pilot position located in Toyama-Shinko.

RESTRICTIONS: Pilot not available during darkness. No restrictions on tide, because small tide in all seasons. If draft over port limitation, vessel enters port after making adjustment by lightening in Outer Harbour in Fushiki.

MAX. SIZE: Length 200 m., draft 34 ft. Tidal range is max. 0.45 m.

HEALTH: Formalities will be carried out at Fushiki quarantine anchorage.

RADIO: (also see "Pilotage"). Recommend Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Tugs normally join vessel at port entrance, but sometimes in Fushiki Outer Harbour for larger vessels. Maritia-Maru (2,060 h.p.) and Nihonkai-Maru (1,800 h.p.) provide lines, free of charge and Raicho-Maru (760 h.p.) uses ship's line. In case public tug, i.e. Nihonkai-Maru and Raicho-Maru used, always require Pilot on board.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700 –1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

DENSITY: Average density between 1015 and 1019 in all seasons.

FRESH WATER: Available, from wharves No. 1, 2, 3, 4, 5 and 6 average 10 t.p.h. In other berths, to be supplied by barge, average 50 t.p.h.

FUEL: Domestic oil is available. Bonded oil will be brought from Kanmon area, with 1 week advance notice, when required.

CONSULS: None.

REPAIRS: Minor repairs only.

DRY DOCKS: No dry docks. Nearest available in Toyama.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.
REPATRIATION: Possible.
AIRPORT: Toyama Airport about 25 km. distance. Two regular services a day. ANA only.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAYS: 1st May and New Year's Day, most probably from 31st December to 3rd January.
POLICE/AMBULANCE/FIRE: Police, Shinminato Police Station, Shinminato (07668) 2-3141; Ambulance, Shinminato Fire Station, Shinminato (07668) 2-3175; Fire, Shinminato Fire Station, Shinminato (07668) 2-3175.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: Hold cleaning available.
SHORE LEAVE: Local Immigration Officers issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer. Attending from Fushiki Immigration Office, Fushiki, due to no office in Toyama-Shinko.
AUTHORITY: Toyama Prefecture, 1-7 Shinsogawa, Toyama City, Toyama Pref., Japan. *Tel:* (0764) 31-4111.

AGENT: Sub-agents of Dodwell & Co. Ltd. Tokyo, Fushiki Kairiku Unso Co. Ltd., 6-6 Fushiki-Minato-machi, Takaoka-Shi, Toyama-ken. TSUKUMI: 33.05 N. 131.52 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
PILOTAGE: Not compulsory, but recommended unless Master well acquainted with locality. Pilot embarks vessel at anchorage, position Lat. 33° 05′ 30″ N., Long. 131° 54′ 00″ E. Request for Pilot made through Agent; Master to report ETA 24 hours prior arrival.
ANCHORAGES: Good holding anchorage available; depth of water about 25 m. Loading and/or unloading of cargo usually effected alongside wharves and in event of loading/unloading at anchorage, when rough weather prevails, difficulty sometimes experienced on account of swell from open sea. Therefore suggested that vessel anchor as close to shore as possible consistent with safety.
RESTRICTIONS:
(a) Berthing: Night entry or berthing after nightfall, though not impractical (depending on weather) is not recommended unless special arrangements (stevedores, etc.) necessitate vessel's immediate berthing.
(b) Departure: Night departure allowed, weather permitting, and subject Pilot's agreement.
MAX. SIZE: See "Berthing".
HEALTH: Vessels usually anchor in the Bay of Saganoseki or Saiki, where the authorities board and grant Free Pratique.
RADIO: Recommended Master communicates with Agents through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.
TUGS: 2 tugs, each 1,800 h.p.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

UBE: 33.56 N. 131.15 E. (See Plan)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.
Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
PILOTAGE: Not compulsory but recommended unless Master well acquainted with area. No Harbour Pilot stationed at Ube but Inland Sea Pilot will attend.

Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Inland Sea Pilot Association covers all inland sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three Pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.
Note: VHF communication available with Inland Sea Pilot Stations.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse. (Vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: Sea bottom is mud.

Depth	4 m. – 7.5 m.	7.5 m. – 10 m.
Sheltered	73,000 sq.m.	233,100 sq.m.
Unsheltered	12,175,500 sq.m.	680,000 sq.m.

RESTRICTIONS:
(a) Outer harbour: No restriction.
(b) Inner harbour: Berthing/unberthing is practicable only during daytime.
(c) Deep draft vessels may berth at high water only.
MAX. SIZE: See "Berthing" and "Tankers".
HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera infected area within 10 days, Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agents prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Master communicates with Agents through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.
TUGS: "Naruto Maru" 2,800 h.p., "Nachi Maru" 2,800 h.p. and "Iris" 2,400 h.p. stationed at Ube. Other tugs available from Moji or Tokuyama. Tug's lines used at no extra charge.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

Wharf	*Length*	*Depth*
Public Okinoyama Wharf	370 m.	10 m.
Public Shibanaka Wharf	185 m.	10 m.
Public Shibanaka East Wharf	152 m.	9 m.
Public Shibanaka New Wharf	260 m.	7.5 m.
Ube Cement Wharf	247 m.	9 m.
Ube Kosan Chisso Wharf	188 m.	9 m.
Ube Kosan Urea Wharf	223 m.	9 m.
Ube Kosan No. 2 Pier	131 m.	9 m.
Central Glass Wharf	162 m.	9 m.
Public Shinmachi Wharf	260 m.	7.5 m.

Wharf for Limestone:

Name of wharf: Okinoyama Limestone Wharf (Ube Kosan No. 5 Wharf). Length of wharf 165 m. Maximum safe draft 11.00 m. Maximum 30,000 d.w.t. Fairway 300 m. wide, 2.25 miles long, 8.80 m. deep, with shallow spot 8.40 m. at low water. Accessible max. draft 10.50 m. Facilities: Loaders × 2; 1,500 tons per unit/hour. Entry and Departure: Berthing/unberthing is practicable only during daytime. Deep draft vessel may unberth at high tide only.
STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agents advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agents, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700 hrs. – 1900 hrs. (50% additional of basic stevedorage), 2100 hrs. – 0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).
MEDICAL: No advance notice required unless urgent.
TANKERS: Seibu Sekiyu Co. Refinery.
(a) Geographical Location: Lat. 33° 49′ 48″ N., Long. 131° 13′ E. 163°, 11,400 m. from Motoyama Misaki.
(b) Entry Permission: Sea berth located outside harbour limit of Ube port and treated as a closed port. Vessels therefore required to obtain special permission for entry from Customs at any open port prior to arrival.
(c) Restrictions: Max. 230,000 d.w.t. Max. LOA 325 m. Max. safe draft 19.5 m.
(d) Diameter/No. of shore pipes: Float-sink hose: 16 in.×2 lines connecting to manifold; sub-marine hose: 20 in.×2 lines; submarine pipe-line: 48 in.×1 line.
(e) Discharging Rate: 7,800 t.p.h. (Crude oil).
FRESH WATER: *(a)* Water barges available from Moji and supply about 50 t.p.h. *(b)* Water from wharf supply at Central Glass Ube Cement and Ube Chisso wharves.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
DENSITY: 1025.
CONSULS: None.
REPAIRS: Sasebo Heavy Industries Co., Ltd., Moji; Kitakyushu Iron Works, Tobata; Ube Dockyard Co., Ltd.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
AIRPORT: 30 minutes by road.
TIME: GMT plus 9 hours. Permanent.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
PILOTAGE: Wakayama-Shimotsu licensed Pilots. ETA advices to Agent. Pilot boards 1,500 m. – 2,500 m. off Wakayama Breakwater. Chart Nos. 1150 and 1143 (Japanese Maritime Safety Board). No pilot boat. Pilot boards from tug.
ANCHORAGES: For waiting Pilot and/or berth (nature of bottom, sand mixed with mud.) Four anchorage points for large vessels (ore carriers for Sumitomo Metal) over 30,000 tons gross are provided by the Port Authority. Agents must apply for one when required. The position of each from the lighthouse (flashing white) in the Southern sector of the port is as follows:

"A" – 3,000 m. – 255°
"B" – 3,500 m. – 272°
"C" – 4,100 m. – 283°
"D" – 4,800 m. – 292°

Other vessels are required to anchor in position (approx.) Lat. 34° 13′ 30° N., Long. 135° 06′ 30″ E. or nearer the shore if possible. (Wakayama Log Carrier): 2,000 m. 245° and 230° from Red lighthouse; depth about 22 m.
RESTRICTIONS: Pilot available daytime only. Channel depth, (Southern Section) 9.0 m; (Northern Section) 14.0 m.
MAX. SIZE: (Wakayama Log Carrier): South Section, LOA 160 m., 20,000 d.w.t. draft 9.0 m.; LOA 200 m., 35,000 d.w.t., draft 10 m. (Sumitomo Metal Pier, South Section): LOA 300 m., 100,000 d.w.t. or 150,000 d.w.t. with part load, draft 14.0 m.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio or Kobe Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio or Kobe Radio respectively.
HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health condition on board. When Free Pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.	Passenger List.
Crew List.	Vaccination List.

The following vessels will not be able to get Radio Pratique:
A vessel that has been in contact with an infected area, or a suspected infected area within 15 days of arrival.
If a vessel has on board any case, or suspected cases, of infectious disease within 15 days of arrival.
TUGS: Tug assistance normally commences from outer harbour. Tug lines used and charge included in towage. 8 tugs available, up to 3,000 h.p.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.
BULK HANDLING FACILITIES:

Berth	*Max. d.w.t.*	*Length* (m.)	*Depth* (m.)	*Cranes*
Sumitomo Metal A	18,000	172	9.5	7×700 t.p.h. 1×1,000 t.p.h.
Sumitomo Metal B	160,000	365	14.0	
Sumitomo Metal C	160,000	274	14.0	
Sumitomo Metal D	40,000	215	12.0	
Sumitomo Metal E	26,000	218 (LOA)	11.00 (Max. draft)	2×20 tons
Sumitomo Metal F	18,000	180 (LOA)	9.30 (Max. draft)	

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1630 – 2130 hrs. (60% additional of basic stevedorage), 2130 – 0400 hrs. next morning (130% additional), 0400 – 0830 hrs. (60% additional), Sundays/holidays (100% additional).
MEDICAL: No advance notice required unless urgent.
TANKERS: *Wakayama Northport (LPG Dolphin):* Sumitomo Metal: Max. 48,000 d.w.t., Max. LOA 230 m., Max. draft 12.0 m., 1×12 in. (butane), rate 2,700 kl.
DENSITY: 1025 – 1030.
FRESH WATER: Available alongside and Water boat, capacity 90 tons.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
CONSULS: None.
REPAIRS: Minor repairs only. Suwa Shipyard Co., Ltd.
Tel. 0734-31-1694.
DRY DOCK: None.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CUSTOMS ALLOWANCES: Only allowed 200 cigarettes to take ashore for one week but no spirits.
REPATRIATION: Possible.
AIRPORT: Itami, Osaka, about 3 hours by car.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police, 110; Ambulance/Fire, 119.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 9 days, but 9 days' extension possible if ship stays longer.
DEVELOPMENTS: Breakwater under construction in the vicinity of the entrance to Wakayama No. 1 Area.

AUTHORITY: Wakayama Shimotsu Port Administration Office, 22, Chikko 6-chome, Wakayama City. *Tel:* (0734) 31-7266.

AGENT: *Wakayama North Port* (Sumitomo Steel Mills), Sumikin Kaiun Co. Ltd., c/o Sumitomo Kinzoku K.K., 1850, Minato, Wakayama City. Tel. Wakayama (0734) 55-5151. Cable Address: Shipsumikin Wakayama. Telex: 05542161 Smikai J, 05542162, 05542193.
Wakayama South Port (Lumber/log discharge), Shimamato Kaiun Co., Ltd., 7, 5-Chome, Chikko, Wakayama City. Tel: Wakayama (0734) 22-5111. Cable Address: Shimamoto Wakayama. Telex: 05542151 Simawk J.

YATSUSHIRO: 32.30 N. 130.05 E. (See Plan)

PORT LIMITS: The sea surrounded by the circle with a radius of 5,000 m. centred upon the triangulation point on Kagashima Island (28.7 m. high), the lines West to the respective bridges on the lowest Mae-kawa and Kuma-gawa, and the coast.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
1 Manifest.
1 Customs.
1 Stores List.
1 Health Document.
1 Bill of Lading.

PILOTAGE: Pilot station (acting also as an Agent for foreign vessels): Yatsushiro Branch Office of the Nippon Tsuun K.K. located at 262-15 Minato-machi, Yatsushiro-shi, Kumamoto-ken. Tel: 09653-7-0011 or 7-0012.

Kokoku Unyu K.K. located at 262 Minato-machi, Yatsushiro-shi, Kumamoto-Ken. Tel: 09653-7-1101. Telex: 767503 Kounkij.

Yatsushiro Branch office of Kitakyushu Unyu K.K. located at 3-2 Tatema, Yatsushiro-shi, Kumamoto-ken. Tel: 09653-2-7136. Telex: 767592 Yatsushiro Kitakyuunma.

Yatsushiro Koun K.K. located at 9-4 Asahichuodori, Yatsushiro-shi, Kumamoto-ken. Tel: 09653-5-2233. Telex: 767506.

ANCHORAGES: Within port limits.

RESTRICTIONS: A Pilot is not available after dark, also his availability depends on the tidal conditions.

MAX. SIZE: Max. d.w.t. 35,000 tons. The tidal difference between high and low water is 4.3 m.

HEALTH: All the necessary procedures must be undertaken at the Yatsushiro-Minamata Branch Office of the Nagasaki Quarantine Station.

RADIO: Not available.

VHF: Not available.

TUGS: 1 tug owned by the Jonan Unyu K.K., tugs also available from Miike Port in Fukuoka Prefecture.

BERTHING:

Quay	A	Length	130 m.	Depth	7.5 m.
,,	B	,,	130 m.	,,	7.5 m.
,,	C	,,	165 m.	,,	9.0 m.
,,	D	,,	185 m.	,,	10.0 m.
,,	E	,,	185 m.	,,	10.0 m.

CRANES: 7 mobile cranes and 20 shovel loaders.

As a rule, when a vessel is secured alongside Quays A, B, C, D and E there is no need to use the ship's own gear. However, it may sometimes be necessary to use the ship's gear during loading and unloading.

STEVEDORES: Arranged by ship's Agent.

MEDICAL: Arranged by ship's Agent.

FRESH WATER: Available from the water supply facilities operated by the Kumamoto Prefecture.

CONSULS: None.

REPAIRS: Not possible.

DRY DOCKS: Not available.

SURVEYORS: Not available.

GANGWAY/DECK WATCHMEN: Watchman is not necessary.

HATCHES: Opening and closing is done by the stevedores.

REPATRIATION: Yatsushiro Branch Office of the Fukuoka Immigration office arranges necessary repatriation.

AIRPORT: Kumamoto Airport (about 70 km. distance).

POLICE/AMBULANCE/FIRE: The Yatsushiro Police station located at Nishimatsuejo-machi, Yatsushiro-shi, Kumamoto-ken. Tel: 09653-5-2110.

The Yatsushiro Head Station of the Yatsushiro Fire Department located at 1-10 Matsuejo-machi, Yatsushiro-shi, Kumamoto-ken. Tel: 09653-2-6181.

EMERGENCY CO-ORDINATION CENTRE: Yatsushiro Branch Office of the Misumi Maritime Safety Department. Tel: 09653-7-1477.

TELEPHONES: There is no arrangements for placing telephone on board.

STORING: See "Prelims".
1. Yes.
2. Yes.
3. Yes.
4. Yes.
5. Yes.
6. Yes.

SHORE LEAVE: Shore passes are to be issued at the Yatsushiro Branch Office of the Fukuoka Immigration Office.

DELAYS: Delays will be expected when quays are occupied by vessels or a Pilot cannot go on board because of the tidal conditions.

AUTHORITY: Yatsushiro Port Office of the Kumamoto Prefecture, 249 Minato-Machi, Yatsushiro City, Japan. *Tel:* 09653-7-0632. *Contact:* Port Office Superintendent.

AGENT: Yatsushiro Branch Office of the Nippon Tsuun K.K., 262-15 Minato-machi, Yatsushiro-shi, Kumamoto-ken. Cable Address: Nexco Yatsushiro. Tel: 09653-7-0011.

YAWATA: 33.52 N. 130.49 E. (See Pla
(See "Kanmon-Ko")

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camer wrist-watch, radio, firearms/swords, etc. (only at first port of call Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manife and Cargo Manifest in transit using specific forms. Therefore ship Agent should be provided with necessary information about details cargoes in advance.

Certificates: Ship's Register to show Customs Inspector ship registered gross and nett tonnages. Valid Cargo Gear Certificat sometimes required by stevedores when cargo gear maintenan appears to be poor.

PILOTAGE: *Harbour Pilotage:* Compulsory for entry, departure a when passing through Straits if vessel exceeds 10,000 g.r.t. departur Pilots embark Eastbound vessels at Mutsure Quarantine Anchora (see "Moji"), Westbound vessels at Hesaki Quarantine Anchorage (s "Moji"). Two Pilots embark vessels exceeding 20,000 gross ton charging 180% pilotage.

Sea Pilotage: Vessel approaching from East obtain Pilot by rad request made at least 24 hours in advance. Pilot embarks 3 miles Sou from Sekisaki Lighthouse; Lat. 33° 13′ N., Long. 131° 54′ E.

Pilots should be kept closely advised of accurate ETA pilot station. any changes, Masters requested radio immediately to pilot offices dire or through Agent reporting revised ETA. Cable addresses of pilot office Harbour Pilot, "Kanmonpilot Moji". Inland Sea Pilot, "Anjin Mo Require 24 hours' notice of ETA, but can attend with 2 – 3 hours' noti in emergency cases.

ANCHORAGES: No anchorage at Yawata, but quarantine anchora used in essential cases. See "Health".

RESTRICTIONS:
(a) Because of narrow channel leading to Yawata and shallow wat at entrance of channel, length and draft of vessel limited, exce for berthing at Nishi-Yawata Wharf, where 20,000 gross tonnag with 200 m. length overall and 8.3 m. draft may accommodated. Limits:

	Wharf	*Buoy*
Length (overall)	166 m.	155 m.
Draft	8.5 m.	8.5 m.
Gross tonnage	10,000 tons	10,000 tons

Vessel slightly exceeding above may be berthed at the Pilot discretion, subject weather conditions and efficiency of engin steering, etc.
(b) Fairway leading into main harbour about 200 m. wide and 2 mil long, running parallel to breakwater and reclaimed land. In th channel, as in main harbour and fairway to Yawata, vesse observe one-way traffic and, on a "not-clear" signal from shor wait outside for outgoing vessels to clear channel. Vessels wi draft of more than 7 m. can enter/depart only at high tide.
(c) Entry permitted only from sunrise and vessels to be berthe before sunset. Night departure prohibited.
(d) Wakato Suspension Bridge crosses channel between Tobata an Wakamatsu. Height of bridge from water line at fairway 42.675 at spring high tide; height of mast of vessels passing under bridg limited to 38 m.
(e) Easterly winds prevail in warm season. N.W. winds in Winte Dense fog sometimes in Spring and Winter, but generally clea in morning. Tidal range about 1.2 m. Tidal current in channe about 1.5 to 2.5 knots, but no current in port.
(f) Port privately owned and controlled by Nippon Steel Corp.

MAX. SIZE: See "Berthing".

HEALTH: See "Moji".
(a) Quarantine station at Western entrance: 0.5 mile East of Mutsu Lighthouse Lat. 33° 58′ 15″ N., Long. 130° 53′ 43″ E.
(b) Quarantine station at Eastern entrance: 125°, 1,500 m. fro Hesaki Lighthouse Lat. 33° 56′ 24″ N., Long. 131° 30′ 12″ E.
(c) Quarantine inspection not allowed inside port except whe weather or other special reasons prevent quarantine boat fro approaching ship at anchorage.
(d) Quarantine service is rendered from sunrise to 1 hour befor sunset.
(e) "Q" flag should be hoisted until ship in Free Pratique.
(f) Vessels exceeding 20,000 gross tonnage may underg quarantine on application when they berth inside port.
(g) When ship arrives from plague-infected or suspected area with 10 days after she left such place, 24 hours special quarantin required. All sanitary scuppers must be closed and garbage mus not be thrown overboard after ship reaches 60 miles off Japanes coast.

RADIO: Recommended Master communicates with Agent throug Choshi Radio or Nagasaki Radio which cover all ports in Japan. I specifically Westbound vessel, to contact Choshi, and Northbound t contact Nagasaki Radio respectively.

BRIDGE: See "Restrictions".

STEVEDORES: At least 24 hours prior notice excluding Sundays an holidays required in order for Agent to arrange stevedores. Vessel mus constantly keep her Agent advised of ETA. If stevedores can commence loading/unloading at time notified by the Agent, the orderer must pay for waiting time. If cargo gear not rigged on berthing stevedores will do same for ship's crew. Overtime surcharges 1700-1900 hrs. (50% additional of basic stevedorage), 2100 – 0500 hrs. ne morning (130% additional), Sundays/holidays (60% additional).

DICAL: No advance notice required unless urgent.

F: Vessel can keep in direct contact with port authorities in regard rival, berthing instruction, etc, through VHF, details as follows:

	Kitakyushu (Moji)	*Shimonoseki*
a) Call sign:	"Kitakyushu Port Radio"	"Shimonoseki Port Radio"

b) Location of radio facilities: The transmitting and receiving station located at top of Mt. Hinoyama, Shimonoseki, for both the above radio stations.

c) Type of wave:

Channel:	Simplex 16	(Calling, responding)
	Simplex 12	(Communication)
	Simplex 14	(Communication)
	Duplex 20	(Communication)
	Duplex 22	(Communication)
Outport:		50 W.

d) Operating hours: 0000 – 2400.

e) Communicating range: Within a radius of 50 miles from the station.

f) Communicating language: English and Japanese.

GS: 2 tugs join vessel at corner of fairway leading into main harbour. p's lines used when vessel berths.

RTHING: No specific requirements. Pilot boarding time will be notified ship's Agent mainly by radio.

te: Capacity for the above, no limit subject to draft and length.

NKERS: No tanker berth.

NSITY: Average density in port about 1020 – 1022 in Summer ason, 1024 – 1025 in Winter season.

ESH WATER: At buoys: Water barges available from Wakamatsu, e of delivery about 50 t.p.h. At wharves: (No. 16, 17, 18, 19, 20 and shi-Yawata Wharf.) From hydrants: 25 t.p.h. – 40 t.p.h. For supply at shi-Yawata Wharf, 1 day prior notice required. Overtime charge: (0500 0800 hrs.) (1700 – 2200 hrs.), 50% add.; (2200 – 0500 hrs.), 100% d.; bad weather 50% add.; Sundays and holidays, 50% add. Minimum uantity at Yawata, 10 tons. Minimum quantity at Mutsure Anchorage, 0 tons.

EL: Domestic oil is available. Bonded oil will be brought from Moji, be or Oita with sufficient advance notice, when required.

RE PRECAUTIONS: No tanker berth. Each tugboat is equipped with e extinguisher system for attending emergency cases.

NSULS: British Consul, who is also acting Swedish Consul, is tioned with Holme Ringer, Moji (tel. 093-331-1311). American Consul tioned at Fukuoka (tel. 092-751-9331). Korean Consul stationed at kuoka (tel. 092-771-0461).

EPAIRS: All types of deck and engine repairs possible.

RY DOCKS: No dry dock available.

ANGWAY/DECK WATCHMEN: Not specially required unless ssengers or valuable cargo aboard.

PENING/CLOSING HATCHES: Stevedores carry out opening and osing hatches. If any time lost by ship's crew doing this work, evedores charge ship for waiting. Recommend request stevedores for s work unless crew can complete it before berthing.

USTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore t no spirits.

EPATRIATION: Possible.

RPORT: Fukuoka Airport; approx. 70 km.

(a) International line:

JAL,	for Pusan (Tuesday and Thursday); for Taipei-Hong Kong (Monday and Thursday);
CPA,	for Taipei-Hong Kong (Wednesday and Saturday);
KAL,	for Pusan-Seoul (Mon., Tues., Wed., Fri., and Sat.).

(b) Domestic line:
JAL and ANA, regular service.

ME: GMT plus 9 hours. No alterations made to clocks during year.

OLICE/AMBULANCE/FIRE: Yawata Police Station, tel. 093-671-631; Wakamatsu Water Police, Yawata Port branch, tel. 093-681-3475; mbulance/Fire, Yawata Fire Department, tel. 093-671-4831.

ERVICES: Tank cleaning, sand blasting (Fuji Co., Tobata), chemical eaning (Fuji Co., Tobata). Hold cleaning (Tsuyama Kosan K.K., awata; Fuji Co., Tobata). Compass adjusting (Kajiwara Koki, himonoseki). DF calibration (Nippon Radio Co., Tobata). Life-raft ervicing and inspection (Kikutani Sengu, Shimonoseki; Marinair ternational, Kobe; International Marine, Kobe; Marine International; okohama and Tokyo); this service requires name of maker in advance. adio and radar repairs available, but requires name of makers/type of e machine in advance. Laundry (Sunrise Cleaning, Tobata; Moji Dry eaning, Moji). Watchmen service available. Charts: only Japanese harts available locally; BA and HO charts can be obtained from Kobe d Yokohama respectively, with adequate notice. Grain fitting (Ushio o., Moji; Fuji Sobi, Moji); this work is usually carried out at Moji (public rt). Fumigation (Toyo Fumigation Co., Moji), this work is not permitted t Yawata but at Moji. Floating crane, capacity 200 tons (Kondo Kaiji, akamatsu; Nichibei Kosan). Diver (Nippon Salvage Co., Moji; uyama Kosan, Wakamatsu). Salvage service (Nippon Salvage, Moji) ainting service (Fuji Co.).

TELEPHONES: Nippon Senpaku Tsushin K.K. available at Moji (tel. 093-331-1089). In case of Mutsure anchorage, extra boat charge and personnel expenses will be incurred. Due to insufficient number of telephones require adequate advance notice for installation. Suitable ship's electrical voltage; DC – 22/28 v. AC – 100 v. 110 v. 120 v. (to keep at least within 10 v.).

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

GENERAL: Whenever vessel takes bunkers in port, advisable to close deck scuppers' holes before pumping in order to avoid overflow oil into sea.

DEVELOPMENTS: All the present discharging berths (wharves) for coal, ore (including Nishi-Yawata Scrap Wharf) converted to loading berths.

AUTHORITY: Kitakyushu Port and Harbor Bureau, 2-7 Nishikaigan, 1-chome, Moji-ku, Kitakyushu City, 801 Japan. *Tel:* (093) 321-5941, (093) 321-5941. *Fax:* (093) 321-5915.

YOKKAICHI: 34.57 N. 136.38 E. (See Plan)

DOCUMENTS: See "Yokohama".

PILOTAGE: Not compulsory; Pilot available at Lat. 34° 56′ 15″ N., Long. 136° 40′ 40″ E. Vessels requiring Pilot cable Agent at least a day ahead advising exact ETA pilot station.

Wireless station for communicating with entering ships and for other port business, call signal JCZ. Radio wave in use is A1.A2 500 kHz and A1.A2 486 kHz, output A1 50 W. and A2 110 W. Zone of communication about 100 km.

Yokkaichi Signal Station also equipped for assigning berths to entering ships and for other port business. VHF communication available, call signal Yokkaichi Port Radio, Channel 16. Working Channel 14, 0600 hrs. to 2000 hrs. any day.

Also see "Nagoya" – "Pilotage: Shipmaster's Report".

ANCHORAGES: Vessels anchor in position Lat. 34° 56′ 15″ N., Long. 136° 40′ 40″ E. where Authorities board and grant Free Pratique; Max. depth 13 m.

RESTRICTIONS: Entry restricted by vessel's draft and Pratique. Max. draft inside port 12 m. Quarantine Authority attend vessel usually from dawn to sundown on any day. Berthing daytime only. Unberthing any time except tankers daytime only.

MAX. SIZE: Max. permissible draft inside port 12 m.

Tankers:

Berth	*Max. d.w.t.*	*Max. LOA* (m.)	*Max. Safe Draft* (m.)
Showa Outer SBM	275,000	335	19.30
Showa Inner SBM	170,000	300	15.80
Showa Wharf "E"	32,000	232	10.50
Daikyo SBM	230,000	330	19.50
Daiyo Umaokoshi Pier	60,000	240	9.80

HEALTH: Request for Radio Pratique to be addressed to Agents not less than 12 hours before arrival.

SPECIALISED CARGO HANDLING FACILITIES:

Bulk Cargoes: No. 2 Wharf has a cereal silo which can store 56,840 tons of imported grain. 2 pneumatic unloaders with unloading capacity of 300 t.p.h. per machine at the Northern berth of the pier to connect the silo with conveyors.

Containers: One deep-sea container berth of 280 m., quay length and minimum water depth of 12 m., incorporating a Ro-Ro ramp. Two 37.5 ton and 44.5 ton Hitachi container cranes. Container yard and marshalling yard area of 58,750 sq.m. Three TCM straddle carriers, 3 forklift trucks (10 tons – 25 tons), 15 tractors, 35 trailers. Container freight stations at Asake 5,940 sq.m. Wool centre 46,768 sq.m.

Facilities of Container Terminal:

1. Total area 58,750 m.
2. Container berth: Length 280 m., depth 12 m., mooring capacity 25,000 d.w.t.×1 berth.
3. Cargo handling equipment: Ramp-way 1 unit, container cranes 2 sets, 1×44.5 tons, 1×37.5 tons.
4. Transport machine: Straddle carrier, 3 units, 1×40 ft., 2×20 ft.; fork lift 3, 1×25 tons, 1×20 tons, 1×10 tons.
5. Container yard: Container yard 6 yards, 29,730 m. refrigerated container yard, one yard 1,275 m.
6. Other relevant facilities: Chassis yard 5,740 m.; wool centre 46,768 m.; cold store 4,664 m.; meat centre 3,335 m.

Liquid Chemicals/LPG Carriers:

Operator: Yokkaichi LPG Terminal Co. Ltd.
Location: Lat. 34° 50′ 05″ N., Long. 136° 40′ 00″ E.
Max. Mooring Capacity: 67,000 d.w.t.
Depth of Water: Passage: 12 m.
Berth: 12 m.
Max. Acceptable Length: 255.46 m.
Max. Acceptable Draft: 10.50 m.
Tidal Range: Zero to plus 2.36 m.
Side Berthing: Starboard
Type of Unloader: Chiksan Arms.
No. of Receiving Lines: 2 liquid and 2 vapour.
Size of Manifold Flange: Liquid 12 in., vapour 8 in. ASA-150.
Manifold Configuration: From forward to aft – bv-bl-pl-pv.
Max. Airdraft Manifold: 19.00 m.
Remarks: Safety Pledge letter has to be filed with Port Authority.

TIDE: Tidal current of Ese Bay runs Northward along East side of Mie Prefecture and turns round at mouth of Kiso River and runs Southward for Chita Peninsula.

Tidal level:			
	High tide	Tidal level (average)	+7.74 ft.
	Mean tide		+4.30 ft.
	Low tide		+0.00 ft.

TUGS: Normally stand-by to assist vessel inside breakwater of entrance to fairway; tug's lines used.

BERTHING:

	Fuel Oil	12 in.×1 (Chicksan arms)	3,000
	Naphtha	6 in.×2	350/450

Attention is drawn to the manual "Safety Standards on Discharge Operations for Crude Oil Tankers", which will be handed to the Master on arrival by the Berthing Master and which are to be strictly adhered to. Apart from request for the normal international safety precautions for tankers, it contains several regulations which could cause considerable delays to vessels if not taken into account when planning discharge/ballasting operations.

Such regulations are:

1. Ballasting operations shall commence between sunrise and 90 minutes before sunset.
2. Berthing operations shall be performed so that discharge operations can be commenced between sunrise and 90 minutes before sunset.
3. Unberthing shall be conducted only between sunrise and sunset.
4. Discharge operations shall be suspended when malfunctions occur to the vessel or discharge facilities or at other times when in the judgement of the Master and the Berthing Master, it is necessary to suspend operations.

It is therefore of utmost importance that the planning/timing of port operations are carefully drawn up and fully discussed with the Berthing Master prior to commencement in order to reduce delays to a minimum. The good operational conditions of ship's equipment (pumps, etc.) and awareness of personnel are of equal importance.

DENSITY: Average 1025.

FRESH WATER: Available, rate of delivery 50 t.p.h. from shore pipes at Government wharves; 100 tons from barge; before 2200 hrs. additional cost 50%; after 2200 hrs. additional cost 100%.

FUEL: Most domestic and bonded oil available, ex-barge.

Minimum 5 days' notice required.

CONSULS: None.

REPAIRS: Minor repairs only.

AIRPORT: No airport.

POLICE/AMBULANCE/FIRE: Police, Tel: 110; Ambulance/Fire, Tel: 119.

TELEPHONES: Telephone can be arranged from shore connection at Government wharves. No connections at tanker berths.

SERVICES: Technicians for vessel's instruments can be arranged from other ports.

REGULATIONS: Under adverse weather conditions:

1. If a typhoon is reported approaching, and upon advice from refinery representative, loading or unloading operation will be suspended and vessel will leave berth to a designated area for refuge.
2. During a violent thunderstorm, cargo work will be stopped upon receiving order from refinery, and vent-line valves securely closed.
3. During stormy weather, with gusty winds condition, Master shall follow weather reports closely and shall endeavour to prevent any accidents by taking all possible precautions, such as reinforcing mooring ropes and arranging adequate emergency personnel to stand-by for any emergency.

Liability for Accidents: If accident is judged by Maritime Safety Office and Port Captain to be ship's fault, either through negligence of these Safety Regulations or otherwise, Master shall immediately cease operations, if necessary, and simultaneously follow in good faith the instructions of refinery and Port Captain, and take all necessary actions. Master shall inspect and verify cause of accident in the presence refinery representative and ship's Agent, and shall be held responsib for reporting the accident, in writing, to the parties concerned. Until th is completed and full agreement reached with refinery representative the vessel shall not leave the jetty, unless otherwise requested. F actual confirmation of the accident, and damage liability, Public Surveyo (Messrs. Japan Marine Inspections Co. Ltd.) is fully entitled to inspe the accident.

GENERAL: Lightening: Not allowed, except a cargo of oil or chemica

DEVELOPMENTS: New container berth (Berth No. 70) will be ready 1991.

AUTHORITY: Yokkaichi Port Authority, 9-1, Chitose-cho, Yokkaichi Ci Mie Pref. *Tel:* (0593) 53-5541/6.

DOCUMENTS:

Immigration:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.

Customs:

1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera wrist-watch, radio, firearms/swords, etc. (only at first port of call i Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Carg Manifest and Cargo Manifest in Transit using specific forms. Therefor ship's Agent should be provided with necessary information about detai of cargoes in advance.

There are 3 types of berths in the Port of Yokohama. Public berth for common use, directly managed by the Municipal Port and Harbou Bureau of Yokohama, that is the administration of the port; Berths f exclusive use owned and leased by Yokohama Port Termina Corporation, which was founded by the local government of Yokohama to construct and manage exclusive-use berths for foreign trade; an berths owned by public companies located in the bay.

Shipping companies or Agents have to submit the documents for po entry for all ships of more than 700 g.r.t. to the Accounting Division o the Municipal Port and Harbour Bureau of Yokohama regardless o berth's type. Furthermore, they have to submit the documents showin the exact schedule of ships to the Marine Affairs Division. It also include the application of the unified arrangement of pilots, tugs, and line-handling and the Division will make the reasonable schedule list by usin the computer and offer the arrangement service. They also submit th application for using a berth when ships use the public berths All documents' procedure is done by special forms.

Certificates: Ship's Register to show Customs Inspector ship registered gross and nett tonnages. Valid Cargo Gear Certificate sometimes required by stevedores when cargo gear maintenanc appears to be poor.

PILOTAGE: At the Ports of Yokohama and Kawasaki, ships are du bound to use pilots for safe navigation in the ports.

The Port of Yokohama is always very busy, and so, all movements of each ship (entry, exit and shift) are controlled by the Municipal Po and Harbour Bureau of Yokohama, the Administrator of the po Shipping companies or Agents have to submit the document showin all movement of the ship, which also includes an application f arrangement of pilots, tugs and line-handling, to the Bureau. The Burea does the unified arrangement for each ship. If any change necessary t arrangements already made, 2 hours' notice is sufficient to mak rearrangement of them.

The station of pilot launches is located at the rear of "Pilot Buildin (nearby the entrance of Osanbashi Pier). Pilots usually use a small pi launch and make use of tugs when it is employed at the same time f embarking and disembarking, especially when sea is rough. In eith case, launch or tug with pilots on board displays "H" flag or ligh prescribed in international regulations. Usually pilots in ports Yokohama and Kawasaki embark or disembark near Yokohama Fairwa Entrance Light Buoys No. 1 and 2. But, when ships anchor inside o outside the port because of waiting for berths, etc., it is usual for the not to request pilots. In these cases ships which want to be quarantine anchor in the quarantine area in the port and other ships anchor at sa place except for restricted area outside of the port.

If ships pick up pilots inside the port, pilot charge is less as it assessed on two stages; "From outside of the port to Yokohama Fairwa Entrance Light Buoys No. 1 and 2" and "from Yokohama Fairwa Entrance Light Buoys No. 1 and 2 to the quay or mooring buoys".

Uraga Channel: Ships which are going to enter the port of Yokohama ave to report to Tokyo Marches of Maritime Safety Agent ("Tokyo Marches" is also a call sign) by 1200 hrs. of the day before passing hrough Uraga Channel (in the case of ships carrying dangerous argoes, 3 hours before passing through) and are permitted and given etailed orders about passing time. After that, ships request pilots for Uraga Channel by VHF radio or ships' telephone (call sign "Anjin okosuka"). At that time, ships also report the arriving time at No. 1 Uraga Channel Light Buoy (in the case of exit No. 6 Buoy). Pilots for Uraga Channel usually embark in the area between the limit line of Tokyo Marches Control" and Uraga Channel No. 1 Buoy for entry and f the quay or mooring buoys in the port for exit.

Recommendations: To be followed by tankers of 100,000 d.w.t. or more when they navigate through the Uraga Channel with cargo loaded:

1. 12 hours and 3 hours, respectively, before such a vessel expects o pass the Uraga Channel No. 1 Light Buoy, it should report the following ems to the Yokohama Maritime Safety Division. Also, after the three-ours-in-advance report, it should keep its radio station open. This, owever, is not required if the vessel is Southbound:
   - (a) Name of vessel.
   - (b) Signal letters, d.w.t. tonnage, type and quantity of cargo, name of port intended to enter (not required in a 3-hours-in-advance report).
   - (c) Availability of international VHF transmitter-receiver equipment aboard.
   - (d) Time at which the vessel expects to pass the Uraga Channel No.1 Light Buoy.
2. Refrain from sailing through the Channel when visibility is poor due o thick mist, etc. (less than about 1 nautical mile).
3. Avoid sailing through the Channel at night unless it is essential to o so. Follow any instruction that may be issued from the Director of he Yokohama Maritime Safety Division as to the time for sailing through he Channel.
4. Maintain look-out at the bow and listen to regular weather reports.
5. Between the neighbourhood of the Uraga Channel No. 2 Light Buoy nd that of the Uraga Channel No. 5 Light Buoy, avoid overtaking other essels (weighing about 500 g.r.t. or more) unless it is essential to do so.

ANCHORAGES: 12 m. – 26 m. in Quarantine Anchorage, and 26 m. – 34 m. in other areas. For details refer to chart published by Hydrographic Division of Japan MSA.

MAX. SIZE: See "Berthing".

Tankers:

Name of Berth	*Max. d.w.t.*	*Max. LOA*	*Max. safe draft*
Keihin Yokohama (Sea berth)	No limit	No limit	19.50 m.
Shell Oil (Main Jetty)	No limit	180 m.	10.00 m.
General Sekiyu	No limit	182 m.	9.30 m.
Mobil Oil	No limit	176 m.	9.20 m.
Asia Oil No. 5	No limit	No limit	12.00 m.
Nisseki Koyasu	No limit	250 m.	12.00 m.
Nisseki Negishi A (E.)	No limit	310 m.	16.70 m.
Nisseki Negishi B	No limit	250 m.	13.60 m.
Shell Sekiyu Super Berth	No limit	260 m.	11.70 m.
Tokyo Gas	50,000	300 m.	12.00 m.

RESTRICTIONS: In the Port of Yokohama, when vessels use berths in public piers, conventional cargo vessels may arrive at the berths up to 2200 hrs. and container vessels may pass through the Honmoku breakwater up to 2400 hrs. There is no restriction on departure. Shifting inside the port must be done according with the entry and exit. In the case of private berths, each company has their own restrictions.

HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When Free Pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.

If a vessel has no valid Derat or Derat Exemption Certificate.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

VHF: Call sign Yokohama Port Radio. (See details under "Kawasaki/VHF").

TUGS: Tugs are under control of Yokohama Kawasaki Tug Company and normally join ships between outer breakwater, light house and entrance light buoys. Number of tugs depends on pilot's decision and normally one or two tugs are required. Many recently built ships are equipped with bow thrusters and in this case only one tug is needed. Number of tugs also depends on the specific condition of the quay and weather conditions. Usually tug's lines are used and charges are included in towage. 34 tugs are available.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Mooring Buoys:

District	*Mooring Capacity*	*No. of Berths*	*Buoys*	*Depth (m.)*

Vice-Consulate of Brazil	Tel. 641–0097

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days; but 3 days' extension possible if ship stays longer.

FRESH WATER: Available (rate 50 t.p.h.) at Honmoku Pier, Yamashita Pier, Osambashi Pier, Shinko Pier, Yamanouchi Pier, Mizuho Pier, Detamachi Pier, Daikoku Pier and 4 Automatic Vending Machines. 3 Water barges with 280 tons capacity also available. 24 hours prior notice is required to supply on Sundays and National Holidays.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
REPAIRS: Any kind of repairs can be effected at this port.
DRY DOCKS: The largest dry dock, owned by Ishikawajima-Harima Heavy Industries Ltd. (and another six smaller dry docks owned by Mitsubishi Heavy Industries Ltd., Nippon Kokan K.K.). Max. length, 1,161 ft. 5 in.; breadth at entrance, 183 ft. 8 in.; height of sill above bottom dock,, 5 ft. 3 in.; depth on sill at high water, ordinary spring tides, 20 ft. 3 in.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
REPATRIATION: Possible.
AIRPORT: Haneda International Airport 25 km., Narita International Airport 100 km. and served by many regular airlines.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAYS: Only observed at Public terminals.
POLICE/AMBULANCE/FIRE: Police, 110; Ambulance, 119; Fire, 119.
TELEPHONES: Telephones can be placed on board.
SERVICES: Almost all requirements by ships could be met, if time permits.
DEVELOPMENTS: *Minato Mirai 21 Project:* This project is designed to create an attractive city centre for Yokohama, one which will have the international and cultural qualities appropriate for a self-reliant, major city within the capital region of Japan, and also have the qualities appropriate for an international port city. This new urban centre is to be built in the inner port area (a total area of 186 hectares, about 110 hectares, inclusive of the already closed Takashima Pier and the Shinko Pier, and some partially reclaimed area of about 76 hectares).

The project began in 1983 and will be completed in 2000. In anticipation of its role in the 21st century, the plan calls for the building of facilities for international exchange: conference halls, green belts and facilities for the purpose of creating spaces with ample amenities for new port activities, daily life and places for people to interact and exchange goods and information.

Honmoku Pier Project: To keep up with this age of containerisation, D-4 Container Terminal started service in November 1984. This was followed by D-5 Container Terminal operating in December 1986 with a berth 300 m. long and a water depth of 13 m.

At C Jetty, the number of gantry cranes was increased to boost the capacity for handling containers with conventional, Ro-Ro and semi-container ships. At present 5 such cranes are in operation. There is also a plan to expand the container yard by reclaiming the space between B and C Jetties.

The newly reclaimed area at D Jetty completed in 1985 (about 70 hectares) has secured space for piers and port facilities to alleviate their shortage. It will also be developed as a green belt of about 20 hectares with various amenities and the Port of Yokohama Symbol Tower to serve as the centre of the area. The citizens began using this tower in July 1986.

Minami Honmoku Pier Project: The waters off the industrial zone of Honmoku Pier have a high development potential as an area for the distribution of goods because of the great water depth, its proximity to the Tokyo Bay Shore Road and other factors. The plan is to build deep-water, larger container terminals in order to respond to the expanding demand for container freight and the trend toward larger vessels.

We also intend to build a new comprehensive base at the Port of Yokohama for distribution of goods in the next century. We hope to establish facilities to meet both the diversified demands of and increasing complexities for goods distribution.

Daikoku Pier Project: This project envisages the construction of a modern pier by a 321 hectare reclamation project, which will be completed in two phases: Phase I includes 221 hectares, and Phase II is intended for 110 hectares near Daikoku Pier, Tsurumi Ward. The Phase I area was reclaimed in 1984. Some of the berths for ocean-going trampers were converted into multi-purpose berths to accommodate Ro-Ro ships and semi-container ships.

Work is now in progress to improve the two large container berths to cope with the expanding demand for container cargoes in the Phase II zone. We plan to improve a complex distribution terminal to be able to handle diverse cargoes in a unified, efficient manner, responding to the trend toward diversified distribution of goods. We also plan to secure areas for citizen recreation activities, as part of our program to improve the environment, by establishing large scale green and water areas (about 20 hectares), at the gateway to the Port of Yokohama.

Tokyo Bay Shore Road Project: This project calls for improving the 160 km. long highway along Tokyo Bay, stretching from Yokosuka to Futtsu through Yokohama, Tokyo, Chiba and Kisarazu. There is a plan to build a road within the Port of Yokohama linking Ogishima, Daikoku Pier and Honmoku Pier, stretching to Kanazawa and Yokosuka. When completed, this road will serve as a central network of highways, to markedly improve the port functions and alleviate traffic congestion within the city.

Yokohama Bay Bridge Project: To be built as part of the Tokyo Bay Shore Road Project, the Bay Bridge will span the Daikoku and Honmoku Piers, the central piers of the Port of Yokohama. It is expected to become one of the world's longest cable-stayed bridges. Construction work started in November 1980, and will be completed in 1989/90.
AUTHORITY: Port and Harbour Bureau, City of Yokohama, 2 Yamashita-cho, Naka-ku, Yokohama, 231 Japan. *Tel:* 045-671-2874/2888. *Telex:* 3822844 Green J. *Contact:* Y. Shimura, Manager of Port Promotion Division.

DOCUMENTS:
Customs:
- Port Call Notification.
- Cargo List.
- List of Crew's dutiable possessions.
- Passenger List.
- Crew List.
- Ship's Nationality Certificate.
- Port Departure permission paper.

Immigration:
- Crew List.
- Port Call Notification.
- Passport or Crew Pocket Book.

Quarantine:
- Declaration of Health.
- Crew List.
- Passenger List.

Plant Protection Station:
- Plant Importation Inspection Application.

Maritime Safety Agency:
- Port Call Notification.
- Application for Loading, Transfer and Unloading of Explosives an Combustibles.
- Application for Transport of Explosives and Combustibles.

Port Authority:
- Port Call Notification.
- Application for use of Facility.

PILOTAGE: In applying for Pilot at time of entry and departure, pilo station should be contacted 24 hours in advance of beginning of Pilotag through Agent. 44 Pilots available.
Uraga Channel Pilots: Tel: 0468-35-6211. Telex: 3852-451.
VHF Call sign: "Uraga Channel Pilot", on Channel 16.
ANCHORAGES: At 4th District of Yokosuka Port. Depths 10 m. – 30 m
RESTRICTIONS: The 1st, 2nd and 3rd District of Yokosuka Port unde compulsory pilotage districts.
Possibilities of Entry or Sailing after Sunset:
Nagaura Pier:
Entry – 0600 hrs. to 1800 hrs.; Sailing – 0600 hrs. to 2200 hrs.
Yokosuka Shin-ko:
Entry – 0600 hrs. to 1700 hrs.; Sailing – 0600 hrs. to 1700 hrs.
MAX. SIZE: See "Berthing".
HEALTH: Radio Pratique available. Authorities board at anchorage Quarantine Station to be informed in advance name of last port, ship's name, tonnage, number of crew, number of passengers, ship's nationality, etc. In event any suspected disease, Agent should be advised. When isolation of ship needed, it will be transferred t Nagahama Quarantine Station in Yokohama.
RADIO: Local radio station.

BERTHING: Agent submits application for berth to Port Authorit (Nagaura and Kurihama Port Offices and Yokosuka New Port Whar Company).

Jordan

AQABA: 29.31 N. 35.01 E. (See Plan)

LOCATION: The commercial sea port of Aqaba is the only outlet to the Hashemite Kingdom of Jordan, and is situated at the top of the Gulf of Aqaba at Lat. 29° 31′ N., Long. 35° 01′ E.

The Passenger and Container Terminals lie approximately 3 miles to the South of the main port.

The New Oil Exporting Jetty lies approximately 8 miles to the South of the main port.

The Fertiliser Industry Terminal lies approximately 12 miles to the South of the main port.

PORT LIMITS: The Southern limit of the port is an imaginary line 270° from Al Derrah Point (Saudi Border); about 12.5 miles from the main port.

DOCUMENTS: *Documents required by the authorities for cargoes:*

1 copy of all dangerous goods on board showing IMO & UN numbers.
6 copies unfreighted Manifest, showing IMO & UN numbers for dangerous goods.
2 copies of unfreighted Manifest for Free Zone if vessel has Free Zone cargo.
1 set of non-negotiable Bills of Lading.

All Manifests should bear the following clause: "This is to certify that the above vessel has not called and is also not scheduled to call at any Israeli ports nor is owned by any Israeli Company, also it is not included in the Black List".

All the above documents are to be airmailed to the Agent's Head Office in Amman and not Aqaba.

Documents Required by the Authorities for Free Pratique:
7 copies Crew List.
7 copies Passenger List.
1 copy Stores List.
1 copy Crew Declaration List.
1 copy Vaccination List.

The Following Forms to be Filled:
2 copies of Maritime Declaration of Health.
1 Customs Declaration Form.
2 copies Vessel's Specification Form.
1 copy Pilotage Form.

The Following Documents to be Produced for Checking:
(*a*) Log Book.
(*b*) Ship's Registry Certificate. (Kept by the Port Authorities until departure).
(*c*) Derat Certificate.

Shipmaster's Report: November 1988.
Customs: 3 copies Crew List.
1 copy Bonded Stores List.
1 copy Crew Declaration.
Agent: 3 copies Crew List.
Quarantine: 3 copies Crew List.
1 copy Maritime Declaration of Health.
2 copies Vaccination List.
Immigration: Photograph for shore passes (compulsory).

PILOTAGE: Pilotage is compulsory for all vessels above 150 n.r.t. for berthing, unberthing and entering the near (East) anchorage area. Pilotage is obtained from the Harbour Master through Port Control. Ships in harbour requiring a Pilot should call the Pilot via Aqaba Port Control Radio (VHF Channel 16, working Channel 12) 1 hour before ship is ready to move. Advance notice of the ship's requirement of pilot service should be given to the Agent who should advise the Harbour Master or his representative.

It should be noted that vessels may proceed to sea from the anchorage without taking a Pilot, but for ships leaving the berths alongside, pilotage is compulsory. Sound signals are prohibited.

Ships intending to go to anchorage, cargo berths or bulk export berths should wait for Pilot 1 mile to the West of the Phosphate Berth.

Ships intending to berth alongside the Floating Berth (Yarmouk) or Container Terminal should wait for Pilot 1 mile to the S.W. of these berths.

Ships intending to berth alongside the Fertiliser Berth or the new Oil Jetty should wait for Pilot 1 mile to the S.W. of these berths.

The vessel has to supply the following information to the pilot station when requesting a Pilot:

(a) Name of vessel;	(e) Maximum draft;
(b) Nationality;	(f) Gross and net tonnages;
(c) Agent's name;	(g) Cargo for Aqaba;
(d) Overall length;	(h) Any special characteristics of vessel.

ANCHORAGES: About 0.6 miles from shore in depths of 15 — 30 fathoms. Ships awaiting discharge can easily anchor in deep water anchorage which can accommodate 9 large vessels.

Anchorages 1-5 are called inner anchorage and are used for ships discharging cargo into barges. The remainder (6-9) are used for ships waiting. The anchorage may take a larger number of ships during congestion periods. All anchorages lie in the compulsory pilotage areas.

When anchored, all ships must keep 6 cables distance from the Royal Jetty.

RESTRICTIONS: The entry of ships to anchorage after sunset is not allowed. Berthing is prohibited during darkness at the oil terminal.

Ships' Masters are warned that contravention of above rules renders them liable to penalties of up to JD. 10,000 per ship.

MAX. SIZE: Up to 20,000 d.w.t. Max. draft 32 ft. for the cargo berths and 100,000 d.w.t. and 50 ft. draft for the phosphate loading berth. Also see "Berthing" and "Notice".

HEALTH: Health Officials board after vessel drops anchor or after vessel is secure alongside.

The Port Medical Officer is in charge of granting Free Pratique to all vessels on arrival, and of all medical matters concerning ships and seamen.

RADIO: Aqaba Radio Station, call sign JYO.

Watchkeeping hours are currently from 0500 hrs. to 1700 hrs. GM The station received all MF frequencies on: 500 kHz and 477 kHz an receives HF frequencies from 0700 hrs. to 0900 hrs. GMT only o 8728 kHz. The radio station listens on VHF Channel 16.

Weather forecasts: Twice daily, at 0730 hrs. and 1530 hrs. GMT.

The new radio station will work for 24 hours and will be able to receiv all types of communications (Telegraphic, Telephonic, Telex, etc.)

Note: To all ships bound for Aqaba Port = In order to facilitate berthin and cargo handling at Aqaba Port, Masters of ships are kindly requeste to cable Harbour Master in Aqaba via Aqaba Radio 72 hours and confir 24 hours before arrival providing the following information:– Ship's nam Flag, Last Port, Next Port, Cargo for Aqaba, Tonnage and Type, Lengt Breadth, GRT/NRT, Draft Forward/Aft, ETA, Aqaba Agent's Name, Lin or Charterer, Year built, and if Ro-Ro ship, the Ramp Location. Station Telex No. 62325 Aq Radio Jo. Station Tel. No. 315544 an 314321.

VHF: Aqaba Port Control at Harbour Master's Office listen from 070 to 2400 hrs. local time on VHF Channel 16, working Channels 10 an 12 for service messages. Pilots listen VHF Channel 16.

RADAR: There is no Port Control Radar, but tugs are equipped wi radar and sounding apparatus.

TUGS: Compulsory. 3 tugs, 840 h.p. – 1,500 h.p., 9 mooring and 5 towing boats 80 h.p. – 380 h.p.

BERTHING: The Main – Port Berths: Includes 12 berths with a tota length of 2,050 m. for handling general cargo, grain, phosphate an discharging lighters.

Berth No.		*Length of Berths* (m.)
1	receives ships up to 40,000 d.w.t.	160
2,5,6		180
3,4		180
7		150
8,9		150
Lighter Discharging Berth		150
Phosphate Berth A (With conveyor belts and shiploader of 1000 t.p.h.)		210
Phosphate Berth B (With conveyor belts and two shiploaders of 2200 t.p.h. each).		180 (Receives ships u to 100,000 d.w.t.)

Also see "Notices".

Container Berth: Total length of 540 m. and a depth of 15 m. which ca receive 3 vessels at a time up to 100,000 d.w.t. each. It is equipped with 2×40 ton gantry cranes. Attached to this berth and with a depth o 10 m. is the Ro-Ro Berth with 40 m. length.

The Container Terminal has a container freight service, Containe Freight Station (CFS) and a container and Ro/Ro storage area o 309,000 sq. m.

The capacity of the container storage area is 7,000 full containers an 5,000 empty containers (in TEUs).

The Terminal also has 24 power points for the supply of power t refrigerated containers.

Passenger Terminal and Yarmouk Floating Berth: Length 150 m. an depth 15 m. It specialises in passenger traffic and their vehicles, it als receives Ro-Ro and container ships.

Mo'ta Floating Berth: Recently fixed to the North of container berths with a length of 150 m. and a depth of 15 m. It is used for bagge cement, export purposes and Ro-Ro vessels. Max. size 20,000 d.w.t.

Moshterak Berth: Length 120 m. and depth of 11 m. Dolphin berth use for oil product exports. Max. size 120,000 d.w.t.

New Oil Export Jetty: Length of jetty 150 m. Depth alongside 25.0 m There are 4 breasting dolphins and 4 mooring dolphins. Max. siz 300,000 d.w.t. Max. monthly oil exporting capacity 300,000 tons.

Industrial Port: Jordan Fertiliser Industry Co. Ltd.

(A)	Timber berth (J.F.I) 1	*Sea Side*
	Max. draft permissible	6.8 m.
	Length of berth	80 m.
	Max. vessel width	—
	Max. vessel d.w.t.	5,000 tons
(B)	(J.F.I.) 2	*Shore Side*
	Max. draft permissible	1.75 m.
	Length	45 m.

There is possibility to use Berth No.1 and No.2 for Ro/Ro vessels o different sizes, with stern (straight) ramp of not less than 35 m. in lengt The vessel will be moored 25 m. from the jetty.

(C)	Fertiliser berth	*Sea Side*	*Shore Side*
	Max. draft permissible	15 m.	11 m.
	Length	230 m.	190 m.
	Max. vessel width	27 m.	27 m.
	Max. vessel d.w.t.	50,000	40,000

2×2,000 t.p.h. shiploaders and 1×500 t.p.h. ship evacuator.
2 Potash stores, each 75,000 tons capacity.

CARGO EQUIPMENT: *Grain Silos:* Erected by Ministry of Supply o Berth No.1 with evacuators & conveyor belts with a capacity of 500 t.p. and storage capacity of 150,000 tons.

Cargo Handling Equipment:
62 cranes with a capacity of 2 tons - 90 tons.
108 Forklifts with a capacity of 1.5 tons - 22 tons.
49 Tractors.
9 Straddle carriers for handling containers.
19 Tug Masters.
12 Top lifts of 5.0 - 30.5 tons.
2 Gantry cranes with a capacity of 40 tons each.
120 Trailers.
33 Barges with a capacity of 250 tons - 500 tons each, includin Water Barge, 1 Waste Collection Barge and 1 Oil Pollution combatin Barge.

Storage Facilities:

Total Shedded Area	41,500 sq.m.
Closed Hangers Area	34,500 sq.m.
Paved Open Storage Area	450,000 sq.m.
Closed Cold Store	500 Tons
Container Terminal Area	309,000 sq.m.

STEVEDORES: Stevedoring is carried out by The Ports Corporation and their working hours are from 0700 – 1400, work must start at 0700 and end at 1400, therefore there is 1 hour overtime in the morning from 0700 – 0800. The second shift's working hours are 1700 – 0100 next morning and are counted as overtime hours.

Ships with homogenous cargoes of bags or steel may work four shifts per day – first shift 0700 to 1100, second 1100 to 1600, third 1600 to 2200 and fourth 2200 to 0500 next morning.

During the month of Ramadan the timing is 0700 – 1300 for the first shift and 2100 – 0300 next morning for the second shift, the four shift system is suspended during this month.

Cargo work is continuous throughout the year with the exception of 1 day at Eid-El-Fitr (the first day of the holiday) and 1 day at Eid-El-Adha (the first day of the holiday).

Friday is the official weekly holiday therefore the working hours during this day are treated as overtime hours at an extra cost of JD 37.5 per gang per day.

Ships' Working Hours: Ships can work around the clock depending on the Master's option and the number of ships in port. Opening of ships' hatches is allowed up to 2100 hrs. if Agent arranges for gangs beforehand.

The port meeting is held daily at 1000 hrs.

MEDICAL: The Health Department of Aqaba Port provides all medical services required and responds to any urgent calls by radio before arrival. A government hospital is available and is well-staffed.

TANKERS: Tankers loading fuel oil can be handled at the following berths:

Mushterak Berth: Consisting of 2 dolphins 120 m. apart from each other with a depth of 11.0 m.

New Oil Berth: Export tankers berth alongside storage vessel "Red Seagull" LOA 362 m. "Red Seagull" is under management of "Sosema Matex" and is used to export Iraqi Crude Oil. No draft restrictions for ocean-going tankers, however LOA should not exceed 340 m. Loading is through 3 × 12 in. hoses at an average rate of 8,000 tonnes per hour.

Port Restrictions:

1. No night berthing/unberthing.
2. Dirty ballast facilities are not available.
3. Pilot boarding area adjacent to the terminal.
4. Slops not accepted.
5. No limitation on freeboard.

Port Circulars:

Ref. No. 2/10/2/499
Date: 10/1/86

To Ocean Going Oil Tankers Arriving at Aqaba Oil Terminal:

Standard information from ocean going oil tankers arriving at Aqaba Oil Terminal must be sent by cable or letter to Ports Corporation at least 15 days before arrival.

1. Date/time of arrival to be confirmed 5, 4, 3, 2, 1 days before arrival.
2. Ships particulars name/kind, date of building, d.w.t., draft, LOA, breadth.
3. Ballast condition, quantity of ballast, condition of ballast segregated or clean ballast.
4. Slop quantity on board on arrival.
5. Condition of cargo tanks, crude oil washed, gas free etc.
6. All overboard ballasting, deballasting, lines condition flushed, cleaned.
7. Equipped with inert gas system, then percentage of oxygen in the cargo tanks on arrival and throughout cargo operations.

All information sent to Ports Corporation must be correct.

Ref. 2/10/2/521
Date: 29/1/86

Port Instructions and Regulations to receive and serve Oil Tankers:

All oil tankers arriving at Aqaba Oil Terminal should comply and perform with the international convention 1973 and 1978 (MARPOL) marine pollution protocol and with OCIMF/ICS for ship to ship transfer guide (petroleum) for the safety and preventing pollution at Aqaba Gulf, hereby:

1. Oil tankers are requested to have segregated ballast, only such capacity which will allow them to operate safely on ballast conditions and on manoeuvring purposes are accepted. No other ballast except the segregated will be, for any reason, discharged at sea - while there are no reception facilities available at Aqaba Oil Terminal.
2. Oil tankers will be allowed to come alongside the storage vessel only if fully inerted. They will be rejected if oxygen percentage is more than 8% and the inerted condition will be maintained throughout mooring and loading/discharging operations.
3. Oil tankers must have the cargo tanks dry, clean and suitable to receive cargo on arrival avoiding any kind of contamination.
4. The crude oil must be loaded by tankers of approximately 200,000 d.w.t. as per contract with Ports Corporation.
5. Tankers age should not be more than 10 years.
6. Oil tankers will be inspected by Ports Authority on arrival coming alongside the storage vessel and they will be rejected if not complying with the requirements mentioned here above.

Also see "Berthing".

DENSITY: Average density in the port is 1031.

FRESH WATER: Fresh water may be supplied to ships and water may be supplied alongside any of the berths with the exception of the floating berth which has no water available.

FUEL: Bunker fuel is available in Aqaba.

CONSULS: All Consulates are in Amman, the capital, except for Hon. Danish Consulate, (Vice-Consul), at Kawar Building and Egyptian Consulate (Western Housing Area).

REPAIRS: Only minor repairs may be carried out above the waterline. Divers may be obtained and a private firm carries out repairs to Navigational Aids including radar, gyro compass, echo sounder, wireless equipment, etc.

DRY DOCKS: Slipway for maintaining port equipment.

SURVEYORS: Germanischer Lloyd, NKK, Bureau Veritas and Lloyd's Register are available.

GANGWAY/DECK WATCHMEN: Customs provide a guard who has to be given full board and lodging. Ships are also supplied with local watchmen through Agents.

OPENING/CLOSING HATCHES: Normally handled by stevedores while alongside or by ships' crew before arrival.

CUSTOMS ALLOWANCES: 20 packets of cigarettes and 1 bottle of liquor for each crew member. Ships' store is locked and sealed by Customs while in port.

AIRPORT: Aqaba Airport links Aqaba with Amman International Airport 355 km. away. One flight daily except for Thursday and Saturday when 2 flights are scheduled for each.

TIME: GMT plus 2 hours.

HOLIDAYS: May Day (May 1st); Independence and Army Day (May 25th); Arab Reconaissance Day (July 4th); Crowning of King Hussein (August 11th); King Hussein's Birthday (November 14th).

The following dates change from year to year as they are reckoned in accordance with the lunar calendar consisting of 354 days.

1986: Eid El Maraj (April 7th); Eid El Fitr (June 8th); Eid El Adha (August 16th); New Year Hijriya (September 5th); Prophet's Birthday (November 15th).

GENERAL: *Weather:* Masters are warned that during the Winter months strong Southerly gales can develop within 2 hours followed by swell. In such a case it may be necessary for small vessels to unberth and proceed to sea, and also for vessels in the anchorage to weigh anchor and proceed to sea and remain at sea until the weather moderates.

Range of Tide: The range of tide is 1.2 m. at Spring tides.

Firefighting: The port has its own fire brigade, which includes 5 water and foam engines; 1 dry powder engine; 1 ladder engine; 3 water and rescue engine and 2 manual high capacity pumps, plus a variety of equipment such as breathing apparatus, etc.

The town of Aqaba has a highly efficient and well equipped fire brigade and it is 4 km. away from the port.

Aqaba Airport 11 km. away also has a fire brigade and assistance may be called for from any of these whenever needed.

Waste Matter and Pollution: No rubbish may be thrown overboard either at the anchorage or alongside the quays. A barge calls regularly at all anchorages to collect garbage. No vessel which has carried livestock may clean its holds while in port. No vessel may pump overboard any silage, fuel or water ballast liable to contaminate the port. This regulation refers particularly to substances mixed with oil.

Ships' Masters are warned that contravention of the above rule renders them liable to penalties of up to JD. 10,000 per ship.

NOTICE:

The Hashemite Kingdom of Jordan Port Corporation - Aqaba
No. 7/3/9492
Date: 4/10/1986

Circular No. 26 for 1986 (with amendment 8/3/1987)
to all Ship Agents

Further to my Circular No. 3 for the year 1985, and effective immediately it is forbidden to accept any vessel calling at Aqaba Port for discharge at berth if she is exceeding the length and draft hereunder.

All Lines represented by you should comply with these instructions.

Berth	*Draft allowed* (m.)	*Length of Vessel* (m.)
No. 1	10.8	200
No. 2	10	180
No. 3, 4	12.5	180
No. 5	10.5	180
No. 6	10	180
No. 7	8	150
No. 8, 9	5.8	110
Old Phosphate – A	11	—
New Phosphate – B	15	220
Mou'ta	15	150
Joint Berth	12	250
Ro/Ro	10	180
Containers	14	230
Yarmouk	10	150
Wood	7	120
Orient Fertiliser Berth	11	190
Western Fertiliser Berth	15	230

Fertiliser Berth No. 2 and Ro/Ro Berth (9 m.): Ro/Ro vessels should have a ramp with at least 35 m. length, and with a minimum distance of 25 m. from the berth.

Signed:
General Manager,
Ports Corporation.

DEVELOPMENTS *Development Projects:* Proposed projects for 1990 are:

1. Erection of a new Ro/Ro passenger terminal.
2. Erection of a berth to serve the Ro/Ro passenger terminal.
3. Developing Port's communication system and the coastal station.
4. Project of prevention of pollution and firefighting.
5. Purchase of 2 tug boats and cargo handling equipment.
6. Computerisation is under consideration.

AUTHORITY: The Ports Corporation – Aqaba, P.O.Box 115, Aqaba, Jordan. *Tel:* 314024/8. *Telex:* 62262, 62352 Port Jo, 62235 Radio Jo. *FAX:* 316204. *Cables:* Port, Aqaba. *Contact:* Eid Al-Fayez, Director General.

AGENT: Gulf Agency Co. (Jordan) Pvt. Ltd., P.O.Box 1479, Aqaba, Jordan Tel: 314218, 312909, After office hours: (06) 821155. Telex: 62343 Gacship JO. Fax: 313618. Cables: Gacship, Aqaba.

Kenya

MOMBASA: 04.04 S. 39.40 E. (See Plan)

DOCUMENTS:

Health Certificates: Forms obtainable from Pilot.
6 Crew Lists.
10 Passenger Lists.
Dangerous Cargo Lists.
Ship's Register.

Shipmaster's Report: 1981.

Declaration of Health (Form Med-284).
Port Health Clearance of Ships (Form GPK-160).
Set Vaccination Lists.
4 Crew Lists.
4 In-transit Passenger Lists.
4 Landing Passenger Lists.
Arrival Declaration for Passengers (Landing Only) (Form F1).
Stores List (Form C7).
Crew Declarations (Form C8).
Parcel Lists (Form C3).
Ship's Register (Copy).
Ship's Record & Master's Report (Form EAH-6007) (to Pilot).
Shore Passes (Company Forms).
Arrival & Sailing Reports (Agency Forms).

Shipmaster's Report: April 1984.

Please note that the "East African Countries" (Kenya, Tanzania, etc.) Customs Union does not exist any more and separate Customs Declarations are needed for each country. Consequently Bonded Stores seal can be broken after Mombasa or Dar Es Salaam.

PILOTAGE: ETA through ships' Agents, 48 hours' notice. VHF Channel 12 (Mombasa Radio VHF Channel 16). Pilot boat 72 ft. launch, international orange hull, white superstructure. No signals for Pilot – call on VHF Channel 12 (Mombasa Pilots) or by signal lamp to lighthouse. Pilot boat position 1 mile outside "Turning Buoy" on Ras Serani leads (301°). No special bad weather regulations. Pilot ladder 6 ft. from water – must have manropes – lit at night.

Tankers: For deep laden tankers, Pilot boards 1 hour before HW. Because of strong currents, deeply laden tankers must not attempt to "close" in before sighting pilot launch. Good lee and some headway recommended.

Special attention is drawn to the fact that ships bound for Kipevu must be in the agreed pilot embarkation position at the agreed time. The time agreed is chosen, such that, ships may transit the dredged channel with maximum advantage of the rising tide and arrive off the berth just before the ebb sets in. At that moment only little time is left to position the vessel and tie up sufficient moorings to hold vessel on to the jetty face, before the force of the ebb, diverted to an abeam direction by the jetty causeway, comes to bear on the ship's side.

Distance to Shimanzi Jetty, about 6 miles.

Distance to Kipevu Jetty, about 7 miles.

ANCHORAGES: No safe outer anchorage.

RESTRICTIONS:

Tankers:

1. By day: Max. length 850 ft.
   By night: Max. length 680 ft.
   Trim to be between 4 ft. to 6 ft.
2. Restrictions for night movements for Crude Oil or Black Oil ballasted vessels up to 850 ft. LOA provided: (Rigid requirements.)

(a) movement takes place on last 3 hours of flood tide;
(b) all anchorages between berth and sea are vacant;
(c) the Duty Pilot holds a Master's Certificate;
(d) ballast draft to be 18 ft. forward, 22 ft. aft.

No night movements are permitted for Low Flash White Oil product vessels. Masters of vessels ready to sail at night are strongly advised to notify the Authorities of the time of sailing; the vessel is to be ready to sail before 1600 hrs. and preferably before 1500 hrs. of the day in question.

This should be done by Radio direct to the Assistant Harbour Master and through Agent. The Agent must also make the request in writing to the Harbour Authorities so that proof of requirements exists.

This is a standing regulation.

MAX. SIZE: Length 850 ft. Draft 43 ft. 06 in. Also see "Restrictions", "Berthing" and "Tankers".

HEALTH: Radio Port Health Officer, Mombasa, giving last port of departure, ETA Mombasa, condition of crew, any sickness on board, passengers. Must have "Q" Flag until doctor visits vessel.

RADIO/VHF: Mombasa Radio Coast Station M/F, H/F, W/T & R/T and VHF R/T Services:

Station 5ZF (W/T) 500 – 524 kHz; traffic list 0100, 0500, 0900, 1300, 1700, 2100; Continuous watch; listening freq. 500 kHz.

Station 5ZF2 (W/T) 8710.4 kHz; traffic list 2018; schedules 2018 –2030, OBS only 0080 – 0030, 0600 – 0630, 1200 – 1230, 1800 – 1830; listening freq. 8354 – 8374 kHz.

Station 5ZF3 (W/T) 13065 kHz; traffic list 0448, 0830, 1518; schedules 0448 – 0530, 0830 – 0900, 1518 – 1545; listening freq. 12531 – 12561 kHz.

Station 5ZF4 (W/T) 17175.2 kHz; traffic list 1248; 1248 – 1315; listening freq. 16708 – 16748 kHz.

Station (R/T) 2595, 2181 kHz; traffic list 0603, 1203; schedules 0600 – 0630, 1200 – 1230; continuous listening watch outside schedules 2182 kHz; listening freq. 2182 kHz.

Station (R/T) 4409.4 kHz; traffic list 0533, 1303; schedules 0530 –0600, 1300 – 1330; listening freq. 4104.4 kHz.

Station (R/T) 8805.6 kHz; traffic list 0633, 1233; schedules 0630 –0700, 1230 – 1300; listening watch on 8255.6 kHz; 0330 – 1530 listening freq. 8255.6 kHz.

Mombasa Radio also provides continuous R/T service on VHF for the benefit of ships in and around Mombasa within radius of 30 miles. Channel 16 for calling and Channels 26 and 27 for working. All times in GMT.

TUGS: 3×4,000 h.p. and 1×6,000 h.p. (salvage tug). Tugs join vessel inside harbour between Ferry and Kilindini Reef. Tug lines no additional charge.

BERTHING: All berths fendered. Nos. 8, 9 and 10 and Shimanzi Oil Terminal berths, no berthing on ebb tide, with range of 6 ft. or more. Kipevu Oil Terminal berthing on first of ebb with tankers over 650 ft.

Draft alongside	Nos.	1 to 5	32 ft. at datum
,,	,,	7	32 ,, ,, ,,
,,	,,	8	31 ,, ,, ,,
,,	,,	9	34 ,, ,, ,,
,,	,,	10	31 ,, ,, ,,
,,	,,	SOT	32 ,, ,, ,,
,,	,,	11 to 14	30 ,, ,, ,,
,,	,,	16 to 18	36 ,, ,, ,,
,,	,,	Mbaraki	36 ,, ,, ,,
,,	,,	KOT	44 ,, ,, ,,

Draft in Buoys varies from 24 ft. to over 60 ft. at datum

Channel depth 40 ft. at datum, plus tide, minus 6 ft. N.E. or 8 ft. S.E. Monsoon gives max. draft for entry. Therefore, max. draft given as 44 ft. as this is the controlling factor for KOT.

CARGO HANDLING: No. 9 Berth has been arranged for bulk export of soda ash. Berth for Roll-on/Roll-off traffic operates at Berth No. 14. Container berths at No. 16, 17 and 18. One 40 tonne container crane at No. 16. 3 ship-to-shore gantry cranes, 11 rubber mounted yard gantry cranes and 2 rail mounted gantry cranes available. Also see "Developments".

Mbaraki cement berth for bulk export of cement clinker and automated loading of cement in bags, also used for bulk import of coal.

Shimanzi oil terminal now handles all imports of bulk vegetable oil as well as all other oil products except crude oil.

Bulk Molasses exports handled at Berth No. 9 and Mbaraki.

Bulk cargoes are at present handled by grabs, railway wagons and lorries.

STEVEDORES: ETA preferably 48 hours in advance in order to arrange gangs. Advisable notify Harbour Master ETA and also give quantity of cargo to be loaded and/or discharged and other matters of importance. *Working Hours:* Weekdays: 3 shifts, 0700 – 1500, 1500 – 2300 and 2300 – 0600. Saturday and Sundays: One shift, 0700 – 1500.

Stevedoring carried out by Kenya Ports Authority.

MEDICAL: In emergencies necessary to receive advance notice. Hospital facilities available. Inoculations required – yellow fever (endemic zones in Africa and South America), cholera (all ships from Asia).

TANKERS: Discharge and load white oils at Shimanzi. Discharge and load Heavy oils at Kipevu.

Shimanzi Oil Terminal: T-head jetty with 200 ft. long berthing head. Depth alongside 32 ft. LWOST. Bunkers and fresh water available.

Kipevu Oil Terminal: T-head jetty with 225 ft. long berthing head. Tankers up to 65,000 d.w.t. berth at dolphins alongside jetty head; depth alongside 44 ft. LWOST. Max. length 820 ft. Max. draft 44 ft. (over 42 ft. by arrangement). Slop reception facilities for 3,000 tons.

At Kipevu, tankers normally berth starboard side to at slack tide, on the beginning of the ebb. Masters should assist Pilots to moor as quickly as possible, in view of the abeam current in a direction off the jetty which is created by the jetty causeway configuration. This current will increase with the ebb tide and ships with all wire moorings are advised to use their first-ropes-ashore with priority. Mooring launches are low powered and can only handle 1 wire at a time, and mooring dolphins are not fitted with winches and require manual handling of wires. In view of the above, and in view of the accurate positioning required to connect to chiksan arms, it is vital that the ship be brought against the breasting dolphins as soon as possible.

In cases where vessel's mooring is delayed by whatever reasons Pilots may require extra tugs to assist in keeping the ship alongside.

Report:

Approaches: The approaches to Mombasa either from North or South must be conducted with extreme caution as Andromache Reef on the S.W. side and Levin Reef on the N.E. side and a great number of shallow waters, all of them not detectable at HW, pose a threat to navigation.

Consideration should also be given to the very strong East African current, setting North, which reaches 4.5 knots during the months from April to November then declining to about 1.5 knots in February.

It is strongly suggested that no attempt should be made to negotiate the approach to the turning buoy without the Pilot on board, and that the positioning of the ship on the leading line to approach the turning buoy be taken at least 1.5 miles from the turning buoy, to properly evaluate the drift.

The suggested waiting area is in Lat. 04° 04′ 12″ S. and Long. 39° 42′ 12″ E. in about 20 fathoms of water.

Navaids: There are no navigation aids with the exception of an RDF (Ras Serani Lt., KL-389.6-A_2, Lat. 4° 04′ 15″ S., Long. 39° 40′ 44″ E.)

Anchorages: (Outside). A suggested anchorage postion is in Lat. 04° 06′ 12″ S. and Long. 39° 42′ 12″ E. (same as suggested waiting area). The anchorage is not sheltered, rather exposed to currents, wind and sea, and bottom holding capacity is doubtful.

Anchoring is not suggested unless the ship has to wait for a long period of time. In this case, Pilots should be consulted on VHF Channel 12 for the most suitable position.

Anchorages: (Inside). There are 6 approved anchorages in the port area, 3 of which are located between Ras Mzimba and Kilindini Reef. The remaining are situated respectively 2 in Port Kilindini and 1 in Port Reitz.

The suggested anchoring point for all of them is along the leading line.

Tankers are usually not allowed to anchor inside the port, except for short waiting periods. VLCCs are sometimes moored on buoys to await berth.

Pilotage: Pilots hold Master's Certificate of Competency. Only Senior Pilots with Master's Certificates and at least 1 year's experience as Pilots in Mombasa Roads are authorised to Pilot large ships. There are currently 12 Pilots employed in Mombasa.

Some delays in obtaining the Pilot can be expected due to shortage of Pilots.

Pilots board the ship approximately in Lat. 04° 06′ 12″ S. and Long. 39° 42′ 12″ E. (waiting area) or up to 1.5 miles from the turning buoy, from a blue hull cutter with white superstructure on which 'Pilot' is painted in black.

When leaving the port, during the S.W. monsoon period with heavy swell affecting the port entrance, the Pilot disembarks just after the Ras Serani turn, before the turning buoy, but may be retained past turning buoy.

Both pilot hoist and pilot ladder are acceptable for boarding and leaving the ship although the ladder is preferred. Manropes obligatory.

Mombasa is a natural port and very well protected where navigation must be conducted with the utmost care and precision.

The port has recently been dredged to permit entrance by vessels with 1,100 ft. LOA.

Chart B.A. 666 is very well detailed and meets all necessary requirements for a safe in-port passage. A very recent Hydrographic Survey following major dredging activities will be added on a New Edition due 1985.

When the ship is set on the approaching leading line, up to the turning buoy the navigation should be checked with utmost care as this leading line sensitivity is rather poor, since the 2 Mackenzie Pt. beacons are too close to each other.

After having rounded the turning buoy navigation proceeds on the leading line 301° and in the area South of Ras Serani, the ship has to make a sharp turn to West to proceed on course 238°. In this turning area tidal currents set North and a good berth must be given to shallow waters, marked by a buoy which is well inside the 6 fathom line.

When on course 238° the ship approaches the narrowest passage in the port, about 600 ft. wide. This passage is marked by a buoy on the South side of the channel and a beacon on the North side.

After Ras Mzimba, when on course 309° another narrow passage must be negotiated before entering Port Kilindini. This passage, about 600 ft. wide, is usually well marked.

After this passage, navigation up to the oil jetty does not present any particular difficulty.

After Ras Serani up to Port Reitz the tidal currents run in the same direction as the channel.

The port navigation is controlled by VHF from the Harbour Master's office.

Shoals in the port area are marked by beacons. It may occur that some of them are missing without any warning. Caution should be exercised as in some areas leading line beacons could be obscured by growing vegetation or by anchored ships.

DENSITY: 1025.

FRESH WATER: Available at all berths; in stream ex-tug at Harbour Master's discretion or barge of 300 tons capacity. 30 t.p.h. on quay.

FUEL: *Main Quay Berths:* Marine fuel oil, viscosity 1500 secs. Marine diesel fuel. Gas oil cannot be delivered by pipe-line at these berths but delivery can be made by bulk lorries up to only 10 tons at extra delivery cost. Minimum 48 hours' notice required. Quantities of 10 to 30 tons can be made by rail tank wagon if 48 hours' advance notice given. Thin fuel oil viscosity below 1500 secs. can be delivered at all berths through Fisher blender. Only 1 Fisher blender available and can deliver fuel to only 1 vessel at a time.

Shimanzi Oil Terminal: All grades, i.e. fuel oil, marine diesel, gas oil and thin fuel oil (through Fisher blender).

Cased Oil Jetty: Only marine diesel and gas oil can be delivered at this jetty.

Kipevu Oil Terminal: Only fuel oil of viscosity between 1500 secs. and 3500 secs. available. Fuel oil viscosity below 1500 secs. not available. At least three days' clear notice required by EA Oil Refineries for arranging bunker delivery. Not possible to deliver any marine diesel or gas oil either ex pipe-line or rail tank-wagons/bulk lorries at this berth.

GANGWAY/DECK WATCHMEN: Watchmen available for gangway and deck and recommended.

OPENING/CLOSING HATCHES: Normally done by stevedores except MacGregor type hatches.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes for each crew member for 8 days. Wine and/or Spirit, 8 small bottles of beer for each crew member for 4 days.

CARGO GEAR: All cargo gear supplied by stevedores.

CERTIFICATES: Normal port requirements for safety cargo equipment.

IDENTIFICATION CARDS: Port passes issued by the Port Authority.

CONSULS: The following countries are represented in Mombasa: Belgium, Denmark, France, Germany F.R., Greece, India, Italy, Netherlands, Norway, Sweden, USA.

REPAIRS:

1. See "African Marine" below.
2. Helmaco Engineering Company Ltd., P.O. Box 99111, Mombasa. Tel: 316776/7 or 316051/2. Telex: 21003, 21045 A/B COMARCO. Almost every aspect of repair work of vessels afloat can be undertaken. Slipway for small vessels.
3. Divecon Limited, P.O. Box 99111. Mombasa. Telephone and telex as for Helmaco. Underwater cleaning and repairs undertaken.
4. Comarco Communications Ltd., P.O. Box 99111, Mombasa. Telephone and telex as for Helmaco. Marine electronic repairs of all kinds carried out.

DRY DOCKS:

African Marine Dry Dock:

Principal Dimensions:

Length	590 ft. 00 in.	180.00 m.
Entrance width	80 ft. 10 in.	24.75 m.
Dock width	86 ft. 00 in.	26.40 m.
Minimum water depth LWS	13 ft. 00 in.	4.00 m.
Maximum water depth HWS	26 ft. 00 in.	7.90 m.

Cranage: 1×30 ton fixed, adjacent to the dock gate.

1×7 ton mobile on rails which can traverse the full length of the West side of the dock.

1×5 ton mobile on rails which can traverse the full length of the East side of the dock.

1×5 ton fixed at the jetty.

1×7 ton mobile.

1×12 ton mobile.

Berths: One piled jetty capable of mooring ships of up to 280 ft. length overall, with certain draft restrictions. A second berth capable of taking ships of up to 300 ft. length overall situated at the dock gate entrance for all but very deep drafted vessels.

Slipways: Two slipways capable of slipping barges, lighters and other small craft.

Tugs and Harbour Craft: For towing and transport. Paint pontoons, barges and catamarans, welding generators and air compressors (either self-propelled or 'dumb') which can be berthed alongside a 'gash' barge and a barge containing workshop facilities.

Electrical Shop: A fully equipped workshop (A/C and D/C).

Carpenter's Shop: Fully equipped to carry out all types of work.

Foundry: All types of castings in cast iron and non-ferrous metal. Maximum single pour in cast iron normally 15 c.w.t. with larger pours by special arrangement.

Paint Shop: All types of ship's paintwork.

Design Office: Chief Draftsman and Design Draftsmen undertake all types of work.

Air Conditioning and Refrigeration Workshop: Specialises in the installation, repair and servicing of General Electric air conditioning units and ship's refrigeration equipment.

General Labour: Gangs of men for cleaning, storing ship available at short notice.

Power Supplies: A/C and D/C power supplies are available at the alongside berths. Two power barges are available which contain: 1×400 KVA, 440 volt, 600/S 3-phase diesel generator; 1×210 KVA, 440 volt, 60 C/S 3-phase diesel generator; 3×60 kW, 220 amp 220 volt D/C diesel generators.

Machine Shops: Comprehensively equipped to handle all types of engineering work.

Plate Yard: For all types of ship repairs, ship construction and steel prefabrication work. A blacksmith's shop for forging and smithying work and a shop for sheet metal work.

Welding Shop: Electric arc welding, both in shop and in the port area. Approved to Lloyd's Register of Shipping standards.

REPATRIATION: Possible. Facilities available.

AIRPORT: About 7 miles from port. Served by regular airlines.

TIME: GMT plus 3 hours.

HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Labour Day (1st May); Madaraka Day (1st June); First Monday in August; Kenyatta Day (20th October); Independence Day (12th December); Christmas Day; Boxing Day (26th December).

Also for persons belonging to Islamic Faith: Idd ul Azha and Idd ul Fitr. Christmas Day is normally only holiday on which port closed except for necessary pilotage of ships in and out and for dealing with mails, passengers and their baggage, livestock and perishables. On other public holidays restricted working at Mombasa may be carried out at overtime rates. Overtime rates also apply on Saturdays after 1500 hrs. and on Sundays, and to third shift between 2300–0600 hrs.

POLICE/AMBULANCE/FIRE: In Port Area – Police 567 444 and 374; Ambulance 33; Fire 333.

TELEPHONES: Telephones supplied on board. Charges include cost of local calls. Telephone essential per port regulations.

SERVICES: All solvents for tank cleaning available. Repairs to Gyro compass, radar and most other electronic aids to navigation. Compass adjusting by arrangement with port.

SHIP SUPPLY SERVICE: Kenya Ports Authority, P.O.Box 95009, Mombasa – Kenya. Tel: 312211. Telex: 21243 Bandari. Cables: Kenports.

Private Organisations:

Comarco Ltd., P.O.Box 99111, Mombasa – Kenya. Tel: 316776/7, 315319. Telex: 21245 Comarco.

Murri International Salvage Company, P.O.Box 82345, Mombasa – Kenya. Tel: 20822/3 – 24 hours. Tel: 24912 – Office hours. Telex: 21215 Kboat.

Southern Oil Supply Co. Ltd., P.O.Box 84145, Mombasa – Kenya. Tel: 315738, 23889, 313204. Res: 471737. Telex: 20049, 21223, Sosco. Cables: Sosco.

Allied Oil Services, P.O.Box 99570, Mombasa. Tel: 315627.

SHORE LEAVE: All crew members allowed ashore and to travel except those from Socialist countries who must stay on Mombasa Island.

PORT REGULATIONS: White tankers and vessels carrying explosives enter port daylight only. No vessels carrying explosives or dangerous cargo allowed to berth at Main Quay.

DELAYS: Usually no waiting days.

NOTICE: *From the General Manager, East African Oil Refineries Ltd. To Ships' Masters.*

Spillage of Oil and Air Pollution:

I would like to draw your attention to the serious consequences which will arise from any spillage or discharge of oil into the waters of Kilindini Harbour. This part of the Kenya shoreline, with its famous coral reef, is an extremely beautiful and popular tourist attraction as well as providing a means of livelihood for many local people.

Any spillage of oil can harm the environment and raises a great deal of criticisms from the residents of the area. The same applies to excessive funnel smoke.

In the event of any spillage or leak from ship or jetty facilities, ship's officers should immediately warn refinery personnel, who will instigate emergency measures. If there is any delay in notifying the refinery, then any oil spillage or pollution into the sea must be reported to:

(1) Ras Serani Lighthouse (Mombasa Port Control) manned 24 hours. Telephone Mombasa 312895 (21211 ext. 357 office hours only). VHF Radio Channel 12.

(2) Senior Harbour Master Kipevu, Office hours telephone Mombasa 24864 or 312211 ext. 259. Other times telephone Mombasa 471550 or through signal station in (1).

I am sure you will agree that both you and your staff as well as ourselves should do all that we can to protect this part of the environment against pollution. Moreover, it is a firm belief that we should try our utmost to avoid adverse publicity for the oil industry of which we are both part.

NOTICE: *Notice from ship's Agent to Masters:*

Stowaways from Mombasa:

We wish to inform you that stowaways from the Port of Mombasa are a very serious problem and we have had a number of vessels leaving Mombasa with half a dozen stowaways on board causing the Owners considerable expense and inconvenience.

Please, therefore, take every precaution to ensure your vessel is not boarded by stowaways whilst in Mombasa. We would suggest you employ shore watchmen to guard the vessel and also perhaps to have members of your crew on duty at all times to protect the ship. Please, just before sailing, carry out a thorough search of the whole ship with your crew and the watchmen. We also suggest that once you have sailed and you are outside the port limits, you steam around the area for a few hours to give any stowaways the impression that the vessel is fully underway, and again during this period have your crew thoroughly search the ship.

If stowaways are found on board of non-Kenyan nationality then the authorities do not permit them to be landed in Mombasa. Most of the stowaways from Mombasa tend to be Tanzanians.

We would stress again that stowaways are a serious problem in Mombasa and it is up to you to ensure your vessel does not sail with stowaways on board. Please inform your crew about stowaways and that they should be on the look out at all times for any suspicious persons on board.

DEVELOPMENTS: New equipment installed includes additional gantry cranes (5×15 tons capacity) for container handling at Mombasa and inland container depot, now open at Embakasi, Nairobi.

Berths No. 16, 17 and 18 (total length 600 m.) have been modified to take the above mentioned cranes.

AUTHORITY: Kenya Ports Authority, P.O.Box 95009, Mombasa, Kenya. *Tel:* 312211. *Telex:* 21243 Bandari. *Cables:* Kenports. *Contact:* Managing Director. Captain A. J. Ketoyo, Senior Harbour Master.

AGENT: East African Commercial and Shipping Company Limited, Notco House, Moi Avenue, Mombasa, Kenya, P.O.Box 95103. Tel. 26251/2 or 21141/2. Telex 21151 Keship Ke. Cables "Keship, Mombasa".

BANABA (Ocean Island): 00.52 S. 169.35 E.

PHOSPHATE MINING HAS CEASED. ALL INSTALLATIONS HAVE BEEN DISMANTLED.

TARAWA (Betio): 01.25 N. 172.54 E. (See Plan)

DOCUMENTS:
Customs: Boards vessel at anchor.
Clearance from Last Port.
4 Crew Lists.
3 Passenger Lists.
1 Stores List.
1 Ship's Report Inward.
1 List of Unmanifested Cargo.
1 Crew's Stores List.
1 Marine Form.
Health:
Pratique granted by Health Department who board at anchorage with Customs.
Vaccinations against Cholera (if required can be carried out).
Name of ports visited and date of arrival at respective ports.
Immigration:
2 Crew Lists.
2 Passenger Lists.
Last Port of Call.
Next Port of Call.
Passports.
Final Destination.
Agent:
3 Bills of Lading.
5 Manifests.
Last Port.
Next Port.
1 Crew List.
1 Passenger List.
Agriculture:
Plants Certificates.
Animal Certificates.

PILOTAGE: Pilot available and must be informed of vessel's ETA 24 hours in advance through the Agent. Entering vessels are strongly advised to await Pilot one mile West of Fairway buoy. Pilot can be contacted by VHF on Channel 16. Pilot boards from small tug, painted yellow, which flies "H" flag at stern. Buoys in lagoon are likely to be missing. Also see "Radio".

ANCHORAGES: See Chart BA. 3269. Betio anchorage main anchorage. Inside the lagoon, safe in all weather although in rare strong winds it may not be possible to work vessel in the lagoon.

RESTRICTIONS: Vessels arriving after 1800 hrs. are advised not to enter the passage and should drift 5 miles away from the entry point.

MAX. SIZE: Any vessel drawing up to 26 ft. may enter at LWOST and 30 ft. HW. Length and breadth are not critical, however vessels over 300 ft. to navigate with extreme care.

HEALTH: See "Documents".

RADIO: Tarawa Radio (T3K) on 500 kHz, 2182 kHz and 6215 kHz. Contact Senior Pilot 4 hours before arrival on VHF Channel 16. Pilot will arrange all formalities, Customs, Health, stevedores, etc.

RADAR: No port radar service.

TUGS: 3 tugs (available for towing barges).

BERTHING: None (lighterage port). Small jetty will be available in 1988.

CRANES: 1 × 20 ton container crane on wharf (stationary). 2 × 5 ton mobile cranes.

STEVEDORES: Available 24 hours. Discharging rate 12 t.p.h. Labour available weekends and holidays if required.

MEDICAL: Medical attendance could be obtained through the Agent during working hours. Hospital available where suspected disease could be medically examined.

TANKERS: Vessels drawing up to 14 ft. can anchor close to the jetty where lines are connected to shore pipes. Maximum working pressure 50 lb. No tanker berth and vessels must provide lines. Floats can be provided by Mobil Oil Agency with labourers if required.

DENSITY: Sea Water.

FRESH WATER: Available in limited quantities in an emergency only and delivered by water barge. Cost of water A$5.00 per 500 gallons. Delivery charge A$3.90 per 200 gallons. Water may be contaminated.

FUEL: Diesel only (in very short supply), in restricted quantities and delivered by barge in tanks. Refuelling cost A$11.20 per 500 gallons.

FIRE PRECAUTIONS: No special precautions other than normal precautions for tankers.

CONSULS: British and Australian High Commissioners and South Korean Honorary Consul stationed at Bairiki (also see "General").

REPAIRS: Small but well equipped and capable workshop for light repairs.

DRY DOCK: Small patent slip, capable to slip ships of 150 tons displacement.

CUSTOMS ALLOWANCES: 25 cigarettes per day and 6 cans (310 ml.) beer per day.

SURVEYORS: Marine Superintendent of the Ministry of Transport and Communications will also act as Lloyd's Sub-Agent and cargo surveyor.

HATCHES: Opened and closed by Stevedores.

WATCHMEN: Not required.

REPATRIATION: All facilities available for crew changes.

AIRPORT: 13 miles from anchorage point. Air service to Nauru on Wednesday only, by Air Nauru, arrives from Nauru 0900 hrs. and departs 1000 hrs.; and to Honolulu once a week by Air Tungaru (the national airline) via Maduro, Marshall Islands.

TIME: GMT plus 12 hours.

HOLIDAYS: New Year's Day (January 1st); Good Friday; Easter Saturday; Easter Monday; Public Holiday (July 14th); Youth Day (first Monday in August); Christmas Day (December 25th) and Boxing Day (December 26th). No cargo work can be arranged.

POLICE/AMBULANCE: Police and Ambulance 999.

SERVICES: Ship's laundries.

BANK: Bank of Kiribati, P.O.Box 66, Betio. Tel: 26124.

SHORE LEAVE: All crew are allowed to go ashore after inward clearance is granted.

IDENTIFICATION CARDS: No shore passes issued. Passport or Seamen's Book are not required when on shore leave.

REGULATIONS: No food waste, ballast, engine oil to be discharged in the lagoon.

DELAYS: Expected delays can be caused by heavy rain and port congestion.

GENERAL: Tarawa is the main port of entry for Kiribati. Other entry port is Christmas Island.

Tarawa Atoll is roughly triangular in shape. A number of islets, separated by shallow passages, dry at low water, form the Southern and Eastern sides of the Atoll. The Eastern side is approximately 19 miles North and South and the Southern side is 16 miles in an East-West direction.

Causeways link up the islets along the Southern side and part of the Eastern side. On the Western side there is a barrier reef, most of which is sunken, enclosing a large lagoon navigable by vessels drawing 26 ft. at LWOST and 30 ft. at HW.

The President's and Main Government Offices are at Bairiki Islet which is connected by causeways to the Tungaru Central Hospital, Government Schools at Bikenibeu and the international airport at Bonriki and the Port of Betio.

DEVELOPMENTS: "L" shaped jetty with length 50 m. and width 8.0 m. at head to be constructed at North end of Eastern Mole. Depth alongside 5.5 m.

AUTHORITY: Ministry of Transport and Communications, Marine Division, P.O.Box 506, Betio, Tarawa, Republic of Kiribati. *Tel:* 26468. *Telex:* 77022 Mincomm. *Cables:* Harbour Master, Tarawa. *Contact:* Captain B. Highland, Harbour Master and Marine Superintendent.

AGENT: Shipping Corporation of Kiribati, P.O. Box 495, Betio, Tarawa, Republic of Kiribati. Tel: 26525, 26521. Cable Address: Portco Tarawa. Contact: Captain T. D. Murdoch, General Manager.

GENERAL

ETA PROCEDURE: The Notice of ETA is applicable to the Owners (operators and charterers) and the Master of foreign vessels calling at ports of the D.P.R.K.

1. The Owners who fix vessels every month, provide the monthly fixture of ships to the Ocean Shipping Agency of the D.P.R.K. (Head Office) and Branches (herein after called the Agent) before 25th of the previous month and advise immediately if any change.

(a) Vessel's name, flag and call sign.
(b) ETA and port of call.
(c) Description and quantity of discharging and loading cargo.

2. The Owners send the Agent the following documents before arrival in the port: (1) Bill of Lading 3 copies, (2) Manifest 3 copies, (3) Stowage Plan 3 copies, (4) Charter party or handling terms, (5) Others if any.

3. The Owner or Master advise the Agent of the Notice of ETA at the Pilot Station 10 days and 3 days, 24 hours, 12 hours and 4 hours prior to arrival.

(A) 10 days' Notice:
(a) Vessel's name, flag and call sign.
(b) ETA and port of call.
(c) Vessel's particulars (g.r.t., n.r.t., d.w.t., number and size of hatches, derricks and their capacity, LOA, breadth, draft.)
(d) Numbers of crew, passengers and nationality.
(e) Description and quantities of discharging/loading, details of heavy lift if any.
(f) Copies of charter party or handling terms.
(g) Provisions, ship's stores, repair.
(h) Flag of the D.P.R.K.
(i) Last port and ship's position.
(j) Full address of Owner or Operator, payer of disbursements and banker.
(k) Others if any.
(B) 24 hours', 12 hours' and 4 hours' Notice of ETA at the Pilot Station; Ship's position and speed only.
(C) The Master should advise the Agent of the ship's position and the time when she passes the following line.
(a) Korea East Sea.
Lat. 42° 24′ N., Long. 131° 10′ E.
Lat. 41° 43′ N., Long. 132° 20′ E.
Lat. 38° 00′ N., Long. 130° 00′ E.
Lat. 38° 00′ N., Long. 128° 45′ E.
(b) Korea West Sea.
Lat. 39° 50′ N., Long. 123° 20′ E.
Lat. 37° 00′ N., Long. 123° 20′ E.
Lat. 37° 00′ N., Long. 126° 30′ E.

(D) The Master should navigate to the pilot station at least 15 miles from the coast after passing the above lines mentioned in item 3-(3).
(E) On arriving at the pilot station the Master should give the Agent the Notice and enter the port under pilotage.
(F) The Owner should deposit disbursement funds before ship's arrival at the port and inform the Agent of the following;
(a) Name, amount, date, No. and other details of T.T.
(b) Ship's name and port of call.

	Coast Radio	HMR

CHUNGJIN: 41.43 N. 129.42 E. (See Pla

DOCUMENTS:
8 Crew Lists.
2 Vaccination Certificates.
2 Lists showing currency, gold and valuables in possession of cre members.

The following information should be radioed to Port Authorities befo arrival:
Number and nationality of crew.
Name of last port.
Ports called at during last month.

PILOTAGE: On reaching North Korean waters, vessels required to gi a position report every 3 hours to KOSA Chungjin. Pilot and Po Authorities board in position 41° 30′ N., 130° 05′ E. where vesse should await Pilot. Water depth too deep to permit anchoring.

ANCHORAGES: No possibility of anchoring outside harbour limits.

CLEARANCE: On arrival in port, the radar, echo sounder, main an emergency transmitters and all optical equipment is sealed. A inspection team board the vessel to verify currency and valuable declarations. Seamen's Books required to be stamped with landing pas

BERTHING: Berth No. 1, max. draft 24 ft. Berths No. 2 and 3, max. dra 27 ft. Berths No. 4 and 5, max. draft 28 ft.

CARGO GEAR: Vessels loaded and unloaded by ship's gear. At Bert 4 and 5 there is a conveyor belt facility for coal loading.

SHORE LEAVE: Seamen not allowed to visit other vessels, or leav the harbour area.

Unauthorised money changing forbidden, and it is prohibited to ta Korean currency out of the country.

No bathing in harbour area.

SHIPMASTER'S REPORT: December 1980.
There are 2 harbours in Chungjin, the Western harbour and the Easte harbour which are about 2.5 miles apart. Western harbour is mostly f export of coal and iron and Eastern harbour for import of general a bulk cargo.

The following port information is for the Eastern harbour:
Documents: Immigration, Customs and Quarantine Officials board t vessel at the pilot station. The Korean Authorities bring on board th own forms for ship's stores, currency, valuables, binoculars, camera etc., and fill these in by using the information contained in the shi forms. However they also take the original of the ship's paper.
Papers required for entry:
5 copies Crew List (IMO Form).
1 copy Vaccination List (Cholera).
1 copy Crew's Effect Declaration (IMO Form).
1 copy List of Currency and Valuables (Free Form).
1 copy Ship's Stores Declaration (IMO Form).
1 copy Ports of Call List.
1 copy Maritime Declaration of Health.

A "General Information" sheet, containing such particulars as vessel's me, call sign, Port of Registry, official number and all the normal data ained in the ship's register, including cargo on board, amount and ere loaded etc., was found to be of great help in filling out their forms d speeded-up the entry and clearance process. 5 copies of above ould be made for distribution to Agent, Customs, Immigration, Harbour aster and Quarantine.

aster's Advice: It is important that all crew members strictly comply h the Rules and Regulations in Korea, especially concerning cameras d binoculars as photography and the use of binoculars is strictly ohibited in the harbour area as well as in the City and the surrounding ea. If the Customs, during their second cabin check, find a camera or oculars the matter will be treated very seriously.

For landing permit, Immigration will stamp the passports or the eaman's books. However I managed to persuade the Immigration fficer not to stamp the passports because of the trouble in certain untries when they see a D.P.R. Korean stamp but it took 2 days and her Immigration Authorities to get this permission.

When filling out the Customs and Immigration Forms, the name North North Korea should not be written on any of above mentioned forms r any other documents as well as on private letters. The Authorities n't accept a divided Korea and will cross out the name North, in any ace it is written.

t is not necessary to take cash advance in Korean Won. American ollars and Yen are most welcome.

lotage: Method of contact: VHF or radio contact not possible. Agent ll inform the pilot station of vessel's ETA.

oarding Position: Lat. 41° 42.8′ N., Long. 129° 50.5′ E. (4 miles S.S.E. breakwater). Pilot is compulsory. Service Time: Daytime only.

nchorage: From 0.5 miles – 4 miles S.S.W. of Chungjin Harbour in - 30 fathoms. Good anchorage in mud/sand and protected from ortherly wind. However during strong South-westerly wind there is a eavy sea and swell.

pproaches: Simple and straightforward. Practically due North along orea's East coast until abeam of Cape Kozakof, then straight for the ilot boarding position or anchorage.

estrictions: Entry: 30 ft. even keel on entry to the harbour.

pecial Regulations: Vessel received orders by cable to navigate 5 miles off the Korean D.P.R. coast and pass through position ° 38.9′ N., 129° 52′ E. en route to the pilot boarding position.

ax. Size: Max. draft alongside at the grain and general pier was 28 ft. d in the harbour 30 ft.

ealth: Radio Pratique not available.

adio: Contact through Congjin Coast Radio Station, call sign "HMC" equency; Call on 500, work on 428 kHz., ships work 425 kHz. Traffic t every hour plus 20 minutes. After initial call on 500 kHz., usually llowed by QRU. MF only.

After arrival, radio station on board is sealed and there is no VHF in e port. However after arrival in the port, Agent will bring on board a mall transmitter/receiver for daily communication between Master and gent's office. The set working on 24 volts. Very few people speak nglish. I found only the Pilot and Agent had a fair command of English.

rrival Notice: Five days then 72, 48 and 24 hours to Agent. Also 5 days d 3 days to receivers.

ugs: Two tugs available, about 500 h.p. maximum. Tugs always take ip's line.

erthing: Mooring Method: Vessels drawing more than 28 ft. must first ghten her draft at anchor in the inner harbour. Vessel is brought up in North/South direction in the harbour and moored aft to the bollards on e breakwater with 4 lines and port and starboard anchor forward, shackles in the water (Mediterranean Mooring).

Along the grain pier, which is only 150 m. long, a strong mooring is ecommended partly because the after part of the vessel overhangs the nd of the pier and partly because of the occasionally heavy swell along e pier.

rain Wharves: Vessels only allowed alongside with draft of 28 ft., but sounding with a line showed about 32 ft. It was not possible to get act information of water depth alongside the general pier. I found the tal wharves length to be about 1,500 m. The grain pier is 150 m. long. ertain wharves in the Eastern part of the harbour, which are shown on A. Chart No. 1271, do not exist anymore as usable wharves.

acilities for Bulk Carriers: There are a total of 8 cranes in the harbour, ach of about 10 tons capacity. Two of the cranes are serving the grain er and connected with a conveyor belt system. No difficulty with height f vessel.

argo Operations: At the harbour anchorage (Mediterranean mooring) e cargo is discharged by ship's gear. Stevedores operating the cranes. peration is slow and there is often damage to the vessel with grabs e to inexperienced stevedores.

Two cranes serve the vessel alongside the grain pier. They are able discharge about 3,000 tonnes per day but actual quantity discharged er day (taken over a 7 days period) was only 1,600 tonnes, mostly due lack of stowage space, transportation problems and crane break-owns.

Stevedores work 24 hours a day, 7 days a week.

The cranes bring the grain to a conveyor belt system which again ngs the cargo to the store house. The store house has a maximum pacity of 12,000 tonnes.

There is a railroad system serving the grain and general pier. evedore damage must be reported to the foreman immediately. All mages are repaired before departure by shore repair workers.

edical: Services available.

ensity: 1026.

esh Water: Good quality fresh water available at the pier. Charge Won 75 per ton (U.S.$1.75). Fresh water can also be delivered by barge the anchorage.

el: Available but expensive.

epairs: According to the Agent, all deck and machinery repairs can be rried out. I expect that to be correct as there is a big shipyard in ungjin.

Surveyors: Local Surveyor only.

Customs: The Bonded Stores are not sealed but all cameras and binoculars are collected before entering the harbour and sealed in a locker. Radio room and echo sounder also sealed.

When the vessel has berthed alongside the pier, Customs will once more come on board and this time check thoroughly for binoculars and cameras throughout the ship. It is possible they will confiscate all cameras and binoculars found during the second check.

Time: GMT plus 9 hours.

Shore Leave: Crew members are not allowed outside the harbour area. Permission is only given for a visit to the Seaman's Club, just outside the gate, but only a walk, straight from the gate to the club. There is an armed guard at the gangway to whom crew members must present their Passport or Seaman's Book and also once more at the harbour gate. Shore leave is from 0800 hrs. to 2300 hrs. There is a new Seaman's Club near Western harbour (about 8 km. from Eastern harbour – by car about 10 minutes). Transportation to and from this club costs U.S.$7.00 per bus.

General: Current: Experienced a slight South-westerly set towards the shore in Kyongusogu Bay when approaching from the South.

Tide: Port not effected.

Charts: BA. 1271, 1316. J.A. 162.

Swell: A heavy swell can cause problems for vessels alongside the wharves, especially in July/August. At times the swell may cause vessels to leave the wharf and shift to the anchorage.

Distress: In case of distress a long blast followed by a short blast with the whistle and repeated 3 times, this will warn the Harbour Master who will take action.

Derat: Derat exemption certificate can be issued.

Laundry: Available and requires about 3 days. Laundry service is satisfactory.

Provisions: Available in limited quantities.

SHIPMASTER'S REPORT: January 1990.

Documentation/Officials: Quarantine and Immigration Officers board with the pilot. Documents necessary as per "Guide". In addition a blank form in English and Korean language is presented by Customs where Master should fill in number of cameras, binoculars, radios, tapes, televisions and sign. They also presented Korean forms for crew and ship's stores which Master only signed and attached IMO forms, which we already had prepared, without objection.

Four crew members are required to accompany the search party to search the deck, engine room, living quarters and provision stores. There is a representative of the Agriculture Ministry who inspects the dry provisions room for insects. They found 2 small cockroaches and ordered fumigation, which ship's crew carried out. All cameras and binoculars were placed under seal. Radio equipment, D/F, echo sounder were sealed but VHF and walkie talkies were not sealed and can be used throughout ship's stay at anchorage or alongside for daily communication with Agent. Bonded stores were sealed after berthing. There was no second search after berthing, only similar search prior to departure, where 2 Immigration Officers will remain onboard up to pilot station and disembark with pilot.

Pilotage: Pilot boards as indicated on the chart from a tug equipped with VHF.

Radio: Cable received from agents Korea Ocean Shipping Agency (KOSA) as follows: Please navigate 15 miles away from our coasts. Pass through 41° 23′ N., 130° 08′ E., thence to pilot station. Chongjin working frequency short wave as follows:

16,995 kHz. from 0900 hrs. – 1800 hrs. (local time).
4,231 kHz. from 0800 hrs. – 1800 hrs. (local time).
8,693 kHz. from 0000 hrs. – 2400 hrs. (local time).

VHF: Chongjin Port Radio and KOSA are both equipped with VHF. Contact can be established on Channel 16.

Berthing: Vessel berthed in Western Harbour.

Cargo Work: Shore cranes were used. Working 24 hours a day, 7 days a week. We loaded steel billets and all cargo arrived by rail. Any damage by stevedores will be repaired by them.

Medical: All crew to have valid health card. Injection for Cholera will be done onboard if required.

Costs: 5 Won for each injection, plus 5 Won for each new card plus 10 Won for Doctor's visit.

Fresh Water: Available alongside by hose provided by water company.

Costs: 2.50 Won per ton, plus supply fee of 1 Won per ton plus Winter charge of 20% (Holiday charge is 125% and night charge is 75%).

Fuel: We received 20 tonnes of diesel oil 7 days after request.

Costs: 980 Won per ton, plus supply charge of 3 Won per ton, plus commission.

Surveyor: D.P.R.K. Register of Shipping surveyor will attend on request.

Repatriation: A vessel in port sent 20 crew to Manila via Pyongyang.

Shore Leave/Shore Pass: An armed guard is on duty at the gangway at all times. I requested Immigration not to stamp Seamen's Books or passports, which they accepted. Ready made shore passes are issued without names, only numbers. There is a U.S.$100.00 fine if shore pass is lost.

Shore leave possible from 0900 hrs. to 2100 hrs., but only within harbour area. Crew can only visit Seaman's Club which is about 2 km. from the gate, by using the bus provided by the Seaman's Club, through shipchandler. Single trip costs 10 Won (U.S.$1 = 2.22 Won).

Excursion tours can be arranged by Agent to museum or hotel. Shopping only possible from Seaman's Club or hotel, although there is a shop in Agent's building. Agent advised me there is an Agent's branch office near East Port.

Provisions: Provisions are very cheap and can be obtained through shipchandler. The supply of fresh provisions is very limited.

HAEJU (Haijuube): 37.59 N. 125.42 E.

SHIPMASTER'S REPORT: August 1978.

DOCUMENTS: Same as Nampo, but Korean Forms must also be filled in on arrival.

PILOT STATION: B.A. Chart 1258. Situated between following points:

37° 40′ 30″ N.	125° 35′ 00″ E.
37° 42′ 00″ N.	125° 35′ 00″ E.
37° 42′ 00″ N.	125° 32′ 24″ E.
37° 40′ 30″ N.	125° 32′ 24″ E.

The ship should anchor and wait. It is imperative to anchor within Pilot Station Area, which is used by North and South Korea, otherwise the Authority will not board the vessel. Approaches to Haeju are not covered by B.A. Charts, Korean (Nos. 15–1354, 1328, 1329) not obtainable. Pilot boards together with Quarantine and Immigration officer. The inspection starts immediately, all crew must have Seaman Book for identification. Food stores and pantries also inspected. Pilotage is carried out depending on tide and ship's draft, daytime only. Berthing at slack tide. After berthing arrival inspection continues (Harbour Master, Customs, Coast Guard).

ANCHORAGE: Ships sometimes complete loading at the Anchorage in position 37° 55.5′ N., 125° 46′ E., depth 11.4 m., but probably swinging space for one ship only. Ships waiting for berth anchor in the vicinity of the wharf. With no chart it makes the situation difficult, as there are no lights or light buoys. Position only obtained by radar. One anchor used due to strong tide which sometimes reaches 4 knots.

ARRIVAL ADVICE: The arrival notice to be sent to KOSA Haeju giving all particulars same as Nampo, first contact via Haeju Coast Radio Station, call sign HMJ, to be made 48 hours before arrival. Earlier contacts via Shanghai Radio.

RADIO: Haeju Radio, call sign HMJ.

BERTH: Old berth described in China Sea Pilot, Vol. III, page 540. Extension works in progress. Shore cranes. Depth at low water about 6.8 m.

EXPORTS: Zinc concentrates, cement from the new factory connected with Port by conveyor belt.

FRESH WATER: From hydrant alongside, at anchor by barge (dredger).

FUEL: In restricted quantities, price unknown.

SERVICES: Provisions and Laundry, available through Seamen's Club.

AUTHORITY: Port Master and Harbour Master.

HEUNGNAM: 39.50 N. 127.45 E. (See Plan)

SHIPMASTER'S REPORT: November 1983.

PILOTAGE: The pilot station is at Lat. 39° 44.8′ N. and Long. 127° 41.0′ E. When arriving at this position and no Pilot is available, vessels are ordered to anchor. Ships are also ordered to navigate at least 12 miles off the coast.

ANCHORAGE: The anchorage is secure and safe with a depth of water of at least 36 ft., however soundings were unobtainable because of the sealing of all equipment.

If vessels arrive with a draft of over 25 ft., cargo is discharged into barges at anchor approximately 1 mile South of the breakwater.

The white light at the end of the breakwater can be seen at a distance of approximately 5 miles.

MAX. SIZE: The minimum depth in the harbour is 28 ft. and ships of up to 25 ft. draft are allowed alongside.

BERTHING: The length and direction of the quays etc. in the harbour are reasonably accurate as they were obtained using radar (See Plan).

The berths are used as explained on the plan. Also the two cranes at the Southern end of the Pier "D" are used for the export of bulk cement.

NAMPO (Chinnampo): 38.43 N. 125.25 E. (See Plan)

SHIPMASTER'S REPORT No. 1.

ARRIVAL ADVICE: The following information should be radioed to KNSA Nampo before arrival:

(1) ETA Nampo Station, Lat. 38° 37′ 30″ N., Long. 124° 49′ 30″ E.
(2) Nationality.
(3) Gross Registered Tonnage.
(4) Net Registered Tonnage.
(5) Deadweight.
(6) Length overall.
(7) Height of Freeboard.
(8) Speed.
(9) Last Port of Call.
(10) Colour of ship's hull.
(11) Number of crew and passengers.
(12) Hatch Loading/Discharging cargo Plan.
(13) Draft.
(14) Ship's position together with ETA 24 hours before arrival within area connected positions Lat. 37° 00′ N., Long. 124° 30′ E., Lat. 38° 08′ N., Long. 123° 35′ E., and Lat. 39° 50′ N., Long. 124° 07′ E. Also vessel should advise position and time passing above connected lines.

DOCUMENTS:
8 Crew Lists.
2 Vaccination Lists.
2 Lists showing currency, gold and valuables in possession of cr
Bonded stores must be declared but not sealed.

PILOTAGE/ANCHORAGE: Pilot and Port Authorities (Quaran Officer and Immigration Officers) board at position Lat. 38° 37′ 30″ Long. 124° 49′ 30″ E. where vessels should anchor awaiting Pilot.

Night pilotage prohibited, according to port regulations.

CLEARANCE: After embarkation of Port Authorities at Nampo Sta the Radar, Echo sounder, VHF, DF, Radio Room and all opti equipment is sealed. On arrival in Port, Customs Officers board vessel and together with Immigration Officers search the whole sh

Seamen's Books required to be stamped with landing pass and are taken ashore by Immigration Authorities for formalities.

RADIO: Nampo Radio. Call sign HML.

BERTHING: Coal berth can accommodate vessels up to 20,000 d There are 2 conveyor belts for coal loading but 1 only can work a time. Conveyor belts are not movable, the vessel has to shift. Vesse loaded and unloaded mostly in the roads by ship's gear. There a 3 other berths but have no information.

FRESH WATER: Only available by barge.

TIME: GMT plus 9 hours.

SHORE LEAVE: Seamen allowed to go ashore by boat or bus o Seamen are not allowed to leave harbour area. In order to visit oth vessels in port, application should be made to Immigration Authoritie

GENERAL: *Currency:* It is prohibited to take Korean currency out of th country.
Bathing: Prohibited.
Fishing: Prohibited.
Provisions: Limited quantities available at the Seamen's Club.

SHIPMASTER'S REPORT No. 2.

Information covering Nampo, Democratic People's Republic of Kore previously known as Chinnampo. See in connection with this B.A. Ch 1257 and 1656, China Sea Pilot III.

The following general information was produced by the navigat officers of a vessel in 1974.

NAVIGATIONAL INFORMATION: Pilot boarding point Lat. 38° 37′ 5″ Long. 124° 49′ 5″ E. Wreck at Lat. 37° 38′ 2″ N., Long. 124° 48′ 2″ 3 masts above water at all states of tide. Radar echo good at 6 mil Buoy – old position Lat. 37° 37′ 4″ N., Long. 124° 51′ 4″ E., moved Lat. 37° 37′ 2″ N., Long. 124° 50′ 7″ E.
Light Sei To – flash every 23 sec. Visible for 8 miles
Light buoy at Lat. 37° 37′ 4″ N., Long.124° 53′ 6″ E., flashes 18 sec.
Light Shimai To flashes 18 sec.
Light San extinguished
Light Chiri extinguished
Light Hi To extinguished
Light at Lat. 38° 41′ 7″ N., Long. 125° 18′ 1″ E., (Bachishin) flash 30 sec.
Light at Nanryoki extinguished
Light at Lat. 38° 43′ 3″ N., Long. 125° 24′ 6″ E., extinguished.

PILOTAGE, ANCHORAGES, INSPECTION AND CLEARANCE: Th Pilot boarding point is at the same time the outer limit of Nampo Harbo and the clearing inwards point. To await Pilot and further instructio before proceeding into Nampo, vessels must wait here. Information ca be obtained via coastal radio Nampo (details in Nautical Wirele Service Standing Instructions), VHF is not available.

The anchorage at the pilotage waiting point is good, and the botto is a thin layer of grey mud with clay underneath it. With wind from th S.W., there is a slight swell. Depth of water between 25 m. and 26 m vessels should anchor with a chain length of at least 100 m. on th capstan and calculate adequate room for swinging, since there is a ver strong tidal flow at all states of the wind and weather, running up t 4 knots according to our observations.

The Pilot comes on board with clearance authorities. As pilot cut (also no VHF) a normal tug is used, which in Winter is also used as a ice-breaker. The tug does not display a Pilot's flag, only the natio flag. The hull of the tug is black, superstructure white with large Kore characters on the front of the bridge. Pilotage only available du daylight hours.

At clearance inwards point (pilotage boarding point) all binocula including bridge binoculars, and photographic equipment is gather together and sealed for the total time in port. It is only released after th Pilot leaves the vessel on departure from the port. Likewise all ech sounding, radar, direction finding equipment is sealed. The use of su equipment and filming and photography in Democratic Peop Republic of Korea is completely forbidden.

From the clearance inwards point the journey to the anchorage in fr of the town is usually at full speed for most of the way. The anchora is selected by the Pilot. The Pilot gives a good impression and from o observations knows his job well. However, one can only expect ve rudimentary English from him. The same applies to the clearan authorities who have only a very few words of English. Clearan proceeds slowly but is carried out very correctly.

GENERAL INFORMATION: When at anchor in front of the town, fu official authorities come on board. These check the whole ship, and through the deck and engine room areas accompanied by one chos member of the crew. Whilst the ship is being examined, all other cr members must remain in their cabins. The crew member accompany the authorities must have his seaman's book with him as identifica When the authorities leave the ship finally they take the log away, a bring it back after a few days. Going ashore is permitted, but norma only in the port area. There is a seaman's hostel there. Travel fu inland is possible, but only by giving 24 hours prior notice to Immigra via the ship's Agent. Also from time to time it is possible for cr members to fly out, but this must be arranged via the state shipp ent. Visits to other ships is also possible, but only by giving 24 hours or notice to Immigration. Radios and cassette recorders may not be en on land or even on deck. Their use is only permitted within the p and cabins. Fresh water and fresh food are available. In the roads, ater is delivered by water boats. Removal of rubbish is also possible y due notice through the Agent, and is even possible at the anchorage. at manoeuvring can likewise take place, but it must be reported, and ay only take place in the vicinity of one's own ship.

For clearance inwards, the following documents are required:

7 Crew Lists.
1 List of Items in Possession of Crew divided into gold, valuables, money, signature.
1 Vaccination List.
1 Maritime Declaration of Health.
1 Passenger List, even if none on board.
1 Narcotics List.
1 List of Tobacco and Personal Goods.

The authorities bring a list of provisions with them and fill it out after claration on board. Stores, such as alcohol and cigarettes are not ealed.

The Health Authorities place greatest score by cleanliness of toilets, igerators, food stores, kitchens, pantries, hospital and first-aid ation.

Generally, it may be stated that the ship's broker and Agent speak d understand good English, but from the authorities normally one can pect no knowledge of Western languages.

The port roads offer anchorages for at least 15 sea-going vessels and ough room for swinging. However, in each case at least 170 m. chain ould be allowed so that the vessel lies securely. The tidal current, in ccordance with our observations, runs at a good 4 knots. The chorage bottom is good and comprises grey mud. The depths of water own in the charts are, in accordance with our observations, roughly rrect.

To the West of the port on the town shore there is a large shipyard h a mobile gantry crane over a slipway under construction. The ipway is about 150 m. long. Normally, the crane is at night directly on e bank (high water mark) and is illuminated and thus constitutes a od bearing, particularly at night, since otherwise no long-range port nts are available.

Position of the crane is about Lat. 34° 43′ 2″ N., Long. 125° 24′ 1″ E. is area where the shipyard is located is designated as "Iron works" Chart 1656, map of Chinnampo Ko. The waterside there no longer s an inlet, but has been straightened out, and building work is still in ogress. See "Plan Section" of "Guide".

Likewise building works are in progress along the whole shore line tween the shipyard and Nampo Ki. The shore line is also straightened re, and to all appearances has been developed as anchorage and air yard for the Korean Navy. The 2 red/black buoys to the South of e iron works in the chart are no longer there. In this area there is only small fixed buoy for guard boats and fishing craft.

n the middle of Shienshin Island there is a 9-storey white hotel, which good landmark by day.

The tidal pole in front of Nampo Ki is no longer available. On the uthern end Nampo Ki is a bunker with a small house on top. The wer part of the house is pink and the upper part white. The West pier Hibatsu To has 5 mobile port cranes, with lifting capacity up to 5 tons. the Southern end of the pier are 2 new large warehouses. A floating ne is available with a capacity of about 160 tons. On the Western er is likewise a small warehouse and 2 mobile port cranes (up to ons). At the Southern end of the Western pier, are two berths for deep e freighters with a good 9 m. water depth N.W. alongside. At the uthern part of the Western pier there is a good 8 m. of water along ength of some 210 m. At Berth 1 (West pier, Southern berth), vessels to 32 ft. draft can go alongside in normal water conditions. The depth water in the inner part of the port could not be exactly determined, t judging by the vessels there must be about 5 m.

The old coal pier has a berth with at least 10 m. depth of water. East this pier is also a further coal pier, equipped also with conveyor belts d about 10 m. depth of water alongside.

For berthing and unberthing there are one large and three small tugs ailable. The large tug acts as pilot craft and for the authorities to visit r clearance. It has been previously described.

From our observations, in the inner roads loading and unloading rarely kes place. There are only a few lighters available. As the port is erloaded, a long waiting time must always be allowed for (at least 4 days).

Medical care for crew members here is somewhat difficult, since one es with all means to avoid having to have the crew member transferred yond the confines of the port. In this connection, the doctor comes y once on board and a decision is taken as to whether or not a visit hospital is necessary. For such a hospital visit one has further to go ough the Agent to the authorities to obtain permission to go beyond e port area.

Below are some soundings of the roads. The vessel's draft = 8.35 m. st bearing is Nampo Ki, second bearing is the pier light, fixed red, in nt of the East pier:

ather nd)	*Bearing*	*Time* (GMT)	*Measured depth, taking into consideration vessel's draft* (m.)
8 knots	344°, 38°	2330	21.15
8 knots	355°, 42°	0130	19.93
5 knots	355°, 39°	0715	15.97
5 knots	343°, 37°	0900	18.41
9 knots	340.5°, 38.5°	2330	21.15
5 knots	343°, 39.5°	0100	21.46
culating nots	324°, 41°	0430	16.88
13 knots	339°, 37°	0000	21.46
20 knots	357°, 40.5°	0300	19.93
Weather (Wind)	*Bearing*	*Time* (GMT)	*Measured depth, taking into consideration vessel's draft* (m.)
290° 10 knots	345°, 40°	0840	18.43
Circulating 5 knots	360°, 45°	0640	16.58

The pier structures have shuttering walls at the bottom, and the upper part is composed of equal-shaped stone blocks. At the mooring points fenders are composed of car tyres strung together on wires. The pier itself is in a satisfactory condition. Rail connection is available, and lorries may run along it. Water connections are also available. As the two cranes on pier Berth No. 1 have very large beams, they are often positioned between two hatches and then work the two hatches alternately.

Loading and unloading is made difficult since it is not possible to obtain precise information as to the number of gangs, the time they will turn up for work, whether they will work with their own equipment or with cranes or with the mobile cranes available. It continually happens that suddenly port workers will appear or disappear, although shortly beforehand the Agent will inform to the contrary.

Telephone connections with Europe are possible. Connections can be obtained at the Seaman's Club in the port after 1600 hrs. On average it takes an hour to get through. It is advisable always to try to get a line to Moscow, and then ask for the required connection oneself in English from the Moscow operator. This noticeably hastens the connection. Comprehension is at times very bad, calculation of charges is dreadful, and one must be prepared to pay three or four times the price as would appertain for a similar call in Europe.

The local currency is the Won. 1 US dollar = approx. 2.15 Won. In the Seaman's Club all customary Western currencies can be changed into Wons.

Loading rigging can be positioned from the ship. If for example this has to be done at night, it must be discussed in advance with the Agent as to whether this has to be done by the ship or the port personnel. If the rigging is done by the port personnel, it must be checked carefully.

Clearance outwards occurs in the harbour roads and not at the pier. It takes a good 3 to 4 hours. Here also, all crew members must be in their cabins for checking purposes, and if the authorities require it, personnel must be available to guide them around the ship. On leaving the port, yet another list must be presented of currency which each crew member has spent in Korea.

They are only interested in foreign currency which has been exchanged for Wons in the Seaman's Club, since Wons may not be exported.

On the journey out from the port, the Pilot is accompanied by an assistant and member of the coastguard. The latter, shortly after coming on board, removes all seals from apparatus sealed when coming into port. The Pilot leaves the vessel at a position Lat. 38° 35′ 5″ N. and Long. 124° 55′ 5″ E.

Herewith some soundings, taking into consideration draft of vessel. First bearing – pier light East side Hibatsu To – fixed red. Second bearing chimney at Lat. 38° 44′ 1″ N. and Long. 125° 25′ 9″ E. (shown on the chart as Chy.)

GMT	*Weather*	*Bearing*	*Line sounding* (m.)
0030	Calm 1022 mb	338° 43°	21.78
0130	Calm 1022	338° 42°	24.79
0430	Changeable 1022	335.5° 40°	21.03
0530	250° 14 knots 1022	312° 38°	24.18

SHIPMASTER'S REPORT: No. 3

VHF: Agent "KOSA" can be contacted on Channel 16. Generally port (Pilot, etc.) do not communicate with the ship directly. All communications (VHF) to be done through "KOSA". General watch keeping time (VHF) – 0900 hrs. to 1030 hrs.; 1200 hrs. to 1300 hrs.; 1400 hrs. to 1630 hrs.; 1900 hrs to 2100 hrs. and 2330 hrs. to 0030 hrs.

FRESH WATER: Also available from shore connections alongside in Berths No. 1 and No. 2.

SURVEYORS: State surveyors of D.P.R.K. (Democratic People's Republic of Korea) available. Survey fees about U.S.$1,900.00 per visit.

REPAIRS: Facilities available.

New Dry Dock: is in operation which can handle ships over 180 m. in length. *Shipyard* builds ships (2 – 3 ships at a time) of moderate size (about 10,000 d.w.t.).

Dry Dock/Shipyard Workshop undertake ships repair. They have boat fully equipped with diving equipment and diver.

Factory Engineer/Technician (Electronic) undertake Radar/Echo-sounder/VHF repairs.

GENERAL:

Marine Note of Protest: No Notary Public or Court of Law. Masters wishing to lodge a "Note of Protest" can write to the Harbour Master who will endorse his (Master's) letter.

People strongly object calling their country "North Korea", it is to be called Democratic People's Republic of Korea.

Fresh Provisions: Fresh provisions also available through the ship chandlers (owned/controlled by the Government). It is advisable to take stores through the seaman's club, where quality can be checked before the provisions supplied on board.

SHIPMASTER'S REPORT: No. 4. May 1986.

Korean Regulations require foreign vessels to stay 15 miles off coast until abreast of port and we were tracked from 37° 00′ N., Northwards to ensure that we did so. As well as ETAs at 5 days, 24 hours, 12 hours and 4 hours before arrival at pilot station, vessel required to report position and speed 24 hours before and on crossing Lat. 37° North.

Approached Sei To Island on course 075° on flood tide with very strong Northerly set and carrying 15° for set to clear shoals to the North. Passed Sei To at 1.1 miles and 7 cables North of Hoko To then course 050° between red can buoy marking Southern end of Chu Shu or Naka Su and black conical buoy marking Northern limit of Kashi or Shimo Su, then 055° to Pilot Station No. 1 and waiting anchorage North of Shimai To. Neither of the above buoys appeared to have lights and were poor radar targets, so approach at night not advisable.

Instructed by cable from Agents (KOSA) to anchor at No. 1 Pilot Station to await Pilot, who arrived unexpectedly after only 2 hours at anchor. We could hear Agents KOSA on VHF Channel 16 but they did not answer.

2 Pilots, 2 Immigration Officials and Port Health boarded from tug which came out from Shimai To. Clearance to enter procedure carried out here which included placing all cameras and binoculars in radio room and sealing the door, took about one hour. The 2 Immigration Officials stayed onboard for passage up river. Echo-sounder sealed but not radars.

Channel to locks at Hito Suido passes close Northwards of Shimai To, 067° through No. 2 pilot station and waiting area to 8 cables N.N.W. of San To, thence straight course to locks.

The damming of the river and the river sealed off from the sea was completed in April 1986. The old main channel (Hito Suido) South of Hi To Island closed with sluices and three locks. Two for large ships in way of the old deep water channel, of which the largest is 270 m.×36 m. and a small lock for fishing vessels close to the Southern shore. The 2 main locks are side by side with a large control tower and large swing bridge on the centre dividing islands, which is extended East and West by 100 m. long leading jetties on piles. Leading jetties have vertical wood fendering against piles and locks have floating wood fenders for full length, both sides. One tug available to assist large ships to enter lock.

East of locks, channel close to South bank to avoid shallow patch in mid-river for first 3 miles, after which appears to be plenty of water for virtually full width, expect changes in the future though, with silt washing down river which cannot pass dam.

We went straight on to berth and the rest of the entry procedure which took 2 hours carried out, normally this is done at anchor before berthing. Papers required were as previous Master's Reports in 'Guide to Port Entry'. All Cholera vaccinations must be valid and all foreign currency must be declared. Before sailing a list is required of all foreign currency changed, which is readily possible at the Seaman's Club, all Hotels and most of the shops in Nampo amd Pyongyang.

Officials searched ship thoroughly on arrival. They require 4 Officers/men to accompany searches, with their passports, and all other personnel have to be in their cabins. Even deck stores and engine room searched. The same procedure takes place before sailing, but this time they are looking for stowaways and Korean currency which it is illegal to take out of the country.

Shore leave for ship's crew is only allowed between 0700 hrs. and 2300 hrs. local time daily and only inside port area, which includes Seaman's Club. Even for this, shore passes and passports must be taken, which are checked by guard at foot of gangway, on and off. Special permission has to be obtained for visits to Nampo City or the capital Pyongyang. This is readily given, though always accompanied by an official guide from either the agency or the Seaman's Club. We were allowed cameras out of seal for a guided tour of Pyongyang, but they were returned under seal, immediately on return to the ship.

Taking of soundings with hand lead, making drawings or sketches of anything in port area, visiting other ships, taking radios or tape recorders on deck and taking anything ashore without declaring to Customs are all strictly forbidden.

Garbage is collected from ship every 3 days, which service has to be paid for (about 300 Won each time). All garbage must be kept in closed bins, and nothing must be thrown overside.

Very keen on rat guards and net under gangway.

Fresh water readily available by barge, in 90 tonne quantities. Seemed to be of good quality though quite expensive (4 Won per tonne).

The Seaman's Club provides chandlery and laundry services. Good fresh vegetables available.

Rate of exchange (May 1986) 2.2 Won to US dollar and 3.4 Won to Pound Sterling.

Bulk handling berth consisted of three large concrete dolphins on steel pillars and joined by steel girders, on which tracks for bulk handling equipment run. Connected to shore by narrow walkway only. Total length of berth about 150 m. so stern was overhanging.

Berth equipped to discharge grain and to load bulk cement (cement being the largest export from the port).

Cargo of bulk wheat was discharged by three methods:-

1). By vertical belt lift to conveyor belt, thence to silo.
2). By ship's grabs via hopper to conveyor belt, thence to silo.
3). By ship's grabs to barges overside.

The majority of cargo being discharged by the latter two methods as, though the vertical lift belt was the fastest when working, it was continually breaking down. Also best work done at night as there was frequently a shortage of shore electrical power during the day.

Draft survey carried out to confirm quantity discharged and surveyor signed a statement to the effect that full B/L quantity discharged. Vessel not given clearance to sail until this had been done.

Although nearly everyone from the agency (KOSA) spoke good English, there was nobody from stevedores who did and consequently ship's personnel had very little control over which hatches were worked and when.

Agents: Korea Ocean Shipping Agency (KOSA) very attentive a said to have 24 hour Channel 16 VHF watch in their office, though th was not put to the test outside normal working hours. Requests f everything has to be by written application, i.e. money, fresh water, rep firm, etc.

SHIPMASTER'S REPORT: No. 5. August 1986.

ARRIVAL: *Pre-arrival notices:*
The state Agent, Korea Ocean Shipping Agencies, cable addre "KOSA" will send by cable, instructions regarding reporting position sea before arrival. In our case we had to send position 24 hour 12 hours and 4 hours before arrival at pilot station together with cou and speed.

The position is also to be sent when crossing a line joining the follow positions:

Lat. 40° 00′ N., Long. 123° 20′ E.
Lat. 37° 00′ N., Long. 123° 20′ E.
Lat. 37° 00′ N., Long. 126° 30′ E.

The coast must be kept at a distance of 15 miles until the approa to the Island of Sei To (Lat. 38° 33′ N., Long. 124° 46′ E.)

Note: North of Lat. 37° 00′ N., the ships are challenged by Korean Na vessels either by VHF or Morse Lamp. They request ship's nam nationality, cargo on board, destination, port of origin. Sometimes th approach close to vessel (3 – 4 cables) to check the name with power projector.

PILOTAGE/APPROACHES: *Pilot boarding anchorage:*
After passing Sei To Island the ship proceeds to the pilot wait anchorage bounded by the following positions:

A. Lat. 38° 41′ 24″ N., Long. 124° 59′ 12″ E.
B. Lat. 38° 41′ 54″ N., Long. 124° 58′ 06″ E.
C. Lat. 38° 43′ 06″ N., Long. 125° 00′ 24″ E.
D. Lat. 38° 42′ 06″ N., Long. 125° 01′ 36″ E.

The tide is very strong but the holding ground is good, pay o sufficient chain to avoid dragging.

Approaches: The red buoy on the SW end of Naka Su Shoal, to be l on the port side when entering, is in position 37° 36′ 51″ N 124° 50′ 42″ E. (7 cables S.W. of charted position).

The black buoy, starboard hand, 2 miles NE, is 3 cables WSW of th charted position.

The black buoy 1 mile N.E. of Shimai To Lighthouse has been change to red and is in position (A) of the waiting anchorage (38° 41.4′ N 124° 59.2′ E.).

LOCKS: A dam has been erected across the river from a positio (approx) 38° 43.4′ N., 125° 14′ E. in a SW direction to the '5 14 wreck East of Hi To Island, then in a 263° direction to the Datum Roc (38° 40.8′ N., 125° 11′ E.) The area between Datum Rock and Hi T Island has been reclaimed and a large esplanade built.

Another dam with gates join Hi To Island to the mainland in a SS direction (198°). 3 locks have been built on the SSW part:

Lock No. 1: The SSW most, is used for barges.

Lock No. 2: In the centre, is for large vessels up to 50,000 d.w.t., th dimensions are 275 m.×36 m. A training wall extends on both ends o the lock on the Northern part. The walls of the training wall are protecte with wooden fenders, the lock has floating wooden fenders.

Lock No. 3: The Northernmost is for medium size ships, th dimensions are length 225 m. and beam 26 m. 2 ships can b accommodated at the same time.

Note: The lack of co-ordination between the Lock Master and Authorit operating the gates of the dam is frightening, when the gates are opene a very strong current sets across the Western part of the lock and it i impossible to leave the lock as the ship is pushed toward the shallo water still existing just outside the lock. Small craft may try to enter th lock when the gate is opened.

A road and railway line on the dam and lock system through a swing bridge.

2 tugs are available to assist large vessels to enter the lock.

We entered the lock in loaded condition with a draft of 10.00 m. witho any difficulties. Our vessel is 37,500 d.w.t.

The locks have been operating since April and the Pilots do not hav much experience.

A very tall monument stands on Hi To Island.

PORT: See "Plan". Since the building of the dam there is no tide in th port and the current is negligible.

Salinity is lowering. At the time of our stay it varied from 1009 to 100 it is said that in future it will be completely fresh water.

5 new berths have been built over the last 5/6 years in addition t Berth No. 1 and No. 2 in Hibatsu To.

Berth No. 3 extends in a Northeasterly direction for 220 m. from th light in position 38° 43′ N., 125° 24.6′ E. There is about 11 m. dep alongside the berth 2 cranes of 5 tons are available.

Berth Nos. 4 and 5 are inside a basin just North of Berth No. 3 an are used by barges.

Berth No. 6 (NE of Berth No. 3) is formed by 3 large platforms equipped with 2 discharges and one loader for grain. There are minim depths of 11.5 m. on the inside part of this berth (where we discharge most of the cargo).

Berth No. 7 (Eastward of Berth No. 6) is about 340 m. long. Ber No. 7 has minimum depth of 6.0 m. at the Eastern part and is used f general cargo. It also has a fixed hopper connected by belt to a si The berth is equipped with 2 cranes of about 5 tons capacity.

Berth No. 8 is equipped with 3 special loaders for cement in bags probably has a minimum depth of 11 m. as we have seen vessels loadi up to a draft of 10 m.

Berth No. 9 (further Northeastward) is a loading berth for coal and about 180 m. in length with depth of more than 12 m.

One loader runs on the pier for loading of coal in bulk.

es: Cranes and equipment for handling grain are locally built and ject to frequent breakdowns. Safety guidelines are absolutely ignored he stevedores who use wires and equipment of poor quality.

Electric cable connections are exposed to the weather.

gulations: Port Regulations must be strictly followed and ships are ject to heavy fines for non observance of the regulations. Pollution strictly prohibited. In future the discharge of sewage into the water ll be prohibited.

eneral: There is another berth further upriver to discharge iron ore at steel factory but details are not known.

The Agent KOSA has a VHF radio operating day and night.

Binoculars, ship's radio station and echo sounder are sealed at waiting nchorage, Radars are left open for operation.

HIPMASTER'S REPORT: No. 6. December 1986.

Vessel called at Nampo with a cargo of bulk wheat from India (about 2,400 tonnes).

1. The Nampo pilot ground has been established in an area enclosed the positions:

a) Lat. 38° 41′ 24″ N. Long. 124° 59′ 12″ E.
b) Lat. 38° 41′ 54″ N. Long. 124° 58′ 06″ E.
c) Lat. 38° 43′ 06″ N. Long. 125° 00′ 24″ E.
d) Lat. 38° 42′ 36″ N. Long. 125° 01′ 36″ E.

2. The binoculars are put away under seal, also the use of nsmitters and echo sounders beyond the lock gate is forbidden.

3. Vessel berthed at Berth No. 6, and the Pilot informed me that a m. fresh water draft is safe.

4. Berth No. 6 is a mechanised berth serviced by 2 conveyor belts nd claims of a discharge rate of 3,000 tonnes per day. There are, owever, breakdowns and we managed about 1,000 tonnes per day ith a high of 1,400 tonnes per day. A silo receives the wheat and has a apacity of 20,000 tonnes. Berth No. 6 is also the loading berth for bulk ement, serviced by one loader. Supposedly a load rate of 3,500 tonnes er day can be achieved. The storage facility for the bulk cement is a lo of 60,000 tonnes capacity.

5. Galley garbage is cleared every 3 days. The Harbour Authorities re strict and among other things are very particular about rat guards eing in position and the satisfactory operation of sewerage treatment ants.

6. The Agents are co-operative and helpful, and going by earlier asters' reports, I think there is vast improvement in telex and telephone cilities.

7. Agent's cable address: Kosa Nampo.

ENBONG: 42.20 N. 130.24 E.

HIPMASTER'S REPORT: March 1987.

OCUMENTS:
8 copies Crew Lists (One additional copy required for each application for shore leave and an additional 2 copies on vessel's departure).
4 copies Vaccination List.
2 copies International Maritime Declaration of Health.
2 copies Crew Declaration.
2 copies List of Valuables and Currency.
1 copy Bills of Lading.
o be presented on arrival:
Vegetable form indicating quantities and country of origin.
Cameras and binoculars form.
Local health form.

LOTAGE: Compulsory for foreign ships. There is no VHF response ior to arrival at pilot station. Pilot boards from tug.

NCHORAGE: Bounded by following points:

2° 17′ 00″ N.	130° 26′ 30″ E.	42° 17′ 00″ N.	130° 19′ 00″ E.
2° 15′ 30″ N.	130° 26′ 30″ E.	42° 15′ 30″ N.	130° 29′ 00″ E.

Pilot and Health Officer board in this area.

ESTRICTIONS: VLCC movements only carried out at night and during oor weather conditions with the Harbour Master's permission.

EALTH: No Radio Pratique. Doctor boards with Pilot and Immigration fficers. All vaccination certificates checked for validity, any expired oculations given. For hygienic reasons, ship supplied disposable podermics. If any crew joined vessel within preceding month, all ersonnel to have temperature taken by Doctor.

ADIO: Call Radio Station HMR (Ragin) on 500 kHz between 0800 hrs. nd 2400 hrs. (local time). When out of range, messages sent via VPS ong Kong.

rival Advice: All communications for Port and Pilots to be sent via gents (36 hour, 24 hour and 12 hour messages). Initial message to clude present position, speed, DWT, GRT, NRT, LOA, Breadth, umber of crew and confirm Democratic People's Republic of Korea flag n board. After initial report, send position reports every 4 hours.

HF: We were informed after arrival that VHF contact is possible, but cal operators only respond to Russian and Korean languages. We ade very brief contact with Pilot when tug 0.5 miles off.

UGS: 1 × 1,000 h.p. and 2 × 800 h.p. tugs available. Aft tug makes st using ship's line, which should be of the floating type. One tug is ed to keep buoy mooring lines coiled on deck.

ERTHING: S.P.M. located in approximate position 42° 18.3′ N., 0° 25.5′ E. and shows LF.2R.12s. There is an inner harbour for aller vessels bunkering, size not known.

EDICAL: Hospital and dental facilities available at Rajin. 24 hours tice required for Immigration.

TANKERS: S.P.M. has 1 × 16 in. hose string which is connected and disconnected by shore personnel. Maximum back pressure allowed at ship's rail is 9 kg. Loading rate averaged 1,300 t.p.h. Shore tanks of 20,000 tons capacity are located approximately 7 km. from the buoy.

Moorings: Two buoy ropes of 130 mm. diameter are made fast on bitts. Ship lowers 2 mooring ropes with lashings and messengers to small line boat which then passes them to a tug near buoy.

DENSITY: 1025.

FUEL: I believe fuel is available to vessels using the port if advance notice given. There is an inner harbour draft restriction of 7.50 m. Barges not available.

FIRE PRECAUTIONS: Minimal, vessel carried out own checks.

CUSTOMS ALLOWANCE: 200 cigarettes, 1 bottle of spirits, no limit for beer. Bonded store not sealed.

TIME: GMT plus 9 hours.

STORING: Small amounts of fresh produce are available, depending on time of year. Payment in cash (U.S. dollars) is preferred.

SHORE LEAVE: Application to be made to Immigration 24 hours in advance. Crew only allowed to visit Seamen's Club in Rajin. Bus takes crew from jetty to Club where crew must remain until return journey. Shore pass and Seaman's Book to be carried at all times. These are checked by Immigration on the ship and on jetty outward and on return.

GENERAL: The initial Quarantine and Immigration inspection takes two hours, therefore it is advisable to anchor.

Immigration Officials seal radio, cameras, binoculars and distress rockets. They also require radars and depth recorder to be sealed but were persuaded to leave this until vessel berthed for safety purposes.

Once berthed, Customs, Agent, Harbour Master, Receivers, S.P.M. Operators and Interpreter board, at which time there is a second Immigration and Customs inspection of whole ship.

Accommodation required for 11 persons and meals for 15 persons. Officials come and go daily.

Prior to departure there is a Customs and Immigration inspection. Once completed, Harbour Master issues Clearance Certificate.

Two Immigration Officials remain onboard until vessel drops Pilots in Quarantine Area.

Pilot remains on bridge throughout discharge and controls the tug which is secured at the stern to keep the vessel off the S.P.M.

Chart: BA. Chart No. 2431 (Unggi).

Agents: Korea Shipping Agency, Rajin Branch. Cables: "KOSA RAJIN". Telex: 6204 RJKP. Telex manned during office hours only.

NOTES

Please also advise Shipping Guides Ltd.

Republic of Korea

GENERAL:

FOREIGN FLAGS: Ministry of Transportation issued following instructions regarding entry and exit of foreign flag vessels in Republic of Korea waters.

Item 1: Director, local Marine Bureau shall not grant permission for entry of foreign flag vessels under ownership of North Korea, Vietnam and China.

Item 2: Director, local Marine Bureau shall not grant permission for entry of foreign flag vessel bound for North Korea or falling short of 90 days of departure from ports of North Korea.

Item 3: No restriction shall be applied for entry of foreign flag vessels unless same appertained to above clauses in accordance with internationally accepted practices.

ETA: The following requirements apply to vessels carrying dangerous cargoes, deep draft vessels and vessels and their tows exceeding 200 m. in length. Such vessels should inform the District Maritime and Port Authority, 12 hours in advance, of their name, tonnage and estimated time of entry into the designated area of the following ports: Yosu, Pusan and Ulsan.

HEALTH: Radio Pratique is available at Inchon, Busan, Yosu, Ulsan, Pohang, Masan, Mokpo, Gunsan, Chungmu, Bukpyong and Cheju.

Masters are required by the Ministry of Health and Social Affairs to include in a telegram requesting Radio Pratique the following information in the order shown:

1. Notice in accordance with Art. 22 (RPM).
2. Name and nationality of vessel.
3. Number of sanitary certificate.
4. Date and place of departure.
5. All ports of call with dates.
6. Name of entry port and ETA (Korean time).
7. Name of issuing authority, date and validity of fumigation certificate.
8. Number of crew and passengers on board.
9. Any transhipment of crew or cargo within 7 days prior to arrival.
10. Name of any patient on board ill within 7 days of arrival and symptoms.
11. Any death on board within 7 days of arrival.
12. Discovery of infected rats, dead or alive.
13. Infection of cargo by quarantinable disease.
14. Any crew or passengers without valid WHO innoculation certificates.
15. Availability of doctor on board.
16. Name of Master.

TIME: GMT plus 9 hours. Summertime (GMT plus 10 hours) from second Sunday in May until second Sunday in October.

BUKPYUNG: 37.29 N. 129.08 E. (See Plan)

SHIPMASTER'S REPORT: June 1982

LOCATION: Bukpyung (Lat. 37° 29.5′ N., Long. 129° 08.5′ E.) lies some 5 miles to the South of Mukho, it has been under construction for the past 4 years and now ranks as the third largest port (by tonnage) in Korea. The port consists of 2 breakwaters extending from the shore and has been constructed primarily for the export of cement in bulk, clinker and bagged forms.

The port is linked to the Donghai Cement Plant which in itself is the largest unit cement factory in the world with an annual production capacity of 8.7 million tons.

This report is mainly directed to the facilities associated with the export of cement, however where possible relevant information has been included which could prove useful to other vessels trading in the area.

PORT LIMITS: Approximately 1 mile radius off the port but mainly to the North of the E./W. Line, passing through the South Breakwater Light. Port limits are indicated on Korean Chart No. 141.

DOCUMENTS:

6 Crew Lists (on blank paper).
3 Vaccination Lists.
2 Port Itineraries for past 6 months.
2 Passenger Lists.
2 Arms Lists.
2 Drugs Lists.
3 Personal Manifests.
3 Cargo Manifests.
3 Stores Lists (including fuel on arrival).
3 Bonded Stores Lists.
Korean Maritime Declaration of Health.
Various Korean entry forms.

PILOTAGE: Generally operate from 0600 hrs. – 2100 hrs. 3 Pilots available and appear quite competent. As an exception they will sail vessels up to 2200 hrs. from the berth. Small pilot launch painted white. No VHF (1982). Pilot ladder required almost to the water, no manropes.

In heavy swell the Pilot refuses to come out to the vessel and no dispensation is given for the vessel to come under the lee of the North Breakwater to pick the Pilot up, even though there is ample room. Pilotage is relatively simple with a wide deep water entrance to the port and a large swinging basin.

APPROACHES: B.A. Chart 882, also Korean Chart 141. Best to run up 5 miles off the coast to keep clear of 3.5 fathom patch reported in position Lat. 37° 28.5′ N., Long. 129° 13.0′ E., then alter course to 270° for approaches to anchor area off the port.

ANCHORAGE: Recommended anchorage about 1 mile to 1.5 miles off the breakwater in about 12 fathoms to 14 fathoms of water. We anchored with South Breakwater Lt. Ho. bearing 180° (T)×1.27 miles, with 7 shackles down on the port anchor and happily rode out a day of wind in excess of 40 knots, though engines were kept on immediate notice. A confused back swell is sometimes thrown off the breakwater during strong onshore winds. Bottom mainly sandy with some rocks. Ample visual and radar targets available to check anchorage position.

MAX. SIZE: No limitations to length or beam. Max. draft 11.8 m. (SW).

HEALTH: Quarantine Officials generally attend at the anchorage and inspect store rooms, galley, etc. Derat sighted and Vaccination List required. Korean Maritime Declaration of Health made out. Pratique granted. Various vaccinations can be obtained at the Port Health Office at Bukpyung. The doctor/nurse will not attend onboard to do injections. No specific vaccinations required for Bukpyung unless vessel from infected area.

RADAR: No port radar at present.

VHF: Bukpyung Port Radio operates on Channels 16 and 12. Daylight operations only. Initial contact is made via this station and arrival time and ships' particulars noted. Berthing instructions are generally relayed through Mukho Radio, VHF Channels 16 and 26 from Agents. Local and overseas calls are also possible through Mukho, with a 24 hour watch kept.

TUGS: Three available: 2×2,000 b.h.p. and 1×1,000 b.h.p. Make fast with tugs' lines with the tugs joining vessel just inside the breakwater. There are an additional 2 tugs at Mukho (5 miles to the North) and these will work at Bukpyung if required. Communication with tugs is by walkie talkie.

BERTHING: Vessels generally berth port side alongside the South Pier (Ssangyong) and starboard side alongside the North Pier. Tugs join just inside the breakwater, the offshore anchor is used when off the berth. Boat takes the headlines only. The North Pier is more exposed than the South and a substantial tie up is recommended. The bollards are 25 m. apart and the jetties very well protected with modern horizontal rubber type fenders. The gangway can be swung out prior to berthing with no obstructions to cause damage. South Pier length 735 m., North Pier length 540 m.

Present Capacity: 4×30,000 d.w.t., 1×10,000 d.w.t. and 4×5,000 d.w.t.

Additional Future Capacity (1986): 6×50,000 d.w.t., 1×20,000 d.w.t. and 1×10,000 d.w.t.

BULK HANDLING FACILITIES:

Coal: One coal berth lies at the seaward end of the South Pier, whilst the other berth is at the inner end of the North Pier. Vessels use their own cranes and grabs for discharging the coal onto the quayside whereupon it is handled by payloaders and loaded into road trucks. Discharge rate is in the region of 5,000 tonnes per day but could improve if more payloaders were brought in to handle the quayside operation. Generally speaking, only two payloaders are used at any one time. Road trucks carry the coal to a stockpile 3 miles away and there appears to be ample supply of trucks available. The final few hundred tonnes in each hatch is shovelled by stevedores into savealls and rubber mats. No bulldozers are available for hatch work.

If a vessel is not equipped with her own grabs then the complete discharge is handled using savealls and manpower. Using this method a discharge rate of about 3,000 tonnes per day could be expected. The crane drivers are quite competent and stevedores helpful. Any damage to ship can be repaired on the spot and stevedores accept full liability.

Bagged Cement: Two companies export cement from Bukpyung, Ssangyong Corporation, the largest, operate from the South Pier whilst Tongyan M&G work off the North Pier. Ssangyong have the facility for loading clinker/bulk and bagged cement by conveyors and loaders. Tongyan can only handle clinker and bulk cement by loader, any bagged cargo being handled by ship's gear.

The Ssangyong export terminal serves the largest unit cement plant in the world with an annual production capacity of 8.7 million tons. The main plant, situated a few miles away at Donghai, is linked to the port of Bukpyung by an extensive conveyor system. Further conveyors link the storage facilities to 2 ship loaders (for bagged cargoes) and 2 spout loaders for clinker and bulk cargoes.

The bagged ship loaders were each rated at 150 tonnes per hour though actual loading rate worked out at nearer 75 tonnes per hour, with both loaders suffering occasional breakdowns. In addition to the loaders ship's cranes were also used to lift bagged cement directly from lorries. In all, 5 gangs were used (2 loader and 3 crane) and a daily load rate of about 4,000 tonnes experienced. The cement was bagged in triple skinned paper/polythene and very little breakage was observed, the loader however throws off some cement dust and the ship receives a liberal covering.

The bagged cement was initially ordered, by Charterers, in nett weight i.e. bags each weighing 50 kg. (gross 50.17 kg.), however as loading progressed it became obvious that the actual weight loaded was considerably more than that tallied aboard. On checking the actual weight of a number of bags, all were found to be in excess of 50.50 kg. (gross). Initial instructions from Charterers required the vessel to load a cargo geared to a limiting draft of 32 ft. at the discharge port, but when realising the full shore tally weight could not be lifted then authorisation was received to load the shore figure. By shore tally and Bills of Lading we loaded 490,000 bags cement at 50 kg. nett per bag equalling 24,500 tonnes.

Actual deadweight on board by draft survey showed some 24,886 tonnes of cargo. One per cent. of spare bags were also loaded with the cargo.

The bagged cement was pre-slung wherever possible in the hatch to facilitate a quick discharge, the discharge port, was not nominated however, this depending upon the number of cement ships discharging on the Indian coast. Ahjin intend sending a supercargo to India to assist in the discharge.

No problem exists with the loaders regarding height clearance over the coamings, however conversely if the vessel is too deeply ballasted then the base of the shoot cannot reach the tank top and it is then necessary to de-ballast to bring the ship up to the loader.

Cargo manifests, etc., were prepared, by the Agents, prior to sailing. ormal procedure is to authorise Agents to sign Bills of Lading on aster's behalf.

Stevedore companies: Ssangyong Cement Co. Ltd., Tongyan M&G Co. Ltd., Korea Express Co. Ltd.

EDICAL: Doctor and hospitals situated at Mukho some 5 miles away. gents will arrange car to transport crew members to and from doctors. edical attention is quite expensive. Medical reports issued on request. n ambulance service is available if required.

RESH WATER: Available by barge in 100 tonne quantities.

UEL: Supplied only by barge either alongside or whilst the vessel in he anchorage. The bunker barges are not equipped with heaters and onsequently the pumping rate very slow (about 90 tonnes per hour for eavy oil and 120 tonnes per hour for diesel oil). Each barge has a apacity of about 400 tonnes; No blending on the barge, this being erformed at the refinery. The barges generally sail up from Pohang nd have to clear customs formalities at Bukpyung. Fenders on the arges are virtually non-existent and if taking bunkers at the anchorage n any kind of weather extra tyres etc., should be used. We were supplied y Korean Marine Bunkering: Seoul 776-8531.

EPAIRS: Engine and general dock repairs possible from Donghai arine Engineering Co. Ltd. The company has a staff of about 12 and re capable of handling most repairs. Welders are Korean registered. arious Customs formalities have to be completed before spare parts re removed from the port area. Prices appear reasonable though ightly higher than Ulsan and Inchon. Radar repairs can be arranged ith ample notice. Chemical cleaning of heaters, etc., can be arranged.

URVEYORS: Local Korean inspectors/surveyors are available at ukho for draft surveys, on/off hire surveys, etc.

Lloyd's and Bureau Veritas are available from Seoul and will attend essels at Bukpyung if necessary, with ample notice.

ATCHMEN: Available from Sanghyup Kongsa (again) recommended ainly for their ability to use telephone especially with the Agency 5 miles away. Cost about £12 per day.

USTOMS: Attend on berthing. Quite casual and friendly. Spirits and igarettes sealed though beer and wine left unsealed. Normal llowances per person and an issue available after vessel has been in ort for 5 days. One Customs Officer remains on the vessel during the tay in port, he requires a cabin and meals. Drugs are also sighted and ealed.

EPATRIATION: No difficulties in this area. Seoul some 300 km. away s served by an express bus service. Sub-Agents liaise with main Agents nd all repatriations seem to run smoothly. An overnight stay is normally rranged at Seoul for incoming and outgoing crew members though this epends on flight times. The journey between Bukpyung and Seoul takes bout 4.5 hours. It is necessary for joining crew members to fill out a ersonal manifest once aboard the vessel, this is collected prior to ailing.

OLIDAYS: See "Inchon".

Arbor Day (April 5th) is also an official holiday at Bukpyung. Work is ossible during all holidays.

ELEPHONES: Available at all berths. Only local calls taken.

HORE LEAVE: No restrictions, no curfew.

ENERAL:

eather: Refer to Pilot Book.

During the latter part of March and April long periods of relatively calm eather were disturbed by severe Lows and Fronts causing strong on hore winds and high seas. During these periods the port remains closed r berthing vessels, though sailing is possible. Smaller ships in the nchorage generally steam offshore during these periods.

tores: Fresh supplies and all chandlery items supplied by Sanghyup ongsa Co. Ltd., Bukpyung (the only chandler in the area). Fresh egetables, fruit, fish, etc., are in plentiful supply locally. Deck and engine tores also available in the area, though more selective items can be btained from Seoul. Local supplies are reasonably priced, though meat xpensive. Bonded stores are also available. Medical supplies can be btained from Seoul as well as current BA. Charts and Admiralty ublications. These again are quite expensive.

mmobilisation: Possible with Port Authority approval.

ort Regulations: Bukpyung also serves as a naval port and onsequently no photography allowed. No written port regulations. ainting over the side not allowed for fear of pollution, similarly no ainting allowed from the quayside.

aunch Service: A launch service is available from the anchorage and s useful for crew repatriation. It can also be used for shore leave, once essel has been cleared, though price is unknown.

arbage: Arranged by Agents, taken away from ship by road truck. ubbish should be retained on board, even at the anchorage, various aval craft regularly patrol around the port area and anchorage.

onsuls/Notary: No Consular offices at Bukpyung or Mukho, it being ecessary to travel to Seoul for these purposes. It is also impossible to ote Protest at Bukpyung or Mukho.

aundry: Adequate laundry facilities exist at Mukho, again arranged by anghyup Kongsa Co. Ltd., a 24 hour service is available.

leaning Gangs: These are available and will clean hatches between argoes. It is not possible to pump out hold residue whilst alongside. leaning gangs do not generally work at night so some pre-planning equired if vessel to discharge and load at the same port. Work requires onstant supervision. Labour for the gangs picked up off the street.

mmigration: All passports inspected: Shore passes issued for all crew embers and these renewable every four or five days. No Curfew exists t Bukpyung or Mukho. It is necessary to pass through Customs Office nd Immigration Office before leaving the port area. Again all mmigration Officials most helpful and friendly and eager to practise their nglish. Shore passes collected prior to sailing before obtaining learance.

ir Freight: Little difficulty in obtaining spare parts, air freight etc., from ther countries. Main Agents at Seoul arrange necessary customs learance and transport.

Agency: Main Agents at Bukpyung: Chokwang Shipping Co. Ltd. They are sub-Agents for most of the main Korean Agencies. Their office is situated at Mukho. With the number of vessels entering and using Mukho and Bukpyung they are kept extremely busy, however all Agency work is eventually attended to and their services are quite satisfactory. Telex and telephone facilities exist at their office, most telexes are directed through the main Agents in Seoul, however a direct line can be obtained if necessary.

SHIPMASTER'S REPORT: November 1985.

On British Admiralty Chart No. 882 BUKPYUNG. Name seems interchangeable on signs, etc.

The anchorage off the port between 0.5 – 0.75 miles W.N.W. of the South Breakwater Light seems good but exposed to E'ly weather. A good swell was running when we anchored off and vessel did not berth for 24 hours. Contact could be made with Agents through Mukho Radio on VHF Channel 16, switching to Channel 26. Language is a problem.

Panamax bulk carriers are the largest vessels taken at the port. Max. permitted draft 12.5 m. 2 moderate powered tugs and 2 small tugs. In bad weather would advise a panamax not to berth.

The commercial port is dominated by Ssang Yong cement works which exports over 2 million tons of cement a year. The bulk berth is clear and modern. Two grab dischargers are said to work 24 hours a day. But there are many stoppages. The jetty is well fendered, good bollards at approximately 100 ft. intervals. We would suggest 4 head/stern lines, 2 breast and 2 springs each end. Extra moorings in bad weather.

Pratique: Vessel was informed before arrival that Pratique was granted. After anchoring vessel was boarded and store rooms inspected, Derat not asked for. Pratique was again granted timed and dated.

Documents: Only Register asked for. Ship had made out stores, personnel goods, narcotic and arms lists on our paper and these were accepted. Only narcotics in Master's safe being checked. Shore passes were made out (by ship). These are required and checked at gate every time. Bond not sealed.

I was unable to Note Protest either here or at Mukho. No ABS surveyor available locally. Checked with Agent before lowering and running lifeboat for normal upkeep. I was informed that it was in order. A small naval craft wanted to arrest it shortly after it was lowered into the water and so we recovered it fast. Painting over the side is allowed.

Nearest airport at Seoul. There is an express bus service (5 hours) or train (6 hours) to Seoul.

Fresh water is available by barge. Bunkers, heavy fuels, diesel, lub oils, can be supplied if several days notice is given, I understand a coaster brings same from Busan.

BUSAN (Pusan): 35.07 N. 129.02 E.

DOCUMENTS:

9 Cargo Manifests.
3 Transit Cargo Manifests.
8 Crew Lists.
8 Passenger Lists.
4 Passenger Baggage Lists.
4 Mail Lists (forms supplied by Agent).
5 Parcels Lists (forms supplied by Agent).
2 Arms-Narcotics Lists.
2 Tobacco Lists.
4 Currency Lists.
4 Stores Lists.
4 Crew Personal Effects Lists.

Immigration: All Seamen's Books examined and shore passes made out. These passes to be carried at all times when ashore.

Certificates:

Derat Certificate or Exemption.
Inoculation and Vaccination Certificates for all crew members.

Shipmaster's Report: November 1988.

3 copies Transit Cargo Manifest.
8 copies Crew List (Customs).
10 copies Crew List (Immigration).
8 copies Passenger List, (if any).
2 copies Arms/Narcotic List.
2 copies Currency List.
2 copies Stores List.
2 copies Crew Personal Effects List.
2 copies Ports of Call List.

Quarantine:

1 copy Maritime Declaration of Health.
1 copy Vaccination List.

Immigration: Keep record of times of departure and returning to the ship of all crew members for handing over to Immigration.

PILOTAGE: Professional Pilot service is available at Busan and contact can be made by telephone No. 44-1651. Necessary for arriving vessel to notify Pilots of arrival 24 hours in advance. VHF unavailable. Formal address is: 15 4-Ka, Jung Yang-Dong, Jung-Ku, Busan, Korea. Blast signal from vessel used to call Pilots. Pilot boarding position Lat. 35° 04.25′ N., Long. 129° 07.17′ E.

Pilotage is compulsory and available day and night. Pilot boards off the entrance to the outer harbour. Pilot boat is white launch with pilot signals. Tugs cannot be employed unless Pilot is on board.

ANCHORAGES:

Designation	*Depth*	*Capacity*
S-anchorage	8-9 m.	4 vessels of 300-2,000 tons
E-anchorage	11-12 m.	6 vessels of 8,000-12,000 tons

RESTRICTIONS: Vessel having called at Communist ports within 3 months of contemplated entry of Busan needs to obtain permission of authorities.

MAX. SIZE: Max. size 50,000 d.w.t. LOA 330 m. Max. draft 12.5 m.

HEALTH: Pratique granted to vessels anchored in a circular quarantine anchorage located in Outer Harbour. Quarantine Inspection can be arranged by day or night if sufficient advance notice given although regular hours are sunrise to sunset. Valid Cholera Certificates required. Inoculations against typhoid and typhus may be required depending on prevalent conditions.

Quarantine Anchorages:
(a) Lat. 35° 05.14′ N., Long. 129° 07.34′ E.
(b) Lat. 35° 04.78′ N., Long. 129° 07.12′ E.

RADIO: Busan Harbour Radio Station: call sign, "6MF".

Vessels to submit ETA to Busan Port and Maritime Authority 72 hours and 24 hours before vessel's arrival, message also to include name of Owner and Agent. 3 hours before arrival vessel must communicate with Busan Port Control.

Radio-Telegraphy: Calling 500 kHz (operating throughout 24 hours), working 520 kHz, 512 kHz.

Radio-Telephony: Calling 2183.4 (operating throughout 24 hours), working 1881.4 kHz, 2320 kHz.

VHF: Busan Harbour Control, calling on Channel 16, working Channel 12, 14, 20 and 22.

RADAR: A radar station is sited in the Harbour Office to assist vessels approaching the port in poor visibility.

TUGS: Tugs join an arriving vessel immediately inside the breakwater of Busan Harbour. Ship's own lines are used. Tugs can join large vessels outside the breakwater. 11 tugs, 1,000 h.p. – 3,200 h.p.

BERTHING: Normally in daylight only.

SHIPMASTER'S REPORT: 1977.

LOCATION: Lat. 35° 09′ N., Long. 128° 40′ E. (Town); Lat. 35° 07′ N. Long. 128° 42′ E. (Pier).

DOCUMENTS:

8 Cargo Manifests.
8 Crew Lists.
4 Stores Lists.
3 Lists of Crew's Personal Effects. Tobacco/Spirits.
1 Vaccination List.
1 Health Declaration.
2 Currency Lists.

All documents are Standard Form. Although currency lists are required there are no restrictions on importing or exporting either Korean or othe currencies.

PILOTAGE: Pilotage not compulsory but recommended. Pilots ar ordered through Agents and board vessel about 10 cables West o Kadok Do Island. VHF not available. No pilotage during night hours Pilot boat is a wooden launch exhibiting International pilotage signals.

ANCHORAGE: Recommended 7 cables in Northwesterly direction o Tongdu Mal Lt. Ho. (Kadok Do.). Depth 25 m. Good anchorage in sand and mud. Quarantine anchorage is located about 1 mile N.N.W. fro Chori Som Island.

HEALTH: Radio Pratique not available. Pratique granted afte inspection.

RADIO: Busan Radio, call-sign "HLP".

TUGS: Required for mooring and unmooring. 2 tugs available of 600 h.p and 1,000 h.p.

BERTHING: Chinhai is a principal naval base. Vessels drawing up t 17 ft. can be accommodated alongside inner harbour.

A buoyed channel with a depth of 36 ft. MHW leads from East o Madang So, to the only berth available for deep-sea vessels abou 1.5 miles N.E. The berth, about 660 ft. in length, belongs to the Chinha Chemical Co. and can accommodate vessels with a maximum draft o 34 ft.

Depth-sounding alongside showed at least 43 ft. 3 in. at HW. (officia 34 ft.). Distance from HW level to deck of pier 2.10 m. Bottom thick mu and density 1025.

Vessels not exceeding 34 ft. salt water draft berth 2 hours prior HW and discharging commences immediately.

The berth is equipped with 1 grab only, and with conveyor-belt to nearby factory. The berth is used for discharging phosphate and potash, and very few general cargoes are handled. Discharge rate for phosphate is a maximum of 8,000 tons per 24 hours, with average of 6,200 tons.

Also see "Masan" – Bulk cargo facilities.

STEVEDORES: Work is continuous throughout 24 hours including Sundays, and without meal breaks.

MEDICAL: Attention available.

FRESH WATER: Available ex-barge from Masan, minimum 200 tons at U.S.$3.00 per ton.

FUEL: Available ex-barge from Masan.

CONSULS: Nearest at Busan.

REPAIRS: Minor repairs only.

GANGWAY/DECK WATCHMEN: Available and recommended.

REPATRIATION: Possible from Busan.

CUSTOMS ALLOWANCES: No restrictions. Stores remain unsealed.

SHIPMASTER'S REPORT: February 1979.

PILOTAGE: Pilotage for the Port of Chinhae is compulsory, Pilots only available during daytime.

Pilots board in position Lat. 35° 02′ N., Long. 128° 47.5′ E. Ships waiting for a Pilot should anchor in the recommended anchorage situated North-east of the recommended track 306°/126° and extending from about 1 mile West to about 2 miles S.E. of Yon Do Island.

PROHIBITED ANCHORAGE AREA: A "Prohibited Anchorage Area" is situated between the existing prohibited area (approx. position 35° 00′ N., 128° 45′ E.) and the Western shore of the Kadok To Island.

The Northern limit of the "prohibited anchorage" area consists of a line running from position Lat. 35° 01.4′ N., Long. 128° 47.2′ E. in a 070° direction to the Western shore of Kadok To Island.

The Southern limit consists of a line running from Lat. 34° 58′ N., Long. 128° 47.3′ E. in a 061° direction to the Southernmost point of Kadok To Island.

According to the naval authorities, anchoring within the above mentioned area is prohibited because of existing submarine cables.

BUOYS: The red conical Buoy "No. 14" in position Lat. 35° 04.9′ N., Long. 128° 42.1′ E. is reported non-existent.

The red conical lightbuoy in position bearing 135° and 8.5 cables from the above mentioned Buoy No. 14 is also reported non-existent.

The black conical lightbuoy Gp. Fl(2) 6 sec. in position Lat. 35° 04′ N., Long. 128° 42.8′ E. is to be moved 4 cables in a 043° direction.

AUTHORITY: Masan District Marine Bureau.

AGENT: See "Masan".

DAESAN: 37.02 N. 126.21 E. (See Plan)

SHIPMASTER'S REPORT: October 1988.

Note: First vessel to call at Daesan S.B.M.

Pilot station for VLCCs proceeding to the SBM is located in the outer harbour of Daesan (Lat. 36° 51′ 40″ N., Long. 126° 08′ 24″ E.) in vicinity of 2 nautical miles South of Shin-do, where the Harbour Pilot boards to lead the vessel to Quarantine Station which is the same as SBM location. Location of SBM is Lat. 37° 01′ 46″ N., Long. 126° 20′ 50″ E.

The vessel arrived at the pilot boarding area on October 13th and due to strong wind and rough sea the Pilot was unable to board. The anchor was dropped 4 nautical miles S.W. of Entrance Buoy No. 1 in a depth of 37 m., with good holding ground.

The Pilot boarded the next morning and the ship entered the buoyed channel approaching the SBM. At Buoy No. 3 in the channel the ship had to turn around due to obstructions by a large number of protesting fishing boats. They suddenly came from everywhere and the vessel was not able to navigate through a fleet of obstructing fishing boats. The Pilot disembarked from the ship and the anchor was dropped at the same position as on arrival.

The Pilot boarded the ship the next morning and commenced approaching the SBM. When the vessel passed Buoy No. 1 a large number of fishing boats sailed from the shore and headed towards the vessel and within a short time stopped in front of the vessel very close to the bow. The vessel's engine was now on full astern in order to have her dead in the water. One man was on lookout forward as we were not able to see the fishing boats close to the bow from the bridge. The Pilot advised me that an attempt to sail through the protesting fleet of fishing boats would have caused a serious and dangerous situation. Luckily they obstructed the vessel where the buoyed channel was wide and deep enough to turn around by her own power so again the vessel turned around, dropped off the Pilot and anchored 4 nautical miles S.W. of Buoy No. 1

October 16th was a Sunday and the Agent informed me that no berthing was possible on holidays and Sundays. He also informed the Agent to make sure the fairway was clear prior to lifting anchor and shifting to the SBM.

The Pilot boarded the vessel again on the morning of 17th October after receiving confirmation from the Agent that the fairway was clear. The vessel commenced shifting to the SBM and, this morning the buoyed fairway was clear.

En route to the SBM the vessel passed in the middle of the channel from Entrance Buoy No. 1 to the SBM. Navigational aids, lighted buoys, are located both sides of the channel.

After passing Kainso Lighthouse on the starboard side, the SBM can be seen 2 nautical miles ahead of the vessel.

Apart from the fishing boats, there are many fishing nets in the channel and close attention is needed to avoid fowling the propeller. The fishing nets are normally attached to white ball-shaped floating buoys. The current in this area may have a speed of up to 5 knots, depending on tidal flows.

Berthing at the SBM will take place from one to two hours before low water and approaching the buoy only from the West in a North Easterly direction. Distance from pilot boarding area to the SBM is 15 nautical miles.

As the SBM at Daesan is new, the Pilots had no experience in berthing in this area and no experience in SBM berthing.

The berthing, assisted by 2 large tugs, took longer than usual for SBM berthing, but without any difficulties.

There is only one mooring hawser from the SBM and the chafing chain was too short to reach the chain bow stopper so bollard strops and bow shackles were used as an alternative to secure the chafing chain. Two additional mooring ropes from the ship were connected to the SBM as one mooring hawser ws not considered to be safe due to a very strong current. I was told that a second mooring hawser and longer chafing chains will be fitted to the SBM in future. During mooring the Pilot was on the bridge and the Loading Master forward, to inform the Pilot and supervise the mooring.

Connecting of 2 × 16 in. floating hoses was carried out by shore workers. The hoses were connected to the ship's manifold by Camlock quick release system.

Whilst moored to the SBM one tug was on stand-by aft with a tug's line connected to the vessel. I believe the tug is necessary so as to keep the vessel clear of the SBM during the change of tide.

Maximum discharge rate was 6,000 tonnes p.h., but will later be increased to 8,000 tonnes p.h. Upon completion of discharge, the shore hoses were flushed with sea water for 30 minutes.

The vessel unberthed without using tugs. The vessel commenced outward passage and the Pilot disembarked between Buoy No. 1 and Buoy No. 3.

At present there is no possibility for supply of food, fresh water, spare parts, etc. at this port.

The SBM is operated by Kukdong Oil Co. Ltd., Daesan Refinery.

General information on the crude terminal (SBM).
The diameter of SBM is 10 m.
Maximum size of crude carrier is 250,000 d.w.t.
Minimum size of crude carrier is 30,000 d.w.t.
Depth (MLLW) is 30 m.
Bottom nature: Clay, sand with boulders.
Korean Charts HO No. 306, 307 and 353 cover the area from Buoy No. 1 to the SBM.

Information required by Daesan port prior arrival: ETA message to be sent at least 72 hours prior to arrival via Agent.

Quarantine Doctors boarded the vessel on completion of mooring and after inspection of the vessel, and gave Port Clearance for Customs and Immigration.

From the SBM to shore, to the Refinery, takes about 40 minutes by service boat. There is no housing in this part of the country apart from the Refinery and its related offices.

During normal conditions this new oil terminal is considered to be easy to approach and the weather is usually clear and fine.

As this was the first ship calling at this new port every operation took longer than usual, but I believe this is quite normal. The mooring, discharging and unmooring went on without any difficulties and with excellent co-operation between ship and shore.

SHIPMASTER'S REPORT: April 1989.

LOCATION: Daesan is about 20 miles due South of Inchon pilot boarding area.

SBM: Position: Lat. 37° 1.8′ N. Long. 126° 20.8′ E. Light: Fl. (3) Y 7 sec. Horn 30 sec.

VESSEL: 155,000 d.w.t.

DOCUMENTS:
2 copies Crew Effects List.
2 copies Bonded Stores List.
2 copies Stores List.
8 copies Crew List.
1 copy Maritime Declaration of Health.
1 copy Vaccination List.
2 copies Narcotics List.
2 copies Arms and Ammunition List.

PILOTAGE: Pilot boards VLCCs proceeding to the SBM 2 miles South of Sin Do or in position Lat. 36° 51.4′ N., Long. 126° 8.24′ E.

RESTRICTIONS: There are no restrictions. Depths not less than 30 m. at chart datum.

VHF: Pilot calls at Channel 16, working on Channel 12.

BERTHING: Pilot boards about 2 hours before slack water at Uno Do in order to be at the SBM just after the tide has turned.

Vessel secures to buoy (SBM) with the aid of 2 tugs, one on each bow, using tugs lines. Vessel picks up mooring and secures to SBM with its chain on vessel's AKD Stopper.

When vessel is fast, one tug using tug's line makes fast aft and remains there until sailing time.

CARGO OPERATIONS: *Hoses:* 2 × 16 in. on port side.

Discharging Rate: Max. rate 50,000 bbls/hr.

REPATRIATION: No difficulties encountered. Seoul Airport is 4.5 hours by car.

GENERAL: *Chart:* BA. Chart No. 1270.

Accommodation: Required for Mooring/Loading Master, Agent and Customs. If possible a rest room should be provided for up to 6 mooring personnel.

SHIPMASTER'S REPORT: March 1990.
Position: 37° 01.5′ N., 126° 24.5′ E.
Location: 30 miles South of Inchon.
Berth: Product Berth.

The port is under the jurisdiction of the port of Kunsan (Gunsan), some 60 miles further South.

Daesan is a newly developed industrial area, with amongst others an oil refinery. The refinery is operated by Kukdong Oil Company Ltd. The import to the refinery is served by a SBM, which can accommodate the largest ships. About 30 ships call at the SBM each year, and the oil imports total about 40 million barrels per annum. All exports from the refinery are shipped through the jetty facilities. Water depths near the buoy and in the approaches are not less than 30 m.

Export of oil products is from a large jetty with 3 berths which can accommodate ships with a maximum length of 200 m. The jetty is a steel construction on steel pylons with concrete dolphins. The jetty runs in a 110° – 290° direction. A large catwalk connects the jetty with a 20 m. wide causeway. Each of the dolphins is fitted with 2 hydraulically operated steel quick release hooks and rope handling capstans. Steel wires are not permitted for mooring, due to the large tidal range which makes their handling almost impossible. All lines are handled by heaving lines and messengers. The least depth alongside is said to be 11.0 m.

During the approach and mooring, the vessel is assisted by 2 powerful tugs of the typical Japanese design. Both are identical 4,200 b.h.p. tugs, fitted with dual Schottel propulsion. Tugs lines are used from their bow with the 10 in. braided nylon ropes stowed onto the fore deck winch.

During the time the vessel is alongside, one of the tugs will remain alongside to cope with eventualities, caused by the large tidal range and strong tide of up to 4 knots.

The two dolphins on either side of the centre of each berth are fitted with 2 heavy wood lined fender boards, which extend from the dolphin tops to a few metres below water level.

Mooring is done with a fairly regular layout of 2 head/stern lines, 2 breast lines and 2 springs each end.

Vessels will dock heading into the tide, which means starboard side to on ebb and portside to on flood tide.

Berthing and unberthing is done during daylight only. Berth No. 4 is fitted with an approach control system with large digital readout, indicating separate values for bow and stern. The system however on this occasion was not used. No explanation was given whether it was operational or not. The larger ships use Berth No. 4. The maximum size handled so far is 35,000 d.w.t.

Each berth is fitted with 2×12 in. Chicksans. One is used for black product and ballast, the other for clean products. No confirmation could be obtained that shore lines were fitted with non-return valves, which could adversely affect clean product ships discharging ballast.

Products available are: Fuel Oils A, B and C, Gasoil, Kerosene, Unleaded, Premium and Regular Motor Gasolines, Naphtha, Solvent (TN), DF 1, JP4 and Jet A1. Loading rates are said to be 1,200 cu.m./hr. maximum.

Heavy Fuel Oils and fresh water are also available from the jetty. No information is available as to the grades of Heavy Fuel Oil and the rates, quality or price of fresh water.

Dirty ballast reception facility of 60,000 cu.m. All cargo ballast must be discharged to shore facility. Maximum back pressure allowed is 1.5 bar. Rates should be around 400 cu.m./hr., but only 225 cu.m./hr. was achieved. Segregated ballast may be discharged to sea after permission is granted by Loading Master. A document prepared by shore is to be signed, stating the amount of ballast water or slops that was actually pumped ashore.

There is no easy means of access to the shore. Use of ship's gangway is not recommended, due to the large tidal range and a shore gangway is not available. In way of the centre manifold, however, there is a steel stairway leading to the water level, which is used by all shore officials and personnel. We did not object to this situation, also because no permission is granted for shore leave. Even jetty access is denied by the police.

The port lies in the Southern part of the delta where also the port of Inchon is situated.

The port as such is not indicated on the chart, but crude indication of the existence of a jetty is given on BA Chart No. 1270, Approaches to Inchon.

Initial approach is made using BA Chart No. 1258, Kyongnyolbi Yolto to Taechong Gundo.

Both BA Charts, although not part of the standard chart index, are absolutely required for a safe access to the port, and had to be supplied from the Japanese Admiralty Agent.

The approach channel is fairly wide and well marked with red and green light buoys of medium size. The paint is of the fluorescent type, which makes the buoys stand out even in the slight haze which was encountered. The lights on the buoys are not very strong and only switch on very late after sunset. Especially the channel entrance when lining up for the entry on a course of 039° must be given ample attention, as the tide sets in and out in a direction roughly parallel to the track, with maximum rates of about 5 knots.

Anchorage was obtained about 1 mile West of Kain So in a depth of 35 m. Vessel was brought up while heading into tidal stream of about 3 knots using 6 lengths of cable. Generally it can be said that ships will swing on their chains in a counter-clockwise direction with the turning of the tide. We experienced sudden quick veers halfway through the tides, but there was never any stress on the cable. The pilots claim that the tidal streams in this part of the channel never exceed 4 knots, which is confirmed by the information on BA Chart No. 1270.

Tides and currents all refer to Inchon (Standard Port). Generally HW and LW differences are +00.10 from Inchon. Off the jetty the tidal stream follows the direction of the channel with rates up to 3.5 knots, but there seem to be unpredictable sudden sets across.

Directions: BA Chart No. 1258, Kyongnyolbi Yolto to Taechong Gundo; and Korean Chart No. 306, An Do to Inchon Hang.

When approaching from the South, shape course to pass about 3 miles West of Ong Do Lt. (Racon Z), and about 3 miles East of Kadae Am Lt. (Racon X). Thence proceed to pass between the red and green buoys, marking the entrance of the channel just South of Sin Do, and about 5 miles South of An Do Lt. Once past the buoys steer 039° through the centre of the channel until passing Buoys No. 5 and No. 6, when course should be altered to 053°, proceeding up to a position between Buoy No. 7 and Kain So Lt., where the recommended anchorage is located.

As the tidal stream runs roughly parallel to the channel, only minor adjustments to ship's heading are necessary to allow for set.

From the anchorage steer 058° to pass between the SBM and Buoy No. 10. Thence continue on 070° and steer for the green Buoy No. 13. Speed should be reduced to about 3 knots. By this time tugs should have been engaged and ready for assisting. Thence alter course to starboard and steer around Buoy No. 12 until vessel is on a S.E.'ly course, and proceed slowly through the channel until off the jetty.

This channel has a least depth of 10.4 m., and is also used for anchorage by smaller vessels awaiting berth.

The two tugs will then assist in easing the vessel gently alongside.

The pilot vessel, which is a regular work boat, is fitted with VHF but the range is very small. Pilot communicates with tugs and pilot boat with handheld VHF radio. All communications were by telex via agents. The terminal is also equipped with VHF. Call "Kukdong Terminal" on Channel 12.

Documents required:

- 5 Crew Lists.
- 3 Stores Lists.
- 3 Crew Personal Effects Lists.
- 1 Narcotics List.
- 1 Ports of Call List for last 90 days.
- 1 Arms and Ammunition List.
- 1 Vaccination List.
- 1 Passenger List.
- 1 Maritime Declaration of Health (Korean Form).

Vessel will be attended by Agents, Customs, Police and Quarantine Officers. All documents may be prepared on plain ships stationery.

Agents will try to help translate queries by other officers, who did not speak or understand English. All Seamen's Books will be checked against Crew List, and even minor differences in spelling are noticed and to be corrected, although differences between Seamen's Book and Passport entries are accepted. There is a minor sanitary inspection carried out by the Quarantine Officer, who specifically wants to inspect vegetable rooms. He will then make out a Korean version of the familiar Japanese Sanitary Certificate, where all quantities of the entries must be recorded. They are however not checked. Customs Officer will seal the bonded store, and will check the ship's narcotics. A Korean Health Form was presented and made out without any problem, and subsequently Free Pratique was granted as per special form.

Agents claim that Daesan is an "open port", and consequently no shore leave can be granted. The nearest village seems to be 40 minutes drive away and the larger cities of Gunsan and Seoul, 2.5 hours and 4.5 hours drive respectively.

Only very limited quantities of vegetables and fruits are available from the local or nearby markets. Only cash payment is accepted, either Korean Won or US Dollars (US $ 1.0 = 680 Won). Quality of provisions was found to be excellent but prices rather high, because local market caters mainly for seasonal crops.

Problems: One of the major problems is that communication is very difficult. Only the agents had a minor working knowledge of English. Refinery and jetty personnel do not speak one single word of English, which proves particularly dangerous while handling cargo or in an emergency. For reasons of safety, we kept a seaman on standby at the shore manifold to assist in conveying messages, and if need be to close the Chicksan valve during topping up. Suppliers personnel were very reluctant to sign letters of protest, mainly because nobody wants to accept any responsibility, and agents had to try to translate most of the wording before all were signed for receipt.

AUTHORITY: Kukdong Oil Company Ltd., Daesan Refinery, 640-6 Daejook-ri, Daesan-myun, Seosan-gun, Chungchongnam-do, Korea.
Tel: (0455) 63-7651. *FAX:* (02) 743-0024.
Head Office: 223, Naeja-dong, Chongno-gu, Seoul, Korea.
Tel: (02) 735-6300. *FAX:* (02) 733-5481.

DAIPORI (Daepo): 38.10 N. 128.36 E.

Vessels bound for Daipori to load iron ore must first call at Mukho for quarantine and customs clearance.

Pilotage from Mukho to Daipori, distance of 50 miles, is not compulsory, but recommended.

NCHON: 37.28 N. 126.37 E. (See Plan)

DOCUMENTS:

Arrival:
6 Crew Lists.
4 Cargo Manifests.
4 Stores Lists (Bond and shop).
4 Crew Customs Declaration.
4 Narcotics List.
4 Arms and Ammunitions List.
4 Ports of Call Lists (last 90 days).
1 Vaccination List.
2 Money Lists.
4 Passenger Lists (Marked "Nil").
Derat Certificate or exemption.

All the above lists are typed on ship's plain paper.

Coasting on Korean Coast: At each port after the first, one requires the same papers but only 2 copies of each, with the exception of the Crew List, of which 5 copies are required.

Vessels with hazardous cargo must complete application to carry hazardous cargo and an application for anchorage of hazardous cargo vessel.

PILOTAGE: There are 2 Pilot stations for entering Inchon (Tel: 883-8111/4):

Ando: At the Ando Light 38 miles off Inchon, position Lat. 37° 03.9′ N., Long. 126° 16.5′ E. (good weather) and Lat. 37° 06.95′ N., Long. 126° 19.6′ E. (bad weather) located in entrance to channel approaching Inchon from the Yellow Sea. 48 hours advance notice to Agent required for vessels requesting to meet Pilot at Ando, customary boarding point for deep-draft vessels.

Palmido: Pilotage from Palmido to Inchon or Inchon to Palmido is compulsory. This pilot station is at Palmido Island and Light, 8 miles off Inchon, position Lat. 37° 21′ N., Long. 126° 31′ E.

ANCHORAGE: Anchorage is divided into 5 large areas according to cargoes of the vessels.
A 1 – 5 (Logs, pulp)
B 1 – 6 (Ships waiting for entry to the inner harbour)
B 7 – 10 (Oil tankers and ships unloading scrap. Coal)
C 1 – 8 (Small tankers, LPG ships)
D 1 – 3 (Logs)
E 1 – 5 (Ships waiting for entry to the inner harbour)

RESTRICTIONS: A peculiarity of Inchon Port is the wide tidal range, i.e. max. 30 ft. difference between the low and high tides. Because of the extreme tidal range in Inchon Harbour and the strong tidal currents which result, the importance of maintaining strict surveillance of the vessel's mooring lines is emphasised. In this regard, the ship's officers and crew must be diligent in the performance of their duties. All vessels to discharge or load commercial cargoes should invariably obtain prior permission for berthing/anchoring from the Inchon District Maritime and Port Authority at least 24 hours before arrival, then proceed to a nominated anchorage in the stream under direction of a compulsory Pilot.

Lock Particulars:

	For 50,000 d.w.t. Vessels	*For 10,000 d.w.t. Vessels*
Lock Chamber	1 base	1 base
Total length	381.0 m.	288.25 m.
Usable length to		
Inner gate	280.0 m.	183.00 m.
Outer gate	310.0 m.	208.00 m.
Width	36.0 m.	22.50 m.
Height	18.5 m. from sill	18.50 m. from sill
Height	19.0 m. from bottom	19.00 m. from bottom
Number of gates	3 sets	3 sets
Length of gates	38.0 m.	24.50 m.
Width of gates	8.3 m.	6.40 m.
Height of gate	18.5 m.	18.50 m.
Weight per gate	1,050 tons	590 tons
Time required for opening-closing	5 minutes	3 minutes

MAX. SIZE: Max. size 50,000 d.w.t. Max. LOA 302 m. Max. draft 13.0 m.

HEALTH: The Quarantine Anchorage is located outside the harbour in position Lat. 37° 22′ 37″ N., Long. 126° 32′ 06″ E. A vessel which sailed from an "Affected Zone" and not passed 10 days thereafter is compelled to receive 24 hours quarantine before entering the discharging anchorage. Quarantine is available only for the period from sunrise to sunset.

RADIO: Inchon Radio.

	Frequency

TUGS: There are 17 tugs (1,000 h.p. – 3,200 h.p.). 2 – 3 tugs are required for each vessel.

All tugs are operated by private companies.

CRANES: 4 Gantry Cranes (35 ton class), 4 Transtainers (30 ton class), 3 Floating cranes (20 ton – 100 ton class), 101 land-based cranes (10 ton – 100 ton class).

BULK CARGO FACILITIES: No. 7 Pier is exclusively used for grain (Rate 800 t.p.h.) by 2 silo operators. Handling capacity is 4 million tons per year and storage capacity is 326,000 tons.

Taihan *Bulk Terminal:* Accommodates 2×50,000 d.w.t. vessels at dolphins. 2×700 t.p.h. Pneumatic suction elevators at each berth. Storage capacity 138,000 tonnes.

BERTHING:

Pier No.	*Berth* No.	*Total Length* (m.)	*Depth* (m.)	*Capacity* (d.w.t.)	*Remarks*
1	11-13	964	8.0	4,500	Dry Cargo
	14-17		7.5	2,000	Dry Cargo
2	21-22	1,442	12.0	20,000	Dry/
	23		12.0	30,000	Bulk Cargo
3	24-28	1,250	9.5	8,000	Bulk Cargo
	31-34		9.5	8,000	Steel and
	35-36		11.0	10,000	Heavy Cargo
	37		12.0	20,000

	42		14.0	30,000	Terminal
	43		14.5	50,000	and Bulk
	44		14.5	30,000	
	45		14.5	50,000	
5	51-52	604	14.0	50,000	Dry/Bulk Cargo
6	Under Development				
7	71-72	604	14.5	50,000	Grain
	73-74		14.5	50,000	Terminal
8	81-83		13.0	50,000	Scrap/Bulk

SPECIALISED CARGO HANDLING FACILITIES: No. 4 Pier (Berth Nos. 41-43 – (3 berths) – 625 m.; Berth No. 44 – 225 m. and Berth No. 45 – 310 m.) is used exclusively for containers. It has 2 container yards which are capable of storing 15,457 TEU. Ro-Ro ramp available.

STEVEDORES: There are 16 stevedoring companies with 105 fork-lifts and 17 cranes. Annual cargo handling capacity is 11,625,000 tonnes.

MEDICAL: Launch is provided in emergency call to evacuate sick men. Modernised hospital is available.

TANKERS: There are six private companies handling oil, LPG and liquids. Maximum quantity of LPG loaded in a single operation is 1,500 tons.

Kyung In Energy Co. Terminal:

Designed for 50,000 d.w.t. over 50 ft. depth at LW. The marine terminal is situated at Lat. 37° 30′ 12″ N., Long. 126° 36′ 19″ E. The face of the dolphin fendering system is on a bearing of approximately 347° true.

The vessel will be berthed alongside the main and secondary berthing dolphins with the vessel's hull against the fenders, which are an integral part of the dolphins. All the dolphins are equipped with electric capstans and quick-release mooring hooks. A navigation light and fog horn is located on the Southern Exterior Mooring Dolphin (Exterior Mooring Dolphin No. 1). A navigation light is also located on Exterior Mooring Dolphin No. 2 on the N. side of the terminal facilities. When a vessel of the 50,000 d.w.t. class is moored to the terminal, the bow and stern lines will perform the function of the breast lines. Therefore, the spring lines must be led out through the chocks on board which will provide sufficient leads ahead and astern to restrict the movement of the vessel along the face of the dolphins. In this regard, due consideration must be given to the rise and fall of the tide.

Loading Arms: There are 3 "Continental-Emsco" loading arms situated on the loading platform. The one to the extreme North and the middle one of the three are for the discharge of crude oil. Both are fitted with 16 in. swivel connections having 150 pound flanges. The loading arm to the extreme South is for the loading of naphtha and is fitted with a 12 in. 150 pound flange. The loading arms are designed for a working pressure of 100 p.s.i.

During the connecting and disconnecting of the loading arms to the vessel, the loading arms will be manipulated and positioned by shore personnel. During the period of time when the loading arms are connected to the vessel's manifold, they will be in the "float" position and will be self-adjusting.

General Information:

Under no circumstances should any member of the ship's crew activate or operate the controls for the loading arms. Authorised shore personnel will perform this function.

The "Continental-Emsco" loading arms will tolerate only a minimum amount of transverse movement by the vessel in either direction. In other words, the movement of the vessel along the face of the dolphins is restricted. For this reason, it is mandatory that the vessel be kept in position, and that the mooring lines be properly tended. It is the responsibility of the vessel to maintain sufficient deck crew on duty to properly tend the mooring lines, and to ensure that the vessel maintains proper position relative to the loading arms.

Discharging Crude Oil:

The distance from the loading platform to the tanks is approximately 2.2 km. (1.4 miles). A 30 in. block valve is situated near the location where the trestle joins the island causeway. Block valves are also installed in the pipe-line system near the inlet to each of the crude oil storage tanks.

There are three crude oil storage tanks on Yul Do Island. Each has a capacity of 200,000 barrels. The tanks are 48 ft. in height with an overflow at 46 ft. There are no check valves in the crude oil pipe-line system. Thus, the vessel must take precautions against back-filling due to head pressure on the system.

It may be necessary to discontinue the discharge of crude oil when changing from one tank to another ashore. The vessel will be given adequate notice for the stoppage of the ship's cargo pumps.

Ballast:

It is unlawful to discharge dirty or oily ballast water into the waters of Inchon Harbour. Severe penalties may be invoked against the vessel by the Republic of Korea in the event of pollution of harbour waters.

The centre loading arm provides a dual function. It is used for discharging ballast from the vessel as well as for the discharge of crude. The ballast flows through a 12 in. pipe-line to the ballast storage tank on Yul Do Island. This tank has a capacity of 30,000 barrels, and is situated about 1.1 km. (0.68 miles) from the loading platform.

Loading Naphtha:

Naphtha is stored in two mainland storage tanks each of which has a capacity of 125,000 barrels. Three pumps provide the flow for shipping naphtha. Each pump has a capacity of 1,600 g.p.m. The pumps are on independent circuits. Thus, the loading rate of the naphtha can be governed by the number of pumps used.

The pipe-line from the pumps to the loading platform is 18 in. and is reduced to 12 in. on the loading platform. A block valve is located in the 18 in. pipe-line near the point where the island causeway joins the trestle. Another block valve is provided in the 12 in. pipe-line on the loading platform.

The pumps which are used for shipping naphtha can be stopped from the Marine Terminal Loading Platform, but they must be started from the mainland. Under normal conditions the vessel's deck officer on watch should give the terminal personnel 10 minutes notice prior to requesting that the loading rate be reduced, and the same notification prior to the completion of loading. As previously stated, the pumps can be stopped from the loading platform in case of an emergency.

The approximate distance from the mainland naphtha storage tanks to the loading platform is 5.4 km. (3.35 miles).

Regulations:

1. Sufficient number of crew members are to be on duty at all times to properly tend the mooring lines and ensure that the position of the vessel is maintained alongside of the dolphins.
2. Except in the case of an emergency, the deck officer on duty shall give the terminal personnel at least 10 minutes notice prior to changing the loading rate of the naphtha, and at least 10 minutes notice prior to the completion of loading cargo.
3. Under no circumstances is the vessel's main propulsion engine to be disabled, or are any repairs to be undertaken while the vessel is moored to the marine terminal.
4. The vessel's fire-fighting equipment is to be kept ready for immediate use. A sufficient number of hoses shall be led out forward and aft to provide full deck coverage.
5. Lights must be provided by the vessel to illuminate the water area in the vicinity of the bow, stern and off-shore side.
6. Smoking will be permitted in such *Interior* spaces as may be designated by the vessel's Master. However, smoking will not be permitted on any open deck areas.
7. The loading of ship's stores and supplies will not be permitted during the time ballast is being discharged, or naphtha is being received by the vessel.
8. Ullage hole screens are to be used at all times while bulk oil transfer operations are in progress.
9. Galley ranges, unless electric, are not to be used while the vessel is loading naphtha.
10. Except for the period of time actually required for passengers to embark or disembark from a launch, no boats, launches or vessels will be permitted to moor alongside a vessel which is berthed at the marine terminal.
11. Safety practices which are common to marine terminals on a world-wide basis will apply.

Honam Buoys: Lat. 37° 29′ 00″ N., Long. 126° 36′ 03″ E., draft acceptable 30 ft., at East side of A–3 anchorage. This berth is the private facility of the Honam Oil Refinery Co. (joint company with Caltex) for discharge of their own petroleum products. Consisting of 4 mooring Buoys and sub-marine pipe-lines.

Union Oil Terminal, 42 ft. depth alongside. Berthing/unberthing in daytime slack water only.

Also see "Daesan".

DENSITY: Varies between 1022 and 1024.
FRESH WATER: Can be supplied by lighter, max. quantity 500 tons.
FUEL: Available by barge only.
CONSULS: None locally. Many Consuls and Embassies in Seoul, 50 minutes by train from Inchon.
REPAIRS: Deck and engine repairs possible by Inchon Shipbuilding Company.

CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, and 1 bottle wine allowed, each man.
GANGWAY/DECK WATCHMEN: Ship security guard service is supplied by 2 companies.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
REPATRIATION: Facilities for crew changes or repatriation.
AIRPORT: Regular flights worldwide from new international airport.

POLICE/FIRE/AMBULANCE: Police (883) 0011, Fire (882) 4069, Ambulance (73) 9000 (Inchon City Hospital).
TELEPHONES: Portable communication facility is available.
HOLIDAYS: January 1st (New Year's Day); February 20th (Folklore Day, first day of first lunar month); March 1st (Independence Movement Day); April 5th (Arbor Day); May 5th (Children's Day); Buddha's Birthday (8th day of fourth lunar month); June 6th (Memorial Day); July 17th (Constitution Day); August 15th (Liberation Day); September (Thanksgiving Day, 15th day of eighth lunar month); October 1st (Armed Forces Day); October 3rd (National Foundation Day); October 9th (Korean Alphabet Day); December 25th (Christmas Day).
SHORE LEAVE: Launch service provided by 3 private companies.
IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.

ACCOMMODATION LADDER: Essential for Port Officials on entry. Also for tanker berth no access allowed through plant. Rig on port side.
DELAYS: Can be caused by bad weather.
GENERAL: Tide condition is critical, swift currents (high tide: 9 m. to 10 m.) special attention is required.
DEVELOPMENTS: Coal Terminal to be built in the outer harbour to accommodate vessels up to 100,000 d.w.t. Length of berth 240 m., depth 16 m.

SHIPMASTER'S REPORT: 1974.
Approaches: Inchon, the port for Seoul, the capital of South Korea, is situated in Lat. 37° 28′ 20″ N., Long. 126° 37′ 09″ E., and is approached from the South through the Yellow Sea. From Kyoknyolbi Do (Clifford Is.) LH. a course should be set to pass 1 mile North of An Do LH., in the vicinity of which the pilot boat will be waiting. Pilotage is not compulsory from this point but is recommended and the Pilot should be ordered at least 48 hours before arrival through the Agent, in Inchon.

From An Do, vessels proceed via the Dong Soodo (East Channel) which is very winding and narrow in places. All lighthouses now show lights in accordance with B.A. Charts and Publications (1984).

Pilotage is about 38 miles to the Inchon Anchorage for deep-sea vessels, about 3 hours steaming. The Pilot was good even in thick fog and all Pilots seem to speak reasonable English. The pilot launch is fitted with VHF.

The anchorage is extensive, with room for about 30 ocean-going vessels, holding ground is good and no trouble was experienced in currents of 5 knots, although even stronger currents are experienced at Spring tides.

The Port: Can be divided into three sections according to location and function; the Inner Dock, Outer Harbour and Northern shoreline.

The Inner Harbour basin is presently operated for the accommodation of cargo ships up to 50,000 d.w.t. The Outer Harbour, of new construction, is largely for coastal and fishing vessels of less than 500 tons, and is located just outside and to the S.W. of the Inner Basin.

The Northern shoreline, North of the closed basin has unloading facilities at many private plants. These are lighter berths.

With the completion, in May 1974, of the new lock system and second tidal basin, the berthing facilities in the port have changed the cargo handling capacity from 1,420,000 tons to 6,270,000 tons per year by providing 3,820 m. length of quay and container berths.

Within the Inner Harbour is the first tidal basin (the older lock system dating from 1923). This basin is accessible through the new lock system.

Equipment in Use (August 1974): Tugs, 2 of 2,000 h.p.; 3 of 3,600 h.p.; Floating cranes, 1 of 75 tons capacity; 1 of 30 tons capacity; Container crane, 1 of 30 tons capacity.

Bulk Grain (1984): Pier No. 7: Jetty berths Nos. 71 – 72: 2 discharge towers, 1 conveyor belt, 1 ship at a time can be handled, capacity 800 t.p.h.

Pier No. 7: Jetty berths Nos. 73 – 74: 2 discharge towers (Simporters), 1 conveyor belt, 1 ship at a time, capacity 22,000 tons per day.

However, due to congestion of cargo in the elevators the maximum capacity on both jetties is reduced to 6,000 – 8,000 tons per day each.

Additional Equipment Planned: Tug boats, 4 of 7,000 h.p. Floating cranes, 1 of 100 tons capacity; 1 of 70 tons capacity. Container cranes, 4 of 35 tons capacity.

Further expansion is planned for the Northern side of the inner harbour. When completed there will be an additional 800 m. of quay at Pier 6 and 780 m. at Pier 8. This will add a total of 10 new berths for vessels from 5,000 to 50,000 d.w.t.

The Port of Inchon is administrated, managed and operated by the Government, represented by the Inchon District Marine Bureau (IDMB) in the Ministry of Transportation.

Decisions on administration and operation of the port, particularly to daily activities, are made by the Director, District Marine Bureau of the above Ministry.

Port activities, such as cargo in transit sheds, or in storage and port facilities of Government property, are in the custody of the Association of Port Management. This Association is formed from members of the various port users associations and was formed in 1972, under the control of the Minister in charge of Port Operations.

Port service companies and Stevedoring companies are still privately owned.

Repatriation and relief of crew members was made without any apparent difficulty.

SHIPMASTER'S REPORT: 1975.
The Ando pilot vessel is equipped with VHF Channel 16. If berthing in the tidal basin it is necessary to use vessel's sewage tank or sanitary tanks provided from ashore. Immigration require 2 copies of crew list forwarded before arrival to Agents, also require ports of call list for previous 3 months. If any crew member is caught smuggling in Republic of Korean ports the vessel is liable to be detained indefinitely.

SHIPMASTER'S REPORT: October 1986.
Pilot is quoted as being at Ando, as in Charterer's telexes, the actual pilot station is Chang-An-So, approximately 2.5 hours steaming to Inchon Anchorage. Pilot not compulsory, but unless vessel is a local trader, strongly recommend use of Pilot. Outside there is no draft problem, shallow patches to be avoided are well marked on charts.

Vessel anchored off Inchon Main Lock at 1930 hrs. on 10th October. Shortly after which 2 Berthing Pilots boarded. 4 tugs made fast, each bow and each quarter. There are strong currents. Lining-up for lock entrance not easy. Due to language it was not possible for Master to communicate with tugs. Max. draft for Inchon Lock, 12.5 m. at high tides and 12.2 m. at neap tides. Cleared lock and moved into container berth. Vessel berthed safely with no damage to or against vessel. All fast 2318 hrs. on 10th October.

Charterer's Agent attended vessel on arrival with Port Health for Pratique. At approximately 0900 hrs. next morning Customs, Immigration and other officials boarded and vessel was properly cleared. Inspection of ship followed. Accommodation spaces all found clear. Insects were found in holds in corn cargo so at 1100 hrs. was informed all but essential crew would be taken off for a day at 1400 hrs. for vessel to be fumigated. I remained on board with 2nd Officer, 3rd Engineer and 3 seamen. I requested to know what gas was being used and that some safety equipment be left on board. As only cargo space involved Charterers informed me, but not in writing, that they would bear all expenses.

Crew returned on board at 1400 hrs. on 12th October. Vessel still under fumigation. Crew then opened hatches. The actual fumigation was carried out in an efficient manner, but if something had gone wrong company would be responsible.

Discharge commenced 1905 hrs. on 12th October. Work is around the clock. But if a container ship comes in, the gantries are moved to her. Discharging also stops when it rains. There are 4 container gantries. All have grab facility, I noticed 40 tonne SWL on grabs.

The berth is well fendered, with adequate mooring bollards. Fresh water is supplied by barge. Medical facility appears to be good. Shore passes are issued and must be taken ashore. The guards at the dock gates are very strict. The dock system is large. No taxi or private car allowed in. This assists vessel to keep unauthorised people off ship.

Container berth also seems to discharge timber carriers and grain. The stevedore permanently on board, co-operated well with Chief Officer. Port Health came on board to renew Derat, no difficulties encountered.

SHIPMASTER'S REPORT: November 1989.

Vessel:

LOA	159 m.
Beam	22.85 m.
Type	Santa Fe 77.
G.R.T.	12,376 tons.
N.R.T.	8,369 tons.
D.W.T.	20,949 tonnes.
Cargo	15,730 tonnes of tapioca pellets in bulk.
Max. arrival draft	31 ft. 00 in.

Approaches: Pilot boarded about 1 mile off Changnanso Lighthouse in fair weather. No difficulties found when approaching, but much attention must be given to fishing boats and their fishing nets.

Both channels (inbound) East and (outbound) West, are well marked as on BA. Charts No. 1258 and 1270.

Inbound: Steaming about 3 hours from Changnanso Lighthouse (Pilot position) to Inchon anchorage with one Pilot only. Another Pilot used from the anchorage to lock and berthing.

Outbound: Only one Pilot used for unberthing, lockage and steaming in channel. Pilots are very good, co-operative and experienced.

Anchorage: The holding ground of Inchon anchorage is very good, even with strong currents. Waiting time at anchorage depends on berth congestion and fumigation. Port Authorities boarded at anchorage (Quarantine) for clearing the vessel. Accommodation and cargo inspection by quarantine officers. Cargo found without insects so no fumigation carried out. Very strict inspection of provisions, store rooms and galley. They are looking for cockroaches and rat excrement.

Boat service from anchorage to port is available but rates are very high.

Port: Outer Harbour: For tankers and dry cargo vessels with up-to-date loading/unloading facilities.

Inner Tidal Basin: For dry cargo vessels up to 50,000 d.w.t. and approximately 11 m. – 12 m. draft. All berths are well fendered.

Special attention must be given to standard port regulations in the tidal basin area as authorities are very strict on violators.

No chipping or painting permitted to the vessel's outer hull.

Tugs: 2 – 4 tugs used for berthing, unberthing and locking, depending on wind/weather, d.w.t. and draft of the vessel.

Lock: Special attention shall be given to the Safe Lockage Regulation and Inchon District Maritime and Port Authority Law No. 14, which is presented on arrival by the local Agents.

Actual tests to vessel's engines, steering gear, telegraphs, whistle, etc. must be carried out by the vessel prior to entering the lock.

All movable projections over vessel's side must be moved inboard and movable fenders are to be ready for use if necessary. Lock is well fendered.

For entering the lock, 3 tugs are used.

For safe lockage, trim and list (port/starboard) must be adjusted to proper conditions or as required by the authorities.

East side of the lock (tidal basin entrance) is under construction and large works are being carried out.

When entering the lock for mooring, use only polypropylene ropes (no wires) as they are easier for handling. Vessels are moored at the centre of the lock chamber.

Stevedores: Work round the clock and mostly use ship's gear. Bulk cargoes are discharged very quickly, rates from 2,000 tons – 3,000 tons per day, depending on number of gangs.

Fresh Water: Available by barge only, due to general repairs and renewal of piping system at the port. Cost is about U.S.$5.00 per ton.

Shore Passes: Crew members shall always carry their passport or Seaman's Book and landing pass when going on shore leave.

Port Authorities are very strict, and in cases where landing passes are lost, heavy fines are imposed and have to be paid.

Density: Inner harbour tidal basin 1023.

Repatriation: Repatriation possible without difficulty. International connections are via Seoul which is 1.5 hours by car from Inchon.

AUTHORITY: Inchon District Maritime and Port Authority, 1-17 Hang-dang 7-ga, Jung-gu, Inchon, Republic of Korea. *Tel:* (032) 883-4061. *Telex:* K23380 Idmapa. *Contact:* Kyu Jin Whang, Director General.

AGENT: Korea Universal Marine Co. Ltd., Room 505, Cheung-Seok Building, No. 241-7, 3-Ka, Shin Heung-Dong, Inchon, Korea. Tel: (032) 8826741, 8836716. Telex: K23228 Samship. Cables: "Samwooship Inchon". Fax: (032) 8847195.

Associated with Jardine Shipping Agencies.

KUNSAN (including Changhang): 35.55 N. 126.45 E.

The Port of Kunsan is situated on the Southern mouth of the Kum River which flows into the Yellow Sea, and North Changhang.

DOCUMENTS:

6 copies Report (Entry/Departure).
6 copies Crew List.
6 copies Passenger List.
2 copies Crew Personal Effects List.
3 copies Passenger Luggage List.
2 copies Store List.
9 copies Manifest (Dis./Loading) only.

NOTICES: All vessels bound for Korean ports should give an ETA to the local Agents 27 hours prior arrival. This is essential to enable the Agents to notify the Port Authorities and arrange Pilot if necessary.

RESTRICTIONS: Vessels should enter during daylight hours only. Many small Korean fishing and cargo boats in this area display dim navigation lights or none at all at night. Pilot is not compulsory but all vessels calling at this port recommended employ a Pilot in view of the hazardous channel and tidal difficulties. Controlling depth 8 ft. at Bar. Keel clearance of 2 ft. required.

PILOTAGE: The pilot station is situated at the Southern side of Piun Do (Hiyo To) Island the correct position of which is at Lat. 35° 56′ N., Long. 126° 27′ E.

The boarding point near Piun Do is about 14 miles from Kunsan. Pilot to be ordered at least 24 hours in advance. Pilots cannot board in rough weather. Due to constantly changing bottom conditions, vessel should not attempt to enter without Pilot.

ANCHORAGE: Outer anchorage about 5.5 miles West of Kunsan for vessels drawing up to 28 ft.

Inner anchorage off Kunsan suitable for vessels of 21 ft. draft.

MAX. SIZE: Draft 18 ft. to 27 ft. dependent on height of tide.

RADIO: Kunsan Radio, call sign HLN operating on 500 and 484 kHz.

TUGS: 5 tugs with respective capacity of 300 h.p. (1) 150 h.p. (2) and 80 h.p. (2) are available. 1 floating crane with capacity of 30 tons owned and managed by the Korea Dredging Corp. is available.

BERTHING: The port is controlled by Kunsan District Marine Bureau and all vessels come under jurisdiction of Kunsan Custom House. The anchorages in stream inner harbour can accommodate 1 or 2 vessels less than 1,000 gross tons, and outer anchorage (Yubudo Anchorage) accommodates 1 ocean-going vessel drawing about 28 ft. There are 5 pontoon piers (3 for Kunsan and 2 for Changhang) each of which can accommodate an ocean-going vessel with maximum draft of 27 ft.

STEVEDORES: There is 1 stevedoring company with 14 wooden barges, 3 steel barges and 3 tug boats. Discharging capacities: average records per day of 24 hours: coal 1,500 tons; grain and wheat 1,600 tons; fertilizer 1,300 – 1,400 tons; cement 1,000 – 1,100 tons; lauan log 500,000 B/F. Daytime only.

MEDICAL: Crew members should be in possession of health certificate showing vaccinations for typhoid. In case health certificate has expired, the person(s) will be vaccinated/inoculated by a quarantine doctor.

CURFEW: In Korea the curfew is still effective from midnight to 0400 hrs. every day.

HOLIDAYS: Public Holidays – New Year (January 1-3); Independence Movement Day (March 1); Labour Day (March 10); Arbor Day (April 5); Memorial Day (June 6); Constitution Day (July 17); Liberation Day (August 15); Nation's Foundation Day (October 3); National Alphabet Day (October 9); United Nations Day (October 24); Christmas Day (December 25). (Can be worked if requested.)

Local Holidays. Work cannot be carried out on Lunar New Year's Day and the Moon Festival, about 15th August.

SHORE LEAVE: Crew shore passes will be issued by Port Immigration Office.

DEVELOPMENTS: Major developments underway which are scheduled for completion in 1993.

AUTHORITY: Kunsan District Maritime and Port Authority. *Tel:* (0654) 3 4131/4. *Telex:* K66666 Gsdmpa.

AGENT: Sub-Agents of Korea Universal Marine Co. Ltd., No. 37-3. Changi-dong, Kunsan 511, Korea. Tel: 2-3592. Telex: K66674 Ssmarine. Cables: "Shinsung Kunsan". Fax: 43-0510.

Associated with Jardine Shipping Agencies.

MASAN: 35.11 N. 128.35 E.

PORT LIMITS: *Port Boundary:* 35° 09′ North.

Arrived ship: A vessel is considered as "arrived" when in the Quarantine Anchorage.

Laytime: (Subject to Charter Party). Generally commences at 0800 hrs. if Notice of Readiness tendered p.m. day before and 1300 hrs. if tendered a.m. day of arrival.

DOCUMENTS:

11 copies of Crew Lists (inward and outward).
3 copies of Personal Effects.
3 copies of Stores List.
3 copies of Bonded Stores Lists.
11 copies of Passenger Lists.
3 copies of Narcotics Lists.
3 copies of Arms and Ammunition Lists.
4 copies of Manifests (entry clearance only, excluding manifest for consignee, stevedore, checker's firm and other related firms)
2 copies of Bill of Lading.
5 copies of Entry Report (only entry clearance).
Ship's Certificates and Seaman's Books or Passports.

PILOTAGE: Kaduk Pilot Station: Lat. 35° 02′ N., Long. 128° 47′ E. ETA required 24 hours prior to arrival. (Tel: 2-9225).

Two pilot boats "An Se" and "Be Yun". VHF to be installed in pilot boats. At the present time contact with Pilot made through Agent or Masan Harbour Control on VHF. Vessels to display usual pilot signals.

In case of bad weather vessels wait for Pilot at the pilot station.

ANCHORAGE: Mooring capacity at anchorages: A-1, A-2, A-3 Depth 30 ft.; A-4, A-5, A-6 Depth 24 ft.; A-7, A-8 Depth 23 ft. Quarantine Station Depth 36 ft.

RESTRICTIONS: Should take Pilot's guidance as a Korean Navy base is located very close to Masan port.

MAX. SIZE: 20,000 d.w.t. LOA 210 m. Max. draft 11.0 m.

HEALTH: Crew members should be in possession of health certificate showing vaccination for typhoid. If the health certificate has expired, the person(s) will be vaccinated/inoculated by a Masan National Quarantine Doctor.

RADIO: Seoul Radio.

VHF: VHF at Masan District Maritime and Port Authority (Call "Masan Harbour Control").

RADAR: None.

TUGS: Two tugs, "Chung Ryong" (Government owned) 1,000 h.p. and "Yong Ma" (Private) 2,000 h.p. Generally, ship's lines used and tugs join vessel at Quarantine Anchorage.

BERTHING:

	Depth (m.)	Length (m.)	Max. Size	No. of Berths
Pier No. 1	8.0	445	8,000	2
Pier No. 2	5.0	385	500	2
Pier No. 3	11.0	210	20,000	1
	11.0	210	20,000	1
Pier No. 4	11.0	1,050	20,000	5
Dolphin	7.0	88	5,000	1
KHIK	11.0	240	20,000	1
Yukong	7.0	100	3,000	1

CRANES: Cranes with capacity 40 – 60 tons expected to be installed at Chang Won Pier. Cargo operation is generally by ship's own gear.

BULK CARGO FACILITIES: There are two bulk cargo piers (Nos. 1 and 3), average discharge rate is 1,500 – 1,800 tons (0800 hrs. – 2100 hrs.) a day, and sulphur is generally discharged at port of Chinhae, where there is a chemical firm.

Length of pier: 210 m. Depth (low tide) 11 m. and one gantry crane (capacity 6 tons bucket) discharging rate is approximately 5,000 tonnes a day (24 hours).

SPECIAL CARGO HANDLING FACILITIES: None.

BRIDGES: None.

STEVEDORES: Advise stevedores number of hatches, number of derricks and capacity, and supply stowage plan on arrival.

Average Discharging Rate by Commodities: (0800 – 2100 hrs.).

Coal	1,500 tonnes
Grain	1,500 tonnes
Wire Rods	700 tonnes
General Cargo	700 tonnes
Others	600 tonnes

MEDICAL: Masan National Quarantine Office is responsible for any matters relating to vaccinations. Master should prepare a medical report form for patients visiting Masan hospital.

TANKERS: No facilities (Transhipment if any, carried out by lighters).

FRESH WATER: Available at Masan.

FUEL: Available by grades.

FIRE PRECAUTIONS: One fire boat stands by 24 hours a day at Central Pier.

CONSULS: None.

REPAIRS: Available anytime (two companies).

DRY DOCKS: 3 minor dry docks.

SURVEYORS: Various survey firms located at Masan, but not Lloyd's or ABS.

HATCHES: Generally, first opening and last closing is by ship's crew and others by stevedores.

GANGWAY/DECK WATCHMAN: Available at Masan.

CUSTOMS ALLOWANCES: Daily consumption quantity only.

CARGO GEAR: Using of cargo gear (utilisation) depends on negotiation.

REPATRIATION: Possible. Application for transferring and reason required. Agent's guarantee letter (for Crew) also required.

AIRPORT: Kimhae Airport: 70 km. from Masan. Kimpo Airport: 436 km. from Masan. Regular services.

TELEPHONE: Not available on board vessels.

SERVICES: Security guard, garbage disposal, line handling, shoring, launch, laundry and provision supply available at Masan.

POLICE/AMBULANCE/FIRE: Telephone Numbers:

Police (Foreign Section) 2-1206; Fire 2-1334; Ambulance 2-1151.

HOLIDAYS: New Year's Day (January 1st); New Year's Day (by Lunar calendar) (January 1st), Independence Movement Day (March 1st); Labour Day (March 10th); Arbor Day (April 5th); Buddha's Birthday (Lunar calendar) (April 8th); Children's Day (May 5th); Memorial Day (June 6th); Constitution Day (July 17th); Indpendence Day (August 15th); Armed Forces Day (October 1st); National Foundation Day (October 3rd); National Alphabet Day (October 9th); Christmas Day (December 25th).

Cargo operations on the above days depend on negotiations.

SHORE LEAVE: Crew shore pass issued by Immigration and has to be extended every 120 hours.

IDENTIFICATION CARDS: Shore pass available from Immigration.

DELAYS: There are no delays for berthing or bunkering.

GENERAL: ETA to authorities concerned no later than 24 hours before arrival.

DEVELOPMENTS: A large container yard to be built.

AUTHORITY: Masan District Maritime & Port Authority. *Tel:* (0551) 31176. *Telex:* K53676 Msdmapa.

AGENT: Sub-Agents of Korea Universal Marine Co. Ltd., No. 6, 2-Ka Wapo-dong, Mansan, Korea. Tel: 45-4849. Telex: K52144 Mashi Cables: "Yeunghwa Masan". Fax: 44-2521.

Associated with Jardine Shipping Agencies.

MOKPO: 34.37 N. 126.23 E.

DOCUMENTS:

6 copies Report (Entry/Departure).
6 copies Crew List.
6 copies Passenger List.
2 copies Crew Personal Effects List.
3 copies Passenger Luggage List.
2 copies Stores List.
9 copies Manifest (Dis./Loading only).

PILOTAGE: Pilots stationed at Kasado Island, 34° 27′ N. 125° 02′ E 30 miles from Mokpo (Tel: 2-1205). 24 hours notice to Agent require to arrange Pilot. Although not compulsory, vessels strongl recommended not to enter without Pilot.

NOTICES: All vessels bound for Korean ports should give an ETA t the local Agents 27 hours prior to arrival. This is essential to enable the Agents to notify the Port Authorities and arrange a Pilot if necessary.

ANCHORAGE: Five anchorages in depths from 11 m. to 20 m Anchorage Nos. 2, 3, and 4 are better than No. 1 and 5 for dischargin cargo because No. 1 is sometimes very dangerous due to strong tida currents.

RESTRICTIONS: Mokpo is located at the South-Western end of the Korean peninsula. The port is at the mouth of the Yungsan River which flows through the Yungsan Peninsula. Kasako Island protects this por from heavy winds and swell. The Yungsan River provides 5 anchorages where 5 vessels of Liberty type can berth at a time.

Tide Information: Max. tide level at high water 4.5 m.; min. tide level at high water 2.8 m.; average tide level at high water 3.5; Max. tide level at low water 0.5 m.; Min. tide level at low water 1.3 m.; Average tide level at low water 0.7 m.

RADIO: Mokpo Radio. Call sign HLM operating on 500 and 484 kHz.

VHF: Pilots on Channels 12 and 16.

TUGS: Three tugs available, up to 150 h.p.

BERTHING: Sam Hak Do Pier, length 168 m. and width 18 m., where only one 8,000 ton ocean-going vessel can operate in 13 m. depth.

One berth for vessels of max. LOA 200 m. and max. draft 10.5 m.

STEVEDORES: There are 3 stevedoring companies with 28 wooden barges (1,680 tons), 7 steel barges (1,200 tons) and 3 tug-boats.

MEDICAL: Crew members should be in possession of Health Certificate showing vaccinations for typhoid. In case the Health Certificate has expired, the person(s) will be vaccinated/inoculated by a quarantine doctor.

FRESH WATER: Available at rate of 150 tons per day. 24 hours notice required.

HOLIDAYS: Public Holidays; New Year (January 1st-3rd) Independence Movement Day (March 1st); Labour Day (March 10th) Arbor Day (April 5th); Memorial Day (June 6th); Constitution Day (July 17th); Liberation Day (August 15th); Nation's Foundation Day (October 3rd); National Alphabet Day (October 9th); United Nations Day (October 24th); Christmas (December 25th). Work can be arranged on all above holidays. Local Holidays; No work can be done on Lunar New Year or on the Moon Festival about August 15th.

SHORE LEAVE: Crew shore passes will be issued by Port Immigration Office. Extension of shore passes should be made every 72 hours.

AUTHORITY: Mokpo District Marine and Authority. *Tel:* (0631) 42 1304 *Telex:* K66767 Mpodmpa.

AGENT: Sub-Agents of Korea Universal Marine Co. Ltd., No 3-7, 1-Ka Okwang-dong, Mokpo, Korea. Tel: 2-0108, 2-0567, 42-5155. Telex K66780 Interco. Cables: "Intership Mokpo". Fax: 43-0510.

Associated with Jardine Shipping Agencies.

MUKHO: 37.33 N. 129.07 E. (See Plan)

PORT LIMITS: The port limit is established by lines joining the following points:

A. Lat. 37° 33′ 12″ N., Long. 129° 07′ 25″ E.
B. Lat. 37° 33′ 12″ N., Long. 129° 08′ 12″ E.
C. Lat. 37° 32′ 00″ N., Long. 129° 08′ 23″ E.
D. Lat. 37° 32′ 00″ N., Long. 129° 07′ 02″ E.

DOCUMENTS:

6 Crew Lists.
6 Passenger Lists (In case of any passenger aboard).
3 Stores Lists.
3 Personal Effect Lists.
3 Cargo Manifests (In case of any cargo on board).
2 Port Itinerary Reports (For the last 6 months).

PILOTAGE: Compulsory and 3 licensed Pilots are available from 060 – 2200 hrs., and usually join ship in position Lat. 37° 32′ 30″ N Long. 129° 08′ 25″ E.

VHF Radio is available for contacting pilot station (Tel: 2-2324/3740

ANCHORAGE: Outer Harbour offers anchorages for the vessel awaiting docking order with a rocky and sandy bottom.

Vessels lying anchored in this anchorage which is open roads, a recommended to pay attention to weather conditions. The depths va from 9 m. to 26 m.

RESTRICTIONS: Pilot for entering inner harbour is available from 0500 hrs. to 2200 hrs. due to close of port.

The max. available depth of inner harbour is 8.5 m. The max. tidal range is 0.4 m.

MAX. SIZE: The max. permissible length, breadth and draft for entering inner harbour is as follows:

Length – 180 m. Breadth – 25 m. Draft – 8.5 m.

HEALTH: Pratique is automatic. For Pratique it is necessary to prepare the following documents: Yellow cards. Derat Certificate and/or Derat Exemption Certificate. In the event of any suspected disease or fever on board it should be reported without delay to Quarantine Station and/or Agent in Mukho.

RADIO: Shore Radio Stations: Seoul Radio, Kangreung Radio, Busan Radio and Mokpo Radio.

Mukho harbour Network 6MF2.

VHF: Call sign "Mukho Radio" Channel 16 for calling station. Channel 25 for communication.

RADAR: None.

TUGS: 2 tugs of 1,000 h.p. each equipped with their own towline are available.

BERTHING: *No. 1 Pier.* (Exclusively for loading Coal/Graphite in bulk).

Berth A: Exclusively for loading Coal/Graphite in bulk. Length 100 m. Available draft at LW 7.5 m. 2 lines of belt conveyor and 2 loaders, height above HWL. 7 m. Loading rate per hour per loader 300 tonnes.

Berth B: Exclusively for loading Coal/Graphite in bulk. Length 110 m. Permissible draft at LW 8 m. 2 lines of belt conveyor and 2 loaders, height above HWL. 7 m. Loading rate per hour per loader 400 tonnes.

No. 2 Pier: Exclusively utilised for Naval and Coast Guard ships. Length 140 m. Depth available 4 m.

No. 3 Pier: For loading bulk cement, bagged cement and cement clinker in bulk, and loading/unloading general cargoes. Length 330 m. Available draft at LW 8.5 m. or 28 ft. 1 line of conveyor and 1 loader (air slider) for loading bulk cement. 2 lines of belt conveyor and 2 loaders for loading bagged cement. 1 line of belt conveyor and 1 loader for loading cement clinker in bulk. Available height above HWL 8 m. Loading Rate: Bulk cement 400 tonnes/p.h. Bagged cement 1,500 tonnes per day per loader. Cement clinker 350 tonnes/p.h.

Loading rate for General Cargo as follows:

Average discharging rate per hour/gang:

Steel material	Various	30 tonnes
Machinery	Case	30 tons
Grain	Bulk	25 tonnes
Gypsum	Bulk	25 tonnes
Coke	Bulk	15 tonnes
Fertiliser	Bag	20 tonnes

Average Loading Rate per hour/gang:

Iron Ore	Bulk	20 tonnes

No. 4 Pier: For loading bulk cement and loading/unloading general cargoes. Length 150 m. Permissible draft at LW 7.5 m. 1 line of belt conveyor and 1 loader (air sliding chute) for loading bulk cement. Height above HWL 8 m. Loading Rate: Bulk Cement 400 tonnes/p.h. Loading rate of general cargoes same as at No. 3 Pier. Discharging rate of general cargoes same as at No. 3 Pier.

Central Pier: For loading/unloading general cargoes. Length 120 m. Permissible depth at LW 6.5 m. No shore facilities. Loading/unloading general cargoes same as at No. 3 Pier.

CRANES: Mobile Cranes 1×20 ton and 1×30 ton.

BULK CARGO FACILITIES: No discharging facilities. Loading facilities see "Berthing".

STEVEDORES: Vessels bound for this port are to radio Agent Shipper/Consignee and Harbour Master, at least 24 hours prior to arrival, draft on arrival, description/quantity of cargo.

Average Discharge Rate per gang/hour:

Steel materials	Various Types	30 tons
Machinery	Case	30 tons
Grain	Bulk	25 tons
Ores	Bulk	25 tons
Fertiliser	Bag	20 tons

Average Loading Rate per gang/hour:
(Only with labourer hands – manually)

Ores	Bulk	20 tons

Average Loading Rate per gang/hour:
(By shore loading facilities)

Coal/Graphite	Bulk	350 tons
Cement	Bulk	350 tons
Cement	Bag	60 tons
Cement Clinker	Bulk	350 tons

MEDICAL: Several hospitals available.

TANKERS: No facilities.

DENSITY: Average salinity of water in the port is 1.025.

FRESH WATER: Supply of fresh water available by water barge and from shore water works.

Supply at pier	50 t.p.h.
Supply by barge	100 tons per day

FUEL: Most grades of domestic and bonded oil available with 4 days prior notice.

FIRE PRECAUTIONS: None.

CONSULS: None.

REPAIRS: None.

DRY DOCKS: None.

SURVEYORS: Classification Surveyors are in Seoul and/or Busan.

GANGWAY/DECK WATCHMAN: Owner's/Master's option.

HATCHES: First Opening/Final Closing by crew and intermediate handling by stevedores.

CUSTOMS ALLOWANCES: Cigarettes: 1 carton. Wine/Spirit: 2 bottles.

CARGO GEAR: Shore loading facilities, see "Berthing". No heavy lift cranes.

REPATRIATION: Possible.

AIRPORT: No airport locally, however there is an express bus service between Mukho and Seoul.

HOLIDAYS: *Official Holidays are as follows:*

The New Year Day	1st January	Work cannot be arranged
Independence Movement Day	1st March	Can be arranged
Memorial Day	6th June	Can be arranged
Constitution Day	17th July	Can be arranged
Independence Day	15th August	Can be arranged
National Foundation Day	3rd October	Can be arranged
Hangul (Korean Alphabet) Day	9th October	Can be arranged
Armed Forces Day	1st October	Can be arranged
Festival Days:		
Lunar Calendar New Year	1st January (Lunar)	Work not possible
Labour Day	10th March	Work possible
Children's Day	5th May	Work possible
Buddha's Birthday	8th April (Lunar)	Work possible
Moon Festival Day	15th August (Lunar)	Work not possible
Christmas Day	25th December	Work possible

POLICE/AMBULANCE/FIRE: Police – 3112. Ambulance – 3900. Fire – 119, 3005.

TELEPHONES: None.

SERVICES: None. Should be arranged from Busan/Inchon.

SHORE LEAVE: Possible.

IDENTIFICATION CARDS: Shore passes are issued for every Crew member who wishes to go ashore.

REGULATIONS: No particular regulations.

DELAYS: Normal delays.

GENERAL: None.

AUTHORITY: Donghae Maritime & Port Authority. *Tel:* (0394) 32-3631. *Telex:* K24336.

AGENT: See "Bukpyung".

POHANG: 36.01 N. 129.24 E. (See Plan)

PORT LIMITS: The sea within the line joining the position of Yeonam Southern Cape Long. 129° 25′ E. to that of Lat. 35° 59′ 50″ N., Long. 129° 27′ 30″ E.

DOCUMENTS: See "Busan".

PILOTAGE: Compulsory, 4 licensed pilots available. Tel: 2-9221/2.

ANCHORAGE: 18 anchorages with depths 8.0 m. – 23.0 m. Bottom is mud and sand.

MAX. SIZE: See "Berthing".

Ship Operator's Report: Posco Mineral Quay:

July 1979: Vessel of 142,767 d.w.t., with 112,012 tons of cargo on board docked at No. 1 B-2 with a draft aft of 49 ft. 6 in. (15.08 m.). The officially accepted draft is 14.50 m.

HEALTH: Quarantine Anchorage: Lat. 36° 03′ 47″ N., 129° 26′ 55″ E.

Radio Pratique to be requested 36 hours prior to arrival.

RADIO/VHF: Port Control on VHF Channel 16.

TUGS: 3 tugs available of 3,000 h.p. The tugs are stationed at the third pier.

BERTHING:

CRANES: 12 Shore cranes. (Lifting capacities 3,138 t.p.h.)

MEDICAL: 2 hospitals available.

FRESH WATER: Can be supplied alongside the quay or by water barge.

FUEL: Available locally. For large quantities 48 hours notice required.

FUEL: All grades obtainable from oil companies.

CUSTOMS ALLOWANCES: Tobacco: 400 cigarettes. Wine: 1,500 cc.

REPATRIATION: All facilities available for crew changes.

AIRPORT: Kimpo 200 km., Kimhae 150 km.

POLICE/AMBULANCE/FIRE: Police 2-3419. Fire 119. Ambulance 2-5269.

HOLIDAYS: New Year's Day – 3rd January, 1st March, 5th April, 5th May, Buddha's Birthday, 6th June, 17th July, 15th August, 3rd October, 9th October, Christmas Day.
SERVICES: Sub-Agents. Ship's laundries, etc.
SHORE LEAVE: Crew members allowed ashore.
IDENTIFICATION CARDS: Seaman's Book is sufficient.
DEVELOPMENTS: Central breakwater under construction.

Works in progress to increase capacity at first pier to 150,000 d.w.t. and draft to 16.5 m.

SHIPMASTER'S REPORT: 1975.
Pilot: Usually boards the vessel after anchoring in position Lat. 36.03 N., Long. 129.26 E.
Anchorage Position for Quarantine Clearance: Same as for Pilot.
Berthing: Entry and departure are only permissible during daylight hours, vessels are not allowed to berth at night.
Fresh Water: Available at all times ex-wharf without limit on quantity taken.

SHIPMASTER'S REPORT: 1975.
Approaches: There are no British Admiralty Charts covering this port. The coastal approach to Yongil Man can be made on Chart B.A. 3666, thereafter an American Chart No. 95166 (formerly H.O. 3257) is suitable for making the approach to the Quarantine Anchorage.

There are no offlying dangers, and depths shelve gradually from the entrance to the head of the bay.

A good lookout should be maintained for fishing nets which are many.
Quarantine: Port Health Officials board at the Quarantine Anchorage – Position Lat. 36° 02′ N., Long. 129° 26′ E. in a depth of 19 m. No Radio Pratique available.

If vessel arrives at night, officials board at daybreak next morning. No port movements during the hours of darkness.
Notice of Readiness: Accepted at time of Free Pratique granted.
Pilotage: Pilot boards with Port Health at anchorage. Pilot stated that our vessel 72,072 d.w.t. was too big for the port, which was designed for max. size 50,000 d.w.t. However, no difficulties experienced, berthing in calm weather conditions. Berthing and sailing in daylight hours only.
Entrance Channel: Entrance to harbour is made via dredged channel, commencing between 2 buoys, (Nos. 1 and 2), about 200 ft. apart, situated about 1 mile off Southern Breakwater head.

Axis of approach channel, from midway between the buoys to midway between the breakwater heads, is a straight line 259° True.

Dredged depth in the channel is stated to be not less than 13 m. However, according to the echo sounder, depth beneath keel was never less than 11 ft. until vessel entered the harbour basin, when further depth recording was impossible due to 'noise' from propeller wash caused by astern movements, obscuring echo sounder signal propagation. As the vessel's draft was 36 ft. 08 in. min. depth of water was therefore 47 ft. 08 in. = 14.5 m. approx. This was verified on the outward passage. The 13 m. minimum probably refers to the basin within the harbour entrance.
Tide: The rise and fall of tide is only about 1 ft.
Tugs: There are only 2 tugs available, both very weak. Pilot kept complaining that the tugs were inadequate for a vessel of this size, which was a fair assessment.
Berth: See sketch (Plan) for depth alongside POSCO mineral quay. Min. depth at berth stated to be 12 m. (39 ft. 04.5 in.) Max. permissible draft 11.2 m. (36 ft. 09 in.) Density was 1026.

Loaded vessels berth head in, starboard side alongside. Can prepare accommodation ladder starboard side before arrival.

The face of the quay is protected by permanent heavy-duty rubber fendering.
Moorings: A minimum of 3 head lines, 1 breast line, and 2 backsprings, each end, is recommended. Although the port is well sheltered from the prevailing W. – N.W. winds, it is wide open to the N.E. from which strong gales can suddenly develop.
Discharge: 2 modern transporter grabs discharge into a conveyor belt system. Discharge rate overall about 1,100 t.p.h., on a 24 hour basis. Holds were well swept clean on completion.

A meticulous draft survey was held upon arrival and after completion, to verify Bill of Lading.
Fresh Water: Plentiful supply from pipe line on the quay. Apply to Agent for services of waterman.
Customs: The bond is not sealed, but a Custom's Officer is stationed on board at the gangway throughout.
Shore Leave: The crew are not allowed to pass through the steelworks, going ashore. A liberty boat must be hired, which plies between the end of the quay and Pohang town pier, about a half hour run.

Last boat returning to ship at night leaves the town at 2200 hrs. First boat in the morning leaves at 0600 hrs. Shore passes issued on arrival.
Documents: The following arrival papers are required:—
Quarantine Declaration and Vaccination List.
14 Crew Lists.
3 Stores Lists.
3 Crew's Effects Declarations.
10 Cargo Manifests in Metric Tons.

N.B. The cargo manifests can be made up on board by typing on plain paper, but quantities must be stated in *metric tons*.
Repatriation: Possible. A complete Chinese crew change (25 men) was carried out during vessel's stay, plus one officer to the U.K.
Communications: There is no Telex system in Pohang. Cables are passed by telephone to General Agents in Seoul, for onward transmission. There is no problem arranging telephone communication with the U.K., but it is not possible to reverse the charges (call collect). Average waiting time about 1 hour.
Repair Facilities: Most engine and hull repairs can be carried out. There are 4 repair firms available, but it is advisable to take the Agent's advice as 3 of these firms are very small, with limited manpower. Materials not immediately available, can be brought by road from Busan, about 3 hours' journey. Lloyd's Hull & Engine Surveyors based in Busan.

SHIPMASTER'S REPORT: July 1975.
Port Limits: By a line drawn from Lat. 36° 04′ 10″ N., Long. 129° 25′ E. to Lat. 35° 59′ 50″ N., Long. 129° 27′ 30″ E., Korean Chart No. 135 Pohang Harbour and Approaches refers.
Documents: See "Busan".
Pilotage: Pilots board either at the Quarantine Anchorage or off the channel entrance as required. Pilotage within the harbour breakwaters is compulsory. No VHF available but Pilots are equipped with transceivers for port operations.
Anchorages: In roadstead, open to the N.E. in depths of 15 m. to 20 m. – Numerous mooring buoys and marker buoys for reclamation are in the vicinity. Vessels should anchor to seaward until a Pilot boards.
Restrictions: Vessels may arrive and sail from the roadstead at any time, but in daylight only if using the inner harbour.
Max. Size: No restriction in the roadstead, 12 m. in the inner harbour.
Pratique: It is advisable to give advance notice of Pratique. Pratique is granted to vessels anchored in a circular quarantine anchorage, radius 500 m., the centre of which is located in Lat. 36° 03′ 20″ N., Long. 129° 25′ 25″ E.
Radio: All messages to Pohang should be routed through Busan Radio HLP.
Tugs: A number of tugs are available, the 2 largest being 2,500 h.p. each. Tugs join the vessel at the breakwater entrance.
Approaches: Vessels using B.A. Chart 3666 should find flashing seabuoy in the entrance to Yon Iru Bay located in position Lat. 36° 05′ 50″ N., Long. 129° 30′ 35″ E., and from there steer a course 227° True (6.8 miles) to the Inner Harbour Fairway Entrance, which is marked by 2 buoys marked 1 and 2 and Qk. Fl. G. and Fl. R. 3 seconds, respectively each visible 5 miles. An anchorage should be found close seaward of the entrance buoys whilst awaiting a Pilot.
Berthing: A number of inner harbour berths are available at depths ranging between 8 and 12 m. datum.

The entrance fairway has a minimum depth of 12.4 m. Harbour developments are still in progress.
Stevedores: Arranged through Agents. Advance notice desirable.
Medical: Available.
Fresh Water: Limited quantities available by barge, if advance notice given.
Consuls: None.
Repairs: Only repairs of a minor nature can be undertaken.
Drydock: None.
Surveyors: Lloyd's available from Busan.
Gangway/Deck Watchmen: Not required.
Opening/Closing Hatches: By Crew.
Customs Allowance: See "Busan".
Repatriation: Not available.
Airport: Busan (Suyeng).
Shore Leave: Permitted, but even if vessel berthed alongside, launch service must be used.
Identification: Shore Passes.
Developments: Considerable reclamation and harbour developments in progress.
General: Last call of vessel was July 1975. B.A. Chart No. 3666 does not show the new port of Pohang at all but can be used for approach work. Korean Chart No. 135 should be obtained if possible.

SHIPMASTER'S REPORT: June 1980.

The port is situated in the S.E. part of the country at the head of a bay and fully exposed to any weather from between North and East. Approaching the port there are very few navigational hazards except numerous small fishing craft. The B.A. Chart No. 3666 covering the area is out of date and the inset showing Pohang gives insufficient detail. I would recommend that with only B.A. Chart No. 3666 entry to the port should be attempted in daylight only. Korean Chart Nos. 132 and 135 cover the port and approaches and appear to be more up to date.

The Korean Pilot Book Supplement No. 9 1978 on Page 71 gives information on minefields and swept channels for approaching the port but the Harbour Pilots have no knowledge of these swept routes. However, there is a large area within the bay that is dangerous to navigation and anchoring but not marked on the chart. Vessels should not pass between the shoreline and a line drawn through the positions of the following lighthouse and buoys:

Fl. G. Lt. – Lat. 36° 05′ 18″ N., Long. 129° 33′ 35″ E.
Buoy RW – Lat. 36° 05′ 30″ N., Long. 129° 30′ 30″ E.
Buoy RW – Lat. 36° 03′ 12″ N., Long. 129° 28′ 20″ E.
Buoy – Lat. 36° 01′ 25″ N., Long. 129° 27′ 50″ E.

Also it is advisable to pass at least 2 miles North of the lighthouse so as to avoid the numerous fishing vessels and fishing stakes off the port, enter the bay passing the buoys on the port hand.

The indicated Quarantine Anchorage has only a limited depth of water and larger vessels are permitted to anchor in the vicinity of the second buoy where the vessel will be cleared by Quarantine Officers before the Pilot boards.

The ore/coal berth is situated in the new harbour where there is still a vast amount of new building and reconstruction taking place. The maximum draft is 14.5 m. and the approach through a short buoyed channel which offers no problems. The berth lies in an 035° – 215° direction with a depth alongside of 16.0 m. for 950 m. and vessels berth starboard side alongside. Standard moorings of 4–2–2 at each end and the port anchor with about three shackles, the latter being used for heaving off when unberthing.

Cargo discharge facilities are three units, with two more under construction, which should be completed by 1981, all suitable for the discharge of ore or coal. Discharge rate was about 30,000 tonnes per day using 2–3 units continuously.

Four tugs are used for berthing and unberthing operations, two of which are modern tugs. The two older tugs are due to be replaced soon with more powerful modern units.

Bulldozers are used for clearing hold bottoms and some shore labour engaged sweeping up excess fallout off hatches, etc. Food and some rm of accommodation has to be provided for the shift foremen on a ntinuous basis.

Fresh stores and provisions of good quality and reasonable price were btainable but no frozen foods of any description available. Laundry ervice available and fair results.

Fuel oil bunkers were available by previous arrangements with wners.

Shore leave is by launch only. Launch lands personnel in the old arbour about 5 miles away outside the breakwaters of the new harbour. o shore gangways available. Accommodation ladders required on each de as Port Officials and Agents board via the quay and ship's personnel re not allowed to walk on quay.

Repatriation for 26 Officers and Crew was done with very little effort nd minimum paperwork. Personnel travel by coach to Busan thence y air to Osaka and Tokyo for London.

Arrival papers were as those required for Pusan and some company rms readily accepted.

The present maximum draft for the port is 14.5 m. but this is expected increase to 14.75 m. next year.

Port limits have been extended and now join the following positions: at. 36° 04′ 30″ N., Long. 129° 25′ 20″ E.; Lat. 36° 03′ 00″ N., ong. 129° 28′ 00″ E.; Lat. 36° 01′ 12″ N., Long. 129° 29′ 54″ E.

HIPMASTER'S REPORT: September, 1982.

ealth: Radio Pratique not possible.

HF: 16 then 6 with Pilot boats; 16 with Pohang Port Authorities; 16, , 26 and 27 with Pohang Radio.

ugs: Four modern tugs.

erthing: Depth alongside Berth No. 1 is 17 m. Vessels berth either side ongside. Berthing in daylight only for large vessels.

uel: All grades of bunkers and lubricants available from Korea Marine unkering Co., Ltd. Cable address: K Bunker Seoul. Telex: K28412.

epairs: Sae Won Marine Engineering Co., Ltd., Cable address: Sae arine Pohang. Telex: K4395. Tel: (72) 5400-1 (riding crew are available r ship repairs on passage).

Sam Yang Marine Engineering Co., Ltd., Telex: Symeco K4415. Tel:) 2251-2, (3) 4451., Agent for Unitor Service.

UTHORITY: Pohang District Maritime and Port Authority, 58-7 angku-Dong, Pohang, Republic of Korea. *Tel:* (0562) 421812/5. *elex:* K54300 Hangman.

GENT: Sub-Agents of Korea Universal Marine Co. Ltd. No. 64-4, Ka Bongbin-ro, Pohang 790-00, Korea. Tel: 3-1611/3. Telex: K54506 inpo. Cables: "Shinjin Pohang". Fax: 42-0205.

Associated with Jardine Shipping Agencies.

YEONG TAEK: 36.57 N. 126.01 E.

LOTAGE: Pilot boards in position Lat. 36° 57′ 05″ N., Long. 26° 01′ 00″ E., which is 38 miles from the LNG Berth.

ESTRICTIONS: Vessels berth at daytime HW only.

AX. SIZE: Berth designed for vessels 90,000 d.w.t. – 100,000 d.w.t.

ERTHING: The dolphin berth, for LNG only, is 480 m. long and has a epth of 14.0 m.

orage: 4 tanks, each with a capacity of 110,000 cu.m.

UTHORITY: *Owner:* Korea Electric Power Corporation.

perators: Korea Maritime Port Authority and Korea Gas Corporation.

AMCHEOG HAN (Sam Chuck): 37.30 N. 129.10 E.

(See Plan)

HIPMASTER'S REPORT: June 1981

OCUMENTS:

Ship's Register (1 copy required to be kept ashore)
Last Port Clearance.
10 Crew Lists.
3 Lists of Private Tobacco and Liquors.
4 Personal Effects Lists.
4 List of Foreign Money.
4 Stores Lists.
4 Ship's Property Declarations.

LOTAGE: Pilot will board at Quarantine Anchorage.

After departure Sam Chuck vessel has to return Pilot to Bukpyung. uring night time no pilotage.

EALTH: On arrival Sam Chuck the vessel has to proceed to Bukpyung, bout 5 nautical miles North of Sam Chuck, and has to anchor at the uarantine Anchorage in position: Lat. 37° 29′ 36″ N., Long. 29° 10′ 30″ E.

The Port Health Officers will board the vessel and arrange Free ratique.

ocuments Required:

1 Crew List.
1 Maritime Declaration of Health.
1 Vaccination List.

VHF: "Mukho Radio" calling Channel 16, communication Channel 26 (slight interference).

TUGS: One tug available, equipped with own tow line.

BERTHING: Conveyor pier, left side of port entrance, exclusively for loading cement clinker in bulk.

Draft allowed according to Pilot is 6.8 m. Other berths, draft allowed is 6.7 m.

One belt conveyor with a loading rate about 300 tonnes per hour.

DENSITY: 1027.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits. Bonded store will not be sealed, as long as the Master only has the key.

One Customs Officer will stay on board for the whole time at berth.

SHORE LEAVE: Possible, shore passes issued for every crew member, have to be returned before departure.

GENERAL:

Ship Chandler: Available from Mukho.

SAMCHEON PO: 34.52 N. 128.05 E.

(See Plan)

SHIPMASTER'S REPORT: June 1983.

DOCUMENTS: Formalities similar to other Korean Ports, but local Authorities are not used to Foreign going ships yet and Port Clearance is very slow. All crew members issued with shore passes by Immigration Authorities, these passes are collected in again before sailing, to hand back to Immigration.

PILOTAGE: Although the Port Information Sheet states that pilotage is not compulsory, I feel that it would be unwise to attempt both berthing and sailing without the benefit of local knowledge. The streams can be very strong, we estimated up to about 4 knots whilst we were there.

Pilot boards at the Quarantine Anchorage. Pilot boarding regulations similar to those at other Korean ports.

Requests for a Pilot should be made through the vessel's local Agents.

ANCHORAGES: Quarantine Anchorage 34° 51′ 56″ N., 128° 05′ 23″ E. (600 m. radius). Good holding ground – yellow mud. Depth 17.2 m. Anchorage is open to South. Channel to quay dredged to 18 m. and is well buoyed.

RESTRICTIONS: Berthing/unberthing carried out at slack water, during daylight hours only.

MAX. SIZE: 100,000 tonnes deadweight. Max. depth alongside 18.1 m. Rise of tide 1.6 m.

TUGS: Two tugs are required. They come from Masan, 3 hours' notice required.

BERTHING: Wharf is 540 m. long and is divided into 2 berths. Principal commodity is coal for the power station.

	Length	*Depth*	*Max. Size*
Northwest end	270 m.	15.10 m.	50,000 d.w.t.
Southeast end	270 m.	18.10 m.	100,000 d.w.t.

Wharf is very well fendered, and has lrage rubber, 'Buffer', type fenders at regular intervals. There is a 2 m. high wall, which runs along the entire wharf frontage, the mooring bollards are set in breaks in this wall; but the set up is dangerous; very awkward for the linesmen, and virtually impossible to get a gangway out, ship to shore.

BULK CARGO FACILITIES: Two ship unloaders with 35 tonne grabs available for coal discharge. Capacity 1,500 t.p.h. each.

STEVEDORES: Working hours per day – 16 hours.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: Nearest Consuls at Busan.

REPAIRS: Limited repairs may be undertaken by local boat yard.

GANGWAY/DECK WATCHMEN: Three Watchmen and two Customs Officers on board at all times, and have to be fed and accommodated. The Watchmen will use one room, but the Customs want to be accommodated separately.

AIRPORT: Nearest at Pusan.

SHORE LEAVE: Shore leave by liberty boat only, takes crew to the small fishing port of Sam Cheon Po, itself about 1 mile further West. Crew members are not allowed to walk ashore through the power station, so only the liberty boat can be used.

IDENTIFICATION CARDS: See "Documents".

GENERAL: Fairly good quality fresh provisions may be obtained, Agent handles chandler's work as well. Agents very willing to be of assistance, but there are very grave language problems, hardly anyone speaks English, and those that do are usually very limited in what they understand.

SHIPMASTER'S REPORT: May 1984.

CHARTS: B.A. No. 127; American 95142; Korean 452.

DOCUMENTS:

9 copies Crew List.
1 Declaration of Health.
1 Vaccination List.
3 Passenger Lists (Nil return required).
2 Crew Declaration of Personal Effects.
2 Currency Lists.
2 Ship's Currency Lists.
2 Bonded Stores Lists.
2 Ship's Stores Lists (all foodstuffs on board to be declared).
1 List of Ports of Call (previous 9 months ports and countries).
2 Ammunition and Firearms List.
2 Narcotics Lists (sealed once checked).
7 Reports of Entrance/Departure (Agent supplies and completes).

ARRIVAL: 2 Customs and 2 Immigration officials and 1 army official board when vessel alongside, Agents assist.

PILOT: Boards in position Lat. 34° 50′ N., Long. 128° 6.5′ E., from small blue coloured boat. Advance notice of arrival important as Pilot comes from Masan (3 hours by bus) and there are no telex facilities in Samcheon Po. All messages in and out by telephone from/to respective radio stations. Best to use Seoul Radio. At least 24 hours notice after which it is too late to change. Pilot boards and takes vessel to Quarantine anchorage, waits onboard until vessel cleared, then berths vessel alongside, with the aid of 2 tugs.

BERTH: The berth is 1,550 m. long with depths of 14 m. at West end and 16 m. at East end. Very well fendered for whole length, but high due to very heavy swell during S.W. Monsoon, sufficient bollards along whole length.

There are 2 gantries for 2 berths with 20 ton grabs, onto conveyor belts to large storage yard. Air draft at least 25 m. from quay. Outreach about 30 m.

Only import at this berth is coal for power station (Korean Electric Company).

FRESH WATER/FUEL: Available by barge only. Bunkers by barge from Yusan or Busan. Fresh water obtained locally but costs U.S.$4.0 per ton.

PROVISIONS: Available locally, usual Korean standard.

SHORE LEAVE: Possible by launch from ship, nobody allowed through installation except Master.

AGENT: Only one Agent in Samcheon Po. (Boo Young Shipping Co. Telephone No. 8111) No telex available.

SHIPMASTER'S REPORT: November 1985.

Approach easy from South. Straight up between Jang Got and Suu Do.

Approximately 16 m. of water in sheltered Quarantine Anchorage. Pilot not required for anchoring. VHF communication with Port Control just possible. Poor reception and language problem. Many small fishing boats and small buoys in the area. 2 tugs arrived by themselves and stood off. Unable to contact them, presumably they had come from Busan. Later a Pilot boarded who spoke a little English. Channel is well buoyed to the power station berth.

Vessel berthed at 1830 hrs. and commenced discharge at 1640 hrs. the following day.

A modern power station type berth, well able to cope with Panamax type vessels. Jetty well fendered with adequate mooring bollards. Unfortunately a wall 6 ft. (2 m.) high has been constructed along jetty edge with spaces left for bollards. The edges of which tend to chafe moorings. It also makes it hard to land gangway or accommodation ladder. This done by shore labour as crew not allowed to walk ashore. Boat service only, which ran to Si Racha.

There are guards on the jetty. Two modern grab dischargers available. There is no airdraft problem. Damage was done to hand rails in No. 4 hold, which ship repaired itself.

Cargo was completed at 0045 hrs. (56 hours after commencement) and vessel cleared at 0532 hrs.

ULSAN (Including Onsan): 35.27 N. 129.23 E.

(See Plan)

(a) GENERAL CARGO FACILITIES.
(b) YUKONG LIMITED – SBM.

(a) GENERAL CARGO FACILITIES

LOCATION: Ulsan is located on the Southern part of Korea's East coast 65 km. by sea from Busan. It is the site of the Hyundai Heavy Industries yard.

PILOTAGE: Compulsory. Quarantine/pilot station situated in position Lat. 35° 27′ 26″ N., Long. 129° 24′ 30″ E.

VHF: Port Control on VHF Channel 16. Vessel's to advise requirements and ETA 3 hours prior to arrival.

TUGS: 7 tugs. 600 h.p. – 2,600 h.p.

BERTHING: The commercial port handles steel products, coal, and chemicals required by the Ulsan Industrial Complex, which is adjacent to the port area and houses a car factory, an oil refinery, and a number of other heavy industry and chemical plants.

Berth	*Length* (m.)	*Depth* (m.)	*Remarks*
No. 1	130	8.0	General cargo
No. 2	260	12.0	General cargo, coal, cars
No. 3	347	9.0	
No. 4	322	7.5 – 11.0	Fertiliser, cars
No. 5	220	11.5	General cargo
KPC Pier	100	7.0	LPG
Coal Pier	273	10.0	Coal

Onsan – see "Shipmaster's Report", March 1987.

FRESH WATER: Available alongside and by barge at anchorage and mooring buoys.

FUEL: Available with 24 hours' notice.

DEVELOPMENTS: Grain terminal under construction for handling vessels of 15,000 d.w.t. – 60,000 d.w.t. 2×750 t.p.h. ship unloaders will be available.

A coal import facility is to be built, Korea Oil Corporation will be the user.

CHIEF OFFICER'S REPORT: 1975

Vessel's Particulars:

Length Overall – 162.18 m. Breadth – 22.8 m.

Summer Draft – 10.382 m. Summer d.w.t. 21,705 m./tons.

Anchorage: Local Agents generally wireless the Quarantine Anchorage position which is approx. 1.5 miles W.N.W. from the position shown on BA Chart No. 898. Care should be taken while anchoring as there are innumerable fishing floats, nets, etc. North of 35° 28′ N., and West of 129° 23.7′ E.

Restrictions: No pilotage between sunset and sunrise.

Pilotage & Berthing: The standard of pilotage was generally good. Pilot arranged by Agents and embarks at Quarantine Anchorage after vessel is cleared by Authorities. 1 anchor is used while going alongside. 1 tug of unknown h.p. and 2 mooring boats assist while berthing. 4 berths are available:

No. 1 Pier – Length 300 m. Depth variable.
No. 2 Pier – Length unknown. Depth supposed to be 36 ft.
No. 3 Pier – Length 165 m. Depth 29 ft.
No. 4 Pier – No details known.

Local Authorities themselves do not have any idea as to the actual depths alongside. It is advisable to sound the bottom twice daily especially at No. 1 Pier as the depths were found to vary almost every 10 ft. Cargo is loaded/discharged by vessel's cargo gear. Rate of loading bagged urea is approx. 400 m/tons per gang per day. Working hours are normally between 0700 hrs. and 1900 hrs. every day, Saturdays and Sundays included. Only on National Holidays no cargo is worked. Discharge of bulk sulphur and gas/product carriers is around the clock. A vessel carrying 28,000 tons of bulk sulphur was discharged in 5 days. There is 1 crane and conveyor belt on No. 1 Pier only for handling sulphur. It was observed that sometimes small coasters were loaded/discharged by mobile cranes.

Stevedores: Ulsan Port has a rule that a gang engaged for one particular hatch will only work that hatch from start to finish and will not work any other hatch, not even the other end of the hatch if the hatch has more than 1 set of derricks. Gangs have to be ordered before noon for the next day.

Medical: Local hospital used, patients normally taken there by watchmen.

Density: Apparently varies. Once 1016 was obtained while 10 days earlier 1020 was obtained.

Fresh Water: Available from barge whose capacity appears to be 150 tons. At least 24 hours notice necessary.

Fuel: Not available.

Repairs: Facility available but rates high.

Dry Docks: Hyundai Shipyard located at Ulsan builds VLCCs.

Watchmen: Essential on foreign vessels. Arranged by Agents.

Hatches: As per charter party but suggest use own crew as labour are only experienced with wooden hatchboards.

Repatriation: Usually done through Seoul which is about 5 hours away by bus. We changed Radio Officers and experienced no difficulty.

Telephones: Placed on board, but only for local calls via exchange.

Services: Only 1 ship chandler who handles everything including providing watchmen, laundrymen, etc.

Identity Cards: Shore pass issued for Ulsan valid for 3 days. To be renewed every fourth day. Usually done by watchmen who collect all passes and go to Immigration Office.

Surveyors: Lloyd's can be arranged from Busan.

General: Ulsan is a very busy port with a large amount of local and Japanese coastal traffic. Local Agents keep trying to shift bigger vessels ahead and astern to try and squeeze in small coasters. It is advisable to strictly adhere to the charter party rules at all times in this port to prevent delays and expense on vessel's account.

SHIPMASTER'S REPORT: May 1979 (Updated 1986).

Vessel: Summer d.w.t., 37,300; LOA, 194 m.; breadth, 28 m.; Summer draft, 36 ft.

Vessel loaded 30,000 tonnes of bagged fertiliser at No. 2 Berth using ship's cranes. The loaded departure draft was 33 ft.

Port Limits: As shown on Korean chart 119, arc passing through:

Lat. 35° 28′ 29″ N., Long. 129° 24′ 25″ E.
Lat. 35° 26′ 00″ N., Long. 129° 24′ 23″ E.
Lat. 35° 24′ 13″ N., Long. 129° 22′ 00″ E.

Documents: As per "Guide to Port Entry".

Pilotage: The Pilot was ordered through the Agent. The Pilot joins the ship in the anchorage from a white coloured pilot boat which has no VHF. A portable VHF is carried by the Pilot for communication with tugs and pilot station. Only 2 Pilots are on duty each day and there are no movements in port between 1900 hrs. and 0600 hrs. The standard of pilotage was good.

Anchorage: The Quarantine Anchorage as shown on Korean Chart 119 is centred on Lat. 35° 27′ 25″ N., Long. 129° 25′ 34″ E. (Radius 400 m.)

Depth in this anchorage is 33 m. to 47 m. This anchorage is outside the harbour limits. A good anchorage was found 1 mile N.E. of No. 2 Imodco Buoy in 24 m. A boat service is available from the anchorage.

Restrictions: No night movements.

Max. Size: Not known.

Health: As per "Guide".

VHF: "Ulsan Radio" maintains a listening watch on Channel 16, contact is made on this Channel then switched to a working Channel. This station is used for local calls only.

Radar: No port radar.

Tugs: There are 2 tugs available of unknown horsepower. The tugs join the vessel off the berth and use their own lines.

Berthing: No. 2 Berth: Length approximately 250 m. The depth alongside was 11 m. with 13 m. offshore, the density varied but averaged 1006. There are no fixed shore facilities at this berth and it appears that it is often used by car carriers.

Cranes: Stevedores have 100, 60, 30 and 10 tonne mobile cranes available.

k Cargo: 30,000 tonnes of bagged fertiliser was loaded using 4 ships nes. Cargo was delivered to the berth in trucks and made up into gs on the jetty. The loading rate was 700 tonnes per hatch/day.

vedores: Gangs should be ordered before 1400 hrs. the previous y. There are a limited number of gangs available. Normal working urs are from 0700 – 1900 hrs. with 1 hour break. It is possible to shift gs to different hatches under certain circumstances and night king is possible but not advised as same men work through to next y. The standard of cargo handling equipment supplied by stevedores good.

dical: Medical treatment and hospital facilities are available.

tches: Hatches should be opened before stevedores arrive on board waiting time is incured.

sh Water: Fresh water is available and is delivered by barge.

patriation: Repatriation was carried out via Busan about 2 hours drive ay without any problems.

port: Nearest airport Ulsan, regular daily flights to Seoul.

lephones: A telephone is placed on board which is for local calls only exchange. Overseas calls can be made from shore, these calls are lect, person to person, only with a waiting time of 2 hours proximately).

ntity Cards: A shore pass is issued for Ulsan which is renewed every h day, usually done by watchmen who collect all passes and take m to the Immigration Office.

res: There is only 1 ship chandler and all stores are ordered through n. The quality is poor and the prices high.

IPMASTER'S REPORT: Port of Onsan. March 1987.

This port is, to all intents and purposes, part of the Port of Ulsan – all vices (tugs, Pilots, Agents etc.) – are from Ulsan.

The port itself consists of a dolphin jetty, with berths on both sides d is owned and operated by "Ssangyang Oil Co." (See B.A. Chart 3 (Ports on East Coast of Korea) "On San Hang").

Berthing/unberthing is during daylight only.

Normal berthing is on either side of the jetty, with ship's head to the E. (vessel swung before berthing). It is recommended that good orings, and as many as possible are used, as the jetty is open to sterly swells which are common during summer months.

No services are available at the berth. Any fresh water or bunkers ne, by barge, from Ulsan.

Cargo Connections: There appear to be only 2 per berth (on our call used 1×8 in. Chicksan attached to a flexible length of hose. Aft of "deep sea" berths there are coaster berths which appear to have er Chicksans.

Maximum draft on the berth is reputed to be 10.8 m.

Documents are as listed in the "Guide".

IPMASTER'S REPORT: April 1988.

strictions: Vessels carrying dangerous cargoes are not allowed to th/unberth during hours of darkness.

alth: Quarantine deadline is 1700 hrs.

rrency: Currency Lists no longer required. Japanese Yen may be en ashore.

re Leave: No restrictions.

THORITY: Ulsan District Maritime & Port Administration, 139-9, eam-Dong, Nam-Ku, Ulsan, Korea 690. *Tel:* 0522-75-4881/3. ex: K 53425 USPORT.

ENT: Sub-Agents of Korea Universal Marine Co. Ltd., No. 139-2, am-dong, Ulsan, Korea. Tel: 75-8881/4. Telex: K54499 Ussye. bles: "Shinyang Ulsan". Fax: 76-1110.
ssociated with Jardine Shipping Agencies.

YUKONG – SBM.

CUMENTS:
copies of Manifested Parcels on board.
copies of the Stores List.
copies of List of Narcotics on board.
copies of List of Arms and Ammunition on board.
copies of List of Vessel's Tobacco, Cigarettes, Spirits, etc.
3 copies of the Crew List.
copies of List of Crew's Personal Effects, Tobacco, Cigarettes, Spirits, etc.
rew's Vaccination Certificates.
erat Exemption Certificates.
learance from Last Port.
0 copies of List of Landing Passengers, if any.
0 copies of List of Passengers in Transit, if any.
copies of List of Passengers Baggage.

OTAGE: The seaward approaches to the Imodco Terminal mooring are free of underwater obstructions, and existing landmarks and igation aids are adequate. Depth of water not less than 65 ft. in proaches. The Imodco Terminal can be approached with the summit Pongdae San bearing 333° true. When in position the following igation fix will obtain at the mooring site:

ongdae San (summit)	bearing	333° true	distance	2,915 yd.
ongjin Hang Light (end of breakwater)	"	053° true	"	4,770 yd.
huck To (centre cut)	"	255° true	"	3,800 yd.

good radar echo will be obtained from the tanks ashore at proximately 20 miles, the Imodco buoys at a distance of 8 miles, and small buoys, marking the floating hose heading off the Imodco Buoy, 1.5 miles.

ights ashore, lights on the Imodco Buoys and on the small buoys pear to be unreliable.

fter clearing Customs a Harbour Pilot will board the vessel to direct the buoy and conduct the mooring operations if required. There is night mooring. However, unmooring is carried out during darkness well as in daylight.

ANCHORAGE: Anchor the vessel about 1 mile S.E. of the buoy, if the weather permits. In this location it is less difficult to find vessel, when in fog. Do not anchor less than 1 mile from buoy, and under no circumstances can the anchors ever be used on approaching the buoy terminal, chain cables and pipe-lines are located at this site and anchoring is strictly prohibited.

RESTRICTIONS: No night mooring at any time at SBM. Unmooring possible at any time.

MAX. SIZE: Max. mooring capacity 260,000 d.w.t. Max. draft 64.5 ft.

HEALTH: Entry prediction to be supplied to Quarantine Authorities by vessel's Agent 24 hours before arrival. Master required to complete Health Declaration when officer boards on arrival. Free Pratique is automatic when coming from another Korean port.

VHF: Communication available in Ulsan Port 24 hours a day.

"Ulsan Harbour Control" on Channels 14 and 16 for reporting vessel's arrival and departure.

"Ulsan Pilot" on Channels 13 and 16 and "Ulsan Radio" on Channel 16 for calling and working channels are Channels 25, 26 and 27 for public messages.

TUGS: 2 tugs assist in mooring operations and 1 tug assists with unmooring operation.

Tugs will join vessel about 1.5 miles East of No. 2 SBM.

BERTH DESCRIPTION: 2 berths at single buoy moorings.

Yukong Terminal No. 1 SBM:

Position: Lat. 35° 27′ 03″ N., Long. 129° 23′ 44″ E.

Description: A 12.5 m. diameter yellow buoy installed in August 1988.

The buoy will be serviced in May 1990. 2×16 in. hoses with length 980 ft. and 945 ft. respectively will be installed. The hose connections are made to the starboard manifold of the vessel only and lifted one at a time for connection to the ship's manifold. Each hose when full of oil is over 10.5 tons in weight.

Light: Fl. Y. 6 secs. Visibility over 5 miles on radar.

Radar Reflector and Fog Horn: Radar reflector equipped, battery powered fog horn with a range in excess of 0.5 miles.

Yukong Terminal No. 2 SBM:

Position: Lat. 35° 26′ 44″ N., Long. 129° 23′ 20″ E.

Description: A 11.4 m. diameter yellow coloured buoy.

Lights: On buoy: Fl. Y. 6 secs. visibility over 5 miles. On hoses: 4 red winking marker lights equally spaced along the 980 ft. floating hoses, visible for 2 miles.

Fog Horn: A battery powered fog horn with a range in excess of 0.5 miles.

Weather: The berth is open to the weather and a short sharp swell is experienced when the wind is from the N.E.

BERTHING: 2 workboats (16 tons and 10 tons) are in attendance during mooring operations.

1 workboat will keep the hoses clear and the other handles the mooring ropes.

Both bow anchors are to be hove well up in the hawse pipes and properly secured before reaching the buoy.

Anchors are never to be used while at the buoy. They can foul buoy cables and pipe-line on the bottom if released.

No. 1 Buoy: Will be in use May 1990.

No. 2 Buoy: The vessel will be moored with chain (OCIMF recommended).

Onsan: See "Shipmaster's Report" dated March 1987 in Section (A).

HOSES:

No. 1 Buoy: Will be in use May 1990.

No. 2 Buoy: There are 2×16 in. hoses, 980 ft. and 945 ft. respectively in length. The hose connections are made to the port manifold of the vessel only and lifted one at a time to the ship's manifold. Each hose, when full of cargo is over 10.5 tons in weight.

Hose Mooring and Connection: Mooring and hose connection, disconnection will be carried out by Berthing Master and shore gangs, and while the vessel is at the buoy, 1 Harbour Master, 1 Cargo Inspector and 6 crew will remain on board during entire operations on the buoy. The vessel will be required to provide sleeping quarters and meals for them. They are mainly kept on board for emergency.

BUNKERS AND WATER: Available by barge at the anchorage. Bunkering is prohibited at SBM.

BALLASTING: After the vessel has discharged about half of her laden cargo, the vessel should be ballasted to a safe margin, to draw not less than 18 ft. forward.

This will avoid the vessel yawing widely on the buoy with strong winds and assist in avoiding contact with the buoy and hoses. Vessel will be moored at all times about 120 ft. from buoy.

REPAIRS/DRY DOCKS: All types of repairs possible at Hyundai Mipo Dockyard. Seven docks available, largest being 380 m.×65 m.×12.7 m.

ENGINES: The ship's engines must remain ready with full power for immediate use and to keep the vessel a safe distance from the buoy. Any repair work or hot work prohibited without the Berth Master's permission.

CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, and one bottle wine or spirits allowed, each man.

REPATRIATION: Nearest facilities for crew repatriation are at Pusan.

HOLIDAYS: 1st, 2nd, 3rd January; 1st March; 10th March; 5th April; 5th May; 6th June; 17th July; 15th August; 1st October; 3rd October; 9th October; 25th December and New Year's Day, (Lunar Calendar Day 1st January); Buddha's Day (Lunar Calendar Day, 8th April); Moon Festival Day (Lunar Calendar Day, 15th August).

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.

REGULATIONS:

Notice to Vessels Arriving at Yukong Limited – IMODCO Buoy Terminal at Ulsan

In the interest of your vessel and Yukong IMODCO buoy we wish to bring to your attention the pecularities that are most likely to occur while your vessel is moored to this terminal for discharge of cargo.

The buoy in its location is subject to wind, sea and tides and although the weather here is generally favourable we find that during each change of tide the vessel is quite frequently inclined to ride up on the buoy.

Our past experiences have taught us that *the best way to avoid this hazard is by use of the vessel's engine. In this instance we will require the co-operation of you and your officers.* The Berth Master who will assist you in mooring will also remain with the vessel throughout its entire discharge.

Tide or wind changes may cause the ship to ride up against the buoy. *In this case the Berth Master will anticipate the ship's movements and advise a dead slow bell astern to avoid ship's contact with the buoy. When the tide or other condition has again resumed its normal trend your engineers will be notified that the Berth Master is finished with the engine.*

During this period while the ship's engineer is on stand-by, one of your deck officers will be required to stand-by on the bridge, to pass the engine order from the Berth Master, who will be stationed on the ship's bridge to observe and direct this operation. The SBM's crew will stand-by at ship's bow and will inform of ship's movements to the Berth Master.

The seaward approaches to the Yukong Ltd. IMODCO terminal mooring site are free of underwater obstructions. Depth of water is more than 64.5 ft. in the approaches. Existing landmarks and navigation aids are adequate (Chart No. 119, published by H.O. of Korea is useful). A good radar echo will be obtained from the radar reflector located at buoy body.

Do not anchor within one mile of buoy and under no circumstances can anchors ever be used on approaching the buoy site and anchoring is strictly prohibited.

Vessels should be anchored 1.5 miles East of No. 2 IMODCO buoy where the vessel could be in sight of shore people and the people can board ship safely. Vessel should not be confused with the Yukong No. 2 Buoy and Ssangyong Refinery Buoy, which is located at Lat. 35° 25′ 13.5″ N., Long. 129° 23′ 08.5″ E. on the South side of Yukong No. 2 Buoy.

Use of Korean Government Pilots is compulsory. They will board the ship in daytime within the anchorage and before commencement of mooring operations. *There is no night-time mooring. Vessel unmooring is carried out day or night upon completion of cargo discharge.*

The Berth Master will board the ship while at anchorage and will take charge of mooring the vessel to the IMODCO buoy. He will be stationed at the ship's forecastle during mooring.

Two tugs assist with mooring and one tug with unmooring operations. Two launches are in attendance, one launch will keep the hose string free of the vessel while the other launch handles the mooring ropes during mooring operations. If the bight of the floating hoses protrudes a considerable distance beyond the buoy, the above hoses will be tended to avoid fouling the mooring buoy system while unmooring.

In the event it becomes necessary to vacate the buoy due to inclement weather or any other emergency, we caution you not to turn the propeller because it may foul hoses drifting near the ship's stern. A boat in attendance will tow the hoses away and clear of your vessel so that the ship's propeller can be used.

To avoid undue strain on the buoy, anchors, floating hoses, mooring ropes and chains, it will be necessary to ballast your vessel while on the buoy. Approximately 40% of her deadweight may be required as ballast to prevent undue strain on the buoy system. Dirty ballast tanks should be selected before hoses are connected to the manifold so that discharge of cargo and ballasting can be carried out simultaneously without contamination of cargo. The vessel will moor about 120 ft. from the buoy which will assist in avoiding contact with the buoy.

When the cargo has been discharged, your tanks inspected and found dry and the hoses disconnected, we will then request that you vacate the buoy mooring. If you desire to take on ballast or more time is required to complete your vessel's business you may go to anchorage to do so.

Yukong Limited will provide you with a copy of our crude oil unloading procedures which provides information and instructions for safe unloading of the crude oil cargo. It will be necessary to release tank inert gas pressure after the tugs have left. *The Yukong procedure specifies certain methods for gauging, water cut, temperature reading, sampling cargo and calculation of cargo. These procedures will be strictly followed by the Cargo Inspector together with Surveyor.*

If a VLCC is going to carry out crude oil washing, her equipment must satisfy Ulsan open sea buoy's crude oil washing regulations and peculiarities. Crude oil washing can be done under ship's responsibility and she must confirm to Yukong Ltd. not less than 7 days before her arrival that vessel's crude oil washing system is operational. Yukong Ltd. crude terminal provides booster pump to increase pumping rate, also an in-line sampler is installed in the shore line to monitor BS&W plus crude oil contamination with water.

The Berth Master is responsible for carrying out terminal's cargo unloading procedures. The Cargo Inspector will be on board for cargo inspection and will carry out cargo gauging and inspection of cargo compartments. Yukong Inspectors will also be on board prior to cargo unloading for sampling of cargo. Slop oil and BS&W shall be substracted from the quantity of cargo. When the Cargo Inspector is satisfied that all obtainable crude oil cargo is discharged to shore tanks, he will inspect the ship and sign the ship's empty and dry certificate along with the appointed ship's officer and the independent Surveyor.

Health: ETA to be supplied to Korean Quarantine Authorities by the vessel's Agent 24 hours before ship's arrival. The Ship's Master is required to complete the Health Declaration upon arrival of the Korean Quarantine Officer. Free Pratique is automatic when the ship is coming from another Korean port.

Radio: It is recommended that the Master communicates with the ship's Agent through Pusan Radio, which covers Ulsan port.

VHF communication is available in Ulsan port 24 hours/day, every day. Call sign "Ulsan Port Radio", calling Channel 16, working Channels 25, 26, and 27. A small walkie-talkie can communicate with the shore by the attendant launch. Pilot office: Tel: 72-7703/0419. Sunjin Tugs Co. Tel: 72-1278.

Ship's Repairs: Possible if arrangements with local shipyards are made prior to the vessel's arrival at Ulsan.

Identification Cards: Seaman's Book is sufficient, a ferry boat operates at all times.

SBM Team of Stand-by Men: While the ship is on the buoy, the vessel should provide sleeping quarters and linen for 8 men, this includes one Berth Master and Cargo Inspector. The stand-by men connect and disconnect hoses, clear floating hoses when necessary and are mainly kept on board for emergency purposes. Under certain conditions should it become necessary, they may ask the vessel for meals.

Safety: All ships and their Agents or concerned persons shall follow good safety practices including, in particular, but not limited to, those described in the International Oil Tankers of Terminal Safety Guide as issued by the OCIMF.

1. The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Berth Master, bearing in mind the weather conditions, or any other circumstances requiring special care or attention.

2. While the vessel is moored or within the vicinity of moorings, all vessel's personnel and vessel's operations must comply with or be in accordance with the following safety rules:

   The ship's engines must remain ready with full power for immediate use.
   Not less than one deck officer and two seamen shall be available on deck at all times while vessel is in the moorings.
   Power must be available at all times on all deck winches and or anchor windlass during vessel's stay at the buoy.
   A good floodlight will be required to illuminate the area around the submarine and cargo hose connections during cargo transfer operations.
   During the discharge of ballast at night, the sea area around the vessel must be adequately lighted.
   Engine repair work is prohibited without the Berth Master's permission.
   Hot work is strictly prohibited while cargo is being discharged.
   Laundry service is available if requested prior to ship's arrival.

General: Many ship repair parts and equipment are obtainable in Pusan located some 40 miles away from Ulsan. Allow about 4 hours for their procurement.

OPERATOR: Yukong Limited, 26-4 Yoido-Dong, Youngdungpo-Ku Seoul, Korea 150. *Tel:* (02) 784-0051. *Telex:* OILKOR K23654. *FAX:* 82-2-784-6075.

AGENT: See "Section – A".

YOSU (including Kwangyang): 34.44 N. 127.45 E.

(See Plan)

(B) PRODUCT WHARF, HONAM OIL REFINERY
(C) NAKPO WHARF, BERTHS NO. 1, 2, 3, 4 AND 5
(D) PIER, LUCKY ADVANCED MATERIALS
(E) DRY CARGO, YOSU HARBOUR
(F) YOSU ENERGY
(G) KWANGYANG STEEL MILL, RAW AND PRODUCTS BERTHS

DOCUMENTS:

Last Port Clearance.
Register.
13 copies of Crew List.
12 copies of Passenger Manifest.
3 copies of Stores List.
3 copies of Bonded Store List.
3 copies of Arms and Ammunition List.
3 copies of Livestock List.
5 copies of Cargo Manifest.
1 copy of Vaccination List showing dates of last yellow fever vaccination, etc.

PILOTAGE: There are 2 pilot stations. Pilot station for vessels of less than 30,000 g.r.t. is located at Lat. 34° 44′ N., Long. 127° 49′ E., and for more than 30,000 g.r.t., such as crude tankers, is located at Lat. 34° 39′ N., Long. 127° 58′ E.

RESTRICTIONS: 2 overhead power cables with clearance of 27 m. and 39 m. respectively in approximate position: Lat. 34° 44′ N., Long. 127° 45′ E.

HEALTH: Before proceeding to respective berth vessels must anchor at the Quarantine Station to obtain Free Pratique.

RADIO: Yosu Port Radio Station, call sign 6MYS, operates on 500 kHz on 24 hour service.

The station's range is about 100/150 nautical miles and it is recommended that tanker Masters should contact the station giving their ETA at the pilot station.

Vessels calling at Yosu must cable the exact time of arrival at the pilot station to ship's Agent and Harbour Pilot's office. VHF Radio for calling Agent is Channel 16, name Agent and switch to Channel 26 to talk.

TUGS: 3×4,200 h.p., 4×3,000 h.p., 1×2,000 h.p. and 5×1,000 h.p.

MEDICAL: ETA to be supplied to quarantine authorities by vessel's Agent 24 hours before arrival. Master required to complete Health Declaration when officer boards on arrival. Free Pratique is automatic when coming from another Korean port.

There are medical facilities in Yosu town. Inoculations and vaccinations can be arranged by the quarantine doctor.

The Quarantine Stations are located at Lat. 34° 42.5′ N., Long. 127° 52.7′ E., for deep drafted vessel and Lat. 34° 45.2′ N., Long. 127° 46.3′ E., for less drafted vessel. The Quarantine inspection can be made at other than the above location depending on the situations. The inspection takes place during daylight.

DENSITY: 1025.

FRESH WATER: Fresh water is available for delivery to ships.

FUEL: Bunkers available by barge, subject to advance notice being given.

EPAIRS: There are repair facilities in Yosu.

USTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, d one bottle wine or spirits allowed, each man.

EPATRIATION: Crew changes or repatriation can be arranged.

OLIDAYS: 1st, 2nd and 3rd January, 1st March, 10th March, 5th April, h May, 6th June, 17th July, 15th August, 1st October, 3rd October, h October, 25th December. 1st January (Lunar Calendar), 8th April unar Calendar), 15th August (Lunar Calendar).

HORE LEAVE: Shore leave for ship's personnel is arranged by ship's gent and the local authorities.

ENTIFICATION CARDS: Crew required to carry valid identification rds at all times.

HARTS: Republic of Korea H.O. Charts No. 209, 241 and 242.

) *CRUDE WHARF, HONAM OIL REFINERY*

ENERAL DESCRIPTION: The crude wharf is located at Lat. ° 51′ N., Long. 127° 46′ 55″ E. running in a 336°/156° direction.

LOTAGE: Pilot station for crude tankers is located at outer harbour positon: Lat. 34° 39′ N., Long. 127° 58′ E. in the vicinity of Tae Do and, where the Harbour Pilot boards to lead the vessel to Quarantine chorage.

PROACHES: En route to the wharf, at approximately Lat. ° 47.3′ N., Long. 127° 48.8′ E. vessels pass narrowest part of annel, Sam Gi, which has about 22.5 m. depth of water at MLLW, d marked by 5 light-buoys and one lighthouse. The course is laid dway between the 5 buoys.

STRICTIONS: Berthing and operating restrictions are as follows:

1. Maximum approach angle: 10°
2. Maximum approach velocity: 0.15 m./sec.
3. Maximum current speed: 2.1 m./sec.
4. Winds

(a) Non-operating conditions
Maximum design velocity 38 m./sec.
(b) Operating Conditions (Moored at berth)
Maximum sustained velocity 18m./sec.
Maximum instant gust 27 m./sec.
(c) Maximum berthing wind velocity
13 m./sec. of Southerly wind
15 m./sec. of Northerly wind

X. SIZE:

Maximum crude carrier:	255,000 d.w.t.
Maximum products carrier (Clean):	80,000 d.w.t.
Maximum draft:	21 m.
Minimum crude carrier:	80,000 d.w.t.
Minimum products carrier (Clean):	30,000 d.w.t.

ALTH: Normally vessels who could not be granted Radio Pratique chor at the Quarantine Station which is located at around . 34° 42.5′ N., Long. 127° 52.6′ E. At this anchorage, Quarantine tors come on board. After quarantine inspection, the vessel should e port clearance of Customs, Immigration and so on.

RTHING: *Approaching the Wharf:* It will be normal tanker practice t all tankers be berthed bow seaward to ensure a quick and omplicated departure in the event of an emergency. Main conditions following this practice are as below:

1. Natural environment's conditions to be favourable.
2. Early passage of Sam Gi Channel prior to high tide to meet slack tide while berthing.
3. Vessel should swing to the North of Crude Wharf with the assistance of tug-boats and approaching course will be about 160°.

When the above is impracticable due to the limited effective noeuvring space in the vicinity of the wharf, vessels will approach ost parallel to the wharf whose direction is about 336°. ll tugs will come alongside to the vessel's bow, mid-ship and quarter No. 3 Buoy. At about half mile off the wharf, the vessel's speed should 2 knots and when abreast of the wharf, the vessel should be stopped. en stopped, the abreast distance between vessel and wharf should about 100 m. – 200 m.

breast distance will be reduced with the assistance of tugs. Closing ed must be 10 cm./sec. or less at a distance of 20 m. and less than m./sec. at a distance of 3 m. between the vessel and wharf. Distance speed for both bow and stern will be displayed on the gangway er of wharf upon vessel reaching about 160 m. from wharf.

oring: The wharf has 8 dolphins for mooring VLCCs as shown in the an Section". Nos. 1 and 4 dolphins are to be used for head and stern s, Nos. 2 and 3 for breast lines, and Nos. 5, 6, 7 and 8 dolphins for e and aft spring lines. Each dolphin has quick release hooks with a stan and about 100 m. of 3 in. messenger lines to pick up mooring es/ropes.

o monitor tanker approach, the wharf is equipped with docking ars which detect distance and approaching speed, which are also played on top of the gangway tower with visibility of about 200 m.

Line handling service agency will render services to handle lines on the wharf. The agency will provide 2 launches relaying mooring lines from berthing vessel to the wharf and 9 men including a chief in charge of the team hooking mooring lines to the dolphins.

About 20 mooring lines for 200,000 d.w.t. tanker are required. Type and quality of mooring lines are in accordance with ISGOTT paragraph 3.3.3 – i.e. "Preferably the mooring lines used to secure the tanker should all be of the same materials and construction. Wire ropes are recommended especially for larger tankers as they limit the tanker movement at the berth. Moorings composed entirely of fibres, especially synthetics, are not recommended as their high elasticity can allow excessive movement due to strong wind or current forces or passing ships. Wire ropes and fibre ropes should never be used together in the same direction because of the difference in their elastic properties".

Vessel puts out springs first, then breast lines and finally head or stern lines or vice versa. Normally breast and long lines will be relayed by launches to the wharf. While making fast spring lines, vessel should adjust centre of her manifolds to wharf loading arms at the request of shore operator. Vessels should be held tightly to breasting dolphins with the assistance of tug-boats, mainly by tug stationed midship, until mooring has been completed.

Anchoring in the vicinity of the wharf is not allowed except in an emergency.

Unberthing: Tugs will be stationed on seaward side of the vessel's bow, midship and quarter as necessary and will push the vessel so as to hold the vessel tightly to the breast dolphins while letting-go all mooring lines. Sequences of letting-go lines is the reverse of mooring. Therefore, long head and stern lines let go first, breast next and springs last.

DISCHARGING: *Prior to arrival:* Prior to arrival at the wharf, vessels should designate 3 manifolds which are convenient for unloading cargo. The designated manifolds should be marked by rags or other materials so as to be able to identify them easily from the wharf and adjust the vessel's position correctly to loading arms of the wharf. All the vessel's manifolds should be kept blinded until vessel is moored. Also, all crude oil tankers must be equipped with 16 in. ASA type flanges on her manifolds.

Connection of hoses: Discharging arms are as follows:
3×16 in. flanged for crude oils.
2×12 in. flanged for products (clean).

After completion of berthing, terminal representative and wharf operators will come on board and check readiness to connect discharging arms, fire fighting equipment, drip pans and oil removing materials. The 3×16 in. discharging arms for crude oil are rotary counter-weighted marine arms with hydraulic quick connect couplings. Remote controlled hydraulic positioners are provided and wharf operators will position and connect the outboard flanges of the arms to the tanker manifold. The vessel's crew, consisting of one responsible officer and 4 other crew, standby at the manifolds, prepare manifolds to be used, and co-ordinate with wharf operators in adjusting, connecting and securing discharging arms.

Operating Envelope: The unloading arms have been designed for an operating-height envelope that accounts for the elevation changes due to tide and varying freeboard of the largest and smallest tankers for which the wharf is designed. The 16 in. unloading arms will accommodate a maximum 255,000 d.w.t. tanker and a minimum 80,000 d.w.t. tanker, or heights of 26.3 m. to 5.2 m. above the lowest water level. The 12 in. unloading arms will accommodate a maximum 80,000 d.w.t. tanker and a minimum 30,000 d.w.t. tanker, or heights of 19.6 m. to 4.6 m.

A longitudinal drift of ±5.0 m. and a lateral drift of ±4.57 m. have been allowed for both sizes of unloading arms.

Rates and Pressure: After hoses have been connected, all shore valves will be opened and vessel's Chief Officer informed of shore readiness. Vessel will open all valves necessary to discharge except manifolds' valves which will be opened just prior to start of discharge.

After confirming that the cargo is flowing into designated shore tank, tanker rail pressure for all vessel sizes shall be 140 p.s.i.g., and maximum discharging rates are:

Arab Medium Crude Oil		70,000 b.p.h.
High Pour Low Sulphur	Crude Oil	40,000 b.p.h.
Naphtha		30,000 b.p.h.

Crude Oil Washing (COW): Crude oil washing of cargo tanks using fixed tank washing machines in conjunction with fully inerted gas tanks is permitted on Master's acceptance of Honam Oil's conditions to carry out COW at the crude wharf which will be delivered to the vessel. The vessel requiring COW should notify it to Honam Oil in advance together with the information of previous COWs conducted and COW schedules to be carried out.

BALLAST: The ballasting operation should be discussed and agreed with the terminal representative regarding the approximate time of commencement and duration of ballasting both into permanent ballast tanks and cargo tanks.

To obtain quick turn around, the terminal encourages simultaneous handling of cargo and ballast, other than permanent ballast, if the vessel is so equipped. Ballasting should be minimum after discharging cargo.

FRESH WATER: Not available.

FUEL: Not available.

SERVICES: Honam Oil provide the following services: Telex service every day from 0800 hrs. to 1800 hrs., except Saturdays when service is available from 0800 hrs. to 1300 hrs., and no service on Sundays and holidays.

Telephone service every day from 0800 hrs. to 1900 hours.

A list of emergency telephone numbers will be available at the wharf.

AUTHORITY: Honam Oil, Yocheon Refinery. *Tel:* 80-2114. *Telex:* 762 (domestic). *FAX:* 82-2228.

Head office: Seoul. *Tel:* 787-1114. *Telex:* Honam K-27234 or K-23261. *FAX:* 787-6051, 785-5451.

(B) PRODUCTS WHARF, HONAM OIL REFINERY

APPROACHES:

Navigation: The route for product tankers up through to Yosu Gulf is easy, without any navigational hazards. After passing the Nak-Po, vessels will steer in a Northwesterly direction for about one nautical mile and then Westerly, keeping within the 10 metre contours.

There are 10.5 metres' shallows at approximate LLW along Myodo Sudo, so vessel's draft limit to pass this channel on high tide will be up to 10.5 m. or more, depending upon tidal rises and in accordance with OCIMF.

The hydrographic charts for navigation and approaching to the Product Wharf area have been published by the Republic of Korea Hydrographic Office.

Approaching and mooring to the Wharf:

a. Pilotage is compulsory for vessels over 1,000 gross tons in accordance with Yosu Port Rules. Tankers calling at the Product Wharf of Honam Oil for loading or unloading products should notify the latest ETA by radio to Port Authority and related Agents for Pilot.

b. The direction of tidal current stream in the vicinity of the wharf is nearly rectilinear and parallel to the wharf, running about 272° on flooding and 084° on ebbing at about 3 knots, the tidal range between maximum high and low water is about 4.0 m. The duration of ebb/flood is about 6.75 hours and 5.5 hours respectively.

c. Vessels are to be berthed with bow to seaward whenever possible, in order to facilitate unberthing as quickly as possible when an emergency situation arises. Use of anchors is not allowed while berthing, except in an emergency.

RADIO: See "Radio" in section "A".

BERTHING: *Product Wharf:* The Product Wharf is located in approximate position Lat. 34° 51′ 40″ N., Long. 127° 44′ 10″ E.

The Product Wharf is designed to accommodate 5 tankers simultaneously. Berths No. 1 and No. 4 for approximately 5,000 d.w.t., Berth No. 2 for 2,000 d.w.t., Berth No. 3A for 35,000 d.w.t. and Berth No. 5 for 50,000 d.w.t. tankers, respectively.

The wharf is designed to moor and unmoor tankers on a 24 hour basis, depending on the tidal conditions at the time and the Master's judgement. The illumination for night work is satisfactory.

Cosmos Wharf: There is one berth located in position Lat. 34° 51′ 20″ N., Long. 127° 42′ 45″ E., designed to accommodate LPG and Chemical vessels of less than 4,000 d.w.t. Shallowest depths of water in the approach channel and wharf area are 2.8 m. and 6.2 m. respectively. Therefore, vessels approaching the wharf should choose high tide to pass through this channel. Illumination for night work is excellent.

Berth Assignment for Loading/Unloading: Berths will be assigned to the vessel after review of the vessel's size and types of product to be loaded. The berth designations will be advised in advance, to the vessel through vessel's Agent.

Flanges: Honam Oil Refinery Wharves are equipped with ASA type flanges for loading arms and hoses.

LOADING:

Supervision: All cargo operations of loading, unloading, switching of tanks and topping-off should be supervised by a ship's responsible officer, and sufficient personnel should be on deck at all times to attend to the loading and/or unloading operations.

Loading Arm/Hose Connection: It is Honam Oil Refinery's policy that vessel's crew shall be responsible for connecting/disconnecting loading arm/hoses to and from vessel's manifold. Also proper reducers and elbows to fit to wharf loading arm couplings must be connected and disconnected by ship's crew. Wharf operators are always on watch to handle loading arms and winches for loading hoses.

Sequences: After mooring at the berth, Honam Oil Wharf Operators will come on board and check readiness to connect loading arms, fire fighting equipment, oil drip pans or oil removing materials. When the vessel is in all respects ready to connect loading arms/ hoses, the following loading procedure will apply:

a. The loading arms/hoses will be swung on board the vessel.

b. Connect loading arms/hoses by vessels's crew.

c. Notice must be given by the vessel to the wharf shift foreman one hour before the vessel completes deballasting.

d. Loading will be commenced by gravity. When the vessel advises wharf operator that the cargo is flowing into vessel's tanks, the loading rate will gradually be increased by pumping until the desired rate has been reached.

e. The vessel must give 30 minutes' notice to the wharf operator before starting "top-off", and shall advise if a decreased rate is desired.

f. The vessel must give 15 minutes' notice to the wharf operator prior to completion of loading at which time the wharf operator may reduce loading rate and/or stop loading pumps.

g. Ship's valves shall not be closed while loading pump is operating.

h. On completion of loading, loading arms/hoses must be drained and disconnected immediately. Samples must be taken upon completion of loading.

Loading Rates: The loading rates vary and depend upon kinds of products, sizes of loading arms and pipe lines, vessel conditions, etc. Detailed loading rates will be determined by close co-ordination between responsible vessel's officer and the wharf operator.

Each berth is equipped with counter weighted marine loading arms. Sizes of these arms' flanges are 6 in., 8 in., 10 in. and 12 in. ASA.

Deballasting: The discharge of dirty ballast within the territorial waters and entrance is strictly prohibited. Shore facilities for disposal of dirty/oily ballast water is available at Honam Oil Refinery. The deballasting operation should be discussed and agreed with the Product Wharf representative regarding the approximate time of commencement, duration of deballasting and kind of ballast oil.

FRESH WATER: Vessels requiring fresh water request required amou of water to ship's agent in advance.

REPAIRS: There are no repair facilities and also repairs are not allowe on the product wharf. In the event of emergency cases, Honam Oil wi assist in carrying out repairs under the supervision of refinery's safe personnel to expedite vessels from the wharf and a quick turn around

AUTHORITY: Honam Oil Refinery.

(C) NAKPO WHARF, NAMHAE CHEMICAL CORPORATION

A straight berth which could accommodate one 50,000, one 30,00 and two 20,000 d.w.t. vessels is located at about Lat. 34° 51′ 40″ N. Long. 127° 44′ 40″ E. The wharf is handling raw material by 800 ton crane and product of fertiliser by 300 tons crane.

(D) PIER, LUCKY ADVANCED MATERIALS, INC.

Located close to the product wharf of Honam Oil Refinery at abou Lat. 34° 51′ 30″ N., Long. 127° 44′ 05″ E. Maximum vessel size and dra are about 4,400 d.w.t. and 5.5 m. respectively.

(E) DRY CARGO, YOSU HARBOUR

PIERS: 3 piers are located in Yosu town at about Lat. 34° 44.3′ N. Long. 127° 45.3′ East and consist of No. 1, No. 2 and No. 3 Piers.

RESTRICTIONS: No. 1 Pier is used for only small vessels. No. 2 Pie for vessels of less than 20 ft. draft and max. draft at No. 3 Pier is 26 f At anchor draft up to 35 ft.

CARGO-HANDLING FACILITIES: Crane barge of 30 tons capacity i available.

(F) YOSU ENERGY

LOCATION: 34° 51′ 38.96″ N., 127° 46′ 10.91″ E.

BERTH:

(1) Principals:

Max. size: 75,000 CBM., LOA 230 m.
Max. draft allowable: 13 m.
Required minimum U.K.C.: 2.5 m.

(2) Operating Condition:

(a) Allowable conditions for mooring:

Max. Wind Speed	*Wind Direction*
13 m./sec.	Southerly
15 m./sec.	Northerly

Max. wave height: 1.64 m.
Approach speed: 0.15 m./sec.
Tidal time for mooring: Mooring at slack tide.
Tugs will assist with berthing when strong tidal current.
Time limit: Berthing operation only carried out in daylight.

(b) Circumstances where unloading is not allowed:
Wind Speed: Over 18 m./sec.
Max. wave height: 0.93 m.
Speed of tidal current: Tugs will assist with berthing when ther is a strong tidal current.
Time Limit: No restriction.
Other conditions: (1) Lightening.
(2) Lack of proper safety plan and safe regulations on board.

SHORE CONNECTION: For LPG tanker, cargo operation and shor facilities.

(1) Shore Connection: (P: Propane, B: Butane, L: Liquid, V: Vapour)

(a) Arrangement as seen from seaward (from right to left): BL, BV PV, PL.

(b) Specification:

Standard of Flange	12 in. ASA 150	8 in. ASA 300	8 in. ASA 300	12 in. ASA 15
Use	BL	BV	PV	PL
Range of temperature	−9°C/0°C	−9°C/5°C	−50°C/5°C	−50°C/−30°C
Max. press.for operation	10 kg./sq.cm	5 kg./sq.cm	5 kg./sq.cm.	10 kg./sq.cm
Max. flow rate	2200 cu.m.p.h.	2200 cu.m.p.h.	2200 cu.m.p.h.	2200 cu.m.p.h.

(c) Movable range:
Limit angle: 60°
Max. distance for angle of depression: 0.9 m. – 10.6 m.
Height above sea level: 22 m. (Mean sea level)

(d) Required ship's manifold position:
– Distance between bow/stern and manifold: About 110 m.
– Distance between side plating and manifold: Minimum 1.0 m
– Height above sea level: 20.5 m. (Mean sea level)
– Distance between each centre of flange: 2.0 m.

(e) Size and number of reducers with onshore facilities:
2×10 in. ASA 150 and 2× 8 in. ASA 300.

(2) Cargo Operation:

(a) Requirements of ship's cargo tank and liquid line for discharg

	Propane	*Butane*
Tank pressure:	Not exceeding 0.25 kg./sq.cm.	Not exceeding 0.25 kg./sq.cm.
Line Temperature:	Not exceeding −42°C	Not exceeding −5°C

(b) Procedure for purging and cool down for connection (Arm and unloading line):
Procedure for purging before: 3 – 5 times vent with shore vapou
Procedure for purging after: 3 – 5 times loading arm flushi with ship's hot gas.
Procedure for cool down: Not required.

(c) Procedure and Rate of Discharging:

	Series Discharging		Parallel Discharging	
	Propane	Butane	Propane	Butane
	(cu.m.p.h.)			
Rate at start	500	500	500	500
Average Rate	1,200	1,200	1,200	1,200
Max. Rate	2,000	2,000	2,000	2,000
Rate of Finish	500	500	500	500
Vapour Return rom Shore	6.9	8.9	6.9	8.9

(d) Discharging quantity for B/L: Ship's calculated figure.
(e) Circumstances when unberthing is requested:
- Wind speed: Over 30 m./sec.
- Wind direction: N.W., S.W.
- Max. wave height: 1.64 m.
- Other Conditions: (1) Typhoon.
  (2) In case of emergency.

OORING:
(a) Required numbers and quality of mooring ropes:

Fore lines:	4 wire and P.P. ropes.
Fore breast lines:	3 " " " "
Fore spring lines:	2 " " " "
After lines:	4 " " " "
After breast lines:	3 " " " "
After spring lines:	2 " " " "

(b) Additional mooring ropes from shore: None.
(c) Gangway: Shore gangway will be used.
(d) Ship's derrick: To be kept on stand-by.
(e) Indication of ship's manifold position: Required.
(f) Mooring facilities – requirements:
- Types of bitts: Quick release hooks.
- Distance between bitts: 50 m. (average).
- Location and types of oil fence: Not available.
- Availability and location of speedmeter for approaching speed: Docking sonar on No. 1 breasting dolphin.
- Place for bonding cable: Not necessary.

(g) Operation system at berth:
- Mooring personnel: At the bow: 5 persons.
  At the stern: 5 persons.
- Connection of arms: 5 persons.
- Required time: 15 minutes for each arm.
- Disconnection of Arms: 4 persons.
- Required time: 15 minutes for each arm.
- Unmooring Personnel: At the bow: 3 persons.
  At the stern: 3 persons.
- Communications: Shore can supply a walkie-talkie.

(h) Disaster prevention system:
- External System: None
- Internal System: Emergency shut down system.
  Fire fighting system (fire hose).
- Disaster prevention facilities at the berth: E.S. system – fire fighting system (monitor).
- Availability of sea water pollution prevention facilities: None.

HORE FACILITIES:
(a) Shore liquid lines: (Distance from tank (heater) to ship's connection, diameter and max. pressure).
- Propane: 1,600 m. (600 m.) – 18 in. – 23 kg./sq.cm.
- Butane: 1,800 m. (600 m.) – 18 in. – 14 kg./sq.cm.

(b) Flare stack capacity: Nil.

UPPLIES AND SERVICE:
) Drinking water and bunkers:
(a) Supply place: Yosu Anchorage.
(b) Method of supply: Barge.
(c) Advance notice: Advise Agent.
(d) Average rate: Bunkers: 100 – 200 t.p.h.
Water: 800 tons per day.
2) Provisions:
(a) Available.
(b) Method of supply: From barge.
(c) Advance notice: Advise Agent.
(d) Kind of provisions available: Meat, fish, vegetables, etc.
3) Medical:
(a) Preventive injection: Cholera available.
(b) Advance notice: Advise Agent.
4) Landing: Possible.
5) Ship's repairs availability:
(a) Hull
(b) Machinery } Only at anchorage.
6) Surveyor/Diver: Available.

ERTH SAFETY REGULATIONS:
er I: (Ocean and Coastal Tanker).
1) Vessel size:

Ocean:	Max. 75,000 CBM.
	Min. 30,000 CBM.
Coastal:	Max. 3,500 CBM.
	Min. 1,000 CBM.

er II: (Only Coastal Tanker).
1) Vessel size – Max.: 3,500 CBM.
Min.: 1,000 CBM.
2) Loading Arms:
2 self-standing for liquid LPG, equipped with 8 in. ASA 300 RF manual quick release couplings.

(G) KWANGYANG STEEL MILL, RAW AND PRODUCTS BERTH

LOCATION: 34° 54′ N., 127° 45′ E.
GENERAL: Port under construction.

Pohang Steel Co. discharge will handle vessels of 250,000 d.w.t. at a 900 m. length berth with depth of 20 m. The loading berth of 700 m. will accept vessels of 50,000 d.w.t.

2×2,000 t.p.h. grab unloaders and 1×2,000 t.p.h. shiploader will be available in the initial stages.

A 280 m. long quay is to be constructed to accommodate container vessels up to 50,000 d.w.t. Container handling equipment and other facilities will be available.

SHIPMASTER'S REPORT: July 1988.

Pohang Iron & Steel Company's complex is built on about 9 square kilometres of reclaimed land on the North side of Kwangyang Hang. It started production in May 1987 and at present manufactures about 5.5 million tons of steel products annually, with 8 million tons planned for 1991. The wharf fronting this area runs in a 101°/281° direction with an eventual length of 5.4 km. by 1991.

At the Eastern end a causeway running North and South has been built connecting Chijin Do Island with the complex.

Charts: B.A. Chart No. 3391. Korean Chart No. 241.

Documents:
10 copies Crew List.
5 copies Stores List.
5 copies Personal Effects List.
3 copies Arms & Ammunition List (See "Notice").
3 copies Narcotics List.
2 copies Ports of Call List (previous 3 months).
5 copies Cargo Manifest.
5 copies Through Manifest (where applicable).
1 copy Maritime Declaration of Health.
Last Port Clearance.
Ship's Register.
Derat Exemption Certificate.

Pilotage: There are 5 licensed Pilots available at the present time. Vessels exceeding 30,000 g.r.t. embark their Pilots at 34° 39′ N., 127° 58′ E., and vessels under 30,000 g.r.t. at 34° 39′ N., 127° 29′ E. Pilots should be contacted on VHF Channels 16 and 14, 2 hours before arrival. This message should be repeated to Yeosu Harbour Control at the same time. There are no overhead power lines or bridges in the buoyed channel, but many fishing vessels operate in the area and they are usually cleared out of the way by a tug steaming ahead of the ship from the Quarantine Anchorage to the berth. When in ballast southbound, the Pilot leaves in the vicinity of the Quarantine Anchorage and the ship should stay outside the buoyed channel.

Anchorages: Large vessels are usually instructed by Yeosu Harbour Control to anchor in the vicinity of Tae Do Island, there is plenty of water and good holding ground (mud) here. The Pilot takes the ship up to the Quarantine Anchorage for Clearance by Port Officials from Yeosu. No mail is delivered unless requested. No Radio Pratique available.

Max. Size: 250,000 d.w.t. LOA 1,030 m. Beam 50 m. Draft 20.0 m.

Tugs: Tugs usually start to make fast off Nakpo Gak Light, using tugs' ropes. This ship (loaded inbound) used 4 tugs, both for berthing and unberthing. The Pilot communicates with the tugs on VHF Channel 14.

The following tugs are available: 3 × 4,200 h.p., 1 × 3,400 h.p., 1 × 3,200 h.p., 1 × 2,600 h.p., 1 × 1,900 h.p. and 2 × 1,200 h.p.

Berthing: Most ships using the Bulk Handling Berth are moored port side to (i.e. head out). This ship, 141,000 d.w.t. used 4 headlines, 4 sternlines, 2 breastlines each end and 2 back springs each end. 2 mooring boats are used to run the first ropes. On the quay is a digital readout giving the distance off for bow and stern and speed of approach.

There are no berthing or sailing operations during the hours of darkness.

Bulk Handling Berth: This is used for the import of iron ore, coal and limestone to feed the steelworks. Coal, via the conveyor system, also feeds the Coal Loading Berth for transhipping coal for coastal distribution. The berth is built on heavy steel piles, running 101°/281° with its present length of about 1.5 km. It is well fendered at 40 m. intervals with buffer type fenders having face pads 7 m. in width and 4 m. vertically, these keep vessel about 3 m. off the quay. The ship must provide its own brow for the gangway platform for access. The minimum depth alongside is 21.5 m. at MLWST, minimum keel clearance 1.5 m. Bottom is sand.

Discharging Facilities: 1×20 ton cantilever crane is situated at the Eastern end of the quay, usually the limestone berth.

Five electric gantry cranes with grab trolleys are mounted on rails which run the full length of the pier. Maximum air draft is 18 m. at HW. Outreach from the face of the fenders is 34.85 m. Grab capacity about 30 tonnes.

Discharging Rates: Maximum 40,000 t.p.d., normally 25,000 t.p.d. each.

Three separate conveyor belts run the full length of the pier to enable limestone, coal and ore to be discharged simultaneously.

Coal Loading Berth: This has been built into the Chijin Do Causeway and runs from the Eastern end of the Bulk Handling Berth, North and South, for about 350 m. It has a moving arm loader and handles ships of up to about 30,000 d.w.t., mainly coasters, the coal can come via the belt system either from the stock-pile or from larger ships discharging at the Bulk Handling Berth, at up to 20,000 t.p.d. There is a regular run down to Yeosu by coal barges.

Steel Products Berth: This lies about 2 km. West of the Bulk Handling Berth in the same line and will eventually make up the Western end of a continuous line of berths. It has 2 container type gantry cranes and 3×20 ton cantilever cranes. Main exports at present are steel coils.

Container Terminal: This is still under construction at Golyak-myon. The channel is being widened from 300 m. to 500 m. by dredging. There are up to 4 dredgers at a time working in different parts of the Bay.

Stevedores: Foremen, labour and crane drivers are in different Unions, this combined with language difficulties causes some confusion, hopefully over a period of time this will resolve itself.

Medical: Medical treatment and hospital facilities available.

Density: Ranges from 1022 to 1025, depending on the season.

Fresh Water: Available only by barge.

Fuel: Available only by barge, at least 2 day's notice required.

Repairs: Minor repairs are available at Yeosu, about 23 km. by launch, and divers are also available, but both are expensive.

Watchmen: From the time of obtaining Clearance to the time of sailing, a Customs Guard lives on board.

Repatriation: Possible. Normally by launch to Yeosu then by mini-bus to Yeosu Airport.

Time: GMT plus 9 hours. Daylight Saving Time, GMT plus 10 hours, is used from 8th May to 8th October.

Shore Passes: Necessary for aliens, renewed weekly. Korean crew have their Seaman's Books kept by Immigration until sailing time. As the dock gate is about 5 km. from ship and Kwangyang about 25 km., it is necessary to hire a mini-bus from the Agent at about U.S.$40 per trip.

Telephone: No telephones available from shore.

Stores: Local chandler can deliver alongside by truck. Western style meat and dry stores are usually imported and expensive, fruit and fresh vegetables plentiful in season. Spares are not easy to obtain.

Notice:

Declaration of Weapons

As you might know, the Republic of Korea is in a "Quasi-War" status with North Korea. Therefore, national security is of the utmost importance in our country.

For the above mentioned reason, you must declare/report any guns, bullets, explosives, etc., to this country.

At the time of your departure from this port, you will be permitted by the Custom's Office to take your weapons with you.

For your own peace of mind, however, the overall security in Korea is well provided for and it is therefore unnecessary to carry weapons.

Additionally, you are reminded that failure to properly declare/report your weapons is illegal and punishable by law.

Thank you for your co-operation.

Signed: . . . . Customs Director.

AGENT: Sub-Agents of Korea Universal Marine Co. Ltd., No. 350 Soojeon-dong, Yosu, Korea. Tel: 62-1406. Telex: K66734. Cables: "Newport Yosu". Fax: 64-1539.

Associated with Jardine Shipping Agencies.

NOTES

Please also advise Shipping Guides Ltd.

Kuwait

GENERAL

ISA REGULATIONS: *Crew Changes:* Crew members joining ships at uwaiti ports can enter Kuwait with a valid Seaman's Book, against a Seaman's Guarantee Letter" from Agent, allowing 24 hour transit only join a vessel in port.

For the preparation of a Seaman's Guarantee Letter (S.G.L.) and to range an "Airline's OK Board Telex" from Kuwait (to allow crew to ard a flight to Kuwait without Kuwaiti visa), please telex the following articulars to vessel's Agent:

Full Name
Nationality
Seaman's Book Number/Date and Place of Issue
Age/Date of Birth
Profession
Flight Details

Once a seaman enters/joins vessel on S.G.L. as above, it is not ermitted for him to sign off/leave the vessel in Kuwait due to Immigration estrictions applicable to seamen entering on S.G.L.

isitors to ships, repairmen and business visitors should obtain a visa efore travelling to Kuwait. It is also possible for the Agent to obtain a isitor's visa (N.O.C.) locally in Kuwait. However, visitors must send, 5 days prior to arrival, a photo-copy of the passport pages containing ll passport particulars (imperative) and 3 passport size photographs the Agent in order to apply for such a visa.

PARES/MAIL: *Air Freight of Ship's Spares, Mail etc.:* Air-freighted pare parts and ship's mail should be addressed to the Master c/o the gent, and marked: "Ship's Spares (Stores) in Transit" and be ccompanied by packing list and commercial invoice and Certificate of rigin both in original, with name and address of manufacturer mperative) and certified by Chamber of Commerce and legalised by y Arab Embassy/Consulate.

Contents and weight of consignment should be correctly stated in all ocuments and air way-bill.

Customs clearance formalities and delivery of air freight consignments Kuwait will take 10-14 days. It is, therefore, advisable to despatch air eight parcels sufficiently well in advance of ship's arrival. The flight etails and air way-bill number should be telexed to the Agent enabling e Agent to collect delivery order from the airline and commence earance formalities immediately.

B.: No documents are needed for ship's mail. It is advisable to send ip's mail/printed matter/documents by air courier, due to faster andling at airport, and to avoid the lengthy procedures applicable to r freight consignments.

ACKING REGULATIONS: *Chemicals in Bags:* The following is from e Director General, Ports Public Authority.

"You will appreciate that chemical materials arriving in bags require areful and special handling to prevent tearing and contamination, and e would, therefore, request you to ask all Steamship Agents and wners of vessels to give their best attention to shipments of this type f cargo, in an effort to ease its handling by the stevedoring labourers ithout obstacles.

The bags should properly be bundled and placed on pallets, covered y thick plastic and/or canvas covers for safety and security of the cargo nd fast discharging.

It should be noted that unless this type of cargo is shipped on vessels nder the condition mentioned above, the Ports Public Authority shall ot permit discharging and the cargo will remain on board the on-carrying essel".

n Transit and Kuwait Cargo Mixed Together in Ships' Holds: The Kuwait orts Public Authority have reported a recent incident which occurred uring discharge of cargo from a vessel.

The berthing of the vessel as usual was arranged according to the able from the Master that Kuwait cargo was clear for discharge in all espects, but when the discharging operation was carried out, they bserved that the in transit and Kuwait cargo in all hatches were mixed ogether. Such being the case the Ports Public Authority were compelled o move one truck out to receive Kuwait cargo, and then bring back the uck of receivers of the in transit cargo, and so on until the discharging as completed. This situation naturally entangled the work altogether nd caused considerable delay in discharging the cargo from the vessel.

Therefore, the Ports Public Authority have requested that we draw Principals' attention to this and ask you to take good care in stowing argo properly in ships' holds and that it not be mixed together.

MINA ABDULLA: 29.02 N. 48.11E. (See Plan)

LOCATION: Mina Abdulla bounded on South by parallel of Lat. 28° 55′ N. n the East by Long. 48° 18′ E. and on North by a line joining following oints:

(1)	29° 01′ 45″ N.	48° 09′ 25″ E.
(2)	29° 01′ 45″ N.	48° 10′ 06″ E.
(3)	29° 02′ N.	48° 10′ 18″ E.
(4)	29° 02′ N.	48° 18′ 00″ E.

FLAG: Every merchant ship when entering or leaving port between unrise and sunset shall fly her national flag and national flag of Kuwait nd, when entering port, shall fly her signal letters. All vessels required o fly Kuwait flag on foremast during daylight hours. Flags may be btained from Agent.

APPROACHES: Mina Abdulla is easily located as it is the Southernmost refinery of the group of refineries which form Ahmadi, Shuaiba and Mina Abdulla. A number of flares will be seen. The Sea Island is situated about 3 miles offshore of the refinery.

When a vessel is ready to enter at the same time as another vessel is ready to leave the port, the outgoing vessel shall have priority over the incoming vessel, subject always to the provisions of the International Regulations for Preventing Collisions at Sea and to the requirements of safe navigation.

DOCUMENTS: Before leaving Kuwait the Master shall be responsible for obtaining a Port Clearance Certificate. The documents necessary for vessels to enter and leave Mina Abdulla are:

Enter

Ship's Manifest.
Bill of Health.
Crew List.
Clearance from Last Port.
Light Dues Certificate.

Clear

Register.
Load Line Certificate.
Radio Certificate.
Safety Certificate.
Last Port Clearance.

Masters and Agents of vessels shall, when called upon by a Customs Officer or Marine Officer, produce any documents relative to the landing or shipment of their vessel's cargo in the port. The Master or his representative is required to hand to the Company a written Notice of Readiness to load.

Discharging certificates of oil cargo loaded from Kuwait and Partitioned Zone ports are to be sent to vessels' local Agents immediately duly attested by the Customs Authorities and Arab Consulate covering full quantity as per Bill of Lading.

If a vessel which has not submitted the certificate for the previous voyage calls for the second time, she will be allowed to load and sail only after paying a cash deposit of KD 2,000.

In order to avoid delay in berthing, loading and outward clearance for vessels, all owners must give instructions to Agents at discharging ports to forward relevant cargo discharge certificates to Agents at loading ports without delay.

Certificates: There is no organisation for dealing with Derat Certificate at Mina Abdulla. Agents are responsible for presentation of Oil-discharging Certificate to Customs Authorities as guaranteed by them. All Cargo Discharge Certificates duly attested by the Arab Consulate are to be sent to Agents directly.

PILOTAGE: Pilot normally boards the vessel about 1.0 miles – 1.5 miles to the Eastward of the Sea Island. Vessels are requested to have pilot ladder of approved pattern, safely and securely rigged, and ready for immediate use. When it is necessary for a vessel to anchor before berthing, she should do so in the recommended anchorage area. At all times a Pilot will be available on the Sea Island.

Vessel with a Pilot on board shall display International Code Flag "H" in a prominent position whilst manoeuvring under his advice, and shall, if so instructed by Pilot, display a flag indicating berth to which vessel is proceeding.

ANCHORAGES: Vessels requiring to anchor for any reason in port limits should do so within area enclosed between positions:

29° 02′ N.	48° 14.3′ E.
29° 02′ N.	48° 15.1′ E.
29° 01.2′ N.	48° 15.1′ E.
29° 01.2′ N.	48° 14.1′ E.

or within reasonable proximity to the East if congestion arises in anchorage area.

All vessels and craft within the port shall be navigated with care and caution, at a speed, and in a manner which shall not endanger the safety of other vessels or craft. In particular, special care and caution is to be observed in passing vessels or craft of the following category: weight-lifting or deeply-laden craft, vessels or craft in tow and vessels or craft engaged on diving, dredging, grabbing, pile-driving or construction work, survey operations or the removal of obstructions.

All vessels within the port shall anchor, or moor and unmoor, when and where required by the Pilot, and shall be moved from place to place as required and by such means or appliances as may be ordered by the Marine Officer.

Vessels or craft shall not anchor near any submarine lines within the port limits, unless engaged on work which, in the opinion of the Pilot, necessitates their doing so.

MAX. SIZE: Mina Abdulla Sea Island consists of 2 berths, primarily for loading, although unloading facilities are also available. The offshore berth (No. 19) is designed to receive tankers up to 276,000 tonnes displacement in ballast to load products and can also accommodate loaded tankers of 35 ft. It is envisaged that loaded tankers will only be handled in an emergency.

The inshore berth (No. 18) is designed to receive tankers from 25,000 to 140,000 tonnes deadweight in ballast annd can also accommodate loaded tankers of 25,000 – 90,000 tonnes deadweight in emergencies.

The minimum depth of water at Berth No. 19 is 59 ft. and at Berth No. 18 minimum depth is 57 ft.

MOORING: Pilots may decline to moor any vessel if in his opinion it is not equipped with satisfactory mooring facilities, lines and gear, etc.

The Sea Island consists of 6 mooring dolphins and 8 breasting dolphins all connected to the loading platform by walkways.

Mooring hooks and capstans for handling ropes are provided. Hooks are of the quick release type, and in an emergency can all be immediately released from the Control Tower. A shore gangway is provided at each berth.

All vessels berthing at Mina Abdulla must be provided with a minimum of 8 mooring ropes forward and aft.

HEALTH: Quarantine regulations administered by Kuwait Government's Quarantine Medical Officer. Pratique granted at anchorage or berth.

Vessels calling at Mina Abdulla are requested to send following information to "Health Shuaiba Port" via Harbour Master at Mina Al-Ahmadi:

(1) Name of vessel.
(2) Last port of call.
(3) Health condition of crew.
(4) Validity of Cholera Certificates.
(5) Request for Free Pratique.

No craft, other than one having on board the Mooring Master or Port Health Officer, may approach any vessel entering the port and no other person may board any such vessel until Free Pratique has been granted.

Adequate covers shall be placed over all overside discharges.

Masters shall be responsible for ensuring that no unhealthy or offensive matter is deposited from their vessels on port premises. Any such matter so deposited that is, or becomes offensive, or, in the opinion of the Port Health Officer, injurious to health, may be removed, confiscated or destroyed and the place of deposit cleaned or disinfected on the direction of the Marine Officer at the expense of the Master responsible.

Any vessel, having on board offensive goods, or goods which, in the opinion of the Port Health Officer, are injurious to health, may be ordered to leave the port by the Marine Officer.

No ashes, refuse or other objectionable matter shall be thrown overboard from any vessel either on to any premises or into any waters of the port.

RADIO/VHF: All communications are to be made through the vessel's Agent, with the request that they be passed to K.O.C. Mina Abdulla, Harbour Master and Marine and Export Operations Department.

TUGS: 2 large tugs are available to assist in berthing and will operate to the Pilot's instructions, but will normally both be used while berthing, usually making fast on the starboard side, by means of 2 ropes each of which will be provided by the tug.

Both tugs are fully fitted with Fire Fighting and Dispersant spraying equipment.

LOADING: All products are loaded at the Sea Island by means of rigid loading arms. They are all fitted with hydraulically operated quick connect/disconnect couplings.

The black products are loaded by means of 10 in. connections and the white products by 16 in. connections.

The maximum loading rate will be approximately 2,000 tons per hour.

Caution: The incoming oil stream is pumped from shore and it is extremely dangerous to close a ship's valve against the incoming oil stream. Such a procedure creates an excessive pressure, which may damage submarine lines, ship's pipe-lines or the terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution.

Loading and discharging of petroleum vessels shall not be undertaken without permission of the Oil Movements Department.

Loading and discharging of petroleum vessels shall not commence until:

(1) Master or Chief Officer has certified to the Oil Movements Department that all necessary valves are open and that vessel is in proper condition to receive or discharge cargo.

(2) Master or Chief Officer has certified to the Oil Movements Department that all ship's sea valves are closed or blank flanged except those required for water circulation purposes, and that these regulations are being and will be observed.

(3) Ship's tanks have been inspected by an authorised inspector and passed as suitable for loading.

Throughout period of loading and discharging operations, following conditions shall be observed:

(1) A responsible Ship's Officer shall be on watch on board at a point near tanks which are receiving oil during process of loading. The company's staff have received instructions to stop loading immediately whenever this rule is disregarded.

(2) A capable member of ship's crew shall be stationed by ship's tank valves which are receiving oil during loading.

(3) All pipe-lines shall, while rigged for loading or discharging petroleum, be directly and continuously earthed and kept constantly under supervision.

(4) No petroleum shall be allowed to escape or overflow.

(5) The following signals will be observed, as well as the radio communications, between ship and shore:

Signal Flag by Day		*Light Signal by Night*
	Starting	
1 Red Flag	Slow Speed	1 Red Light
2 Red Flags	Full Speed	2 Red Lights
	Stopping	
1 Red Flag	Slow Speed	1 Red Light
All Flags Down	Stop	No Lights

(6) When normal ship-to-shore communication fails, the emergency signal to stop the oil flow will be a continuous blast on the ship's whistle until the oil ceases to flow. Steam or air should never be shut off from whistle during loading. When practical, means should be provided for blowing the whistle from the after section of the cat walk. Whenever an Emergency Whistle Signal is used, all loading operations in the berths will be shut down until normal communication is restored. For this reason it is requested that ships in the area refrain from using ship's whistle for other than essential purposes.

Load Lines: Masters are warned that their load lines are subject to scrutiny by the Port Officer from Mina-Al-Ahmadi on completion of loading or bunkering. It is in their own interest therefore, to observe the regulations, as vessels are liable to be delayed and have to pump ashore or be fined if overloaded, and Port Clearance withheld.

MEDICAL: Patients will in normal course of events be treated by Quarantine Medical Officer on board. Neither medical nor hospital facilities are provided by the Company. However, in cases of emergency those requiring urgent hospitalisation may be taken by vessel's Agent.

BALLAST: As soon as practicable after arrival, all vessel's tanks wi be inspected for evidence of oil in ballast. During discharge of ballas similar inspections will continue. If evidence of oil appears at any o these inspections, the ship must return at once to a point not less tha 100 miles from the coastline and there clean tanks and segregate slop

Masters will be required to sign a declaration certifying that any wate ballast intended for discharge from vessel is clean and free from oil.

No deballast reception facilities are available.

POLLUTION: Cases of discharging dirty ballast or oil spillages will be investigated and vessels are liable to fines and/or detention. Vessels shall not discharge into the water of the port any part of the content o their cargo, slop, or ballast tanks or bilges which is liable to pollute these waters. Masters shall ensure that pipe-line and equipment are clear before using them for discharging anything into the water of the port. Scuppers shall be plugged effectively and no leakage or spillage o petroleum on board shall be allowed to leak or be swept overboard.

The State of Kuwait has stringent laws in force concerning the pollutio of the sea by oil. The following are 2 amended paragraphs of this law

Paragraph 1, Art. 4. "A person responsible for any pollution as described in Articles 1 and 2 shall be punished by a fine of not less tha 1,500 Dinars and not more then 40,000 Dinars. In the event of his committing a similar crime within a period of 1 year from the date of his conviction, such a person shall be punished by a fine of not less tha 3,000 Dinars and not more than 40,000 Dinars, and in the event of his committing yet another crime within a year from this last conviction he shall be punished by a fine of not less than 6,000 Dinars and not more than 40,000 Dinars".

For each offence a bond of 40,000 Kuwaiti Dinars must be deposited prior to release of vessel.

Paragraph 3, Art. 6.. "The person responsible for pollution may suspend the detention order against the ship on payment, as a cash guarantee, of 40,000 Kuwaiti Dinars to the official entrusted with the execution of such order".

TIDE: The maximum tidal range is 10 ft. 6 in. and velocity of tide is from 0.5 to 2 knots.

DENSITY: 1025.

FRESH WATER: Cannot be supplied at Mina Abdulla. In case of utmos need Agent may hire a barge with a capacity of 100 tons of fresh water from Kuwait, and send to Mina Abdulla.

FUEL: Fuel oil bunkers can be loaded in either berth at a max. rate of 500 t.p.h, thus raising the max. loading rate of either berth by 500 t.p.h for fuel oil cargoes only.

CONSULS: See "Shuwaikh". Consuls are situated just outside Kuwai town, some 30 miles from the terminal.

REPAIRS: No facilities.

CUSTOMS: Import of firearms and ammunition is forbidden. Under Kuwait Law No. 46, it is an offence to sell or trade liquor within the State of Kuwait. Any person convicted for selling, purchasing, giving away, accepting or acquiring in any manner, liquor or any intoxicating drinks for the purpose of trading and marketing shall be punished by a maximum 3 year's imprisonment and a maximum fine of KD 300 or by only 1 of the 2 aforesaid penalties. Alcoholic beverage is strictly prohibited to be held out of bond. Master allowed to keep limited quantity in his cabin.

REPATRIATION: See "Visa Regulations" under General before firs port

AIRPORT: Kuwait.

TIME: GMT plus 3 hours.

PROVISIONS: K.O.T.C. does not provide any chandlering facilities Masters of vessels calling at Mina Abdulla must arrange for supplies through ship's Agent. Foodstuffs, beverages, tobaccos, etc., are available from ship chandlers in Kuwait in limited kinds and quantities Prices a little more expensive than in Kuwait due to long transportation Ship's Agent should be advised by cable well in advance.

SHORE LEAVE: At present, crews not allowed ashore at Mina Abdulla and this rule will be strictly adhered to.

REGULATIONS: Main engines shall always be kept ready for use Steam pressure shall be maintained at minimum necessary to operate auxiliaries and to manoeuvre in case of need. Deck steam is to be maintained at all times.

Engine repairs which may prevent working of main engines may only be undertaken with written permission of the Oil Movements Department

Master shall at all times retain on board sufficient crew to work vessels

Vessels shall have both anchors ready for immediate use on arriva and departure.

Vessels berthed at sea terminals shall not carry out engine trials without permission of the Oil Movements Department.

No swimming in vicinity of vessels or from vessels in berth is allowed

DEVELOPMENTS: The CBM berths formerly used have been removed but the pipelines and ground tackle remain in place. The former position of the CBM berths, which are about 1 mile South of the Sea Island, are marked by a navigation buoy and Masters are cautioned from anchoring in this area.

AUTHORITY: Kuwait National Petroleum Co. (KSC), Mina Abdulla Refinery, P.O.Box 69, Safat, 13001-Safat-Kuwait. *Tel:* 3260233 ext. 3028/3029. *Telex:* Kunpema 44204 Kt. *Cables:* Kunpema Kt–Marine Mina Abdulla. *Contact:* Captain Hani S. Omar, Marine Department - Section Head.

All shipping movements are directed by Mina Al-Ahmadi Harbour Master.

MINA AL-AHMADI: 29.04 N. 48.09 E. (See Plan)

OPERATORS: Kuwait Oil Company.

LOCATION: Port of Mina Al-Ahmadi is open roadstead situated on western shores of the Gulf.

PORT LIMITS: From the shore at Lat. 29° 02′ 50″ N. Eastward to Long. 8° 09′ 42″ E. Thence in a S.E. direction to position Lat. 29° 02′ 45″ N., Long. 48° 09′ 47″ E. then in an Easterly direction towards Long. 8° 11′ 30″ E. and the Northerly limit Lat. 29° 10′ 00″ N. from the shore Long. 48° 11′ 30″ E.

Note: Southern limits liable to slight modification due to Shuaiba Port expansion. Changes of no consequence to visiting vessels.

FLAG: National flag of Kuwait is to be flown at foremast head during vessel's stay in port.

DOCUMENTS:

To obtain clearance inwards, following documents required by Agents:

(i) Ship's Register.
(ii) Safety Equipment Certificate.
(iii) Safety Radio Certificate.
(iv) Load Line Certificate.
(v) Last Port Clearance.
(vi) Two copies of Crew List showing names, nationalities and Passport/Seaman's Book numbers.

Items (i) to (v) are returned to Master together with Port Clearance (valid 4 hours only) prior to sailing.

Customs boarding officers require following:

(a) One copy of Crew List.
(b) Log Books covering period from last visit.
(c) Completed Customs Declaration Form (supplied by boarding officer).
(d) List of Ports visited with arrival and departure dates since last visit (form also supplied by boarding officer).
(e) Completed Ballast Form (form also supplied by boarding officer).

Immigration Officials require the following:

(a) Valid Passport or Seamen's Book – the latter is preferable for landing.
(b) Letter of Guarantee from Agents.
(c) Two copies of Crew Lists.

Early Departure Procedure. KOC Documents Section are now operating an Early Departure Procedure to cut down delays in documentation. Masters may opt to use this scheme, full details of which can be obtained from KOTC. Those vessels not accepting this system of documentation are unberthed to anchorage to await documentation and therefore subject to delay in sailing until documents are ready and delivered onboard by launch. Weather conditions may prolong such delays on occasions.

Discharge Certificates: Discharging certificates of oil cargo loaded from Kuwait and neutral zone ports are to be sent to vessels' local Agent immediately, duly attested by Customs Authorities and Arab Consulate covering full quantity as per Bill of Lading.

If a vessel, which has not submitted the certificate for the previous voyage, calls for the second time, she will be allowed to load and sail only after paying a cash deposit of KD 2,000.

In order to avoid delay in berthing, loading and outward clearance for vessels, all owners must give instructions to Agent at discharging ports to forward relevant cargo discharge certificates to Agent at loading ports without delay.

NAVIGATIONAL AIDS:

Current hydrographic information may be obtained by radio from the Middle East Navigation Aids Service, Bahrain".

Lights and Fog Signals: A fog signal on the extreme South end of South Pier – MAA with characteristics of one 3-second blast every minute. Approx. position Lat. 29° 03′ 42″ N., Long. 48° 09′ 42″ E.

A fog signal situated on the North Pier with a characteristic of 2.5 second blast, 3 second silence, 2.5 second blast, 3 second silence, 2.5 second blast, 46.5 second silence, Approximate position Lat. 29° 07′ 24″ N., Long. 48° 09′ 00″ E.

A fog signal situated on MAA – KOC Sea Island with a characteristic of 2×3 second blasts every 90 seconds. Approximate position Lat. 29° 06′ 48″ N., Long. 48° 17′ 29″ E.

A fog signal situated on MAA – KOC Single Point Mooring with a characteristic of a 10 second blast every 60 seconds. Approximate position Lat. 29° 06.9′ N., Long. 48° 19.2′ E.

A fog horn situated on the Shuaiba Petroleum Products Pier – SPPP – with a characteristic of a 3 second blast every 17 seconds. Approximate position Lat. 29° 02′ 46″ N., Long. 48° 10′ 46″ E.

A fog horn situated on the Mina Abdullah Sea Island – MAB – with a characteristic of prolonged blast duration of 2 seconds on and 18 seconds intervals off. Followed by morse "LI". Approximate position Lat. 29° 01.5′ N., Long. 48° 12′ 45″ E.

PILOTAGE: Vessels should arrive with sufficient clean ballast for safe manoeuvring under prevailing weather conditions. Under certain conditions the Pilot, after consulting the Harbour Master, may require additional ballast to be run in before berthing.

All berthing, unberthing and manoeuvring of vessels within the port limits, restricted area and prohibited anchorage must be done under the supervision of a KOC Pilot.

It is the duty of the Master to inform the Pilot of any special conditions, difficulties, or peculiarities whatsoever pertaining to his vessel which might impose hazards in connections with the handling, mooring, unmooring, loading or discharging of the vessel.

The Pilot boarding places for North Pier and for South Pier are 2 miles East of the respective piers, and for the offshore terminals 2 miles off the terminals.

Caution: Vessels are cautioned to keep well clear of the port area and on no account to pass within a distance of 2 miles of North or South Piers without a Pilot on board.

ANCHORAGES: The suggested anchorages in the Port of Mina Al-Ahmadi have been laid out to facilitate shipping in general. These anchorage areas are outside of the port limits and clear of the prohibited anchorage and restricted areas. Depths in the anchorages range from 10 to 15 fathoms, the seabed is of sand and soft coral with mud patches and affords good holding ground.

Incoming vessels are assigned berths by the Harbour Master in accordance with time of arrival, type of cargo required, size of vessel and loaded draft. Endeavour is made to berth vessels on arrival and Masters will be advised, prior to arrival, of the pier at which they will berth. If a berth is not available, vessels will be requested to anchor in one of the three anchorages as follows:

1. To the North-West or South-East of the Sea Island and inside of the Restricted Area.
2. To the East of the North Pier, outside of the port limits and to the North of the Prohibited Anchorage.
3. To the East of the South Pier, outside of the port limits and between the Southern limit of the Prohibited Anchorage and the Northern port limit of Shuaiba Port.

To the East of the port limits exists a Prohibited Anchorage and a Restricted Area which embraces the Sea Island and submarine-feeder pipe-lines.

Positions of these areas are:

Prohibited Anchorage	29° 05′ 00″ N.		29° 05′ 00″ N.
	48° 11′ 30″ E.	to	48° 15′ 00″ E.
	29° 07′ 00″ N.		29° 07′ 00″ N.
	48° 11′ 30″ E.		48° 15′ 00″ E.
Restricted Area	29° 05′ 00″ N.	to	29° 05′ 00″ N.
	48° 15′ 00″ E.		48° 20′ 00″ E.
	29° 05′ 00″ N.		29° 05′ 00″ N.
	48° 15′ 00″ E.		48° 20′ 00″ E.

Prohibited anchorage for Mina Abdulla is the area formed by lines joining the following position:

1.	29° 02.0′ N.	48° 13.0′ E.	3.	29° 00.8′ N.	48° 09.5′ E.
2.	29° 00.8′ N.	48° 13.0′ E.	4.	29° 02.0′ N.	48° 09.4′ E.

HEALTH: Vessels calling at Mina Al-Ahmadi are requested to radio the following information to "Health Minahmadi Port":

(1) Name of vessel.
(2) Last port of call.
(3) Health condition of crew.
(4) Validity of Cholera Certificates.
(5) Request for Free Pratique.

Free Pratique will be considered at the discretion of the Quarantine Officer, and vessels must hoist the yellow flag unless they are informed by Agent or Harbour Control that Free Pratique has been granted.

Regulations.

(i) All vessels must exhibit quarantine signals until quarantine formalities are completed or Free Pratique granted. By day, International Code Flag "Q"; by night, red light over white light. No person other than the Pilot is allowed to board any vessel either alongside pier or at anchorage until pratique has been granted.
(ii) Valid Cholera Certificates will be required from travellers coming from infected areas with the exception of children under one year.
(iii) Ratguards must be fitted to all moorings – this is being rigidly enforced.
(iv) Maritime Declaration of Health Form (supplied by boarding Quarantine Officer) to be completed.
(v) One copy of Crew List containing dates of vaccination and inoculation is required.
(vi) International Certificates of Vaccination and Inoculation to be available for inspection if required.
(vii) Details of air-conditioning available in vessel (form supplied by boarding officer).
(viii) A valid Derat Certificate must be produced. Facilities are available locally for renewal.

RADIO:

1. *Station:* All radio communications to the Company should be quoted in Greenwich Mean Time and should be routed through Kuwait Coast Station 9KK, details of which are given below:

412G Al Kuwait (9KK) Lat. 29° 10′ 09″ N., Long. 47° 45′ 42″ E.

Frequency			*Hours*
(9KK) 430*, 450, 500	A1, A2	2 kW.	0300–2100
(9KK2) 4,287	A1	0.75 kW.	On request
(9KK3) 6,370	A1	0.75 kW.	On request
(9KK4) 8,525	A1	0.75 kW.	0300–2100
(9KK5) 12,895	A1	0.75 kW.	0300–2100
2,182, 2,200, 2,750	A3	0.1 kW.	0300–2100

*On request.

Procedure: Transmits traffic lists on 450 kHz each even hour; 8,525 and 12,895 kHz each odd hour plus 35, listens for 30 mins. thereafter: 2,750 kHz each odd hour plus 05.

2. *ETA:* 72 hours before arrival Masters should transmit to KUOCO through Al Kuwait Radio (9KK) the following information required by Kuwait Oil Company.

1. ETA.
2. Cargo and Bunkers required.
3. Notice of any repairs which may immobilise vessel.
4. Any special requirements regarding cargo documents.
5. Max. loading rate and ballast discharge time, special loading instructions if any.

The ETA should be confirmed 24 hours before arrival. The Master should also provide Agent with following information prior to arrival:

1. ETA.
2. Last port of call.
3. Any sickness on board.
4. Number of crew to see doctor or dentist.
5. All requirements – provisions, supplies, lubricating oils, repairs, stores, machinery for landing, crew repatriation, etc.

VHF: A short range VHF Radio Telephone. Port control system is in operation and continuous watch is maintained on International Channel 16. Port working Channels are:

11 12 14	General Port Working.
15 17	Sea Island Operations and General Port Working.
73 74	Pilot/Tugs Pier Controller North Pier/South Pier.

Vessels bound for Mina Al-Ahmadi should make contact, as soon as they are within range, calling "Mina Al-Ahmadi Port Control" on Channel 16.

Note: As Channel 16 is reserved for calling, safety and emergency, stations should refrain from using this Channel unnecessarily.

RADAR: Norcontrol VTS installed in the Marine Control Centre at the South Pier. It covers the approaches to the Sea Island and the South Pier.

NOTICE OF READINESS: Vessels are accepted for loading either by being given a range date or "As convenient". If a crude oil loading tanker arrives within her nominated range date (a 3 day period) her Notice of Readiness will be taken as the time of her arrival whether or not she is berthed on arrival. An LPG vessel is nominated an "Acceptance Date" plus 1 day and her Notice of Readiness will likewise be taken as the time of her arrival, whether or not she berths so long as her arrival time is within her range. If a vessel arrives "As convenient" or for lifting bunkers only then her notice of readiness will be taken as the time that the Pilot boards. Time of anchoring, together with position relative to South Pier Control should be advised to the Harbour Master by VHF or through 9KK as soon as possible. All vessels at anchor are required to be ready on receipt of 1 hour's notice from Port Control, this notice will be given by VHF or Lamp and vessels should ensure an efficient watch is maintained to receive notice.

Cancellation of Notice of Readiness: In all cases, including vessels having Range Dates, if after having received 1 hour's notice a vessel is not ready to berth when Pilot boards, at the expiry of that notice the original Notice of Readiness will be cancelled and the Pilot withdrawn. The new Notice of Readiness will be the time the Pilot re-boards the vessel concerned. As vessels are normally berthed in strict Notice of Readiness sequence, a vessel could lose considerable time through not being ready and Master should ensure that delays of this nature do not occur.

TUGS: K.O.C. maintain 3 diesel tugs for port use. They are 5,200 h.p. with a designated bollard pull of 70 tons. 2 tugs are normally on duty at all times. Hire charges for the services of Pilots, tugs and rope launches are covered by comprehensive port charges. Under normal operating conditions no tugs or other craft will come alongside the vessel before the Pilot boards. Ship's personnel must not signal for tugs or other boats to come alongside.

Tugs will make fast during all berthing operations, two lines will be given to the vessel. A messenger line is recommended for handling these lines from the tug to the vessel's deck. Tugs could also be used for vacating purposes.

MOORINGS: When at berth, vessels must be moored to entire satisfaction of Pilot. Vessels must be ready at all times to put out extra moorings as requested by pier personnel or dictated by weather changes.

Mina Al-Ahmadi is subject to sudden fierce squalls; winds of 70 knots have been recorded, therefore vessel's mooring lines must be checked frequently to prevent excessive movement of vessel in berth. Experience has shown that wholly synthetic moorings have too much elasticity and allow vessel to range or drift away from the berth during periods of adverse weather. Whilst these moorings are acceptable as head/stern ropes, it is felt that the ideal breast moorings should be of wire or a wire rope combination with the end being sent ashore fitted with a synthetic pennant or tail. This type of mooring provides the necessary elasticity while still being able to hold the vessel in position. All vessels moored with automatic tension winches must set the manual brakes on these winches.

BERTHING: Vessels can berth at any time of the day and night. Berths are allocated by the Harbour Master depending on various factors and the berthing position is advised by VHF. All vessels must establish contact with Mina Al-Ahmadi Port Control before anchoring to ascertain position. Vessels should remain at 1 hour notice for berthing at all times and maintain a continuous listening watch on VHF Channel 16.

The Port facilities consists of 4 Piers, 1 Buoy Mooring (Sea Berth), 2 Sea Islands and Single Point Mooring.

South Pier: The South Pier is connected to the shore by an approach trestle, which leaves the shore in position Lat. 29° 04′ N., Long. 48° 09′ E., and runs seaward in an 071° 26′ direction for a distance of 4,200 ft. (1,280 m.). The "T" head is formed by the oil pier running Northwards in a 341° 26′ direction for 2,805 ft. (855 m.) and the South arm running in a 174° 26′ direction for 1,076 ft. (328 m.). The pier is a steel piled structure with a wooden deck, 24 ft. above zero tide. The South Pier has 4 oil-loading berths and 2 L.P.G. berths. New fendering system independent of main structure installed to berths towards sea. Vessel to provide safe access between ship and terminal.

Bitumen Pier: A Bitumen Pier, for the export of Bitumen is located in an approximate position Lat. 29° 03.9′ N., Long. 48° 09′ E. The Pier approach projects out from the shore opposite the Bitumen plant in an 071° direction for approximately 600 m. The Pier head is 100 m. long and runs in a 341° – 161° direction. Water depth approximately 20 ft 6 in. (zero tide). Largest vessel to be accommodated 5,000 ton S.D.W.

North Pier – MAA: The North Pier is situated 3.5 nautical miles North of the South Pier – MAA and is connected to the shore by an approach trestle which runs seaward from Lat. 29° 07.1′ N., Long. 48° 08.2′ E. in a direction of 071° for a distance of 4,754 ft. (1,449 m.). The head is formed by the Oil Pier which runs Northward in a direction of 341° for a distance of 2,304 ft. (702 m.). The pier is a steel piled structure with a wooden deck, 20 ft. above zero tide. The North Pier has 4 oil-loading berths. An independent berthing dolphin and associated mooring dolphin have been recently installed as improved facilities at the South end of the Pier, together with an independent protective dolphin to impro docking facilities at the Northwest end of the Pier. Vessels to provid safe access between ship and terminal.

Sea Island: The loading platform of this Terminal is located in positio Lat. 29° 06.8′ N., Long. 48° 17.5′ E. approximately 7.4 miles East of th North and South Piers. It is a steel piled structure in 94 ft. of water (zer tide). It consists primarily of a central loading platform with control towe 6 mooring and 8 breasting dolphins all interconnected by catwalks. Th Terminal which lies in a 330° – 150° direction, is some 1,620 ft. in leng (494 m.). The height of the loading platform above zero tide is 44 ft.

The Sea Island – MAA KOC has 2 loading berths. Crude oil is fed t the Terminal by a 48 in. submarine line and heavy fuel oil by a 20 in submarine line. The submarine lines are marked by 3 light buoy letttered "A", "B" and "C". Details are given in the navigational aids L.F.O. and D.O. bunkers are not available at the Sea Island.

Multi-pile Single Point Mooring: A Single Point Mooring is located i position Lat. 29° 06.9′ N., Long. 48° 19.2′ E. approximately 1.5 nautica miles East of the Sea Island. The SPM is currently mothballed. The hos strings have been removed to store.

Sea Berth: There is 1 sea berth located South of South Pier. Berth "A is maintained only for the import of refined products.

MAB – Sea Island: This terminal has 2 cargo handling berths. Th terminal is for loading products only which are fed to the terminal b 4×24 in. white product lines and 1×24 in. black product line. Shor gangways available on this terminal.

Shuaiba Petroleum Products Pier: This terminal has 4 product handlin berths. The terminal is connected to the shore by an approach trestl which leaves the shore at 29° 02′ 25″ N., 48° 09′ 55″ E. and run seawards in an 062°T direction for distance of 997 m. The "T" head i formed by the oil piers running Northwest in a 331.5° T direction fo 336.1 m. and Southwards in a 151.5° T direction for 453.7 m. Vessel to provide safe access between ship and terminal.

Limiting Depths and Berth Lengths:

Berth	*Depth at Zero Tide* (ft.)	*Nominal Length* (ft.)
South Pier – MAA		
1.	47	930
3.	47	930
4.	48.5	960
5.	41.5	765
6.	43	705
9.	44.5	615
10.	49.5	1,050
North Pier – MAA		
11.	59	1,490
12.	59	1,152
15.	57	870
16.	57	840
Sea Island – MAA KOC		
20.	94	1,420
21.	94	1,420

Loading Manifold, Loading Connection Sizes: South Pier: Berths 5 an 6 only are equipped with 10 in. cargo hoses and 8 in. bunker hoses- standard 150/ASA.

Berth 1 is equipped with	5×16 in. Cargo Arms. 2×12 in. Bunker Arms.
Berths 3 and 4 are equipped with	1×12 in. Cargo Arm, white products 2×16 in. Cargo Arms, white products 2×16 in. Cargo and Bunker Arms, blac products
Berth 10 is equipped with	4×16 in. Cargo Arms. 2×12 in. Bunker Arms.
Berth 9 is equipped with	6 in. bunker hose only. All Standard 150/ASA.
North Pier:	
Berths 11 and 12 Loading Arms	3×16 in. Cargo Arms. 2×12 in. Bunker Arms. 1×16 in. Chicksan for P.C.NA. (Berth 12
Berths 15 and 16 Chicksan Units	4×12 in. Cargo Flanges. 2×8 in. Bunker Flanges. Standard 150/ASA.
Sea Island:	
Berths 20 and 21 Loading Arms	4×16 in. Cargo Flanges. 2×12 in. Bunker Flanges. Standard 150/ASA.
SPM:	
Berth 22 Floating Hoses	2×16 Cargo Flanges. 1×12 in. Bunker Flanges. Standard 150/ASA.

Reducers: All vessels using the Port of Mina Al-Ahmadi should b equipped with reducing spools to fit these loading connections. These fittings should be in place, prior to berthing to help expedite the vessel's turn around.

Crude/Product Loading Rates: The following table shows the crude an products available at each berth and the nominal loading rates.

Grade	*Location*	*Nominal Rate* (t.p.h.)
Crude Oil	Sea Island	15,000
Crude Oil	North Pier	7,200
Crude Oil	South Pier	2,100
HFO Bunkers	Sea Island	750
HFO Bunkers	North Pier	500
HFO Bunkers	South Pier	500
HFO Cargo	North Pier	2,000
HFO Cargo	South Pier	2,000
LFO Bunkers	North Pier	500
LFO Bunkers	South Pier	500

Grade	Location	Nominal Rate (t.p.h.)
LFO Cargo	South Pier	1,100
D.O. Bunkers	North Pier	500
D.O. Bunkers	South Pier	500
Line Blend Fuel Oil	South Pier	1,200
Gas Oil	South Pier	1,500
L.S.F.O.	South Pier	2,600
A.T.K.	N. & S. Piers	1,500
M.S.	N. & S. Piers	1,200
P.C.NA.	N. & S. Piers	2,600
Bulk L.P.G.	South Pier	2,000

L.S.F.O.: Low Sulphur Fuel Oil.
A.T.K.: Aviation Turbine Kerosene.
M.S.: Motor Spirit.
P.C.NA.: Petrol Chemical Naphtha.

ote: All blended cargoes containing crude oil as one of the components n be loaded at any crude berth.

K.O.C. are in the process of installing a new metering system for ports.

lops: A 10 in. slop-line is available on all berths on North and South ers for reception of slops. For first 3 hours use of this facility is free, r each additional hour or part thereof, a charge is made. Reception of ops is necessarily slow and a vessel may be considerably delayed in aving to pump slops ashore. Vessels are therefore expected to arrive th clean ballast and Masters are asked to certify that all tanks and nes have been thoroughly washed unless "load on top" techniques are eing operated.

EDICAL: Patients will normally be treated at State Quarantine Clinic, here doctors are on duty between 0800 – 1200 hrs. and 1500 – 000 hrs. daily. In emergencies doctors are available any time. Patients quiring hospital treatment will be transported by Agents to either KOC spital in Ahmadi or to State hospital in Kuwait. Dental treatment can e arranged by Agents.

RESH WATER: Fresh water is not available at Mina Al-Ahmadi. essels should contact their Agents for supply from alternative sources, ch as Shuwaikh Anchorage, Shuaiba Port, etc.

UEL: Heavy, light and diesel fuel can be supplied on all berths except e Sea Island, where only heavy fuel is available. There are no nkering facilities on the Bitumen Pier.

	API	*Viscosity*	*Sulphur content*
Heavy Fuel	15.2–15.8	2,900–3,400	4.0 or less
Light Fuel	19.0–20.0	600	3.5 or less
Diesel Fuel	35.5–36.5	36	1.5 or less

UBRICATING OILS: The stock of marine products of BP, Shell and ulf Oil are maintained at Mina Al-Ahmadi and requests indicating the antities are to be made in advance. All drums are to be handled during eballasting or before loading. Vessels will not be allowed to load more an 9 drums after loading unless under special circumstances and epending on shipping congestion. No bulk luboil delivery service ailable in Kuwait.

ONSULS: Most friendly countries maintain Embassies or Consulates Kuwait Town.

USTOMS: Customs Officials will board vessels to inspect log books ascertain violation of Israeli Boycott Rules and seal the liquor bond ring stay in berth. An accurate list of alcoholic drinks in *Bonded Store* nly is to be presented to the officials sealing the bond and the seal is t to be broken until vessel leaves the port.

(i) Personal effects mainly required for personal use and not for resale or purpose of commercial gain are allowed free of duty. However, all other goods are subject to a 4% ad valorem duty (CIF value). Suppliers' invoices and Certificate of Origin are required for clearance.
(ii) Importation and the sale of alcoholic beverages is strictly prohibited.
(iii) All goods for landing from tankers must be declared to boarding Customs Officer and necessary documentation completed.
(iv) Israeli goods, goods made by companies having interest or branches in Israel, Israeli vessels and vessels trading with Israel are boycotted and not allowed entry into Kuwait.

MIGRATION:

(i) Nationals of all friendly countries normally allowed to land. Israelis forbidden entry into Kuwait.
(ii) Transit visas should be obtained from Kuwait Embassies and Consulates abroad. However, in emergencies entry visas can be arranged at airport.
(iii) Transit passengers having valid connecting airline ticket to next port are allowed to land without visas up to 24 hours, extendable to 48 hours if required.
(iv) Seamen of all friendly countries normally allowed to land in transit to join vessels, without visas but on Agents guarantee. Advance information regarding names, nationalities, age, sex, etc. is required by Agents in order to facilitate reception and immigration clearance.

N.B. Thursdays and Fridays are Company holidays.

(v) Seamen allowed to land for hospitalisation, repatriation, transfer, etc., on a written undertaking that all expenses are met by Agents on behalf of Owners.
(vi) Passports must be valid for Kuwait for citizens of all countries. Stateless persons are required to have a visa before arrival in Kuwait.

Also see "Visa Regulations" in "General" before first port.

ME: Kuwait State bases local time on the 45th meridian (GMT plus hours). This time is in force the whole year.

TORING: Vessels can only be stored by barge at the anchorage. When oring alongside at the berth, trucks can only proceed to the head of e jetty. From this point hand carts are used to the berth. No fork lifts n be used on the jetty. The labour force is supplied by the Ship handler who also deals with the Customs Regulations.

DEEP WATER DEPARTURE CHANNEL: A comprehensive survey was carried out to determine the route of the Departure Channel for the larger and deep draft vessels leaving the port of Mina Al-Ahmadi in a loaded condition. This channel is some 28 miles in length; it extends from the Sea Island Terminal to Madira Reef and is marked by 21 light buoys and 2 light beacons, one established on Taylor Rock and the other on Madira Reef. In addition to the above aids, Madira Reef Light Vessel has been re-positioned further to the East and renamed Ahmadi to act as a fairway mark. Water depth in the departure channel is from 91 ft. to 100 ft. and above. Two shallow patches, one is about 9 miles from Sea Island with a minimum 91 ft. and the second is 14 miles from Sea Island with 92 ft. minimum water. Vessels which by reason of their draft are confined to this deep water channel and consequently hampered in their freedom to manoeuvre, will exhibit the following signals:

(i) *By day.* A black cylinder 4 ft. long by 2 ft. in diameter exhibited where it can best be seen.
(ii) *By night.* Four red lights vertically disposed spaced 3 ft. apart with an all round visibility of 4 miles exhibited where they can best be seen.

The exhibition of these signals in no way absolves any vessel from taking all appropriate action to avoid collision as required by the International Rules and Regulations for Preventing Collisions at Sea, but if a deep draft vessel is in doubt that an approaching vessel is not giving her sufficient room to manoeuvre she should indicate such doubt by giving at least 5 short and rapid blasts on her whistle.

Vessels having less draft should, when able to do so, give way to vessels exhibiting and sounding these signals and indicate this intention by giving 1 short blast followed immediately by 1 long blast on the whistle. Normal sound signals for vessels in sight of another should then follow.

Anchoring and fishing are forbidden within the deep water Departure Channel.

The Departure Channel is marked by the following buoys and beacons conforming to the I.A.L.A. "A" system:

Buoys A1, B1 and C1 mark the submarine pipeline from shore to North Pier Terminal (See "Plan").

SERVICES: To avoid delay all vessels advised to cable Agent of all their requirements in advance, giving full details.

Repairs.

(a) *Ship Repair:* All running repairs are undertaken through local contractors.
(b) *Radar/Radio and Electronic Equipment:* Maintenance service of this equipment is available through KOTC whose engineers/ technicians are available for service on request.

Supplies: Supply of chemicals, paints, spare parts and provisions are available through local Agents.

Laundry: Laundry service is available on advance notice.

Oil Inspection: An independent oil inspection service is maintained at Mina Al-Ahmadi by the following: E. W. Saybolt & Co., B. & R. Redwood Ltd., and Chas. Martin.

Seamens' Services Centre: Situated at South Pier. Provides recreational facilities for all visiting seamen. Personnel mail service, beverages, snooker, toiletries, souvenirs and Walport Film Exchange service available. Open 0800 hrs– 2000 hrs. daily.

Classification Societies: Lloyd's Register of Shipping has a Resident Surveyor in Kuwait and maintains an office with Kuwait Maritime & Mercantile Co., who attend marine and non-marine work. Other societies have non-exclusive surveyors and their services can be obtained through KOTC.

Divers: Divers' services are available, including underwater hull cleaning service, through KOTC.

SHORE LEAVE: Ship's personnel and passengers not permitted ashore for any purpose whatsoever until pratique granted. All shore leave is contingent upon compliance with quarantine regulations and, under limited conditions and hours, shore leave may be granted. Masters should consult Agents to obtain the necessary passes.

REGULATIONS:

(a) Local Laws: The laws of Kuwait are in force at the Port of Mina Al-Ahmadi. Masters and crew members are advised for their own protection to abide by them. Comprehensive regulations governing the use of the port are promulgated in Law No. 21 of 1961. Masters of visiting vessels should acquaint themselves with this law.

(b) Pollution: The State of Kuwait has stringent laws in force concerning the pollution of the sea by oil. For information, the following are two paragraphs of this law:

Para 1, Art. 4: "A person responsible for any pollution as described in Articles 1 and 2 shall be punished by a fine of not less than 1,500 and not more than 40,000 Kuwaiti Dinars. In the event of his committing a similar crime within a period of one year from the date of his conviction such a person shall be fined not less than 3,000 and not more than 40,000 Kuwaiti Dinars, and in the event of his committing yet another crime within a year from the date of this last conviction he shall be punished by a fine of not less than 6,000 but not exceeding 40,000 Kuwaiti Dinars.

Para 3, Art. 6: The person responsible for pollution may suspend detention order against the ship on payment, as a cash guarantee, of 40,000 Kuwaiti Dinars to the official entrusted with the execution of such order".

(c) Certificates: All vessels must comply with International Safety Regulations and ensure that ship's certificates, i.e. Safety Radio, Safety Equipment and Load Line are valid. Facilities are available for renewal or extension providing proper notice is given. At least 48 hours should be allowed *excluding* Thursdays, Fridays or other local holidays.

(d) Load Line Regulations are strictly enforced, vessels overloaded will not be allowed to sail and subject to lengthy delay awaiting suitable facilities for pumping ashore. No facilities for pumping cargo ashore from Sea Island and S.P.M. are available.

(e) A Cargo Discharge Certificate for cargo loaded from Kuwait each voyage is to be presented to the Customs and Ports in Kuwait through the Agents within 4 months from sailing and these certificates are to be signed and stamped by local Customs officials and authenticated by an Arab Embassy or Consulate in the country of discharge.

PORT TAX: Introduced by the State of Kuwait at the rate of 45.25 fils (KD. 0.4525) calculated on ship's g.r.t. and outward clearance is subject to payment of their dues before departure.

Declaration of g.r.t. and n.r.t. details essential to avoid overcharge.

AUTHORITY: Kuwait Oil Company (K.S.C.), P.O.Box 9758, Ahmadi-61008, Kuwait. *Tel:* Kuwait 3261558, 3262268. *Telex:* 44233 KT, 44293 KT. *Cables:* Kuoco Kuwait. *FAX:* 3262265. *Contact:* Captain A.M. Salem, General Superintendent, Marine and Export Operations Department.

AGENT: For all tankers loading/discharging or sundry errands on a sole agency basis. Address: Kuwait Oil Tanker S.A.K. (Agency Branch), P.O. Box Fahaheel No. 7055, Kuwait. Telex: 4201, 4202. A/B Minatank Kwt. Tel. 911753/5; 911758/9; 911811. Cables: "Minatank Kuwait".

KOTC Agency is also connected with direct short range telephone VHF system and continuous watch is maintained on Channel 16. Working channels are and can be reached by calling "Minatank". Channel 16, calling only. Channel 26, Agency Working. Channel 27, Agency Working.

MINA SAUD (Mina Al Zoor): 28.45 N. 48.24 E.

(See Plan)

OPERATORS: Mina Saud Marine Terminal operated by Getty Oil Company, a subsidiary of Texaco. (hereinafter referred to as the Company). Weather and other circumstances permitting, ships will be loaded, moored and unmoored at all hours of the day, 7 days a week. Company representatives available at all times to discuss with Master any problems affecting vessel turnaround.

LOCATION: Mina Saud located just South of Ras Az Zaur approximately 23 miles 244° from Madira Light Vessel. Terminal connected to field and production centre at Wafra, 31 miles to N.W., by 16 in., and 10 in. oil pipe-lines, and 8 in. gas line.

The most conspicuous object at the terminal is the refinery flare, in position Lat. 28° 44′ 13″ N., Long. 48° 23′ 19″ E. Other objects conspicuous to the navigator: Ras Al Zour Beacon: Lat. 28° 44′ 48″ N., Long. 48° 24′ 16″ E. A 35 ft. high frame exhibiting 1 flash every 5 secs.

A conspicuous power station/desalination plant close South of the terminal with two chimneys 192 m. high in position Lat. 28° 42′ 21″ N., Long. 48° 22′ 30″ E.

FLAG: All vessels required to fly Kuwait flag at foremast during daylight hours. Flags may be obtained from Agents.

APPROACHES: Vessels on passage direct to Mina Saud up Gulf should pass about 1 mile South of Madira Reef Light Vessel, thence make good a course of 242° to an anchorage off Mina Saud in 17 m.

DOCUMENTS:

Ship's Manifest.
Bill of Health.
Crew List.
Clearance from Last Port.
Passengers Manifest, if any.
Stores List.
Bonded Stores List.

Agents are responsible for presentation of Oil Discharging Certifica to Customs Authorities as guaranteed by them. All cargo discharg certificates duly attested by Arab Consulate to be sent to the Agen directly.

Cargo documentation carried out by Terminal. Masters will grea assist Terminal Staff by prompt provision of ship's tank ullages o completion of loading. Normal practice is for Master to sign blan documents during loading in order to save time on departure. (Shou the Master desire, he may protect Owners interest by issuing a prote letter at time of signing blank documents. This letter can be rescinde if document figures are acceptable.)

PILOTAGE: Vessels boarded by Mooring Master either on approach o at anchorage. Mooring Masters are Licensed Masters Foreign Goin They act in an advisory capacity to Master and have expert knowledg of local conditions.

Mooring Master will pilot the vessel into the berth, supervise th mooring and unmooring, and advise Master with respect to th connecting and disconnecting submarine hose. A ship's deck offic must be on the bridge at all times while ship is manoeuvring, and dec officer must direct ship's crew in all hose handling. During loadin operations Mooring Master will act as Company's representative. shore crew of 5 persons handle ropes to and from buoys during berthin and unberthing.

The same crew connect/disconnect hoses and remain on boar throughout loading.

ANCHORAGES: Centre of the recommended anchorage area is position 090° from Flare 4.3 miles, which has good holding ground wi mud and sand bottom.

Prohibited anchorage area defined as follows: beginning at refine flare 060° 3.5 miles thence 180° 1.75 miles thence 270° 3.0 miles t refinery flare.

MAX. SIZE:

Guidance for Maximum Dimensions:

	Berth No. 1	*Berth No. 2*
LOA	800 ft.	1200 ft.††
Beam	No limit	No limit
Max. Sailing Draft	41 ft.	52 ft. (56 ft.*)
Max. d.w.t. (for full cargo) approx.	50,000†	approx. 140,000
Min. depth in berth	43.6 ft.	55.8 ft. (48.5 ft. on inshore bar)
Min. depth on exit route	43.6 ft.	53.8 ft.

*Tidal loading to 56 ft. allowed in suitable conditions.

†Larger vessels (up to 370,000 d.w.t.) are allowed for part cargo o bunkers providing other parameters are satisfied.

††Limiting parameter is maximum distance stern to manifold of 600

HEALTH: Vessels calling at Mina Saud are requested to include th following information.

(1) Name of vessel.
(2) Last port of call.
(3) Health condition of crew.
(4) Validity of Cholera Certificates.
(5) Request for Free Pratique or details or any cases or suspecte cases of infectious diseases during the last four weeks.

Free Pratique will be considered at the discretion of the Quarantin Officer and vessel must hoist the yellow flag unless informed by Age or Harbour Control that Free Pratique has been granted.

RADIO/VHF: *Communications:* Messages should either be telexe direct (Telex: 23074 Kt, Fax: 3950126) or by cable via Kuwait Radi (call sign 9KK on 500 kHz) for onward transmission to Gettymar Mi Al Zour (Mina Saud).

Kuwait Radio transmits traffic lists on 450 kHz at 25 minutes pa every even hour and on 8525 kHz and 12895 kHz at 35 minutes pa every odd hour.

VHF Service maintained by Mina Saud Marine. Listening on Channe 16 (156.8 MHz). Operating hours: Continuous 24 hours a day, 7 da per week.

Masters are requested to advise ETA 72 hours before arrival Mi Saud, and to confirm this when 48 hours and 24 hours distant from the Po

It will assist if the following information is passed to "Gettymar Mi Saud" before vessel's arrival.

Bunker fuel requirements in metric tons or U.S. bbls. at 60° F.
Cargo requirements in long tons or U.S. bbls. at 60° F.
Confirmation that only clean ballast is to be discharged and expecte deballasting time.
Confirmation that ballast and pipe-lines are clean, 2 ropes or wi and both anchors forward and 9 synthetic ropes or wires available a
Arrival draft fore and aft, expected sailing draft fore and aft.

When berthed at Mina Saud contact with the shore is maintained b VHF R/T portable units supplied by the Company.

TUGS: Two tugs are available to assist berthing and unberthing, als to stand-by for emergencies while vessels are in berth.

Tug charges of 160 KD. per tug, per hour or part thereof based up hours of actual usage when made fast or standing by ready to ass the vessel e.g. during berthing/unberthing operations. (whilst vesse in the berth and throughout deballasting/loading operations. Additio tug charges will be levied if called to assist, e.g. tug(s) called to ass vessel to remain in berth in the event of bad weather or for any oth reasons concerning safety).

READINESS: Notice of Readiness will be received by Company within terms of Charter Party or Contract when known, otherwise during ordinary business hours, which shall be between 0700 hrs. and 1800 hrs. local time except on Fridays and Public Holidays.

Laytime to commence 6 hours after time of acceptance or upon commencement of loading, whichever occurs first, except that when Notice of Readiness received before 1600 hrs. local time the 6 hours shall be continuous, but if received after 1600 hrs. then such 6 hours shall be daylight hours, daylight hours for such purpose being between 0600 and 1800 hrs. local time.

If after giving Notice of Readiness, vessel is delayed in getting into berth or in loading, such delay shall not count as used laytime unless delay shall be due to default of Company. On completion of loading, laytime shall cease upon disconnecting cargo hoses.

Should Company Mooring Master be handed a Notice of Readiness out of business hours and before commencement of loading he will note it as "Received" at that time, for acceptance by the Company at earliest recommencement of business hours, or at time of commencement of loading, whichever shall be first.

If Notice of Readiness given after latest accepted nominated lifting date, laytime shall not commence before commencement of loading.

BALLAST: Vessels must have enough clean ballast to permit safe manoeuvring under any conditions. All vessels, particularly VLCCs must retain ballast during early stages of loading and discharge ballast as necessary during latter stages of loading.

Mooring Master will advise when ballast discharge may commence. Inspection of ship's tanks for suitability to receive cargo carried out by Mooring Master or by qualified petroleum inspectors if required.

GEAR: For handling 2×10 in. strings of hoses ship's derrick should have a minimum safe working load of at least 5 tons. Outreach overside should be at least 5 ft.

2 lengths of 1 in. diameter good quality rope each of 20 fathoms in length should be available for use as slip ropes for flexible hoses.

Reducers should be available for connection of hoses to ship's manifold and to ship's bunker line connection.

Company provides snub lines of manila and wire rope for hanging off hoses.

In the event that ship's derrick gear is inadequate for loads required, a work barge can be made available. Charge for this barge, including positioning and personnel, is equivalent of 250 U.S. Dollars per hour (approx.).

BERTHING: There are 2 loading berths, each conventional multi-buoy moorings which are connected by a 20 in. submarine line for fuel or crude and a 12 in. submarine line for naphtha. Each berth has a 10 in. hose for fuel or crude and a 10 in. hose for naphtha.

Vessels taking bunkers will use fuel cargo hose before or after loading cargo. Manifolds should be prepared with 10 in. 150 ASA standard connections.

The outer berth, 073° – 2.6 miles from refinery flare, is equipped to take vessels of up to approx. 140,000 d.w.t. for full cargo. Larger vessels can be accommodated for bunkering only or part cargo. Max. draft allowed is 52 ft. In exceptional circumstances tidal loading to 56 ft. is allowed. See Appendix below.

Appendix A. Mina Saud Tidal Loading Procedure, December 1975: Assuming 1,000 ft. ship has berthed. Starboard anchor between 150 ft. and 300 ft. South of starboard anchor marker and one ship's length (1,000 ft.) inside, (Course made good 270°T). Starboard anchor ranged along bottom and port anchor let go when 11 – 12 shackles out on starboard. i.e. 1,000 ft. West of starboard (allowing for slack). Vessel would be in berth with between 8 – 10 shackles on each anchor.

When letting go at HW with ebb tide and heaving port anchor. Vessel should manage to remain in at least 16.4 m. charted depth, heading about 340°T with stern in line with, or to seaward, of manifold marker buoy.

Every effort should be made to pick up port anchor without slacking too much on starboard anchor. Ideally, last shot of port cable is dragged home whilst starboard cable is fairly tight, so that when port anchor is aweigh vessel swings to starboard and presents her port side to the ebb, thus regaining a mid berth position. (Sometimes necessary to put engines ahead in order to clear manifold marker hose buoys).

Pilot should endeavour to have vessel heading North when starboard anchor is aweigh. Vessel should then steam North or slightly West of North in order to maintain a distance of approx. 1,000 ft. from starboard anchor marker buoy. Vessel should start turn to starboard (bearing in mind ebb tide) when abeam of starboard anchor marker buoy, and endeavour to turn on radius of about 1,000 ft. with starboard anchor marker buoy at centre. A course of 066°T should be made good until deep water is reached. If this procedure is followed, the minimum depth should be not less than 16.4 m. (chart datum).

Note: 16.4 m. exists in berth and on exit channel. Close attention must be paid to vessel's position, as depths of less than 16 m. are in close proximity to exit channel.

Vessel should finish loading cargo or bunkers at least 3 hours before HW thus ensuring maximum height of tide for bottom clearance plus ebbing tide for easier control. (Ebb tide usually commences 2 hours before HW). See "Tides".

16.4 m. must be reckoned governing depth.

Calculate thus: 16.4 + height of tide then subtract 1 m. Result will be max. allowable draft (only if weather conditions are ideal).

eg.

16.4 m.
+ 1.8 m. height of tide
____
18.2 m.
− 1.0 m. clearance
____
17.2 m. allowable draft (56 ft. 5 in.)

It must be borne in mind that mentioned clearances are the absolute minimum that can be tolerated in ideal conditions.

Seismic survey indicates feasibility of dredging or burying pipe-lines should it ever be necessary and also indicates good anchor holding power potential throughout area. *End of appendix.*

The inner berth, 073° – 2.0 miles from refinery flare, has a minimum depth of 44 ft. at LLW and can accommodate vessels up to 800 ft. in length. Max. draft allowed is 41 ft.

MOORING: *(a)* Port is an open roadstead and ships must be prepared to use main engines, unmoor and leave at any time.

(b) Mooring and unmooring carried out during day or night, as required. Except mooring at Berth No. 1, during daylight only.

(c) Vessels moored to ebb tide stream at both inner and outer berths. Resilience in mooring achieved by weight of clump anchor and catenary of chain cable. Remotely operated quick release hooks connect ship's ropes to the buoy. (At outer berth (No. 2) only.)

(d) Both port and starboard anchors should be lowered clear of hawse pipes and ready for instant letting-go from brakes.

Spar buoys established to mark starboard and port anchor dropping positions.

(e) 9 good quality synthetic ropes (or wires for VLCCs) should be flaked ready for running from the stern. After anchoring, as vessel proceeds astern in berth, quarter lines are run by Company launch and secured to quick release hooks on quarter buoys. 2 Lines are then run to No. 5 buoy on the Port Bow.

(f) When securely moored in correct position for handling hoses, each anchor should have about 8 shackles out and it is advisable that tankers using these submarine berths be provided with not less than 10×15 fathom lengths of cable on each anchor.

(g) Masters are requested to ensure that power to deck machinery and sufficient seamen to operate it are immediately available at all times when in berth.

LOADING: Submarine line marked by permanent red coloured buoy at each berth, and marker buoys fitted to all hoses.

Recovery of flexible hoses is by fleeting with ship's tackle making use of beckets fitted to recovery chain.

"Ship's Stop" is invariable rule except in an emergency. Ship must give reasonable stand-by time to Mooring Master, 15 to 20 minutes, to alert Terminal staff on shore for closing valves.

Loading rate at present averages 1,500 t.p.h. (Max. 2,000 t.p.h.)

MEDICAL: In emergency only. For normal cases, Agent arranges visit to Port Health Doctor.

FRESH WATER: Not available.

FUEL: Bunker fuel (Max. 1500 secs Redwood No. 1 equivalent to 180 Cst.) at loading berths through 12 in. submarine line with single 10 in. flexible hose, at Berth No. 1, and 10 in. hose at Berth No. 2.

FIRE PRECAUTIONS: Masters are responsible for enforcing "No Smoking" regulations for their vessels and Mooring Master will stop loading if he considers them to be inadequate or if they are not being obeyed. Smoking in Company craft in the berths is forbidden.

CONSULS: See "Kuwait."

REPAIRS: Repair facilities are available. Fully qualified divers are available from Terminal. Underwater cutting gear, welding equipment and a full range of underwater tools are available.

Services of divers and equipment are available at rates to be arranged for the job and agreed by Superintendent of Marine and Terminal Operations, Mina Saud.

Repairs to main engines must not be carried out in the berth without permission of Superintendent of Marine and Terminal Operations. Normally vessels requiring to immobilise engines will be anchored well clear of other ships.

CUSTOMS: Alcoholic beverages strictly prohibited to be held out of bond.

It is important to remind Owners and Masters that all goods, either landed or embarked, must be cleared by Agent through local Kuwait Government Customs.

Import of firearms and ammunition forbidden.

REPATRIATION: Crew changes normally effected through Kuwait.

Also see "Visa Regulations" in "General" before first port.

TIME: GMT plus 3 hours. Permanent.

WEATHER: In Summer months of June, July and August light to moderate Northerly and North-westerly winds are general rule at Mina Saud. Occasional strong N.W. winds of Gale force. Strength and duration governed by strength of S.W. monsoon blowing outside the Gulf.

During Autumn and early Winter months fine weather is generally experienced associated with moderate N.E. monsoon prevailing outside the Gulf. Occasional 'Shamals' (N.W. winds) occur.

In late Winter period and Spring, strong S.E. winds with moderately heavy seas frequently experienced at Mina Saud. These are due to approach of low pressure systems from Atlantic and Mediterranean Sea spreading Eastwards across Levant and Iraq. Extremely violent local storms sometimes occur without warning especially at change of seasons. These disturbances sometimes attain hurricane force and are accompanied by erratic changes in wind direction and poor visibility due to suspended sand.

TIDES: Tide cycle is combination of diurnal and semi-diurnal tides giving a Higher High, Lower High, Higher Low and Lower Low Waters during a 24 hour period. Range of tide is average 7.5 ft. at Springs and 5 ft. at Neaps.

Commencement of ebb stream (direction 190°) after HW may be taken as 2 hours before predicted time of HW at Mina Saud published in Admiralty Tide Tables.

Main direction of flood and ebb streams are 010° and 190° respectively. Direction is extremely variable between LHW and HLW period. Average direction during this period about 045°.

Tide heights are affected by meteorological conditions and could vary by more than 3 ft. from predicted heights in extreme circumstances. Times of high and low water may also be considerably affected.

The Mooring Masters have access to information from the Marine Meteorological Station at Mina Saud.

SHORE LEAVE: Ship's personnel and passengers not permitted ashore for any purpose whatsoever until pratique granted. All shore leave is contingent upon compliance with quarantine regulations and, under limited conditions and hours, shore leave may be granted. Masters should consult Agents to obtain the necessary passes.

REGULATIONS:

(a) Local Laws: The laws of Kuwait are in force at the Port of Mina Al-Ahmadi. Masters and crew members are advised for their own protection to abide by them. Comprehensive regulations governing the use of the port are promulgated in Law No. 21 of 1961. Masters of visiting vessels should acquaint themselves with this law.

(b) Pollution: The State of Kuwait has stringent laws in force concerning the pollution of the sea by oil. For information, the following are two paragraphs of this law:

Para 1, Art. 4: "A person responsible for any pollution as described in Articles 1 and 2 shall be punished by a fine of not less than 1,500 and not more than 40,000 Kuwaiti Dinars. In the event of his committing a similar crime within a period of one year from the date of his conviction such a person shall be fined not less than 3,000 and not more than 40,000 Kuwaiti Dinars, and in the event of his committing yet another crime within a year from the date of this last conviction he shall be punished by a fine of not less than 6,000 but not exceeding 40,000 Kuwaiti Dinars.

Para 3, Art. 6: The person responsible for pollution may suspend detention order against the ship on payment, as a cash guarantee, of 40,000 Kuwaiti Dinars to the official entrusted with the execution of such order".

(c) Certificates: All vessels must comply with International Safety Regulations and ensure that ship's certificates, i.e. Safety Radio, Safety Equipment and Load Line are valid. Facilities are available for renewal or extension providing proper notice is given. At least 48 hours should be allowed *excluding* Thursdays, Fridays or other local holidays.

(d) Load Line Regulations are strictly enforced, vessels overloaded will not be allowed to sail and subject to lengthy delay awaiting suitable facilities for pumping ashore. No facilities for pumping cargo ashcre from Sea Island and S.P.M. are available.

(e) A Cargo Discharge Certificate for cargo loaded from Kuwait each voyage is to be presented to the Customs and Ports in Kuwait through the Agents within 4 months from sailing and these certificates are to be signed and stamped by local Customs officials and authenticated by an Arab Embassy or Consulate in the country of discharge.

PORT TAX: Introduced by the State of Kuwait at the rate of 45.25 fils (KD. 0.4525) calculated on ship's g.r.t. and outward clearance is subject to payment of their dues before departure.

Declaration of g.r.t. and n.r.t. details essential to avoid overcharge.

AUTHORITY: Kuwait Oil Company (K.S.C.), P.O.Box 9758, Ahmadi-61008, Kuwait. *Tel:* Kuwait 3261558, 3262268. *Telex:* 44233 KT, 44293 KT. *Cables:* Kuoco Kuwait. *FAX:* 3262265. *Contact:* Captain A.M. Salem, General Superintendent, Marine and Export Operations Department.

AGENT: For all tankers loading/discharging or sundry errands on a sole agency basis. Address: Kuwait Oil Tanker S.A.K. (Agency Branch), P.O. Box Fahaheel No. 7055, Kuwait. Telex: 4201, 4202. A/B Minatank Kwt. Tel. 911753/5; 911758/9; 911811. Cables: "Minatank Kuwait".

KOTC Agency is also connected with direct short range telephone VHF system and continuous watch is maintained on Channel 16. Working channels are and can be reached by calling "Minatank". Channel 16, calling only. Channel 26, Agency Working. Channel 27, Agency Working.

MINA SAUD (Mina Al Zoor): 28.45 N. 48.24 E.

(See Plan)

OPERATORS: Mina Saud Marine Terminal operated by Getty Oil Company, a subsidiary of Texaco. (hereinafter referred to as the Company). Weather and other circumstances permitting, ships will be loaded, moored and unmoored at all hours of the day, 7 days a week. Company representatives available at all times to discuss with Master any problems affecting vessel turnaround.

LOCATION: Mina Saud located just South of Ras Az Zaur approximately 23 miles 244° from Madira Light Vessel. Terminal connected to field and production centre at Wafra, 31 miles to N.W., by 16 in., and 10 in. oil pipe-lines, and 8 in. gas line.

The most conspicuous object at the terminal is the refinery flare, in position Lat. 28° 44′ 13″ N., Long. 48° 23′ 19″ E. Other objects conspicuous to the navigator: Ras Al Zour Beacon: Lat. 28° 44′ 48″ N., Long. 48° 24′ 16″ E. A 35 ft. high frame exhibiting 1 flash every 5 secs.

A conspicuous power station/desalination plant close South of the terminal with two chimneys 192 m. high in position Lat. 28° 42′ 21″ N., Long. 48° 22′ 30″ E.

FLAG: All vessels required to fly Kuwait flag at foremast during daylight hours. Flags may be obtained from Agents.

APPROACHES: Vessels on passage direct to Mina Saud up Gulf should pass about 1 mile South of Madira Reef Light Vessel, thence make good a course of 242° to an anchorage off Mina Saud in 17 m.

DOCUMENTS:

Ship's Manifest.
Bill of Health.
Crew List.
Clearance from Last Port.
Passengers Manifest, if any.
Stores List.
Bonded Stores List.

Agents are responsible for presentation of Oil Discharging Certificates to Customs Authorities as guaranteed by them. All cargo discharge certificates duly attested by Arab Consulate to be sent to the Agents directly.

Cargo documentation carried out by Terminal. Masters will greatly assist Terminal Staff by prompt provision of ship's tank ullages on completion of loading. Normal practice is for Master to sign blank documents during loading in order to save time on departure. (Should the Master desire, he may protect Owners interest by issuing a protest letter at time of signing blank documents. This letter can be rescinded if document figures are acceptable.)

PILOTAGE: Vessels boarded by Mooring Master either on approach or at anchorage. Mooring Masters are Licensed Masters Foreign Going. They act in an advisory capacity to Master and have expert knowledge of local conditions.

Mooring Master will pilot the vessel into the berth, supervise the mooring and unmooring, and advise Master with respect to the connecting and disconnecting submarine hose. A ship's deck officer must be on the bridge at all times while ship is manoeuvring, and deck officer must direct ship's crew in all hose handling. During loading operations Mooring Master will act as Company's representative. A shore crew of 5 persons handle ropes to and from buoys during berthing and unberthing.

The same crew connect/disconnect hoses and remain on board throughout loading.

ANCHORAGES: Centre of the recommended anchorage area is in position 090° from Flare 4.3 miles, which has good holding ground with mud and sand bottom.

Prohibited anchorage area defined as follows: beginning at refinery flare 060° 3.5 miles thence 180° 1.75 miles thence 270° 3.0 miles to refinery flare.

MAX. SIZE:

Guidance for Maximum Dimensions:

	Berth No. 1	*Berth No. 2*
LOA	800 ft.	1200 ft.††
Beam	No limit	No limit
Max. Sailing Draft	41 ft.	52 ft. (56 ft.*)
Max. d.w.t. (for full cargo) approx.	50,000†	approx. 140,000†
Min. depth in berth	43.6 ft.	55.8 ft. (48.5 ft. on inshore bar)
Min. depth on exit route	43.6 ft.	53.8 ft.

*Tidal loading to 56 ft. allowed in suitable conditions.

†Larger vessels (up to 370,000 d.w.t.) are allowed for part cargo or bunkers providing other parameters are satisfied.

††Limiting parameter is maximum distance stern to manifold of 600 ft.

HEALTH: Vessels calling at Mina Saud are requested to include the following information.

(1) Name of vessel.
(2) Last port of call.
(3) Health condition of crew.
(4) Validity of Cholera Certificates.
(5) Request for Free Pratique or details or any cases or suspected cases of infectious diseases during the last four weeks.

Free Pratique will be considered at the discretion of the Quarantine Officer and vessel must hoist the yellow flag unless informed by Agents or Harbour Control that Free Pratique has been granted.

RADIO/VHF: *Communications:* Messages should either be telexed direct (Telex: 23074 Kt, Fax: 3950126) or by cable via Kuwait Radio (call sign 9KK on 500 kHz) for onward transmission to Gettymar Mina Al Zour (Mina Saud).

Kuwait Radio transmits traffic lists on 450 kHz at 25 minutes past every even hour and on 8525 kHz and 12895 kHz at 35 minutes past every odd hour.

VHF Service maintained by Mina Saud Marine. Listening on Channel 16 (156.8 MHz). Operating hours: Continuous 24 hours a day, 7 days per week.

Masters are requested to advise ETA 72 hours before arrival Mina Saud, and to confirm this when 48 hours and 24 hours distant from the Port.

It will assist if the following information is passed to "Gettymar Mina Saud" before vessel's arrival.

Bunker fuel requirements in metric tons or U.S. bbls. at 60° F.
Cargo requirements in long tons or U.S. bbls. at 60° F.
Confirmation that only clean ballast is to be discharged and expected deballasting time.
Confirmation that ballast and pipe-lines are clean, 2 ropes or wires and both anchors forward and 9 synthetic ropes or wires available aft.
Arrival draft fore and aft, expected sailing draft fore and aft.

When berthed at Mina Saud contact with the shore is maintained by VHF R/T portable units supplied by the Company.

TUGS: Two tugs are available to assist berthing and unberthing, also to stand-by for emergencies while vessels are in berth.

Tug charges of 160 KD. per tug, per hour or part thereof based upon hours of actual usage when made fast or standing by ready to assist the vessel e.g. during berthing/unberthing operations. (whilst vessel is in the berth and throughout deballasting/loading operations. Additional tug charges will be levied if called to assist, e.g. tug(s) called to assist vessel to remain in berth in the event of bad weather or for any other reasons concerning safety).

EADINESS: Notice of Readiness will be received by Company within rms of Charter Party or Contract when known, otherwise during rdinary business hours, which shall be between 0700 hrs. and 1800 hrs. cal time except on Fridays and Public Holidays.

Laytime to commence 6 hours after time of acceptance or upon mmencement of loading, whichever occurs first, except that when otice of Readiness received before 1600 hrs. local time the 6 hours hall be continuous, but if received after 1600 hrs. then such 6 hours hall be daylight hours, daylight hours for such purpose being between 600 and 1800 hrs. local time.

If after giving Notice of Readiness, vessel is delayed in getting into erth or in loading, such delay shall not count as used laytime unless elay shall be due to default of Company. On completion of loading, ytime shall cease upon disconnecting cargo hoses.

Should Company Mooring Master be handed a Notice of Readiness ut of business hours and before commencement of loading he will note as "Received" at that time, for acceptance by the Company at earliest commencement of business hours, or at time of commencement of ading, whichever shall be first.

If Notice of Readiness given after latest accepted nominated lifting ate, laytime shall not commence before commencement of loading.

ALLAST: Vessels must have enough clean ballast to permit safe anoeuvring under any conditions. All vessels, particularly VLCCs must etain ballast during early stages of loading and discharge ballast as ecessary during latter stages of loading.

Mooring Master will advise when ballast discharge may commence. nspection of ship's tanks for suitability to receive cargo carried out by Mooring Master or by qualified petroleum inspectors if required.

EAR: For handling 2×10 in. strings of hoses ship's derrick should ave a minimum safe working load of at least 5 tons. Outreach overside hould be at least 5 ft.

2 lengths of 1 in. diameter good quality rope each of 20 fathoms in ength should be available for use as slip ropes for flexible hoses.

Reducers should be available for connection of hoses to ship's anifold and to ship's bunker line connection.

Company provides snub lines of manila and wire rope for hanging off oses.

In the event that ship's derrick gear is inadequate for loads required, work barge can be made available. Charge for this barge, including ositioning and personnel, is equivalent of 250 U.S. Dollars per hour pprox.).

ERTHING: There are 2 loading berths, each conventional multi-buoy oorings which are connected by a 20 in. submarine line for fuel or rude and a 12 in. submarine line for naphtha. Each berth has a 10 in. ose for fuel or crude and a 10 in. hose for naphtha.

Vessels taking bunkers will use fuel cargo hose before or after loading argo. Manifolds should be prepared with 10 in. 150 ASA standard onnections.

The outer berth, 073° – 2.6 miles from refinery flare, is equipped to ake vessels of up to approx. 140,000 d.w.t. for full cargo. Larger vessels an be accommodated for bunkering only or part cargo. Max. draft llowed is 52 ft. In exceptional circumstances tidal loading to 56 ft. is llowed. See Appendix below.

ppendix A. Mina Saud Tidal Loading Procedure, December 1975: ssuming 1,000 ft. ship has berthed. Starboard anchor between 150 ft. nd 300 ft. South of starboard anchor marker and one ship's length 1,000 ft.) inside, (Course made good 270°T). Starboard anchor ranged long bottom and port anchor let go when 11 – 12 shackles out on tarboard. i.e. 1,000 ft. West of starboard (allowing for slack). Vessel ould be in berth with between 8 – 10 shackles on each anchor.

When letting go at HW with ebb tide and heaving port anchor. Vessel hould manage to remain in at least 16.4 m. charted depth, heading bout 340°T with stern in line with, or to seaward, of manifold marker uoy.

Every effort should be made to pick up port anchor without slacking o much on starboard anchor. Ideally, last shot of port cable is dragged ome whilst starboard cable is fairly tight, so that when port anchor is weigh vessel swings to starboard and presents her port side to the bb, thus regaining a mid berth position. (Sometimes necessary to put ngines ahead in order to clear manifold marker hose buoys).

Pilot should endeavour to have vessel heading North when starboard nchor is aweigh. Vessel should then steam North or slightly West of orth in order to maintain a distance of approx. 1,000 ft. from starboard nchor marker buoy. Vessel should start turn to starboard (bearing in ind ebb tide) when abeam of starboard anchor marker buoy, and ndeavour to turn on radius of about 1,000 ft. with starboard anchor arker buoy at centre. A course of 066°T should be made good until eep water is reached. If this procedure is followed, the minimum depth hould be not less than 16.4 m. (chart datum).

ote: 16.4 m. exists in berth and on exit channel. Close attention must e paid to vessel's position, as depths of less than 16 m. are in close roximity to exit channel.

Vessel should finish loading cargo or bunkers at least 3 hours before W thus ensuring maximum height of tide for bottom clearance plus bbing tide for easier control. (Ebb tide usually commences 2 hours efore HW). See "Tides".

16.4 m. must be reckoned governing depth.

Calculate thus: 16.4 + height of tide then subtract 1 m. Result will be ax. allowable draft (only if weather conditions are ideal).

g.

16.4 m.
+ 1.8 m. height of tide

18.2 m.
– 1.0 m. clearance

17.2 m. allowable draft (56 ft. 5 in.)

It must be borne in mind that mentioned clearances are the absolute inimum that can be tolerated in ideal conditions.

Seismic survey indicates feasibility of dredging or burying pipe-lines should it ever be necessary and also indicates good anchor holding power potential throughout area. *End of appendix.*

The inner berth, 073° – 2.0 miles from refinery flare, has a minimum depth of 44 ft. at LLW and can accommodate vessels up to 800 ft. in length. Max. draft allowed is 41 ft.

MOORING: *(a)* Port is an open roadstead and ships must be prepared to use main engines, unmoor and leave at any time.

(b) Mooring and unmooring carried out during day or night, as required. Except mooring at Berth No. 1, during daylight only.

(c) Vessels moored to ebb tide stream at both inner and outer berths.

Resilience in mooring achieved by weight of clump anchor and catenary of chain cable. Remotely operated quick release hooks connect ship's ropes to the buoy. (At outer berth (No. 2) only.)

(d) Both port and starboard anchors should be lowered clear of hawse pipes and ready for instant letting-go from brakes.

Spar buoys established to mark starboard and port anchor dropping positions.

(e) 9 good quality synthetic ropes (or wires for VLCCs) should be flaked ready for running from the stern. After anchoring, as vessel proceeds astern in berth, quarter lines are run by Company launch and secured to quick release hooks on quarter buoys. 2 Lines are then run to No. 5 buoy on the Port Bow.

(f) When securely moored in correct position for handling hoses, each anchor should have about 8 shackles out and it is advisable that tankers using these submarine berths be provided with not less than 10×15 fathom lengths of cable on each anchor.

(g) Masters are requested to ensure that power to deck machinery and sufficient seamen to operate it are immediately available at all times when in berth.

LOADING: Submarine line marked by permanent red coloured buoy at each berth, and marker buoys fitted to all hoses.

Recovery of flexible hoses is by fleeting with ship's tackle making use of beckets fitted to recovery chain.

"Ship's Stop" is invariable rule except in an emergency. Ship must give reasonable stand-by time to Mooring Master, 15 to 20 minutes, to alert Terminal staff on shore for closing valves.

Loading rate at present averages 1,500 t.p.h. (Max. 2,000 t.p.h.)

MEDICAL: In emergency only. For normal cases, Agent arranges visit to Port Health Doctor.

FRESH WATER: Not available.

FUEL: Bunker fuel (Max. 1500 secs Redwood No. 1 equivalent to 180 Cst.) at loading berths through 12 in. submarine line with single 10 in. flexible hose, at Berth No. 1, and 10 in. hose at Berth No. 2.

FIRE PRECAUTIONS: Masters are responsible for enforcing "No Smoking" regulations for their vessels and Mooring Master will stop loading if he considers them to be inadequate or if they are not being obeyed. Smoking in Company craft in the berths is forbidden.

CONSULS: See "Kuwait."

REPAIRS: Repair facilities are available. Fully qualified divers are available from Terminal. Underwater cutting gear, welding equipment and a full range of underwater tools are available.

Services of divers and equipment are available at rates to be arranged for the job and agreed by Superintendent of Marine and Terminal Operations, Mina Saud.

Repairs to main engines must not be carried out in the berth without permission of Superintendent of Marine and Terminal Operations. Normally vessels requiring to immobilise engines will be anchored well clear of other ships.

CUSTOMS: Alcoholic beverages strictly prohibited to be held out of bond.

It is important to remind Owners and Masters that all goods, either landed or embarked, must be cleared by Agent through local Kuwait Government Customs.

Import of firearms and ammunition forbidden.

REPATRIATION: Crew changes normally effected through Kuwait.

Also see "Visa Regulations" in "General" before first port.

TIME: GMT plus 3 hours. Permanent.

WEATHER: In Summer months of June, July and August light to moderate Northerly and North-westerly winds are general rule at Mina Saud. Occasional strong N.W. winds of Gale force. Strength and duration governed by strength of S.W. monsoon blowing outside the Gulf.

During Autumn and early Winter months fine weather is generally experienced associated with moderate N.E. monsoon prevailing outside the Gulf. Occasional 'Shamals' (N.W. winds) occur.

In late Winter period and Spring, strong S.E. winds with moderately heavy seas frequently experienced at Mina Saud. These are due to approach of low pressure systems from Atlantic and Mediterranean Sea spreading Eastwards across Levant and Iraq. Extremely violent local storms sometimes occur without warning especially at change of seasons. These disturbances sometimes attain hurricane force and are accompanied by erratic changes in wind direction and poor visibility due to suspended sand.

TIDES: Tide cycle is combination of diurnal and semi-diurnal tides giving a Higher High, Lower High, Higher Low and Lower Low Waters during a 24 hour period. Range of tide is average 7.5 ft. at Springs and 5 ft. at Neaps.

Commencement of ebb stream (direction 190°) after HW may be taken as 2 hours before predicted time of HW at Mina Saud published in Admiralty Tide Tables.

Main direction of flood and ebb streams are 010° and 190° respectively. Direction is extremely variable between LHW and HLW period. Average direction during this period about 045°.

Tide heights are affected by meteorological conditions and could vary by more than 3 ft. from predicted heights in extreme circumstances. Times of high and low water may also be considerably affected.

The Mooring Masters have access to information from the Marine Meteorological Station at Mina Saud.

STORES: Provisions and stores are available from Kuwait. Requirements should be arranged with Agents through Kuwait Radio prior to arrival at Mina Saud.

SHORE LEAVE: Can be arranged through Agent.

AUTHORITY: Getty Oil Company, P.O.Box 6, Mina Al Zour (Mina Saud), Zone Code 66051, Kuwait. *Tel:* 3950444 (ext. 339) or 3950221 or 3950096. *Telex:* 23074 Kt. *FAX:* 3950126. *Cables:* Gettymar. *Contact:* Captain Hadi M. Al-Abbas, Marine Superintendent.

AGENT: See "Shuwaikh".

SHUAIBA: 29.02 N. 48.10 E. (See Plan)

PORT LIMITS: From a point on the coastline in position:

(a) 29° 03′ 09.7″ N., 48° 09′ 04.6″ E. in direction 090° to
(b) 29° 03′ 09.7″ N., 48° 09′ 27.58″ E. thence 116° to
(c) 29° 02′ 45″ N., 48° 10′ 24.6″ E. thence 090° to
(d) 29° 02′ 45″ N., 48° 15′ 09″ E. thence 180° to
(e) 29° 02′ 00″ N., 48° 15′ 09″ E. thence 270° to
(f) 29° 02′ 00″ N., 48° 10′ 16.8″ E. thence 180° to
(g) 29° 01′ 15″ N., 48° 10′ 16.8″ E. thence 270° to a point on the coastline at
(h) 29° 01′ 15″ N., 48° 09′ 29.4″ E.

The above limits are shown on Admiralty Chart No. 1223, and the coordinates of the first two points are amended according to last agreement with KOC in May 1983.

Ships whilst in port limits during daylight hours shall fly their national flag at the after part of the ship and where a ship is of foreign registry also the Kuwait National Flag at the fore.

DOCUMENTS:

Manifest: 15 copies which should clearly indicate weights in metric tons and measurements in cubic metres and each copy should be duly signed and stamped by the loading port Agent.

The copies of the manifest may be photostat copies or carbon copies but it is imperative that the stamp and signature made by the loading port Agent is appearing in original on each copy.

If cargo is carried in-transit a separate Transit Cargo Manifest (15 copies) is also required in same fashion as above.

Bills of Lading: 5 sets of non-negotiable copies Bills of Lading, i.e. ordinary carbon copies of Bills of Lading. Photostat copies will not be accepted.

In addition the following documents are to be provided:

4 copies of Final Stowage Plan, duly signed and stamped on each copy by the loading port Agent. Photostat copies are accepted as long as same are signed and stamped.

4 copies of Hatch List as above.

If dangerous cargo is being carried 2 copies of a separate Dangerous Cargo List are also required and again each copy to be duly signed and stamped by the loading port Agent.

Also 2 copies of Crew List to be presented to Customs Office.

N.B. Since all cargo for discharging at Port of Shuaiba has to go on direct delivery, and Customs clearance has to be completed prior to berthing of a vessel, it is therefore imperative that all documents, as above, are in Agent's hands for submission to relative authorities at least 7 working days prior to vessel's ETA, otherwise berthing of vessel is likely to be delayed.

Certificates: All usual documents such as:

Ship's Manifest.
Crew List.
Clearance from Last Port.
Passenger Manifest.
Stores List.
Bonded Stores List.
SOLAS Certificates.
Bill of Measurements, etc.

PILOTAGE: Pilotage is compulsory and requests for Pilots may be made to Shuaiba Port Communications Centre (call sign "Shuaiba Port"). The Port Communications Centre is equipped with VHF Channels 16, 9 and 13. Shuaiba Port Pilots Telex No.: 44235KT PORTS. HF 2,182 kHz., Fax: 3262943. All working around the clock.

ANCHORAGES: Ships bound for Shuaiba Port, with cargo to load or discharge, or intending to use facilities supplied in the port such as bunkering, will be permitted to use Shuaiba Port Anchorage between Lat. 29° 02.75′ N. and Lat. 29° 02.00′ N. and between Long. 48° 15.11′ E. and Long. 48° 12.72′ E. Ships are not permitted to anchor to the West of Long. 48° 12.72′ E.

All other ships not falling in the categories listed in the first paragraph, such as vessels waiting for orders or which have not been nominated for bunkers, are not permitted to anchor in the Shuaiba Port Anchorage and must anchor well to the East of Long. 48° 15.11′ E.

RESTRICTIONS: Ships whilst in port limits during daylight hours shall fly their national flag at the aft part of the ship and where a ship is of foreign registry also the Kuwait National Flag on the main mast at the fore.

Vessels exceeding 200 m. in length, 32 m. beam and 12 m. draft are subject to the Port Authority approval.

MAX. SIZE:

Dry Cargo Berth No.	*Max. Draft Permitted* (m.)	*Length of Quay Wall* (m.)	*Max. LOA* (m.)
1	9.5	160	200
2	9.5	160	200
3	9.5	200	180
4	6.5	175	180
5	6.0	210	170
6	10.5	257	180
7	10.0	200	180
8	10.0	200	180
9	12.0	200	180
10	12.0	200	180
11	12.0	200	180
12	12.0	200	180
13	12.0	200	180
14	12.0	232	180
15	12.0	240	Subject to berth occupancy
16	12.0	210	
17	12.0	200	
18	12.0	230	
19	12.0	225	200
20	12.0	225	200

The seaward side Berths No. 4, 5, 6, 7 and 8 are occasionally affected by bad weather.

Agents of vessels with dimensions in excess of the above must make due representation to the Port Authority for permission for these vessels to be accepted and ample notice is necessary when submitting such requests.

HEALTH: Vessels calling at Shuaiba are requested to send the following information to "Health Shuaiba Port".

(1) Name of vessel.
(2) Last port of call.
(3) Health condition of crew.
(4) Validity of Cholera Certificates.
(5) Request for Free Pratique.

Free Pratique will be considered at the discretion of the Quarantine Officer, and vessels must hoist the yellow flag unless they are informed by Shuaiba Port Communications Centre that Free Pratique has been granted.

RADIO: All vessels calling at Shuaiba Port are required to submit an initial ETA 72 hours and 36 hours prior to arrival followed by a firm ETA 12 hours before arrival. ETAs should be passed through Kuwait Radio (9KK) either to the ship's Agent or to the Harbour Master, Shuaiba.

Vessels equipped with VHF should contact Shuaiba Port Communications Centre when within range.

ETAs should contain details of arrival draft, LOA and beam.

TUGS: Tugs of 4,200 h.p. are available. The use of tugs is compulsory.

BERTHING:

Southern Quay Mole: Berths No. 1 to 5.

The Western side of the mole consists of three berths, Nos. 1, 2 and 3, with a total berthage of 500 m., whilst the Eastern side consists of two berths, Nos. 4 and 5 with total berthage of 350 m.

There are 2 storage sheds but all cargo is direct delivery.

An overhead conveyor belt system exists at Berths No. 1 and 2 for loading bulk urea.

Northern Quay Mole: Berths No. 6 to 20.

Berths No. 6, 7 and 8, which are on the seaward side of the breakwater, have a max. allowable draft of 9.5 m. – 10.5 m. (See "Max. Size") and are restricted to good weather. Berths No. 9 to 14 have a max. allowable draft of 12.0 m. Berths No. 15 – 20 have a max. allowable draft of 12.0 m. Berths No. 12 to 14 are equipped with 4 quayside cranes with max. capacity of 15 tons.

Total berthage of the Northern Quay Mole is 3,220 m.

Conveyor facility is available at Berths No. 6 and 14 to load Sulphur and Petcoke respectively.

Barge and Small Craft Harbour: Situated S.W. of the Southern Quay Mole. The Small Craft Harbour comprising 3 berths accommodating vessels of less than 4 m. draft.

Berth No. 1	Length 100 m.
Berth No. 2	Length 200 m.
Berth No. 3	Length 175 m.

The Barge Harbour which is more spacious than the Small Craft Harbour has a water depth of 5.5 m. and includes the following berths

Berth No. 1	Length 211 m.
Berth No. 2	Length 157 m.
Berth No. 3	Length 287 m.
Berth No. 4	Length 250 m.

CONTAINER FACILITIES: A multi-user modern container terminal (S.A.C.T.) occupies Berths No. 15, 16, 17 and 18 with a total length of 880 m. and a total storage area of 31 hectares, equipped with 4×41 tonnes gantry cranes, straddle carriers, heavy duty forklifts, tractors and trailers. Both LCL and Reefer service available.

Storage: There are 2 cargo sheds, but all cargo is being taken direct delivery.

STEVEDORES: Stevedores shall be nominated by Owner or Agent from a list of stevedores registered by the port for cargo handling operations. A common tariff published by the port applies.

Vessels will be required to maintain a minimum daily tonnage dependent on the type of cargo they are carrying.

Permission for the landing of heavy lifts on the quays must be obtained from the Port Management each time in advance.

MEDICAL: There is a medical centre ashore which provides a very efficient service for vaccinations. Advance notice required if medical attendance needed on board.

REPAIRS: Small repairs can be arranged if sufficient notice is given.

DRY DOCK: No arrangements at Shuaiba Port. Drydocking facilities available with Kuwait Shipbuilding and Repairyard Co., Kuwait Telex: 24438KT A/B DOCKYARD. Tel: 4835488.

TANKERS: *Petroleum Products Pier:* Operated by KNPC. Located to the East of the Southern Quay Mole and consisting of 4 berths for the accommodation of tankers. Berths No. 1 and 3 comprise the Eastern berths whilst Berths No. 2 and 4 are located on the Western side.

Berth No. 1	Length 350 m., draft 13.71 m.
Berth No. 2	Length 369 m., draft 12.19 m.
Berth No. 3	Length 369 m., draft 13.71 m.
Berth No. 4	Length 331 m., draft 12.12 m.

The above lengths are inclusive of mooring dolphins positioned Northward and Southward of the pier. Because of draft restrictions at Berths No. 2 and 4, tankers in excess of 230 m. in length will be subjected to the Port Authority's acceptance. Each berth is supplied with 2×20 in. fuel lines and 5×16 in. supply lines for naphtha, avtur and gas oil. All lines reduce to 12 in. at the loading arms. Additionally at Berth No. 2 there are lines for discharging lubricating oil and for loading liquid ammonia (See "Shipmaster's Report"). An 8 in. line for slops is available. Each berth at the Petroleum Products Pier is equipped to provide bunkers by means of 2×20 in. lines for fuel oil and marine diesel oil whilst light fuel oil is supplied by an 8 in. line.

DENSITY: 1028.

FRESH WATER: Available at all berths except Berths No. 6, 7 and 8.

FUEL: The Kuwait National Petroleum Co. KSC, Kuwait, supply marine fuel and diesel oil at cargo wharves at Shuaiba by means of small tankers and Bunker Barges, under the following specifications.

BFO – 380 CST
BFO – 180 CST
MGO –

Bunker nominations may be arranged through Kuwait National Petroleum Co., Telex No. 44874KT PETCORP, 44875KT PETCORP, and Tel: 2455455, extension bunker sales.

At least one week's notice required. MGO can only be supplied by small bunker barges to the vessels alongside commercial jetty and at anchorage.

CONSULS: Most countries represented.

SURVEYORS: Lloyd's, ABS and others are represented in Kuwait.

GANGWAY/DECK WATCHMEN: Watch to be maintained by ship's crew.

CUSTOMS ALLOWANCES: Tobacco, no restrictions. Wine and/or Spirit, alcoholic beverage strictly prohibited to be held out of bond.

REPATRIATION: Can be arranged.

Also see "Visa Regulations" in "General" before first port.

AIRPORT: 35 km. to Kuwait International Airport.

TIME: GMT plus 3 hours.

HOLIDAYS: Every Friday, New Year's Day (1st January), Kuwait National Day (25th February).

The following Islamic holidays are celebrated but dates are subject to alteration: Prophet's Birthday, Prophet's Ascension, Eid Al Fitr, Eid Al Adha and 1st Muharram.

POLICE/AMBULANCE/FIRE: Port Security Police, Ambulance and Fire Department assistance available upon request.

TELEPHONES: There are presently no facilities for shipboard telephones but it is programmed to provide telephones for the use of ships in the future.

SPECIAL SERVICES: The services of Classification Society Surveyors, Tank Cleaning Operators, Compass Adjusters, Divers and Underwater Cleaning and D/F Calibration Adjusters are available in the area.

BANKS: Almost all the commercial banks in Kuwait have their branches at Shuaiba Industrial Area.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Passport or Seamen's Book necessary.

PORT REGULATIONS: The following are excerpts of some of the more important port regulations:

Fire fighting appliances to be kept in readiness for immediate use.

Pumping or discharging in any way into the sea oil fuel tanks, bilges, dirty ballasts, etc., is prohibited.

Disposal of garbage over the side of the ship into the harbour is prohibited.

The presence of a Pilot on board a vessel shall not relieve the Master of his responsibility regarding the safety of the vessel. The Port Authority shall have the right to claim against a vessel for any damage caused by that vessel to berths, shore installations, tugs, buoys, etc.

The Harbour Master or his deputy may order a vessel to leave the berth at short notice in the case of emergency, bad weather, etc.

Vessels carrying explosives or dangerous cargoes must declare quantities and categories of same when they report their ETA.

Crew members are prohibited from swimming within the harbour.

Lowering into the water of ship's life-boats, launches or life-rafts is prohibited without the written approval of the Harbour Master or his deputy.

Mooring of ship's life-boats, launches or life-rafts to navigational marks and buoys is prohibited.

Due regard shall be given to the safety of divers when they are working within the Port Limits. Engines should be stopped when approaching their working area at a circle of 150 m. The launch attending divers displays the International flag letter "Alfa" during diving operations.

SHIPMASTER'S REPORT: May 1980 (Updated 1990). Vessel loading ammonia.

Approaches: Charts B.A. 3773 and BAP1223. The complex lies about 5 miles South of the port of Mina Al-Ahmadi.

At the time of call the Decca chain was not operating. Approach is fairly straightforward with good positions being obtained by radar and from the various light floats and buoys that abound.

Currents appear to follow the trend of the coastline.

Anchorage: There is no night berthing allowed on the Ammonia Berth. Vessels arriving during the hours of darkness are asked to anchor about 3 miles due East of the berth.

Pilotage: Pilots will board the vessel about 1.5 miles due East of the berth, usually from a tug.

Call Port and Pilots on Channel 16 VHF, usually work 13 or 14 thereafter. Communication was good, fluent English. Vessel has the option of berthing either side alongside and, if not heavily loaded, would suggest starboard side to with the head out.

Two powerful tugs available for berthing, usually only one required for sailing. Tug's lines, lying alongside.

Length of pilotage about one and a half hours to being secured.

Berth: Consists of a "T" jetty, the head of which lies about 340°/160°. The stem of the "T" is 1,000 m. long and the head about 800 m. long.

The Ammonia Berth lies on the Northern side of the "T" and inside.

Quoted depth is 40 ft. which was borne out by soundings. The Pilots however quoted a max. sailing draft of 36 ft.

The Ammonia Berth itself is about 350 m. long. The concrete sections of the jetty are currently undergoing repair and this affected the mooring arrangements. Besides this there are lamp standards which may interfere with lines in the future. Usual mooring arrangements, 3 headlines, 2 breastlines and 2 springs.

Gangway: It is only possible to use ship's gangway when lying starboard side to as it fouls the chicksan area when head in. Careful positioning and tending is required.

There is a group of chicksans which handle oil products about halfway along the jetty and the ammonia chicksans lie just South of these.

No VRL. No venting.

Shore personnel connected the Chicksan (bolted) and no reducer was necessary.

Cooldown: Charterers asked us to limit the amount of coolant taken to 300 tonnes.

Petrochemical Industries Company (who operate the berth) would have allowed us to take this coolant into more than one tank had it been possible or necessary. They were very conscious of us having to vent excess pressure (using 'cascade' system for atmospheres) and went to great lengths to ensure no ammonia vapour was discharged to atmosphere.

Control of cargo rate was very good.

Vessel has to anchor at least three miles off berth to complete cooling.

Notice of Readiness: Was tendered on arrival and again on completion of purging/cooling operations. Cable "Ammoniaship". This was not accepted until secured in the loading berth and ready to load.

Loading: Despite the length of pipe-line from the refinery the product was reasonably cold and they have a recirculating system which enables stopping cargo at very little notice.

Berth operators were quite happy with bottom temperatures only at −32°. Loading rate is quoted at 1,000 t.p.h. but our overall average was only 605 t.p.h. at which the operators expressed themselves as satisfied.

Throughout the whole cooling and loading programme the vessel was under continual close scrutiny from shore personnel. The technical ability of these people was very high indeed (although very fair and practical minded). Pressure graphs and temperatures were checked and noted hourly together with hourly rates.

Redwoods attended as surveyors throughout. Bills of Lading are presented before sailing and are usually claused "Freight Prepaid".

Output of the plant is quoted as about 700 tonnes of liquid per day, but the fertiliser division apparently has first call on product which may result in short loading.

Note: The port office, which is situated at the junction of the "T", is very sensitive to ammonia smells and the personnel there test the atmosphere using Draeger tubes.

Bunkers: Diesel oil taken at this call and vessel has to position under the oil chicksans. This requires shifting ship to or from the loading chicksans.

Bunker suppliers, KNPC, will NOT accept bills signed over Time Charterer's stamp. Ask Owner for permission to sign the bills 'clean' prior to arrival.

General: Shore passes required. Prior arrangements to be made by sending necessary information to the agent concerned, at least 3 days prior to ship's arrival.

Transport: Necessary to get from jetty to shore. This is provided on a continual basis.

Alcohol: Customs will allow alcohol to be issued to bars. It is better to arrive with these emptied and ask for an allowance. As usual, it is a very grave offence to offer alcohol to shore personnel.

Fresh Water: Available but none taken.

Medical: There is a medical centre ashore which provides a very efficient service for vaccinations.

General: Service is available for radars and Decca Navigator.

No stores taken.

Items may be landed for despatch to UK after informing the Customs and providing a description of the packages, etc.

Personnel may be repatriated (no alcohol in baggage) and there is a frequent service to UK.

Agents: Kuwait Oil Tanker Company, cables 'Minatank Kuwait'.

In case of emergencies they have an office on the shore which is manned 24 hours. If necessary to telephone UK one has to go to the head office at Ahmadi. Agents usually work Channel 26 VHF.

Departure: About four hours should be allowed for completion of paperwork before sailing. Vessel may leave the berth at night.

AUTHORITY: Ports Public Authority, P.O. Box 3874, Safat, 13067 Safat, Kuwait. *Tel:* 4812623, 4833709. *Telex:* 22740 Hmshp Kt. *Contact:* Dr. Ibrahim Makki, Director General.

A.R.Al-Naibari, Assistant Director General PPA, Shuaiba Port., P.O.Box 10099, Shuaiba Code 65451. *Tel:* 3260687/3260189. *Telex:* 44235 PORTS. *FAX:* 3260150/3262943.

AGENT: International Shipping Agency Limited, POB 20637, 13067 Safat, Kuwait. Old KIC Building, 1st Floor, Safat Square, Ahmad al Jaber Street, Kuwait, State of Kuwait. Tel: 2441860. Facsimile No. (965) 2415732. Telex: 22208 (Answerback "Isaship Kwt") and 22396 (Answerback "Isatug Kt"). Cables: "Shipagent, Kuwait".

In the case of tankers, agency services are provided by the Kuwait Oil Tanker Company.

SHUWAIKH (Kuwait Harbour): 29.21 N. 47.56 E.

(See Plan)

PORT LIMITS: According to the General Port Rules (1959) the Seaward Limits comprise all waters in the area confined by line drawn in direction 000° from Ras Al Ajuza, (Lat. 29° 23′ 27″ N., Long. 48° 00′ 24″ E.) to the parallel of Lat. 29° 30′ 00″ N. Hence in direction 230° to Ras Al Ashairij Lat. 29° 23′ 15″ N. Long. 47° 51′ 00″ E. For the seaward boundaries of the Port within which a vessel is considered to be on "arrived ship", refer to "Anchorage".

DOCUMENTS:

Manifest: 15 copies which should clearly indicate weights in metric tons and measurements in cubic metres and each copy should be duly signed and stamped by the loading port Agent.

The copies of the manifest may be photostat copies or carbon copies but it is imperative that the stamp and signature made by the loading port Agent is appearing in original on each copy.

If cargo is carried in transit a separate transit cargo manifest (15 copies) is also required in same fashion as above.

Bills of Lading: 5 sets of non-negotiable copy Bills of Lading i.e. ordinary carbon copy Bills of Lading. Photostat copies will not be accepted.

In addition the following documents are to be provided:

4 copies of Final Cargo Stowage Plan, duly signed and stamped on each copy by the loading port Agent. Photostat copies are accepted as long as same are signed and stamped.

4 copies of Hatch List as above.

If dangerous cargo is being carried 2 copies of a separate Dangerous Cargo List is also required and again each copy to be duly signed and stamped by the loading port Agent.

Also 2 copies of Crew List to be presented to Customs Office.

1 copy of Crew List, 2 copies of Passenger List, all Seaman's Books or Passports, 1 photograph of each crew member for the Immigration Office.

1 copy of Crew List, 1 copy of Vaccination List, all vaccination books for Quarantine Office. Immediately on berthing place the rat guards on mooring lines.

Ship's Registry, Loadline, Cargo Safety Equipment Certificate, Safety Radio Certificate and Last Port Clearance to be presented for port clearance.

Certificates: A survey of life rafts may be carried out unless vessel's safety certificates indicate that life rafts were surveyed less than 12 months previously.

APPROACHES: *Navigation Warning No. PPA 1/88 – 1509:* The following is a Navigational Warning issued by Ports Public Authority. State of Kuwait, applicable to all vessels arriving and/or departing all ports of Kuwait (Chart No. 3773).

Vessels arriving at Shuwaikh port:

1. All vessels calling at Shuwaikh Port shall abide by taking their course at 000° from position: 28° 36′ 02″ N., 48° 54′ E. up to one nautical mile North East of Ahmadi Light Vessel.
2. To observe its course through 294°, from one nautical mile towards North East Ahmadi Light Vessel, up to a distance of 3.8 nautical miles towards 160° from the Sea Island. From such a position the vessel shall take the course and observe the direction leading it to Shuwaikh Anchorage.
3. Speed of vessels shall not be less than 10 knots until passing Ras Al Ard Lighthouse.

PILOTAGE: Pilotage service available and request for Pilot should be made to Port Signals Station, or to look-out Signal Station when in use. Ships proceeding through the dredged channel to Shuwaikh are boarded by the Pilot in the anchorage. Pilotage not compulsory in the Outer Anchorage.

MAX. SIZE: Max. draft at Berths No. 1 to 14, 31 ft. 6 in., and Berths No. 18 to 21, and dolphin berths, 26 ft. 6 in. Max. draft at Berths No. 15 to 17, 19 ft. 6 in. These drafts allow 2 ft. of water under the keel. Tidal range is about 2.8 m. (9 ft.). Berthing draft dependent upon tidal conditions at time of arrival, and vessels exceeding 26 ft. have to wait for tide.

ANCHORAGES: Ships may take up anchor berth in the Outer Anchorage, without the Pilot.

Because of congested anchorage, and for the benefit of all concerned, the Outer Anchorage (BA Chart 1214) was divided into areas, and the approach waterway of 0.75 miles in width from Ras Al Ardh to anchorage and vice versa, is left free for navigation.

Ships bound for Kuwait, in order to *discharge their cargo* should anchor in the area marked by the following co-ordinates, and in the depth of water, according to their drafts.

Lat. 29° 25.0′ N., Long. 47° 58.7′ E.
Lat. 29° 27.0′ N., Long. 47° 58.7′ E.
Lat. 29° 27.0′ N., Long. 48° 02.5′ E.
Lat. 29° 25.0′ N., Long. 48° 02.5′ E.

Ships which have *no cargo* for Kuwait, and calling only for fresh water, provisions, crew changing, transhipments or any other reason, but not discharging cargo, should anchor: North of Parallel 29° 25.0′ N. and East of meridian 48° 03.0′ E. If mentioned anchorage area described is congested the ship could take temporary anchorage: North of Parallel 29° 24.0′ N. and East of Meridian 48° 05.5′ E. but change their position to the area described, immediately as opportunity occurs. The ship should leave the anchorage immediately after they have received the facilities, and proceed to the anchorage of the Port they are bound for.

Ships which have received instructions of possibility of berthing in the morning, should change their position to the area reserved, marked by the following co-ordinates:

Lat. 29° 25.0′ N., Long. 47° 57.6′ E.
Lat. 29° 27.0′ N., Long. 47° 57.6′ E.
Lat. 29° 27.0′ N., Long. 47° 58.7′ E.
Lat. 29° 25.0′ N., Long. 47° 58.7′ E.

When the movement is confirmed the vessel should hoist:

By Day: "G" Flag over a Black Ball or Shape.

By Night: A White Light over a Red Light, visible all round.

Note: (1) The Master shall advise the Director of Marine Operatio (D.M.O.) and/or the Pilot of any damage or disability to th ship under his command, *before berthing*.

Ship unable to comply with the berthing instructions, shou notify the D.M.O. in ample time of their inability to do so, b VHF, Visual Signals or via Kuwait Radio:

500 kHz	9 KK 4 – 6381 kHz
450 kHz	9 KK 6 – 8525 kHz

Any ship sailing from the outer anchorage for any reaso should notify the Kuwait Harbour Control that she is sailin and give the reason.

The Area North of Parallel 29° 25.0′ N. and West o Meridian 47° 57.6′ E., is reserved for ships of *National Flee* who require repairs, waiting for orders, changing crews, et

(2) The D.M.O. may direct any vessel to move from one ber to another, or vacate a berth as circumstances demand.

(3) (a). A ship whose turn is defined in the Morning Meetin and whose Agent is notified, and upon calling her no rep is received shall be prohibited from her turn for *3 days*, an after its elapse will be given another turn.

(b). A ship which is defined as a temporary one on the reco in the Morning Meeting, and upon calling, is not ready sha be prohibited from taking her turn for *2 days*, after which will be given a normal turn.

(c). A ship which is registered and then sails, if she dela her return for her specified turn for berthing will be prohibite for *15 days*, as delay penalty.

HEALTH: Vessels calling at Shuwaikh Port must send the followin information to "Health Port Shuwaikh" by cable:

(1) Name of vessel
(2) Last port of call
(3) Health condition Crew members
(4) Validity of Cholera Certificates
(5) Request for Free Pratique

Vessels arriving at Outer Anchorage must hoist "Q" flag, and keep hoisted until Free Pratique is granted.

Free Pratique will be granted usually at anchorage, and in some case alongside, at the discretion of the Quarantine Officer.

No person, except the Pilot, shall board the vessel, before Pratiqu is granted.

RADIO/VHF: *Signal Station:* (Call Kuwait Harbour Control)

There is Lookout Signal Station at Ras Al Ajuza (Lat. 29° 23.3′ N., Long 47° 59.8′ E.) and a Port Operation VHF/RT Service at the same position The VHF/RT is a Single Frequency Simplex Service, operating o Channel 13 (156.650 MHz), 12 (156.600 MHz) and 11 (156.550 MHz Working restricted to messages relating to the Movements and Safe of Ships.

All vessels arriving should establish contact with either one of thes Stations as soon as possible by VHF or Visual Signals:

Tel: 2443785, 2443788, 2443796 and 2435873. Telex: 22733, 2274

Kuwait Coastal Station (9 KK) operates throughout 24 hours.

Radio Station:

2182 kHz	8802.4 kHz
2765 kHz	13182.5 kHz
2750 kHz	17328.5 kHz
4434.9 kHz	22699.0 kHz
6518.6 kHz	

Radio Telegraphy – 9 KK:

9 KK	9 KK 2 – 4299 kHz
500 kHz	9 KK 4 – 6381 kHz
450 kHz	9 KK 6 – 8525 kHz
	9 KK 8 – 12895 kHz
	9 KK20 – 12925 kHz
	9 KK22 – 16995 kHz
	9 KK23 – 22304 kHz

For Kuwait: Only English and French languages are accepted, for th other countries all languages are accepted.

Telex: 31933, 31934, 31935 and 31936. Tel: 2410140 and 2410145

Marine Communications

This Service links the ship directly with their Agent or Principal in Kuwa and the Call for this Branch is "Kuwait Maritime".

The "Kuwait Maritime" Service covers all the ship's calls with Kuwa and abroad. The procedure is as follows:

Agent to Ship

Call by telephone No. 108 Kuwait Maritime, asking for connection, givi the Name of the Ship, and her Call Sign. The Kuwait Maritime operat will contact the ship for you on Channel 16 (156.800 MHz) and the transfer to vessel's frequency for communication.

Ship to Agent or Abroad

Call "Kuwait Maritime" on VHF Channel 16 (156.800 MHz) and as to be connected to Agent or abroad.

TUGS: Join vessel entering dredged channel, Tug's lines used. The us of tugs by ships manoeuvring within Shuwaikh port limits under directi of D.M.O. or Pilots. Number of tugs used for each movement: *(a)* 2 tu for ships exceeding 400 ft. in length. *(b)* 1 tug for ships between 250 and 400 ft. in length.

16 tugs available, 8 of 1,000 – 2,400 h.p. and 8 of 300 – 600 h.p. Us of tugs is compulsory.

REGISTRATION PROCEDURE: Notification of vessel's arriv According to port regulations a questionnaire issued by the D.M.O., d filled in and signed by the Master of the vessel, is to be submitted the port prior to berthing. In many cases vessels arrive and obtain be immediately and thus there is no possibility of presenting th questionnaire to Authorities in time. In order avoid berthing dela Masters should cable following information to the D.M.O. direct 48 hours before arrival:

(a) ETA.
(b) Total cargo for discharging Kuwait.
(c) Distribution quantity each hatch.

(d) Declaration hazardous, flammable and explosives cargo, and guns and ammunition.
(e) Declaration all vessel's winches in good working condition and cargo clear for discharging at Kuwait.
(f) Draft fore and aft.

We quote below specimen cable covering the above:
essel XXX ETA Kuwait 21/8 0600 local quantity discharging 1,400 ns general hatch one 300 hatch two 300 hatch three 250 hatch four 00 hatch five 250 no hazardous, flammable explosives guns munition stop All winches derricks good working condition draft fore ft. Aft 27 ft. Kuwait cargo clear for discharging".

The above cable sent to the D.M.O. will facilitate berthing vessel on ne. ETA to be reconfirmed before 24 hours, if any change.

Also see "Shuaiba – Notice".

Also cable Health, Port of Shuwaikh: ETA, last port, crew health, lidity of certificates, and request Free Pratique.

Apart from above, on dropping anchor contact Port Health, Tel: 811344, through Kuwait Maritime Channel 16 and request Free atique, and on receiving same inform Agent by VHF or by cable.

When approaching the anchorage vessel should hoist her "Call Sign" nd "Quarantine" flag.

On arrival at anchorage contact Harbour Control and standby VHF hannel 16 when at anchorage.

Also send acknowledgement to ship's Agent stating time cable sent o Director Marine Operations Department.

ERTHING/CRANES:

Berth	Overall Length (m.)	Depth Below ACD (m.)	Max. LOA of vessel allowed to berth (m.)	Max. Permitted draft (m.)	Cranage

Total area of open storage: 488,600 sq.m.

Container Stacking Areas:

Container Terminal	120,000 sq.m.
New Extension	145,000 sq.m.
Total Container Stacking Area:	265,000 sq.m.

STEVEDORES: All stevedoring and transport inside the port is performed by an authorised contractor.

Container work is handled by Shuwaikh Container Terminal (SCT). Plans are under consideration for specialised container berth facilities.

There are four Cement Silos of capacity 14,000 tons each adjacent to Berth No. 8. Discharging rate is 350 tons per hour.

Working Hours: General Cargo Handling:

Winter (1st November – 31st March):	
Saturday – Wednesday	0700-1430 1430-2200
Thursday	0700-1230 1230-1800
Summer (1st April – 31st October):	
Saturday – Wednesday	0630-1400 1400-2130
Thursday	0630-1230 1230-1830

Overtime is compulsory for all vessels. On Fridays, only work on vessels which are to be completed during the day.

Container Terminal: 24 hour working.

MEDICAL: Masters to radio prior arrival if medical attendance required on board. Hospital facilities available.

A rescue vessel, 90 ft. and 20 knots speed, equipped with surgery, operating theatre and all medical appliances is maintained by the Ministry of Health.

DENSITY: 1028 (Winter); 1036 (Summer).

FRESH WATER: All berths except Berths No. 1 to 7, have fresh water connection, and water can be supplied by pipe-line. Rate 20 to 25 t.p.h.

In addition to water available alongside the berths by pipe-line and hose, water may be supplied by barge to ships alongside dolphin berths. There are 2 private companies supplying fresh water alongside and at anchorage by barge.

FUEL: Fuel oil and gas oil supplied by bunker tankers. For quality and prices please enquire from the Agents.

FIRE PRECAUTIONS: Shuwaikh Fire Brigade is responsible for all fire fighting in port areas and storage areas. There is also a fire station situated near the Small Boat Harbour, where the 3 fire fighting tenders are berthed. A salt water main for the fighting services is laid at all berths. There are two 90 ft. fire fighting tenders capable of pumping 5,000 gallons of water per minute from 4 nozzles. In addition they can pump 900 gallons of foam per minute. The 98 ft. fire fighting tender is capable of pumping 9,000 litres of water per minute and 650 litres of foam, and the capacity of her pump is 4,500 litres of water or 143.5 litres of oil. The tender has 8 nozzles for water and 2 nozzles for foam. These modern fire-fighting units are equipped with radio, radio-telephone, radar, etc.

REPAIRS: All deck, hull and machinery repairs can be carried out by local shipyard. Repair facilities available for Gyro, Radar and electronics.

DRY DOCK: Floating dock lifting capacity 35,000 tonnes, dimensions 190 m. × 32 m. Syncrolift rated lifting capacity 2,000, tonnes.

GANGWAY/DECK WATCHMEN: Gangway Watchman compulsory (see "Regulations").

OPENING/CLOSING HATCHES: Opening and closing of hatches is normally carried out by the stevedores on liners, and by ship's crew on charter vessels.

CUSTOMS ALLOWANCES: Tobacco: No restrictions. Wine and/or spirit allowance: Alcoholic beverage is strictly prohibited to be held out of bond. Master allowed to keep limited quantity in his cabin.

CARGO GEAR: Ship's gear and cranes used for discharging.

SURVEYORS: Lloyd's Register of Shipping (Kuwait): American Bureau of Shipping (Kuwait); Bureau Veritas (Kuwait); Norske Veritas (Bahrain).

REPATRIATION: Can be arranged.

Also see "Visa Regulations" in "General" before first port.

AIRPORT: Served by regular airlines. Airport 17 km. from town.

TIME: GMT plus 3 hours.

HOLIDAYS: New Year's Day, Id Al Fitr, National Day (February 25th), Mount Arafat Day (Wakfa), Id Al Adha, New Hijra Year, Birthday of Prophet Mohammad, Isra walma'raj. The above days are subject to alteration.

TELEPHONES: Cannot be arranged on board.

SERVICES: Swedish Welfare for Seamen. Lloyd's Surveyor. Butterworth Tank Cleaning Machines and Equipment and also underwater cleaning.

PROVISIONS: All kinds of food available at reasonable prices.

SHORE LEAVE: Only permitted for Consular matters, medical reasons and making emergency telephone calls. Contact Agent for further information.

Shore passes are issued and must be returned to Immigration prior to departure, if not returned a heavy fine will be imposed. Crew members require a photograph but this is not returned.

IDENTIFICATION CARDS: Passport or Seaman's Book necessary.

GENERAL: The following is required from all vessels calling at Kuwaiti ports for the first time:

Quote:

> The Harbour Master Department of the Ports Public Authority, with immediate effect, request that Masters of vessels calling for the first time at Shuwaikh Port should give in their ETA cables, details of cargo on board, the length, width, number and condition of hatches, discharging facilities, and any other information which they may consider necessary in assisting the Ports Authority to allocate the vessels the best berth possible.
>
> Such information will considerably help all concerned and at the same time prevent unnecessary delay and unjustified extra charges to owners, since in the event that the allocated berth is not suitable, the Harbour Master shall have no alternative but to shift that particular vessel to another suitable berth, or take it out to anchorage.
>
> Furthermore, it has been observed some Masters of vessels are not indicating in their ETA cables to the Harbour Master the word "Kuwait" when indicating the tonnage figures of cargo onboard, clear and ready for discharging. It is imperative that the Master should say in his cable 'ETA . . . hours. Cargo for Kuwait . . . tons clear and ready for discharging draft . . . ft.

Unquote.

REGULATIONS: The State of Kuwait has stringent laws in fo concerning the pollution of the sea by oil. The following are two amend paragraphs of this law:

Paragraph 1, Art. 4. "A person responsible for any pollution a described in Articles 1 and 2 shall be punished by a fine of not less tha one thousand and five hundred and not more than forty thousand Dinar In the event of his committing a similar crime within a period of one yea from the date of his conviction, such a person shall be punished by fine of not less than three thousand and not more than forty thousan Kuwaiti Dinars, and in the event of his committing yet another crim within a year from this last conviction he shall be punished by a fine forty thousand Kuwaiti Dinars".

Paragraph 3, Art. 6. "The person responsible for pollution ma suspend the detention order against the ship on payment, as a cas guarantee, of forty thousand Kuwaiti Dinars to the official entrusted wi the execution of such order".

The Master shall advise the Harbour Master and/or Pilot of any specia damage or disability to the ship under his command before berthing o unberthing.

A vessel in outer anchorage receiving a Movement Order in writin by signal or VHF, and awaiting the Pilot, shall carry:
By Day: "G" Flag, over a black ball or shape.
By Night: A white light over a red light.

Ships that receive instructions to berth at specified hours and no adhering to these instructions could lose their turn and be liable to pa charges for the time lost at the berth, and facilities arranged for and no used due to such delay.

Ships that receive instructions to unberth at specified hours and no adhering to these instructions, i.e. retarding the movement of incomin ship, will be liable to pay charges for time lost at the berth and th facilities for the incoming ship, and not used, due to such delay.

Ships unable to comply with the berthing or unberthing instruction should notify the Harbour Master in ample time of their inability to so d by VHF, visual signals, personally or through Agent.

A ship entering or navigating within the dredged channel or inner bas shall have at least 1 anchor ready for immediate use.

The Master of a ship alongside Shuwaikh Wharf or dolphin berth, sha ensure that:

(a) Vessel not allowed to use VHF to any vessel except to call Kuwa Harbour Control or Kuwait Maritime.

(b) A safe and proper accommodation ladder to the quay is provide adequately lit during the hours of darkness.

(c) A Quartermaster or watchman is stationed on deck, in charge o the ship's gangway, who shall inform the Master or the Duty Offic whenever required by the Port Authority Officials, and shall check tha no authorised persons will enter the officer's or crew's accommodation Gangway must be lifted up whenever vessel is not working, and a 2200 hrs. daily.

(d) The crew or watchman to attend the mooring ropes and lines, an shall cause their adjustment from time to time, as necessary on the ris and fall of the water.

(e) That no substance, matter or material is thrown overboard, eithe into the water or on to the wharf.

(f) That no engine repairs are undertaken which would prevent th movement of the vessel under her own power, without first obtainin the permission of the Harbour Master.

(g) That all pipe discharges on that side of the ship nearest to th wharf are either adequately and properly covered to prevent their effluen falling on to the wharf, or their use discontinued while the ship remain alongside.

(h) It is forbidden to jettison or ballast other than clean water or pum out the bilges or oil of any description within the port limits.

(i) All ships loaded with petroleum or crude oil at the wharf shall hav the end of a steel hawser of sufficient strength, paid out to the wate edge, at the offshore bow and quarter, to enable tugs to take the vesse to place of safety with the least possible delay.

(j) The Master shall at all times retain on board sufficient crew to wor his ship.

(k) Ratguards to be fixed to all ship's mooring ropes.

(l) The Master shall not shift his vessel while alongside the whar prior to receiving permission from the Harbour Master or Berthin Master.

(m) The Master shall not connect water hoses to the water supp points and take water on board before receiving permission from th person in charge of water distribution.

(n) The Master shall report to the Harbour Master or Berthing Mast any incident, accident or unusual happening on board his ship.

The Master not complying with the above-stated Port Rules, shall b liable to suffer the penalties prescribed for contravention.

Warning: Port tugs are supplied with nylon and polypropylene hawser which require particular attention when securing to ship's bollards, i order that they do not slip. Extra turns than normal on the bollards ar recommended.

NOTICE:

Supplied to Ship's Master, on arrival, by Agent (October 1984).

1. One watchman to be kept regularly on gangway.
2. Immediately the labourers leave the vessel after each night sh the gangway should be taken up and not to be lowered before 0600 hr next working day.
3. Strictly forbidden to sell any alcoholic drinks onboard or to brin on to jetty.
4. Rat guards to be fixed properly on the ropes.
5. No cleaning of decks, painting of hull or welding on deck is allow when vessel is alongside jetty.
6. Neither fresh nor dirty water should be pumped out alongside je for any reason and under any circumstances.
7. No garbage should be thrown either on jetty or in to sea at an time and under any circumstances.
8. Any pollution either during supply of bunkers or at any other tim and for any reason is entirely your responsibility.

9. No repairs or dismantling of engines are allowed unless prior ritten approval from the Harbour Master is granted.

10. Vessel's draft should not exceed that draft on which she was llocated a berth.

Maximum drafts of/on various berths are:

Jetty Nos. 1 – 14 inclusive	31 ft. 6 in.
Jetty Nos. 18 – 21 inclusive	26 ft. 6 in.
Dolphins	26 ft. 6 in.
Jetty Nos. 15 – 17 inclusive	19 ft. 6 in.

NOTES

Please also advise Shipping Guides Ltd.

Lebanon

BEIRUT (Beyrouth): 33.54 N. 35.30 E.

DOCUMENTS:

Manifests should be visaed by Lebanese Consul at ports of shipment, or at any port *en route* where there is a Lebanese Consul. If on account of non-existence of Lebanese Consul at ports of shipment or at any of these *en route* the manifests are not visaed, then such consular visa dues are collected at Beirut.

5 Copies of Cargo Manifests.
2 Store Lists.
5 Passenger Lists.
2 Lists of Cigarettes and Tobacco (see "Customs Allowances").

For cargoes loaded for Lebanon, there are new regulations concerning documentation as follows:

Original Cargo Manifest to be presented to the Authorities should be rubber stamped and signed by the Customs Authorities at the port of loading.

Copy of each Bill of Lading should be attached to the above Manifest.

A letter from Owners/Charterers indicating the Agents at the respective port.

PILOTAGE: Agent arranges Pilot via Harbour Master. Agent therefore to be kept well informed of ETA, 48 hours and 24 hours prior arrival. Pilot boat white with red funnel. Sound signals, 2 long and 1 short or contact can be made via VHF to Harbour Master. Pilot boards outside main breakwater. Assistance of Pilot outside daily normal hours, Sundays and official holidays, will be cost calculated at 100% more. Official normal working hours for pilotage station as follows: from 1st October up to 30th April, 0700 till 1700 hrs.; from 1st May up to 30th September, 0700 till 1800 hrs., For tankers outside harbour, the pilotage dues will be 100% extra.

Also see "Shipmaster's Report – January 1982".

ANCHORAGE: In Roads outside breakwater. Also see "Shipmaster's Report – January, 1982".

RESTRICTIONS: No particular restrictions. Pilot normally available between sunrise and sunset otherwise by special agreement.

MAX. SIZE: Max. draft in port 13 m. No limitation to breadth or length.

HEALTH: Health Authorities board in Roads. Health Form obtainable from Agent or doctor. Yellow fever certificates required for ships coming from Far East and Red Sea. Owners should check with Agents respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for Crew members.

RADIO: Cables via Beirut Radio to and from Agent.

VHF: VHF Channels 13 and 16.

TUGS: Tugs of 1,000 h.p. join vessel inside port when necessary. Ship's lines to be used.

BERTHING: If port congested priority given to vessel already registered. Passenger-tourist vessels and cargo for Army have priority. Harbour capable of berthing 24 ships simultaneously and 3 moored on buoys, discharging into barges. All discharging is by ship's gear.

Dock No. 1: Surrounded by Quay Nos. 1, 2, 3. Depth of water varies between 3 m. and 8 m. Parts of Quay No. 1 and Quay No. 2 with 3 m. depth of water are reserved for floating units of port company and for launches of Harbour Master and pilotage service. Slipway of 1,000 tons capacity and workshops.

Dock No. 2: Surrounded by Quay Nos. 4, 5, 6, 7, with water depths varying between 8 m. and 10.5 m. On Quay No. 5 berthing priority is given to passenger ships, while the other quays are for cargo vessels.

Dock No. 3: Surrounded by Quay Nos. 8, 9, 10, 11, with depths varying between 10.5 m. and 13 m. All these quays can berth ships bringing general cargo. At Quay No. 8 of 13 m. depth, priority of berthing is given to grain ships.

Grain Silo: There are 120,000 tonnes capacity silos. Ships will be unloaded by means of 2 gantry type suction machines, mobile on rails with a capacity of 6×100 t.p.h.

Containers: A ship's Master advises that containers should be loaded on one side of the vessel and vessel berth that side to the berth as crane unable to reach outboard side.

Ro-Ro: All quays in Docks No. 2 and 3 can receive Ro/Ro vessels.

STEVEDORES: Ordered by Agent. No ETA to Stevedores necessary. Working hours, 0800 – 1200, 1300 – 1600. Otherwise overtime on Sundays and on official holidays.

MEDICAL: Master to advise Agent by cable prior to arrival if medical attendance required.

TANKERS: Notice: The Coral Oil Co. Ltd.: Dated November 1984. To the Master.

TANKER MOORING AND DISCHARGING PROCEDURE AT CORAL OIL TERMINAL, BEIRUT.

We should be grateful if you would kindly note the following:

1. Berthing: The following is for your guidance:

Our moorings have been laid so as to give you a stern mooring for the old lines and amidships mooring for the new line (see item 2) using ship's anchors at the head. It is recommended that both anchors should be dropped when the vessel is discharging.

The ideal position for your ship is such that she would be heading N.N.W., in which position you will be clear of all obstructions in the event of an emergency. As you are aware, there is a wreck lying on the seabed to the East of the moorings and a half-submerged rock to the West.

When the significant wind speed is 10 knots, it is recommended that you stop cargo operations and advise our representative on board (see item 4 below) accordingly. Our hoses will be disconnected immediately after that. Please ensure close co-ordination with him.

When the significant wind speed rises to 15 knots you are recommended to unmoor and leave the berth. It is your responsibility to ensure that arrangements are made for the Pilot's mooring boat to unmoor the ship's lines.

Please keep in touch with the Meteorological Office in periods of unstable weather, and keep your engines in a state of readiness.

N.B. For amidships discharge (see item 2 below) you are advised t have enough mooring ropes available to cover extra distance to ou mooring buoys (roughly 4 × 200 m.).

Please do not "Hang On" in wind speed beyond the above limits.

2. Cargo Discharging System:

There are two systems:

(a) The "Old Lines": The so called "Old Lines" system is to b connected through our submarine hoses to your stern discharge poi At that point the following products may be discharged: Lubricating bas oil through one line and Jet A-1 and a limited number of chemica Gasoline or Gasoil through another line. In this particular case, you a requested to pump sweet or sea-water plugs, as the case may be, t clear our submarine and shore line between products.

(b) The "New Line": The so called "New Line" is for amidshi discharge and is exclusively used for chemicals through a 'piggin arrangement. Ideally, you should have Nitrogen aboard as well a compressed air for use in conjunction with this system, bearing in mi that Nitrogen must be used (not compressed air) with low flash poi products.

3. Quality of Cargo: Please hand our representative the Certificate o Quality, issued by the Refinery, corresponding to the cargo destined t us.

The cargo may not be discharged unless the Certificate of Quality i handed to us beforehand and found to be fully conforming to the late issue of the relevant specifications.

Furthermore, we shall carry out a few tests on representative sample drawn from your tanks before discharge.

If the results of the analyses are unsatisfactory, the cargo may not b discharged.

4. Personnel on Duty: A member of our staff with a few assistants wi be on duty day and night on your ship and we trust they will be allowe to use your mess-room from time to time. Installation personnel are als on constant watch checking the shore tanks, inspecting the pipe-line and manipulating the signals.

We would ask you to ensure that a responsible member of your cre remain on duty at the stern or amidships to answer shore signa promptly and react accordingly.

A member of our staff is always present at the Installation while th ship is discharging and you are requested to contact him if anythin should be required.

5. Security and Safety:

(i) No engine repairs should be carried out at this berth.

(ii) The Port Authority forbids gas freeing while the tanker is berthe Besides, fishermen's practices in the immediate vicinity of the berth ma endanger your ship in case of gas-freeing.

(iii) You will appreciate that we cannot be held responsible for th security of your ship or prevent unauthorised persons from going o board.

Peddlers might attempt to board tankers, in which case the safety o your operations might be affected. It is strongly recommended that yo post watchmen to prevent their access to the ship.

6. Communications: (a) Pumping Signals: Shore signals are made wi White and Red discs by day and coloured lights by night from the Ya Arm of the signalling mast at the shore end of our jetty.

Ship signals are a series of short blasts of 5 seconds' duration.

(i) Amidships Discharge:

	Shore Signals		*Ship Answering Signals*
	Day	*Night*	
Launch pig or sphere	One disc	One white light	One blast
Pump product	Two discs	One green light	Two blasts
Pump air or Nitrogen	Three discs	Two green lights	Three blasts
Stop pumping product, air or Nitrogen	Four discs	One red light	Four blasts
Disconnect	No disc	Two red lights	Several short an long blasts
(ii) Stern Discharge			
Pump water	One disc	One white light	One blast
Pump product slowly	Two discs	One green light	Two blasts
Pump product full speed	Three discs	Two green lights	Three blasts
Stop pumping product or water	Four discs	One red light	Four blasts
Disconnect	No disc	Two red lights	Several short an long blasts

In the event of the ship having to stop pumping, please sound 4 sho blasts before closing the valve, whereupon pumping should not b resumed until the appropriate signal has been run up again on our sig mast.

(b) "Walkie-Talkie": Walkie-Talkie communication is establishe between ship and the shore, but the equipment may fail and the abo signals are essential.

(c) Motor-boat: Motor-boat is on Company service while the ship is mooring.

7. Pumping and pumping speed: Delivery of all products may proc day and night.

(i) "Old Lines" Jet A-1, some Chemicals, Gasoline or Gas Oil:

When delivering the above products through the "Old Line" (i.e. us water plugs), the following pumping speeds must be observed:

During the first half hour, pump slowly to clear the water plug in th pipe-line and avoid development of unrelaxed static electricity. Th pumping rates must be limited as follows: Kerosene/Jet A-1 90 t.p. Water 115 t.p.h.

After the first half hour, the rate of pumping should be commensu with a pressure at the stern connection to the submarine hoses n exceeding 100 p.s.i. It should not be less than 300 product t.p.h.

At the end of the cargo pumping operation, sea-water is to be pumped to clear the product contained in the pipe-line into the shore tanks. Pumping speed must not exceed 115 t.p.h.

(ii) "Old Lines" – Lubricating Base Oils: No restrictions except to pressure at the stern which is not to exceed 100 p.s.i.

(iii) "New Line" – Chemicals: No restrictions except to pressure at the amidships discharge point which is not to exceed 150 p.s.i.

The detailed procedure concerning the use of the sphere or pig and Nitrogen, Compressed Air, or Chemical products to push the sphere or pig will be discussed and agreed with you beforehand.

3. Quantities to be discharged: Will you please ensure that the quantities discharged agree with the B/L figures. Any difference in these figures should be confirmed in writing to the member of our staff on board your ship. In any case, the shore tanks' dips are those that will serve as a final basis for acknowledgment of the cargo received. They are witnessed and certified by the shore Customs Authorities, as well as the Insurance Surveyor.

4. Ship's Agent: The ship's Agent is expected to deal with all questions of port and harbour regulations, currency, health, etc.

Reminder: Hose-lifting derrick, air compressors and nitrogen; the tanker must be fitted with derricks of 3 to 4 tons lifting capacity depending on the height of the connection above sea-level) to lift part of the submarine 8 in. hoses required for connection to its stern discharge or amidships discharge, as the case may be.

In the case of lubricating base oils, the tanker must be provided with an air compressor to clear the line before pumping the next grade of base oils.

In the case of chemicals, except for those to be discharged at the "Old Lines", the tanker must have Nitrogen and compressed air available in adequate quantity.

Signed: Manager Operations.

Also see "Shipmaster's Report" dated February 1983.

DENSITY: 1025.

FRESH WATER: The port company has equipped all quays with hydrants. Ships moored on buoys can also be supplied with water from cistern barge. By shore installation or by barge. Delivery rate 20/25 t.p.h. Outside harbour double price per barge.

FUEL: Fuel, gas oil, diesel obtainable. 48 hours' notice required.

FIRE PRECAUTIONS: Special berths for tankers.

GANGWAY/DECK WATCHMEN: Available and recommended.

OPENING/CLOSING HATCHES: For liners, by stevedores, otherwise per agreement.

CUSTOMS ALLOWANCES: (Tobacco) 40 cigarettes per Crew member (Master 2-3 cartons). Customs very strict, and will search crew cabins. Regulations are as follows:

1. That the quantity of tobacco to be allowed on board vessels upon their arrival at a Lebanese port, will be fixed on the basis of 2 packets per crew member, passenger per day and to be calculated on a maximum period of 4 months, if the vessel emanates from an American, Asian or African port - not central Africa; and for 2 months if the vessel last port of call is in Europe, Central Africa or Mediterranean, which will be deducted port of call, until arrival at a Lebanese port. That the number of passengers to be taken into account on a tourist vessel, will be the number of berths the vessel can accommodate and not the number of passengers actually on board. As to cargo vessels, the actual number to be accounted for will only be the crew members and the Master of the vessel.

2. In the event that it is the first call of the vessel at a Lebanese port and not aware of such regulations, and it was found onboard her an excess quantity to the actual one allowed, as indicated above, a Process Verbal will be established for the excess quantity found and the cigarettes placed under seal. An undertaking is also to be obtained from either the Owners and/or her Agents to the effect that they will submit a certificate, within 1 month, to be issued by the relevant Customs Authorities of the next port of call of the vessel after a Lebanese port. While the seizure on the vessel will be lifted when a Bank Guarantee equalling the amount of fine and dues is placed, or a personal guarantee from the Agent – if solvable – and in the event that the undertaking is not fulfilled the usual penalties will be inflicted according to the Law.

3. In the event the vessel is aware of such restriction, and for one reason or another, she is carrying an excess quantity, this excess must be, as per official regulations, shown on the manifest legalised and issued at the last port of call touched by the vessel prior to Beirut. Any excess found over and above such declaration will be considered as smuggling and the law will be applied.

Wine and/or Spirits: 1 bottle per crew member. Master allowed 3 or 4 bottles.

HOLIDAYS:

Holidays	*Date*	*Days*
New Year's Day	January 1st	1
St. Maron	February 9th	1
Good Friday (Catholic)	Varies	1
Easter Monday (Catholic)	Varies	1
Labour Day	May 1st	1
Good Friday (Orthodox)	Varies	1
Easter Monday (Orthodox)	Varies	1
Al Fiter (Ramadan)	Varies	1
Assumption Day	August 15th	1
Al-Adha	Varies	2
Moslem New Year's Day	Varies	1
Achoura	Varies	1
All Saints' Day	November 1st	1
Independence Day	November 22nd	1
Prophet's Birthday	Varies	1
Christmas Day	December 25th	1

Port closes completely: New Year's Day, Al-Adha, Easter Monday, Labour Day, Independence Day, 1st day of Ramadan and Christmas Day. On other holidays, day work in port carried out against overtime payment.

CARGO GEAR: Ship's gear to be used but mobile cranes can be hired. Shore cranes except mobile cranes only available at Quays 9 and 11. Floating crane of 120 tons available.

CONSULS: Most countries have consulates.

REPAIRS: Most types of repairs carried out.

DRY DOCKS: None except for 500/1,000 tonner.

REPATRIATION: Very good facilities for repatriation.

AIRPORT: About 10 km. distant, served by regular airlines.

TIME: GMT plus 2 hours. Summertime, GMT plus 3 hours.

POLICE/AMBULANCE/FIRE: Telephone numbers: Police 16, Ambulance 18, Fire 17.

TELEPHONES: Available on request by shipping agency.

SERVICES: Tank-cleaning equipment. Facilities for discharge of tank-washings, compass adjusting, laundry, etc., available.

SHORE LEAVE: Crew allowed onshore.

IDENTIFICATION CARDS: Shore pass given to each crew member. Passport and Seaman's Book to remain in Master's care.

DELAYS: 1. Unavailability of berth or barges due congestion mainly during Winter months (December to April). 2. Vessel already registered will lose turn if not returned to port in time. 3. Barge ordered for bunkering might be occupied if vessel's arrival delayed.

DEVELOPMENTS: There are plans for a new container berth with crane and container park at the fifth basin.

SHIPMASTER'S REPORT: 1978.

Navigation Buoy: The buoy off the end of the breakwater has been replaced in approximately the same position as the original buoy. The present buoy is painted green with a 'cone top mark'. Although the buoy is a light buoy the flash was not observed. On no account should the vessel pass between the end of the breakwater and the buoy as rubble is being dumped to extend the breakwater. The actual dumping position is marked.

The local Pilots are now working VHF Channel 16 from the Harbour Office.

SHIPMASTER'S REPORT: January, 1982.

Vessels approaching Beirut Harbour from a Southerly direction are advised to make Ras Beirut Light on a bearing of 132°. When the light is approximately 3 miles away alter course to 090° until the Eastern end of breakwater is abeam and alter course to 150° to pass Green Buoy (near end of breakwater) to starboard. The Pilot will board vessel near the green buoy or at anchorage.

Good anchorages may be obtained East of breakwater with good holding ground. In view of the prevailing tension it is advisable to approach Beirut during daylight hours as incidents of sniper fire and shelling have been reported.

Shore leave for seamen/ship's personnel may be granted during daylight hours from 0900 to 1500 only in the Christian (Eastern) Sector. It is not advisable to visit the Muslim sector of the Western Beirut.

Provisions, bonded stores and good shopping available despite tension.

SHIPMASTER'S REPORT: February 1983.

Tankers: The following are the requirements for product delivery vessels calling at tanker berths operated by Dora Terminals.

Medco Terminal:

I – TECHNICAL CONDITIONS

1. Tanker mooring should take place during daylight at the berth specially provided for discharging opposite our installations at Dora i.e. "Baie Saint Georges".
2. Tanker's d.w.t. (dead weight tonnage) must not exceed 25,000 – 30,000 metric tons.
3. Only stern discharge is permissible.
4. Submerged portion of the tanker's stern must not exceed 28 ft. – 29 ft.
5. Discharge hose facilities provided are of 6 in., 8 in. and 10 in. diameter. Working pressure must not exceed 5 – 6 kg./sq.cm.
6. Upon arrival, the Shipmaster shall abide by the instructions given to him by Beirut Pilot and Harbour Master and by employees of this company, it being understood that putting the ship at anchor immediately upon arrival is subject to weather conditions. In other words mooring, anchorage and discharge of load are not possible when sea is rough.
7. Ship must be equipped with all necessary international documents in accordance with universally accepted rules and regulations because discharging takes place under supervision of Lebanese Customs Authorities and other Government Officials.
8. Swivelling tanker's crane boom to extend outside tanker minimum 3 m. in order to lift vertically flexible hoses. Also suitably located hang-off bitts for submarine hose.
9. Discharge line to be fitted with ASA 150 8 in. flange connected (or ASA 150 6 in. connection) and pressure gauge, conveniently located.
10. Pumps to be preferably centrifuge with by-pass (or relief valve) set at 9 kg./sq.cm.
11. Tanker shall be responsible for any and all damages which may occur to our installations whether it be due to weather, natural or technical reasons. Tanker shall likewise be responsible for damages caused by negligence or faulty manoeuvres on the part of the Master or the crew.
12. The company's Superintendent at his own discretion may refuse admission to a tanker or discharge of a cargo when he notices that the tanker is not adequately equipped technically for the discharging process as is usually required. Shipowners shall then carry out all necessary repairs, wherefore demurrage, if any, shall be exclusively at the tanker's expense.

13. When the discharge process has been completed and all formalities done, hose disconnected and mooring ropes released, the tanker, using its anchor to move forward, shall leave the mooring place immediately and clear a suitable distance off marine installations without using the propeller.
14. Should weather conditions worsen during discharge operations, the Superintendent shall have the right to disconnect the hose and request Shipmaster to leave discharge berth immediately for protection of human lives, installations and ship.
15. All harm befalling divers and/or company workmen during discharge activities shall be at the tanker's expense as long as these men are on board the tanker.
16. Both tanker and company shall be prepared to tie-in the discharge hose within 6 hours period effective from the time mooring at company's berth has been performed by Beirut Pilot.
17. Master is requested to give 72/48/24 hours' pre-arrival notice through "Radio Orient" to our cable address "Geochammas Beirut".

II – GENERAL CONDITIONS

1. Details of tanker arrival and discharge must be arranged beforehand. Should two tankers arrive at the terminal preference shall be accorded the tanker that has arrived first.
   In those cases where a Government-bound tanker comes in for unloading at the same time as another tanker is discharging at our installations, no demurrage shall be due by the company.
2. Quantities received are those measured in our tanks. The company shall not be responsible for any shortage due to leakage or otherwise, notwithstanding the fact that the company shall spare no effort to avoid any such loss.
3. It is clearly understood that all discharge activities such as anchorage, discharge, material receiving, storage, etc. are for the responsibility and expense of the Government. It is likewise agreed that all damage which may befall our marine installations, tanks and the company's other installations at Dora, irrespective of cause, even if it be a force-majeure, are the responsibility of the Government as the company shall then be working in accordance with the Government's request and for its account.
4. All port dues and other charges connected with the tanker or the cargo are for the Government expense.
5. All expense for products delivered by tank trucks are for the account of the receiver.
6. Under all circumstances the company shall be held free of any responsibility whether for reasons mentioned above or omitted. It is likewise not responsible in all instances where the terms "cas fortuit, force majeure" and applicable.
7. The company may be contacted through the following means:
   (a) Radio Orient Ogero.
   (b) Telex: 22259 Menira/20816 Mecham/20112 Ctctco.
   (c) Telegram: Geochammas-Beirut.
   (d) Tel: 894.077 (working hours: 0800 – 1400 hrs.)
   (e) Marine Band: Channel 16 when 30 miles away.

Wardieh Terminal:
Max. draft at Terminal 30 ft.
Max. quantity which can be received through the sealine is 200 metric tons per hour.
Type of flange – 8 in. flange.
Pumping can be effected through a 10 in. submarine pipe-line.

AUTHORITY: Compagnie de Gestion et D'exploitation du Port de Beyrouth, B.P. 1490, Beirut, Lebanon. *Tel:* (01) 580211/16. *Cables:* Beyrouport-Beirut. *Contact:* J. Khazen, Port Director.

AGENT: Gulf Agency Co. (Lebanon) Ltd. All enquiries, telexes, cables and correspondence regarding agency appointment and agency arrangements that concern Lebanese ports to:
Gulf Agency Company Ltd., P.O.B. 61033, GR-151 10 Amaroussion, Greece. Tel: 6830613-17, after office hours 6722011. Telex: 214548, 216344, 218687 ("GAC GR"). Fax: 6830611.

CHEKAA (Including Enfeh Terminal): 34.20 N. 35.43 E. (See Plan)

See "General" before first port.

Port is used for cement loading and discharge of sulphates.

ANCHORAGE: Safe anchorage in Chekaa Bay.
MAX. SIZE: Max. d.w.t. 35,600 tons. Max. draft in calm weather 27 ft.
LOAD/DISCHARGE: Up to 4,000 tons cement and 2,500 tons coal per day.
TANKERS: *Enfeh Terminal:* Position: Lat. 34° 20′ 31″ N., Long. 35° 43′ 54″ E. Port is used to load and discharge gasoline and bitumen.
Anchorage: Safe anchorage in Chekaa Bay.
Max. size: Draft up to 20 ft.
Berthing: Using 2 anchors and moored stern to shore facilities. In event of swell vessel required to leave quay and anchor in bay.
Storage Capacity: 5,000 tons for gasoline. 2,500 tons for bitumen under construction.
Load/Discharge: Rate 150 t.p.h. Tankers to use stern discharge and communicate with shore 48 hours prior to arrival on VHF Channel 16.
Agent: Gefco.
REPORT: November 1982.
Slag is from time to time discharged at this port.

1. Max. draft permissible: 27 ft.
2. Length of berthing quay: about 40 m. – 45 m. Therefore vessels must do several shifts ahead and astern in order to discharge all holds.
3. Discharging by 2 shore cranes (1 fixed at quay and 1 mobile) usin grabs.
4. Daily quantity discharged: about 2500 – 3000 tons per weathe working day of 24 hours (receivers and stevedores workin 24 hours round the clock, subject weather permitting).
5. The quay is at an open road, not sheltered and well exposed t South Westerly winds.
6. Agency attendance was monopolised in Chekaa since 1975 (whe war started in Lebanon) and the only agents attending are:
   (a) Messrs. Kfoury, the Pilots of Chekaa for:
   The Societe des Ciments Libanais Sal Chekaa.
   (b) Mr. Paul Adem, for:
   The Societe Nationale de Cements Sal Chekaa, the compan who owns the above mentioned quay.

AGENT: See "Beirut".

RAS SELAATA: 34.17 N. 35.40 E.

See "General" before first port.

(A) LEBANON CHEMICAL CO. PLANT WHARF:
(B) SELA'ATA TERMINAL PORT:

(A) LEBANON CHEMICAL CO. PLANT WHARF:

LOCATION: Lat. 34° 16.2′ N., Long. 35° 39.2′ E.
Lebanon Chemical Co. Port is located to the South of Tripoli and used for dry and liquid chemical cargoes.
PILOTAGE: Pilotage is provided by the Company, and the Pilot meet vessels one mile to the S.W. of the quay.
ANCHORAGE: Good anchorage is available in Sela'ata Roads.
MAX. SIZE: Depth in manoeuvring area is 21 ft. Maximum permissib draft is restricted to 21 ft.
HEALTH: Health Authorities board in harbour. Health form obtainab from Agent. Owner should check with Agent with regard to any recen imposition of anti-epidemic regulations and requirements for additiona injections for crew members.
RADIO: Cables to and from Agent sent via Beirut Radio.
VHF: See "General".
BERTHING: One pier 90 m. long, suitable for vessels up to a maximu of 6,000 tonnes d.w.t.
STEVEDORES: Cargo handling is carried out by the Company's cre round the clock.
MEDICAL: Master to advise Agent by cable prior to arrival if medica attendance required.
DENSITY: 1026 – 1027.
FRESH WATER: May be available alongside pier.
FUEL: Diesel oil available by truck.
CONSULS: Most countries have consulates in nearby Tripoli.
AIRPORT: Kleiate (Tripoli) or Beirut.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summertime.
HOLIDAYS:

Holiday	*Date*	*Days*
New Year's Day	January 1st	1
Al-Adha (Karban Bairam)	varies	2
Ashoura	varies	1

GENERAL: Lebanon Chemical Co. have VHF set in managemen building. Call sign is "Pilot Lebanon Chemical Co.". It has a range o 35 miles and listens on VHF Channel 16 from 0630 hrs. to 1600 hrs. *Agent:* P. Adem may be contacted on VHF Channel 16 or through th Company.
Cables: Cables to Agents and Company are routed through Beiru Radio.

(B) SELA'ATA TERMINAL PORT:

LOCATION: Lat. 34° 16.97′ N., Long. 35° 39.87′ E.
Sela'ata Terminal Port is located to the South of Tripoli, and is use for dry, liquid, general cargoes and containers.
The entrance to the harbour and the channel entrance are restric to vessel's having a maximum draft of 13.0 m.
PILOTAGE: Agent arranges for qualified Pilot to meet vessels 2 mi N.W. of breakwater.
ANCHORAGE: Good anchorage available in Sela'ata Roads.
MAX. SIZE: Depth at entrance 13.0 m. Max. draft alongside qu 13.0 m.
HEALTH: See Section "A".
RADIO: Cables to and from Agent (ASLAC) via Beirut Radio (OGER
VHF: See "General".
TUGS: There is one tug at Sela'ata (250 h.p.). A second tug could made available upon request.

BERTHING: One pier about 140 m. long, 2 berths, 2 shore cranes and 1 grain unloader (250 t.p.h.), suitable for vessels up to 30,000 tonnes d.w.t.

STEVEDORES: No ETA to stevedores necessary. Working hours are 0700 hrs. – 1500 hrs. Overtime on Sundays and on official holidays.

MEDICAL: Master to advise Agent (ASLAC) by cable prior to arrival if medical attendance required.

TANKERS: *Liquid Cargoes:* A 6 in. connection is available at plant wharf with a length 800 m. and a discharge capacity of 200 t.p.h. Vessels to be equipped with a 6 in. discharge hose of 10 m. length.

DENSITY: 1026 – 1027.

FRESH WATER: May be available inside harbour premises.

FUEL: Diesel oil is available in trucks.

GANGWAY/DECK WATCHMEN: Recommended. Shore watchmen available round the clock.

OPENING/CLOSING HATCHES: For liners by stevedores, otherwise per agreement.

CUSTOMS: Available on request.

IDENTIFICATION CARDS: Due to prevailing situation, on shore passes issued to crew members.

CONSULS: Most countries have consulates in nearby Tripoli.

AIRPORT: Beirut or Kleiate (Tripoli).

TIME: GMT plus 2 hours. Summertime GMT plus 3 hours (15th June – 15th October).

HOLIDAYS: See Section "A".

GENERAL:

Agent : A. Sinno (Huiles et Derives) on Channel 16 (ZOUYOUT).
Cables : Cables to Agents routed through Beirut Radio (ASLAC).

VHF:
Equipment : Fixed Station sited in Terminal Building and used by Supervisor.
Call Sign : ZOUYOUT.
Range : Approximately 35 miles.
Frequency : Transmitting on Channel 16.
Receiving on all frequencies.
Watches : 0630 hrs. – 1430 hrs.

Mobile Station
Equipment : Portable, battery operated, carried aboard vessel with loading/discharging Supervisor.
Call Sign : ZOUYOUT.
Range : Approximately 2 miles.
Frequency : Transmitting on CB bands (Domestic).
Receiving on CB bands (Domestic).
Watches : Continuous, whilst vessel loading/discharging.

Note: The VHF system is not connected to the main telephone switchboard, and only selected shore stations have access to it.

AGENT: See "Beirut".

SIDON: 33.30 N. 35.21 E. (See Plan)

BERTHS NO'S. 1, 3 AND 4 HAVE BEEN TAKEN OUT OF SERVICE AND ALL MOORING BUOYS HAVE BEEN REMOVED. THE SUBMARINE LINE IS STILL THERE.

BOTH THE WHITE AND THE RED SEABUOYS ARE MISSING.

OPERATORS: Trans-Arabian Pipe-line Company, Sidon Terminal. The Company transports crude oil from Saudi Arabia via pipe-lines and exports from terminal South of Sidon (Saida). Terminal operates 24 hours a day, 7 days a week.

Advance Information: Prior to acceptance of nomination of vessels, Tapline requires advance information regarding maximum draft, vessel's equipment and location of manifold in reference to distance from the stern of the vessel, permanent ballast, simultaneous loading of cargo and discharging of ballast, etc. Acceptance or rejection will be made after evaluation of above data by Sidon Marine personnel.

FLAG: All vessels required to fly Lebanese Ensign on foremast during daylight hours. Lebanese flags may be obtained from ship's Agent.

LOCATION: Sidon Terminal is open, unsheltered roadstead, situated immediately North of Zahrani River, about 5 miles South of City of Sidon (Saida), Lebanon. It is approximately 35 miles South of Beirut, and 17 miles North of Tyre.

DESCRIPTION: Terminal's Tank Farm consists of 23 storage tanks situated East of terminal at 360 ft. (average) above sea level. Marine and administrative offices, a laboratory for testing stocks, 2 large and 2 small storage tanks all located within area just above sea level. An "L"-shaped pier for harbouring Company's marine craft extends approximately 1,000 ft. from shore near Southern end of berthing area.

NAVIGATIONAL AIDS: Radio beacon tower located 1,200 ft. back from beach, S.E of moorings. Occulting red light (about 30 flashes per minute) mounted on top, elevation 184 ft. above sea level; position Lat. 33° 30′ 04″ N., Long. 35° 20′ 31″ E. Tower also marked with 2 sets fixed red lights located respectively 45 ft. and 90 ft. below occulting red light. Radio beacon is automatic and operates on 24 hr. basis on frequency of 296.5 kHz, with "SAD" as the identifying call sign. It will signal 2 times over a 10-second period and then give a constant 1,000 cycle tone for 72 seconds. Tower is of cage-type construction, painted red and white. About 2.5 miles S.W. of terminal sea buoy and approximately 2 miles offshore is rocky shoal with approximately 32 ft. of water over it. Vessels approaching from Southward should keep offshore until radio beacon tower bears 100° true before hauling-in.

"Sailing Directions for the Mediterranean" (U.S. Navy Hydrographic Office Publication No. 154A Vol. IV) reads in part:

> "*Caution:* As the coast between Saida and Tyre, 20 miles South-South-westward, is bordered in places by rocks and shoal water extending as far as 1 mile offshore, it should not be approached closer than 1.5 miles, nor within depths of less than 16 fathoms."

During darkness terminal range lights and mooring buoy marker lights may be visible. These lights are located inside the restricted area.

A conspicuous water tank (painted aluminium) on a tower located Lat. 33° 29′ 27″ N., Long. 35° 21′ 10″ E., the top of which has elevation of 460 ft. above sea level. Location is seaward of centre oil storage tanks.

There are a number of smaller radio towers to N.W. and S.W. of beacon tower. South of terminal, at Medreco Refinery, is a conspicuous black stack located Lat. 33° 29′ 31″ N., Long. 35° 20′ 08″ E. A little further N.W. from this stack is a tall pipe painted aluminium with a flare on top at Lat. 33° 29′ 35″ N., Long. 35° 20′ 03″ E.

Berth Locations:
Berth No. 1 (7 buoys) Lat. 33° 30.8′ N., Long. 35° 19.9′ E.
Berth No. 3 (6 buoys) Lat. 33° 32.0′ N., Long. 35° 20.4′ E.
Berth No. 4 (5 buoys) Lat. 33° 32.4′ N., Long. 35° 20.8′ E.

DOCUMENTS:
Health Declaration: International Health Form to be filled out by Master on arrival.
Cargo Manifest: No cargo arrival manifest required, as same usually prepared by local Agent.
Clearance: No clearance required.
Crew List: 4 copies required on arrival.
Passenger Manifest: If any passengers on board.
Store List: 2 copies.
Bonded Store List: 2 copies. Present regulations at Sidon Terminal allow each seaman to retain in his possession a maximum of 40 cigarettes or the equivalent weight of tobacco or cigars. The balance of all smoking items must be collected and carefully listed prior arrival. This list will be checked by Customs before sealing lockers. If any discrepancies, vessel subject to a fine.

PILOTAGE: Vessels to be moored at Sidon will be boarded by Mooring Master of Company within 2 miles to seaward of terminal sea buoy. Mooring Master will advise Ship's Master on approaches to berth, mooring, unmooring, connecting and disconnecting submarine hoses and in all other operations within berthing area. All manoeuvring of ships within berthing area shall be done only in accordance with advice of a Tapline Mooring Master, subject to the understanding that in all cases and circumstances Master of the vessel being manoeuvred shall remain solely responsible, on behalf of vessel's owner, for safety and proper manoeuvring of vessel. Ship's Master or qualified deck officer must be on bridge at all times while ship is manoeuvring.

Vessels must have a pilot ladder safely and securely rigged, and all vessels over 45,000 d.w.t. should have an accommodation ladder rigged in combination with pilot ladder for safe boarding of Mooring Master and Government officials. Pilot ladder should be abaft and close to accommodation ladder so that Mooring Master, after climbing a few steps, can use accommodation ladder for remaining climb. Since hoses handled on port side at Sidon, it is advisable to rig ladders on starboard side. If at night, adequate lighting must be rigged over-side for Mooring Master to approach side of ship and climb ladder safely.

Note: Vessels having special rigs, such as hoisting equipment on short sections of pilot ladder, are not required to rig pilot/accommodation ladders per the above.

ANCHORAGE: For vessels awaiting berth, good anchorage just W.S.W. of terminal sea buoy in 16 to 20 fathoms, sandy bottom. Vessels should under no circumstances anchor North of terminal sea buoy as depths are excessive for safe anchoring.

RESTRICTIONS: Berthing and unberthing during daylight hours only.

Vessels must not arrive with more than 50,000 tons cargo on board.

MAX. SIZE: Berth No. 2, depth approx. 67 ft. Tankers up to 80,000 d.w.t. or approx. 55 ft. draft are considered max. size which should be handled during Winter months at Sidon, and then only if vessel meets all of below recommended requirements. Otherwise, vessels of over 80,000 d.w.t. should not be nominated for liftings at Sidon during period November-April. In Summertime max. 100,000 d.w.t.

Based on previous experience, sudden and severe storms of long duration are not expected from April through October. Vessels over 80,000 d.w.t. may, therefore be accommodated during this period. However, prior to acceptance of nomination of vessels over 80,000 d.w.t. Tapline requires advance information regarding max. draft, vessel's equipment and location of manifold in reference to distance from stern of vessel which should not exceed 450 ft. Acceptance or rejection will be made after evaluation of above data by Sidon Marine personnel.

Summary of Recommendations for Vessels over 40,000 d.w.t.:

1. Capable, efficient and reliable anchor windlass(es).
2. 15 shots on starboard chain – 13 shots on port chain are satisfactory.
3. Mooring wire winches, 1 on aft well deck, 3 on poop deck, 200 fathoms wire on each, with adequate number of manila or synthetic ropes to double up as needed.
4. Capability of lifting 16 in. hose string – 6.5 tons static weight.
5. Suitably located hang-off bits.
6. Capability of keeping vessel in a reasonable safe ballast condition (November-March) by permanent ballast or loading while deballasting, or a combination of both.
7. Ship's manifold located not more than 400 ft. from stern.

RADIO:

(a) Facilities. Tapline has own ship-to-shore radio telegraph, and VHF radio telephone station at terminal. This station is not open to commercial traffic. Services limited to traffic between Tapline and tankers within 3 days' sailing time from terminal. Messages to or from tanker agents classed as "Commercial" and must be routed via Radio Orient, a commercial radio station. Its call sign is ODR.

Radio Orient Beirut, call sign ODR, transmits (CW) on 8702 kHz and 13101 kHz simultaneously half-past each hour beginning at 0630 until 2130 hrs. GMT, the traffic list; 524 kHz each hour beginning at 0600 hrs. until 2100 hrs. GMT, the traffic list. Listens on 8534–8374 kHz and 12531–12561 kHz for replies and calls each hour from half-past the hour until the hour; 500 kHz 0600 to 2200 hrs. GMT and 425, 454, 468 and 480 kHz from the hour until half-past the hour for replies and calls. Keeps watch only between 0600–2200 hrs. GMT on 500 kHz.

(b) Advice of Arrival. It is important that ships establish radio contact with "ODR" when 3 days distant from Sidon and maintain this contact at regular intervals until just prior to arrival at the terminal. All ships should send a 72-hour ETA message to Tapline, giving the best estimate of ship's arrival time, a statement of bunker requirements and other relevant information. Shorter notice may result in berthing delay. Further ETA messages should be sent when vessel is 24 hours and 12 hours distant and to cover any other time changes occurring in the original ETA or those subsequent thereto. The 12-hour ETA should include a statement regarding "ship's readiness to load" on arrival, and time required to discharge clean ballast after ship is moored. A further contact when 4 hours away is desirable for exchange of weather data and mooring schedule. Vessels failing to give minimum of 12 hours arrival notice may be subject to delays in acceptance.

(c) Ship-to-Shore Communications. Ship-to-shore communications, while ships are in moorings, will be by portable VHF radio units used by the Mooring Master only. The use of the ship's radio station (except Channels 16-14) and/or battery charging equipment is prohibited for safety reasons during cargo transfer operations.

In the event of normal ship-to-shore communications failure, the (ship's) emergency whistle signal should be used.

VHF: Tapline VHF radio telephone system operates on international Channels 14 and 16, 156.7 MHz and 156.8 MHz respectively. Channel 16 used to establish contact while all traffic handled on Channel 14. Tapline guards these channels on a 24 hour basis, and contact can generally be made at distances up to 100 miles from terminal. Conversations on these channels will be carried out in English language only.

Mooring Master only will be in direct charge of portable VHF ship-to-shore radio communications.

HEALTH: Rules governing quarantine of vessels are same as found in other ports.

BERTHING: 7 buoys at Berth No. 2. Berths numbered 1 to 4 from South to North. Vessels moored on 1 heading (West) basis using both bow anchors with max. possible spread of anchors to increase ship's anchor beam holding components. Ship's stern moored to cylindrical buoys fitted with release hooks, using 7 ropes (or wires) to respective mooring buoys. Permanent moorings consist of 7 steel cylindrical buoys in each berth.

Certain mooring buoys in all berths fitted with 1.5 in. diameter preventer wires, one end of which is secured to mooring buoys. When required, other end is brought on board vessel by a messenger line after ship moored in position. Preventer wires supplemental to ship's regular moorings during adverse conditions. Ships should have chain stoppers for handling these wires.

BALLAST: Masters are warned that no dirty ballast or bilge water may be discharged within an area extending 100 nautical miles seaward of the Lebanese coastline. All pipe-lines, sea suctions, strainers and pumps that are to be used for the discharge of clean ballast must be flushed clean prior to entering the 100 mile zone. Except for oil retrieved under "load-on-top" procedures, Masters must assure themselves that all oil tanks, pipe-lines and pumps are free of all traces of oil.

The terminal has no facilities for receiving oily ballast. A vessel must have sufficient ballast for safe manoeuvring. However, by carefully watching the weather, especially in the Summer months, by frequent interchange of weather information and berthing instructions, and, by a knowledge of the behaviour of his own vessel, a Master may desire to arrive at the terminal with minimum ballast thereby lessening any possibility of infringement of the pollution restrictions of this section, and also reducing time in berth.

As soon as practicable after arrival and prior to acceptance, all the vessel's tanks will be inspected for evidence of oil in ballast tanks. Inspection will continue during discharge of ballast. If evidence of oil appears at either of these inspections, the ship must return at once to a point not less than 100 miles from the coastline and there accomplish the necessary tank cleaning. Any vessel required to return to a position at least 100 miles offshore for the purpose of discharging dirty ballast, cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered, and at the same time loses any priority held for loading. On return from sea, vessel will be entered for loading at the time of the second arrival, when a new Notice of Readiness will be tendered.

Vessels discharging dirty ballast within the prohibited 100 mile zone may be subjected to action by the Lebanese Government. In addition, ship's owners and charterers will be promptly notified of any violation.

Masters are also warned that ship's garbage or trash should not be dumped within 50 miles from the Lebanese coast.

LOADING: *(a) Readiness:* Tenders to load will normally be accepted and berths assigned to vessels in order of arrival, provided vessels have nominations for cargo valid at the time, carry clean ballast and are in all respects equipped and ready to moor. In event berthing delayed on account weather, vessels will ordinarily keep their loading priority in order of arrival. Vessels required to leave port area on account of weather (port closed), should keep in contact with terminal via VHF in order that they will be available when weather moderates. Company will make every effort to load vessels on arrival, or as promptly as berth is available, weather permitting. Notice of readiness will not be accepted unless vessel ready to load. Arrival time will be considered as time Mooring Master boards vessel underway or time vessel anchors, whichever occurs first.

(b) Connecting-up. Ships loaded by means of submarine pipe-line. Weight of the 16 in. hose in No. 2 Berth about 6.5 tons. Hoses lifted by ship's gear on port side. Detail of flange templates shown in drawing below. Ships should provide manifold fittings to allow connection to flanges shown in "Plan Section".

Mooring Master advises ship's personnel in lifting, connecting, disconnecting and lowering of hoses. A ship's deck officer must be present, and must direct ship's crew in all hose handling. There must be sufficient crew on deck to perform this work.

(c) Rates: Loading is by gravity flow from tank farm which is approximately 360 ft. above sea level. Loading rates as follow (approximate maximum):

	Rates (BPH)	
Berth	*With 1 Hose*	*With 2 Hoses*
2	40,000	70,000 (16 in. hoses)

Order save ship's time and to ballast vessel as quickly as possible as well as to make berth available for others, it is requested that ship receive oil as fast as it can be delivered, with due regard for safety. The removal of any restrictions, such as strainers, etc., is recommended.

DISCHARGING: Ships unloading crude or refined products in Tapline Seaberth must:

1. Be able to discharge at least 1,000 t.p.h.
2. Be equipped with centrifugal cargo pumps only. Piston pumps will NOT be accepted due to the damaging effect they have on the submarine hoses.
3. Ships without permanent ballast tanks must be able to discharge cargo and load ballast simultaneously.
4. Vessels must NOT strip (drain) their cargo tanks into the sealine. Air injected by this operation may cause the line to float and buckle.

Report: 1983. Cargo discharged through 8 in. line (old bunker line).

MEDICAL: Neither medical nor hospital facilities provided by Tapline. Private doctors and hospital facilities available at Sidon and Beirut. Agents acquainted with situation and can make necessary arrangements.

If unable make radio contact, then vessels requiring emergency medical assistance should hoist International Code Flag "W" in daylight and at night, send "W" (· – –) on blinker light to attract immediate attention, the same signal "W" (· – –) should be given on ship's whistle in either day or night hours. Signal should be repeated until acknowledged visually by either another ship in berth; from shore station or from Company launch. As soon as signal is received, terminal officials will advise ship's Agent as soon as possible of the emergency medical aid required.

DENSITY: Salinity of the sea is same as open Atlantic Ocean. Temperature ranges from 60°F. to 85°F. (15.6°C. to 29.4°C.) depending on season.

FRESH WATER: Not available.

FUEL: Bunker fuel loaded at rate of 3,000–5,000 bbls.p.h. through 8 in. deck hose. Bunker connection should be located near ship's cargo manifold. Ships calling at Sidon to load crude oil should arrange for bunker fuel nominations through one of the offtaker companies well in advance of arrival. Bunker fuel will not be delivered until Tapline has received a firm nomination. Bunker fuel will be loaded as promptly as circumstances permit, but Tapline assumes no liability for any delay incurred by a vessel in berthing or loading bunker fuel. Maritime lubricants available, through marketing representatives in Beirut by arrangement through Agents.

PRECAUTIONS: *(a) Valve Control.* Ship's valves must not be closed against the oil stream.

(b) Emergency Signal. When, and if normal ship-to-shore communications fail, the emergency signal to stop oil flow will be a continuous blast on ship's whistle, until oil ceases to flow. Steam or air should never be shut off from the whistle during loading. Whenever emergency whistle is used, all loading operations in all berths will be shut down until communications can be established with vessel giving the signal. For this reason, it is requested that ships in the area refrain from using their whistles for other purposes.

(c) Readiness to Leave Berth. Port is considered an "open roadstead" and under no circumstances may engine be shut down for repairs while ships moored in submarine berths. Vessels in submarine berths must be able to clear, and shall clear immediately upon advice of Mooring Master. Ship's engine and gear must therefore be ready at all times with full power for immediate use.

(d) Loading and Deballasting Simultaneously. Properly equipped vessels will be encouraged to discharge clean ballast and load oil simultaneously. This capability is especially necessary during unsettled weather order keep vessel reasonably ballasted.

CONSULS: Italy and Norway. Consular or diplomatic representatives for most nations maintain offices in Beirut.

REPAIRS: No facilities.

SURVEYORS: Available from Beirut. Saybolt also available.

OFFICIALS: Lebanese officials, such as Customs Director, Quarantine Officer, Immigration Officer, Captain of the Port and Police, stationed at Sidon. Should Customs guards be stationed on board while in berth, it is expected that ship will provide food for these guards and other officials.

STORING: See "Prelims".

1. Barge only.
2. No storing during loading/ discharging.
3. Open sea-berth.
4. Open sea-berth.
6. No.

SHORE LEAVE: Arranged between Agent and Lebanese Security Officer aboard vessel. Ship's personnel (other than emergency medical cases) not allowed to disembark at terminal. All personnel going ashore must land at Sidon where small boats must cross a shallow and sometimes impassable bar. Delays have been caused to vessels whose personnel have been unable to rejoin their ship. Sufficient personnel must be aboard at all times for letting go lines so that vessel can clear berth whenever required.

GENERAL: *(a) Mooring Wires and Winches.* Use of mooring wires to powered drums for all vessels calling at Sidon is strongly recommended. Because there are no mooring tugs available, a ship's ability to moor during marginal weather conditions is dependent upon its ability to warp itself into position. Vessels with capable wire winches and deck mooring equipment that are able to place 1 or 2 mooring ropes on a windward mooring buoy, usually able to moor without difficulty. Vessels over 40,000 d.w.t. should have mooring wires to powered drums, 1 on aft well deck and 3 on poop deck. The wires should be 200 fathoms in length and so secured as to be easily let go from ship if necessary.

(b) Ropes. Vessels should have 2 suitable, best quality mooring ropes of 200 fathoms each located on aft part of after well deck for use on either port or starboard side, 3 (min.) suitable, best quality mooring ropes of 200 fathoms each and 3 additional ropes of 150 fathoms each on poop deck plus properly located warping winches and bitts. Vessels equipped with mooring wire winches on poop deck may reduce required "additional" ropes accordingly. Wires are not used on port side of aft well deck due to possible fouling of wire with hose or pipe-line underwater facilities. In this position a suitable, best quality mooring rope must be used. 2 ropes of 200 fathoms each recommended, to be used on either side while mooring, and used on port side only for securing ship in berth.

SHIPMASTER'S REPORT: February 1983.

Tankers: The following notices are presented to the Master on arrival at the terminal.

TRANS-ARABIAN PIPE-LINE COMPANY
SIDON, Lebanon
Tanker Loading Advice

Master . . . . 19...........

Your vessel is scheduled to moor in Berth No.............at . . . . hours..............................19........

A Mooring Master will board your vessel prior to this hour. Engines, deck machinery, mooring lines and crew should be in readiness to proceed to berth.

The cargo (a 5 ton lift) and fuel hose will be picked up on the PORT SIDE.

The Mooring Master advises ship's personnel regarding the lifting and connecting of the submarine hoses, and after loading is completed, regarding the disconnecting and lowering. In this connection, he acts in an advisory capacity and assumes no liability on behalf of the Company. A ship's deck officer must be present, and he must approve the hose connection on board. The ship's crew will do the actual connecting and disconnecting of the hose.

The Mooring Master will be in charge of all ship to shore communications.

One prolonged blast of ship's whistle is the emergency signal to shore to stop the flow of oil to the ship and apply vacuum on the submarine lines.

SHIPS MUST NOT CLOSE VALVES AGAINST INCOMING OIL. Ships will be held liable for damage resulting from such closures.

Vessels in submarine berths must be able to clear immediately upon instructions from the Mooring Master.

CAUTION: It is the ship Master's responsibility to see that no oil (crude, bunker C, diesel or bilges) is pumped or spilled overboard from his ship either in the vicinity of the Company's Terminal area or within the area of 100 miles from the Lebanese coast. In the event of any oil spillage or loss from your vessel as the result of any act or omission of the vessel, such as but not limited to, pumping of oily water over side from ballast or bilge, or oil spill during loading, the vessel shall be responsible for all costs and expenses of clean up, or for any damages to property or injury to persons resulting from such spillage or oil loss. Tapline reserves the right to take all reasonable measures to clean up any resulting pollution or contamination on land or sea and will charge to vessel for all costs and expenses incurred thereby. In addition, since Tapline, as operator of the Terminal, is responsible (as a guarantor of the ship) for any damages to property of or injury to third persons, resulting from such spillages or oil losses, in the event Tapline pays or settles valid claims of third parties for such damages or injury, Tapline shall have the right to recover from the vessel all costs and expenses arising from its handling, payment and settlement of such third party claims.

The Port Authorities are very strict in this matter and a written report is submitted to ship's owners. WELL DECK SCUPPERS MUST BE PLUGGED DURING LOADING.

Please sign the attached duplicate of this notice, acknowledging receipt of same.

TRANS-ARABIAN PIPE LINE COMPANY.

TRANS-ARABIAN PIPE LINE COMPANY
SIDON, Lebanon

Master . . . . 19.........
Sidon, Lebanon
Dear Sir,

It is the ship Master's responsibility to assure that no oil including without limitation crude, bunker C, diesel or bilges is pumped or spilled overboard from his *vessel* in the vicinity of the Company's Terminal area or within the Prohibited Zone offshore Lebanon as defined in the International Convention for the Prevention of Pollution of the Sea by Oil, 1954, as amended in 1962. In the event of any oil spillage or loss from your vessel including but not limited to spillage due to pumping of oily water over the side from ballast or bilge or oil spill during loading, the vessel and her owners, operators, *Agents, and Master* shall be responsible for all costs and expenses of cleanup and for any injury to persons or damage to property, *including Tapline employees and property*, resulting from such oil spillage or loss. Tapline reserves the right to take all reasonable measures to clean up any resulting pollution or contamination on land or sea, but only as a contractor on behalf of your vessel and/or her owners, operators, *Agents or Master* and will charge the vessel and/or her owners, operators, *Agents or Master* for all costs and expenses incurred thereby. Tapline, as operator of the terminal, is responsible as a guarantor of the ship for any injury to third persons or damage to property resulting from such oil spillage or losses. The Port Authorities are very strict in this matter and a written report is submitted to *the vessel's owners, operators, Agents or Master* for any such incidents. In the event Tapline settles or is required to pay valid claims of third parties for such injury or damage, Tapline shall have the right to recover from the vessel and/or from her owners, operators, *Agents or Master* all costs and expenses arising from its handling, settlement and payment of such third party claims.

Please sign and return the attached duplicate of this notice acknowledging receipt of same.

TRANS-ARABIAN PIPE LINE COMPANY.

AUTHORITY: 1. Zahrani Terminal, Lebanon, P.O.Box 28, Sidon, Lebanon.

2. Trans-Arabian Pipeline Company, P.O.Box 11-1348, Beirut, Lebanon. *Tel:* Beirut 341270-5. *Telex:* 20769 Le Taplin. *Cables:* Tapline Beirut. *Contact:* Captain K. E. Hopen, Asst. Terminal Superintendent.

AGENT: See "Beirut".

TRIPOLI: 34.28 N. 35.49 E. (See Plan)

(a) DRY-CARGO PORT (b) OIL TERMINAL

(a) DRY-CARGO PORT.

Manifests should be visaed by Lebanese Consul at ports of shipment or at any port *en route* where there is a Lebanese Consul. If on account of non-existence Lebanese Consul at ports of shipment or at any ports *en route* the manifests are not visaed, then such consular visa dues are collected at Beirut.

Non-Liner vessels calling at Tripoli, are to present on arrival to the local Customs' authorities, one copy of each manifest of cargo on board (even "IN BALLAST" manifests), DULY STAMPED AND SIGNED by the Customs' Authorities at the Loading Ports.

Otherwise, the vessel is subjected to a Customs' FINE.

DOCUMENTS:

1 Legalised copy of Cargo Manifests.
5 copies of Cargo Manifests.
2 Store Lists.
5 Passenger Lists.
2 Lists of Cigarettes and Tobacco (see "Customs Allowances").

In addition to documents listed, 2 copies of each Bill of Lading are to be handed over on arrival to the Agents, for Local Customs' Authorities control and check.

PILOTAGE: Compulsory. Agent arranges with Harbour Master, therefore keep Agent closely advised ETA. Harbour Master may also be contacted on VHF Channel 16.

Pilot boarding position: Lat. 34° 29.6′ N., Long. 35° 49.5′ E.

APPROACHES: Sunken wreck in position Lat. 34° 30′ N., Long. 35° 49′ E.

Depth in channel 9.0 m.

ANCHORAGE: Good anchorage.

MAX. SIZE: Max. LOA 150 m. (occasionally 175 m.). Max. draft alongside berth 22 ft. 6 in.

HEALTH: Health Authorities board in roads. Health form obtainable from Agent or doctor. Yellow Fever Certificates required for ships coming from Far East and Red Sea. Owners should check with Agents respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members.

RADIO: Cables via Beirut Radio to and from Agent.

VHF: Harbour Master on Channels 16 and 6.

BERTHING: New pier about 600 m. length. 2 berths. 20 cranes, capacities 5 tons – 100 tons. 2 forklifts with capacity 20 tons each. Lighters available for discharging alongside vessel. Ship's gear often used for discharging. There is a grain silo with capacity of 4,000 tonnes. 30 steel barges of 350 tons capacity each. 40 wooden and steel barges of 200 tons capacity each. All cranes, forklift and barges are privately owned. 50 ton floating crane available, owned by port company.

STEVEDORES: Ordered by Agent. No ETA to stevedores necessary. Working hours, 0700 – 1500, otherwise overtime included on Sundays and on official holidays.

MEDICAL: Master to advise Agent by cable prior to arrival if medical attendance required. Hospitals available.

DENSITY: 1025.

FRESH WATER: Available by barge.

FUEL: Available alongside by tanker trucks.

REPAIRS: Possible.

GANGWAY/DECK WATCHMEN: Available and recommended.

OPENING/CLOSING HATCHES: For liners by stevedores, otherwise per agreement.

CUSTOMS ALLOWANCES: Tobacco. 40 cigarettes per crew member. Customs very strict, checking crew cabins. Regulations are as follows:

1. That the quantity of tobacco to be allowed on board vessels upon their arrival at a Lebanese port will be fixed on the basis of 2 packets per crew member, passenger per day, and to be calculated on a maximum period of 4 months, if the vessel emanates from an American, Asian or African port – not Central Africa; and for 2 months if the vessel's last port of call is in Europe, Central Africa or Mediterranean, which will be deducted from the quantity, and on the same basis the consumption by the crew members and passengers during their trip, and this to start from the last port of call until arrival at a Lebanese port.

13. When the discharge process has been completed and all formalities done, hose disconnected and mooring ropes released, the tanker, using its anchor to move forward, shall leave the mooring place immediately and clear a suitable distance off marine installations without using the propeller.
14. Should weather conditions worsen during discharge operations, the Superintendent shall have the right to disconnect the hose and request Shipmaster to leave discharge berth immediately for protection of human lives, installations and ship.
15. All harm befalling divers and/or company workmen during discharge activities shall be at the tanker's expense as long as these men are on board the tanker.
16. Both tanker and company shall be prepared to tie-in the discharge hose within 6 hours period effective from the time mooring at company's berth has been performed by Beirut Pilot.
17. Master is requested to give 72/48/24 hours' pre-arrival notice through "Radio Orient" to our cable address "Geochammas Beirut".

II GENERAL CONDITIONS

1. Details of tanker arrival and discharge must be arranged beforehand. Should two tankers arrive at the terminal preference shall be accorded the tanker that has arrived first.
   In those cases where a Government-bound tanker comes in for unloading at the same time as another tanker is discharging at our installations, no demurrage shall be due by the company.
2. Quantities received are those measured in our tanks. The company shall not be responsible for any shortage due to leakage or otherwise, notwithstanding the fact that the company shall spare no effort to avoid any such loss.
3. It is clearly understood that all discharge activities such as anchorage, discharge, material receiving, storage, etc. are for the responsibility and expense of the Government. It is likewise agreed that all damage which may befall our marine installations, tanks and the company's other installations at Dora, irrespective of cause, even if it be a force-majeure, are the responsibility of the Government as the company shall then be working in accordance with the Government's request and for its account.
4. All port dues and other charges connected with the tanker or the cargo are for the Government expense.
5. All expense for products delivered by tank trucks are for the account of the receiver.
6. Under all circumstances the company shall be held free of any responsibility whether for reasons mentioned above or omitted. It is likewise not responsible in all instances where the terms "cas fortuit, force majeure" and applicable.
7. The company may be contacted through the following means:
   (a) Radio Orient Ogero.
   (b) Telex: 22259 Menira/20816 Mecham/20112 Ctcto.
   (c) Telegram: Geochammas-Beirut.
   (d) Tel: 894.077 (working hours: 0800 – 1400 hrs.)
   (e) Marine Band: Channel 16 when 30 miles away.

Wardieh Terminal:
Max. draft at Terminal 30 ft.
Max. quantity which can be received through the sealine is 200 metric tons per hour.
Type of flange – 8 in. flange.
Pumping can be effected through a 10 in. submarine pipe-line.

AUTHORITY: Compagnie de Gestion et D'exploitation du Port de Beyrouth, B.P. 1490, Beirut, Lebanon. *Tel:* (01) 580211/16. *Cables:* Beyrouport-Beirut. *Contact:* J. Khazen, Port Director.

AGENT: Gulf Agency Co. (Lebanon) Ltd. All enquiries, telexes, cables and correspondence regarding agency appointment and agency arrangements that concern Lebanese ports to:
Gulf Agency Company Ltd., P.O.B. 61033, GR-151 10 Amaroussion, Greece. Tel: 6830613-17, after office hours 6722011. Telex: 214548, 216344, 218687 ("GAC GR"). Fax: 6830611.

CHEKAA (Including Enfeh Terminal): 34.20 N. 35.43 E.

(See Plan)

See "General" before first port.

Port is used for cement loading and discharge of sulphates.
ANCHORAGE: Safe anchorage in Chekaa Bay.
MAX. SIZE: Max. d.w.t. 35,600 tons. Max. draft in calm weather 27 ft.
LOAD/DISCHARGE: Up to 4,000 tons cement and 2,500 tons coal per day.
TANKERS: *Enfeh Terminal:* Position: Lat. 34° 20′ 31″ N., Long. 35° 43′ 54″ E. Port is used to load and discharge gasoline and bitumen.
Anchorage: Safe anchorage in Chekaa Bay.
Max. size: Draft up to 20 ft.
Berthing: Using 2 anchors and moored stern to shore facilities. In event of swell vessel required to leave quay and anchor in bay.
Storage Capacity: 5,000 tons for gasoline. 2,500 tons for bitumen under construction.
Load/Discharge: Rate 150 t.p.h. Tankers to use stern discharge and communicate with shore 48 hours prior to arrival on VHF Channel 16.
Agent: Gefco.
REPORT: November 1982.
Slag is from time to time discharged at this port.

1. Max. draft permissible: 27 ft.
2. Length of berthing quay: about 40 m. – 45 m. Therefore vessels must do several shifts ahead and astern in order to discharge all holds.
3. Discharging by 2 shore cranes (1 fixed at quay and 1 mobile) usi grabs.
4. Daily quantity discharged: about 2500 – 3000 tons per weath working day of 24 hours (receivers and stevedores work 24 hours round the clock, subject weather permitting).
5. The quay is at an open road, not sheltered and well exposed South Westerly winds.
6. Agency attendance was monopolised in Chekaa since 1975 (whe war started in Lebanon) and the only agents attending are:
   (a) Messrs. Kfoury, the Pilots of Chekaa for:
   The Societe des Ciments Libanais Sal Chekaa.
   (b) Mr. Paul Adem, for:
   The Societe Nationale de Cements Sal Chekaa, the compa who owns the above mentioned quay.

AGENT: See "Beirut".

RAS SELAATA: 34.17 N. 35.40 E.

See "General" before first port.

(A) LEBANON CHEMICAL CO. PLANT WHARF:
(B) SELA'ATA TERMINAL PORT:

(A) LEBANON CHEMICAL CO. PLANT WHARF:

LOCATION: Lat. 34° 16.2′ N., Long. 35° 39.2′ E.
Lebanon Chemical Co. Port is located to the South of Tripoli and used for dry and liquid chemical cargoes.
PILOTAGE: Pilotage is provided by the Company, and the Pilot mee vessels one mile to the S.W. of the quay.
ANCHORAGE: Good anchorage is available in Sela'ata Roads.
MAX. SIZE: Depth in manoeuvring area is 21 ft. Maximum permissib draft is restricted to 21 ft.
HEALTH: Health Authorities board in harbour. Health form obtainab from Agent. Owner should check with Agent with regard to any rece imposition of anti-epidemic regulations and requirements for addition injections for crew members.
RADIO: Cables to and from Agent sent via Beirut Radio.
VHF: See "General".
BERTHING: One pier 90 m. long, suitable for vessels up to a maximu of 6,000 tonnes d.w.t.
STEVEDORES: Cargo handling is carried out by the Company's cre round the clock.
MEDICAL: Master to advise Agent by cable prior to arrival if medic attendance required.
DENSITY: 1026 – 1027.
FRESH WATER: May be available alongside pier.
FUEL: Diesel oil available by truck.
CONSULS: Most countries have consulates in nearby Tripoli.
AIRPORT: Kleiate (Tripoli) or Beirut.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summertime.
HOLIDAYS:

Holiday	*Date*	*Days*
New Year's Day	January 1st	1
Al-Adha (Karban Bairam)	varies	2
Ashoura	varies	1
New Year (Islamic)	varies	1

Christmas Day	December 25th	1

GENERAL: Lebanon Chemical Co. have VHF set in managem building. Call sign is "Pilot Lebanon Chemical Co.". It has a range 35 miles and listens on VHF Channel 16 from 0630 hrs. to 1600 hrs *Agent:* P. Adem may be contacted on VHF Channel 16 or through Company.
Cables: Cables to Agents and Company are routed through Be Radio.

(B) SELA'ATA TERMINAL PORT:

LOCATION: Lat. 34° 16.97′ N., Long. 35° 39.87′ E.
Sela'ata Terminal Port is located to the South of Tripoli, and is us for dry, liquid, general cargoes and containers.
The entrance to the harbour and the channel entrance are restric to vessel's having a maximum draft of 13.0 m.
PILOTAGE: Agent arranges for qualified Pilot to meet vessels 2 mi N.W. of breakwater.
ANCHORAGE: Good anchorage available in Sela'ata Roads.
MAX. SIZE: Depth at entrance 13.0 m. Max. draft alongside qu 13.0 m.
HEALTH: See Section "A".
RADIO: Cables to and from Agent (ASLAC) via Beirut Radio (OGER
VHF: See "General".
TUGS: There is one tug at Sela'ata (250 h.p.). A second tug cou made available upon request.

THING: One pier about 140 m. long, 2 berths, 2 shore cranes and n unloader (250 t.p.h.), suitable for vessels up to 30,000 tonnes

VEDORES: No ETA to stevedores necessary. Working hours are hrs. – 1500 hrs. Overtime on Sundays and on official holidays.
ICAL: Master to advise Agent (ASLAC) by cable prior to arrival if ical attendance required.
KERS: *Liquid Cargoes:* A 6 in. connection is available at plant wharf a length 800 m. and a discharge capacity of 200 t.p.h. Vessels to quipped with a 6 in. discharge hose of 10 m. length.
SITY: 1026 – 1027.
ESH WATER: May be available inside harbour premises.
L: Diesel oil is available in trucks.
NGWAY/DECK WATCHMEN: Recommended. Shore watchmen ilable round the clock.
ENING/CLOSING HATCHES: For liners by stevedores, otherwise agreement.
STOMS: Available on request.
ENTIFICATION CARDS: Due to prevailing situation, on shore passes ued to crew members.
NSULS: Most countries have consulates in nearby Tripoli.
RPORT: Beirut or Kleiate (Tripoli).
ME: GMT plus 2 hours. Summertime GMT plus 3 hours (15th June – h October).
LIDAYS: See Section "A".
ENERAL:
ent : A. Sinno (Huiles et Derives) on Channel 16 (ZOUYOUT).
bles : Cables to Agents routed through Beirut Radio (ASLAC).

HF:
Equipment : Fixed Station sited in Terminal Building and used by Supervisor.
Call Sign : ZOUYOUT.
Range : Approximately 35 miles.
Frequency : Transmitting on Channel 16.
Receiving on all frequencies.
Watches : 0630 hrs. – 1430 hrs.

obile Station
Equipment : Portable, battery operated, carried aboard vessel with loading/discharging Supervisor.
Call Sign : ZOUYOUT.
Range : Approximately 2 miles.
Frequency : Transmitting on CB bands (Domestic).
Receiving on CB bands (Domestic).
Watches : Continuous, whilst vessel loading/discharging.

ote: The VHF system is not connected to the main telephone itchboard, and only selected shore stations have access to it.

GENT: See "Beirut".

IDON: 33.30 N. 35.21 E. (See Plan)

ERTHS NO'S. 1, 3 AND 4 HAVE BEEN TAKEN OUT OF SERVICE ND ALL MOORING BUOYS HAVE BEEN REMOVED. THE UBMARINE LINE IS STILL THERE.
BOTH THE WHITE AND THE RED SEABUOYS ARE MISSING.

PERATORS: Trans-Arabian Pipe-line Company, Sidon Terminal. The ompany transports crude oil from Saudi Arabia via pipe-lines and xports from terminal South of Sidon (Saida). Terminal operates 4 hours a day, 7 days a week.
dvance Information: Prior to acceptance of nomination of vessels, apline requires advance information regarding maximum draft, vessel's quipment and location of manifold in reference to distance from the tem of the vessel, permanent ballast, simultaneous loading of cargo nd discharging of ballast, etc. Acceptance or rejection will be made fter evaluation of above data by Sidon Marine personnel.
LAG: All vessels required to fly Lebanese Ensign on foremast during aylight hours. Lebanese flags may be obtained from ship's Agent.
OCATION: Sidon Terminal is open, unsheltered roadstead, situated mmediately North of Zahrani River, about 5 miles South of City of Sidon Saida), Lebanon. It is approximately 35 miles South of Beirut, and 7 miles North of Tyre.
ESCRIPTION: Terminal's Tank Farm consists of 23 storage tanks ituated East of terminal at 360 ft. (average) above sea level. Marine nd administrative offices, a laboratory for testing stocks, 2 large and 2 mall storage tanks all located within area just above sea level. An "L"-haped pier for harbouring Company's marine craft extends pproximately 1,000 ft. from shore near Southern end of berthing area.
AVIGATIONAL AIDS: Radio beacon tower located 1,200 ft. back from each, S.E of moorings. Occulting red light (about 30 flashes per minute) ounted on top, elevation 184 ft. above sea level; position Lat. 3° 30′ 04″ N., Long. 35° 20′ 31″ E. Tower also marked with 2 sets fixed ed lights located respectively 45 ft. and 90 ft. below occulting red light. adio beacon is automatic and operates on 24 hr. basis on frequency f 296.5 kHz, with "SAD" as the identifying call sign. It will signal 2 times ver a 10-second period and then give a constant 1,000 cycle tone for 2 seconds. Tower is of cage-type construction, painted red and white. bout 2.5 miles S.W. of terminal sea buoy and approximately 2 miles ffshore is rocky shoal with approximately 32 ft. of water over it.

Vessels approaching from Southward should keep offshore until radio beacon tower bears 100° true before hauling-in.

"Sailing Directions for the Mediterranean" (U.S. Navy Hydrographic Office Publication No. 154A Vol. IV) reads in part:

> "*Caution:* As the coast between Saida and Tyre, 20 miles South-South-westward, is bordered in places by rocks and shoal water extending as far as 1 mile offshore, it should not be approached closer than 1.5 miles, nor within depths of less than 16 fathoms."

During darkness terminal range lights and mooring buoy marker lights may be visible. These lights are located inside the restricted area.

A conspicuous water tank (painted aluminium) on a tower located Lat. 33° 29′ 27″ N., Long. 35° 21′ 10″ E., the top of which has elevation of 460 ft. above sea level. Location is seaward of centre oil storage tanks.

There are a number of smaller radio towers to N.W. and S.W. of beacon tower. South of terminal, at Medreco Refinery, is a conspicuous black stack located Lat. 33° 29′ 31″ N., Long. 35° 20′ 08″ E. A little further N.W. from this stack is a tall pipe painted aluminium with a flare on top at Lat. 33° 29′ 35″ N., Long. 35° 20′ 03″ E.

Berth Locations:
Berth No. 1 (7 buoys) Lat. 33° 30.8′ N., Long. 35° 19.9′ E.
Berth No. 3 (6 buoys) Lat. 33° 32.0′ N., Long. 35° 20.4′ E.
Berth No. 4 (5 buoys) Lat. 33° 32.4′ N., Long. 35° 20.8′ E.

DOCUMENTS:
Health Declaration: International Health Form to be filled out by Master on arrival.
Cargo Manifest: No cargo arrival manifest required, as same usually prepared by local Agent.
Clearance: No clearance required.
Crew List: 4 copies required on arrival.
Passenger Manifest: If any passengers on board.
Store List: 2 copies.
Bonded Store List: 2 copies. Present regulations at Sidon Terminal allow each seaman to retain in his possession a maximum of 40 cigarettes or the equivalent weight of tobacco or cigars. The balance of all smoking items must be collected and carefully listed prior arrival. This list will be checked by Customs before sealing lockers. If any discrepancies, vessel subject to a fine.

PILOTAGE: Vessels to be moored at Sidon will be boarded by Mooring Master of Company within 2 miles to seaward of terminal sea buoy. Mooring Master will advise Ship's Master on approaches to berth, mooring, unmooring, connecting and disconnecting submarine hoses and in all other operations within berthing area. All manoeuvring of ships within berthing area shall be done only in accordance with advice of a Tapline Mooring Master, subject to the understanding that in all cases and circumstances Master of the vessel being manoeuvred shall remain solely responsible, on behalf of vessel's owner, for safety and proper manoeuvring of vessel. Ship's Master or qualified deck officer must be on bridge at all times while ship is manoeuvring.

Vessels must have a pilot ladder safely and securely rigged, and all vessels over 45,000 d.w.t. should have an accommodation ladder rigged in combination with pilot ladder for safe boarding of Mooring Master and Government officials. Pilot ladder should be abaft and close to accommodation ladder so that Mooring Master, after climbing a few steps, can use accommodation ladder for remaining climb. Since hoses handled on port side at Sidon, it is advisable to rig ladders on starboard side. If at night, adequate lighting must be rigged over-side for Mooring Master to approach side of ship and climb ladder safely.
Note: Vessels having special rigs, such as hoisting equipment on short sections of pilot ladder, are not required to rig pilot/accommodation ladders per the above.

ANCHORAGE: For vessels awaiting berth, good anchorage just W.S.W. of terminal sea buoy in 16 to 20 fathoms, sandy bottom. Vessels should under no circumstances anchor North of terminal sea buoy as depths are excessive for safe anchoring.

RESTRICTIONS: Berthing and unberthing during daylight hours only.

Vessels must not arrive with more than 50,000 tons cargo on board.

MAX. SIZE: Berth No. 2, depth approx. 67 ft. Tankers up to 80,000 d.w.t. or approx. 55 ft. draft are considered max. size which should be handled during Winter months at Sidon, and then only if vessel meets all of below recommended requirements. Otherwise, vessels of over 80,000 d.w.t. should not be nominated for liftings at Sidon during period November-April. In Summertime max. 100,000 d.w.t.

Based on previous experience, sudden and severe storms of long duration are not expected from April through October. Vessels over 80,000 d.w.t. may, therefore be accommodated during this period. However, prior to acceptance of nomination of vessels over 80,000 d.w.t. Tapline requires advance information regarding max. draft, vessel's equipment and location of manifold in reference to distance from stern of vessel which should not exceed 450 ft. Acceptance or rejection will be made after evaluation of above data by Sidon Marine personnel.

Summary of Recommendations for Vessels over 40,000 d.w.t.:

1. Capable, efficient and reliable anchor windlass(es).
2. 15 shots on starboard chain – 13 shots on port chain are satisfactory.
3. Mooring wire winches, 1 on aft well deck, 3 on poop deck, 200 fathoms wire on each, with adequate number of manila or synthetic ropes to double up as needed.
4. Capability of lifting 16 in. hose string – 6.5 tons static weight.
5. Suitably located hang-off bits.
6. Capability of keeping vessel in a reasonable safe ballast condition (November-March) by permanent ballast or loading while deballasting, or a combination of both.
7. Ship's manifold located not more than 400 ft. from stern.

RADIO:
(a) Facilities. Tapline has own ship-to-shore radio telegraph, and VHF radio telephone station at terminal. This station is not open to commercial traffic. Services limited to traffic between Tapline and tankers within 3 days' sailing time from terminal. Messages to or from tanker agents classed as "Commercial" and must be routed via Radio Orient, a commercial radio station. Its call sign is ODR.

Radio Orient Beirut, call sign ODR, transmits (CW) on 8702 kHz and 13101 kHz simultaneously half-past each hour beginning at 0630 until 2130 hrs. GMT, the traffic list; 524 kHz each hour beginning at 0600 hrs. until 2100 hrs. GMT, the traffic list. Listens on 8534–8374 kHz and 12531–12561 kHz for replies and calls each hour from half-past the hour until the hour; 500 kHz 0600 to 2200 hrs. GMT and 425, 454, 468 and 480 kHz from the hour until half-past the hour for replies and calls. Keeps watch only between 0600–2200 hrs. GMT on 500 kHz.

(b) Advice of Arrival. It is important that ships establish radio contact with "ODR" when 3 days distant from Sidon and maintain this contact at regular intervals until just prior to arrival at the terminal. All ships should send a 72-hour ETA message to Tapline, giving the best estimate of ship's arrival time, a statement of bunker requirements and other relevant information. Shorter notice may result in berthing delay. Further ETA messages should be sent when vessel is 24 hours and 12 hours distant and to cover any other time changes occurring in the original ETA or those subsequent thereto. The 12-hour ETA should include a statement regarding "ship's readiness to load" on arrival, and time required to discharge clean ballast after ship is moored. A further contact when 4 hours away is desirable for exchange of weather data and mooring schedule. Vessels failing to give minimum of 12 hours arrival notice may be subject to delays in acceptance.

(c) Ship-to-Shore Communications. Ship-to-shore communications, while ships are in moorings, will be by portable VHF radio units used by the Mooring Master only. The use of the ship's radio station (except Channels 16-14) and/or battery charging equipment is prohibited for safety reasons during cargo transfer operations.

In the event of normal ship-to-shore communications failure, the (ship's) emergency whistle signal should be used.

VHF: Tapline VHF radio telephone system operates on international Channels 14 and 16, 156.7 MHz and 156.8 MHz respectively. Channel 16 used to establish contact while all traffic handled on Channel 14. Tapline guards these channels on a 24 hour basis, and contact can generally be made at distances up to 100 miles from terminal. Conversations on these channels will be carried out in English language only.

Mooring Master only will be in direct charge of portable VHF ship-to-shore radio communications.

HEALTH: Rules governing quarantine of vessels are same as found in other ports.

BERTHING: 7 buoys at Berth No. 2. Berths numbered 1 to 4 from South to North. Vessels moored on 1 heading (West) basis using both bow anchors with max. possible spread of anchors to increase ship's anchor beam holding components. Ship's stern moored to cylindrical buoys fitted with release hooks, using 7 ropes (or wires) to respective mooring buoys. Permanent moorings consist of 7 steel cylindrical buoys in each berth.

Certain mooring buoys in all berths fitted with 1.5 in. diameter preventer wires, one end of which is secured to mooring buoys. When required, other end is brought on board vessel by a messenger line after ship moored in position. Preventer wires supplemental to ship's regular moorings during adverse conditions. Ships should have chain stoppers for handling these wires.

BALLAST: Masters are warned that no dirty ballast or bilge water may be discharged within an area extending 100 nautical miles seaward of the Lebanese coastline. All pipe-lines, sea suctions, strainers and pumps that are to be used for the discharge of clean ballast must be flushed clean prior to entering the 100 mile zone. Except for oil retrieved under "load-on-top" procedures, Masters must assure themselves that all oil tanks, pipe-lines and pumps are free of all traces of oil.

The terminal has no facilities for receiving oily ballast. A vessel must have sufficient ballast for safe manoeuvring. However, by carefully watching the weather, especially in the Summer months, by frequent interchange of weather information and berthing instructions, and, by a knowledge of the behaviour of his own vessel, a Master may desire to arrive at the terminal with minimum ballast thereby lessening any possibility of infringement of the pollution restrictions of this section, and also reducing time in berth.

As soon as practicable after arrival and prior to acceptance, all the vessel's tanks will be inspected for evidence of oil in ballast tanks. Inspection will continue during discharge of ballast. If evidence of oil appears at either of these inspections, the ship must return at once to a point not less than 100 miles from the coastline and there accomplish the necessary tank cleaning. Any vessel required to return to a position at least 100 miles offshore for the purpose of discharging dirty ballast, cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered, and at the same time loses any priority held for loading. On return from sea, vessel will be entered for loading at the time of the second arrival, when a new Notice of Readiness will be tendered.

Vessels discharging dirty ballast within the prohibited 100 mile zone may be subjected to action by the Lebanese Government. In addition, ship's owners and charterers will be promptly notified of any violation.

Masters are also warned that ship's garbage or trash should not be dumped within 50 miles from the Lebanese coast.

LOADING: *(a) Readiness:* Tenders to load will normally be accepted and berths assigned to vessels in order of arrival, provided vessels have nominations for cargo valid at the time, carry clean ballast and are in all respects equipped and ready to moor. In event berthing delayed on account weather, vessels will ordinarily keep their loading priority in order of arrival. Vessels required to leave port area on account of weather (port closed), should keep in contact with terminal via VHF in order that they will be available when weather moderates. Company will make every effort to load vessels on arrival, or as promptly as berth is available, weather permitting. Notice of readiness will not be accepted unless vessel ready to load. Arrival time will be considered as time Mooring Master boards vessel underway or time vessel anchors, whichever occurs first.

(b) Connecting-up. Ships loaded by means of submarine pipe-lines. Weight of the 16 in. hose in No. 2 Berth about 6.5 tons. Hoses lifted by ship's gear on port side. Detail of flange templates shown in drawing below. Ships should provide manifold fittings to allow connection to flanges shown in "Plan Section".

Mooring Master advises ship's personnel in lifting, connecting, disconnecting and lowering of hoses. A ship's deck officer must be present, and must direct ship's crew in all hose handling. There must be sufficient crew on deck to perform this work.

(c) Rates: Loading is by gravity flow from tank farm which is approximately 360 ft. above sea level. Loading rates as follows (approximate maximum):

	Rates (BPH)	
Berth	*With 1 Hose*	*With 2 Hoses*
2	40,000	70,000 (16 in. hoses)

Order save ship's time and to ballast vessel as quickly as possible, as well as to make berth available for others, it is requested that ships receive oil as fast as it can be delivered, with due regard for safety. The removal of any restrictions, such as strainers, etc., is recommended.

DISCHARGING: Ships unloading crude or refined products in Tapline Seaberth must:

1. Be able to discharge at least 1,000 t.p.h.
2. Be equipped with centrifugal cargo pumps only. Piston pumps will NOT be accepted due to the damaging effect they have on the submarine hoses.
3. Ships without permanent ballast tanks must be able to discharge cargo and load ballast simultaneously.
4. Vessels must NOT strip (drain) their cargo tanks into the sealine. Air injected by this operation may cause the line to float and buckle.

Report: 1983. Cargo discharged through 8 in. line (old bunker line).

MEDICAL: Neither medical nor hospital facilities provided by Tapline. Private doctors and hospital facilities available at Sidon and Beirut. Agents acquainted with situation and can make necessary arrangements.

If unable make radio contact, then vessels requiring emergency medical assistance should hoist International Code Flag "W" in daylight and at night, send "W" (· – –) on blinker light to attract immediate attention, the same signal "W" (· – –) should be given on ship's whistle in either day or night hours. Signal should be repeated until acknowledged visually by either another ship in berth; from shore station or from Company launch. As soon as signal is received, terminal officials will advise ship's Agent as soon as possible of the emergency medical aid required.

DENSITY: Salinity of the sea is same as open Atlantic Ocean. Temperature ranges from 60°F. to 85°F. (15.6°C. to 29.4°C.) depending on season.

FRESH WATER: Not available.

FUEL: Bunker fuel loaded at rate of 3,000–5,000 bbls.p.h. through 8 in. deck hose. Bunker connection should be located near ship's cargo manifold. Ships calling at Sidon to load crude oil should arrange for bunker fuel nominations through one of the offtaker companies well in advance of arrival. Bunker fuel will not be delivered until Tapline has received a firm nomination. Bunker fuel will be loaded as promptly as circumstances permit, but Tapline assumes no liability for any delay incurred by a vessel in berthing or loading bunker fuel. Maritime lubricants available, through marketing representatives in Beirut by arrangement through Agents.

PRECAUTIONS: *(a) Valve Control.* Ship's valves must not be closed against the oil stream.

(b) Emergency Signal. When, and if normal ship-to-shore communications fail, the emergency signal to stop oil flow will be a continuous blast on ship's whistle, until oil ceases to flow. Steam or air should never be shut off from the whistle during loading. Whenever emergency whistle is used, all loading operations in all berths will be shut down until communications can be established with vessel giving the signal. For this reason, it is requested that ships in the area refrain from using their whistles for other purposes.

(c) Readiness to Leave Berth. Port is considered an "open roadstead" and under no circumstances may engine be shut down for repairs while ships moored in submarine berths. Vessels in submarine berths must be able to clear, and shall clear immediately upon advice of Mooring Master. Ship's engine and gear must therefore be ready at all times with full power for immediate use.

(d) Loading and Deballasting Simultaneously. Properly equipped vessels will be encouraged to discharge clean ballast and load oil simultaneously. This capability is especially necessary during unsettled weather order keep vessel reasonably ballasted.

CONSULS: Italy and Norway. Consular or diplomatic representatives for most nations maintain offices in Beirut.

REPAIRS: No facilities.

SURVEYORS: Available from Beirut. Saybolt also available.

OFFICIALS: Lebanese officials, such as Customs Director, Quarantine Officer, Immigration Officer, Captain of the Port and Police, stationed at Sidon. Should Customs guards be stationed on board while in berth, it is expected that ship will provide food for these guards and other officials.

STORING: See "Prelims".

1. Barge only.
2. No storing during loading/discharging.
3. Open sea-berth.
4. Open sea-berth.
6. No.

SHORE LEAVE: Arranged between Agent and Lebanese Security Officer aboard vessel. Ship's personnel (other than emergency or medical cases) not allowed to disembark at terminal. All personnel going ashore must land at Sidon where small boats must cross a shallow and sometimes impassable bar. Delays have been caused to vessels whose personnel have been unable to rejoin their ship. Sufficient personnel must be aboard at all times for letting go lines so that vessel can clear berth whenever required.

GENERAL: *(a) Mooring Wires and Winches.* Use of mooring wires to powered drums for all vessels calling at Sidon is strongly recommended. Because there are no mooring tugs available, a ship's ability to moor during marginal weather conditions is dependent upon its ability to warp itself into position. Vessels with capable wire winches and deck mooring equipment that are able to place 1 or 2 mooring ropes on a windward mooring buoy, usually able to moor without difficulty. Vessels over 0,000 d.w.t. should have mooring wires to powered drums, 1 on aft well deck and 3 on poop deck. The wires should be 200 fathoms in length and so secured as to be easily let go from ship if necessary.

Ropes. Vessels should have 2 suitable, best quality mooring ropes of 200 fathoms each located on aft part of after well deck for use on either port or starboard side, 3 (min.) suitable, best quality mooring ropes of 200 fathoms each and 3 additional ropes of 150 fathoms each on poop deck plus properly located warping winches and bitts. Vessels equipped with mooring wire winches on poop deck may reduce required additional" ropes accordingly. Wires are not used on port side of aft well deck due to possible fouling of wire with hose or pipe-line underwater facilities. In this position a suitable, best quality mooring rope must be used. 2 ropes of 200 fathoms each recommended, to be used on either side while mooring, and used on port side only for securing ship in berth.

SHIPMASTER'S REPORT: February 1983.

Tankers: The following notices are presented to the Master on arrival at the terminal.

TRANS-ARABIAN PIPE-LINE COMPANY
SIDON, Lebanon
Tanker Loading Advice

Master . . . . 19...........

Your vessel is scheduled to moor in Berth No.............at . . . .
hours............................19.........

A Mooring Master will board your vessel prior to this hour. Engines, deck machinery, mooring lines and crew should be in readiness to proceed to berth.

The cargo (a 5 ton lift) and fuel hose will be picked up on the PORT SIDE.

The Mooring Master advises ship's personnel regarding the lifting and connecting of the submarine hoses, and after loading is completed, regarding the disconnecting and lowering. In this connection, he acts in an advisory capacity and assumes no liability on behalf of the Company. A ship's deck officer must be present, and he must approve the hose connection on board. The ship's crew will do the actual connecting and disconnecting of the hose.

The Mooring Master will be in charge of all ship to shore communications.

One prolonged blast of ship's whistle is the emergency signal to shore to stop the flow of oil to the ship and apply vacuum on the submarine lines.

SHIPS MUST NOT CLOSE VALVES AGAINST INCOMING OIL. Ships will be held liable for damage resulting from such closures.

Vessels in submarine berths must be able to clear immediately upon instructions from the Mooring Master.

CAUTION: It is the ship Master's responsibility to see that no oil (crude, bunker C, diesel or bilges) is pumped or spilled overboard from his ship either in the vicinity of the Company's Terminal area or within the area of 100 miles from the Lebanese coast. In the event of any oil spillage or loss from your vessel as the result of any act or omission of the vessel, such as but not limited to, pumping of oily water over side from ballast or bilge, or oil spill during loading, the vessel shall be responsible for all costs and expenses of clean up, or for any damages to property or injury to persons resulting from such spillage or oil loss. Tapline reserves the right to take all reasonable measures to clean up any resulting pollution or contamination on land or sea and will charge to vessel for all costs and expenses incurred thereby. In addition, since Tapline, as operator of the Terminal, is responsible (as a guarantor of the ship) for any damages to property of or injury to third persons, resulting from such spillages or oil losses, in the event Tapline pays or settles valid claims of third parties for such damages or injury, Tapline shall have the right to recover from the vessel all costs and expenses arising from its handling, payment and settlement of such third party claims.

The Port Authorities are very strict in this matter and a written report is submitted to ship's owners. WELL DECK SCUPPERS MUST BE PLUGGED DURING LOADING.

Please sign the attached duplicate of this notice, acknowledging receipt of same.

TRANS-ARABIAN PIPE LINE COMPANY.

TRANS-ARABIAN PIPE LINE COMPANY
SIDON, Lebanon

Master . . . . 19.........
Sidon, Lebanon
Dear Sir,

It is the ship Master's responsibility to assure that no oil including without limitation crude, bunker C, diesel or bilges is pumped or spilled overboard from his *vessel* in the vicinity of the Company's Terminal area or within the Prohibited Zone offshore Lebanon as defined in the International Convention for the Prevention of Pollution of the Sea by Oil, 1954, as amended in 1962. In the event of any oil spillage or loss from your vessel including but not limited to spillage due to pumping of oily water over the side from ballast or bilge or oil spill during loading, the vessel and her owners, operators, *Agents, and Master* shall be responsible for all costs and expenses of cleanup and for any injury to persons or damage to property, *including Tapline employees and property,* resulting from such oil spillage or loss. Tapline reserves the right to take all reasonable measures to clean up any resulting pollution or contamination on land or sea, but only as a contractor on behalf of your vessel and/or her owners, operators, *Agents or Master* and will charge the vessel and/or her owners, operators, *Agents or Master* for all costs and expenses incurred thereby.

Tapline, as operator of the terminal, is responsible as a guarantor of the ship for any injury to third persons or damage to property resulting from such oil spillage or losses. The Port Authorities are very strict in this matter and a written report is submitted to *the vessel's owners, operators, Agents or Master* for any such incidents. In the event Tapline settles or is required to pay valid claims of third parties for such injury or damage, Tapline shall have the right to recover from the vessel and/or from her owners, operators, *Agents or Master* all costs and expenses arising from its handling, settlement and payment of such third party claims.

Please sign and return the attached duplicate of this notice acknowledging receipt of same.

TRANS-ARABIAN PIPE LINE COMPANY.

AUTHORITY: 1. Zahrani Terminal, Lebanon, P.O.Box 28, Sidon, Lebanon.

2. Trans-Arabian Pipeline Company, P.O.Box 11-1348, Beirut, Lebanon. *Tel:* Beirut 341270-5. *Telex:* 20769 Le Taplin. *Cables:* Tapline Beirut. *Contact:* Captain K. E. Hopen, Asst. Terminal Superintendent.

AGENT: See "Beirut".

TRIPOLI: 34.28 N. 35.49 E. (See Plan)

(a) DRY-CARGO PORT (b) OIL TERMINAL

(a) DRY-CARGO PORT.

Manifests should be visaed by Lebanese Consul at ports of shipment or at any port *en route* where there is a Lebanese Consul. If on account of non-existence Lebanese Consul at ports of shipment or at any ports *en route* the manifests are not visaed, then such consular visa dues are collected at Beirut.

Non-Liner vessels calling at Tripoli, are to present on arrival to the local Customs' authorities, one copy of each manifest of cargo on board (even "IN BALLAST" manifests), DULY STAMPED AND SIGNED by the Customs' Authorities at the Loading Ports.

Otherwise, the vessel is subjected to a Customs' FINE.

DOCUMENTS:

1 Legalised copy of Cargo Manifests.
5 copies of Cargo Manifests.
2 Store Lists.
5 Passenger Lists.
2 Lists of Cigarettes and Tobacco (see "Customs Allowances").

In addition to documents listed, 2 copies of each Bill of Lading are to be handed over on arrival to the Agents, for Local Customs' Authorities control and check.

PILOTAGE: Compulsory. Agent arranges with Harbour Master, therefore keep Agent closely advised ETA. Harbour Master may also be contacted on VHF Channel 16.

Pilot boarding position: Lat. 34° 29.6′ N., Long. 35° 49.5′ E.

APPROACHES: Sunken wreck in position Lat. 34° 30′ N., Long. 35° 49′ E.

Depth in channel 9.0 m.

ANCHORAGE: Good anchorage.

MAX. SIZE: Max. LOA 150 m. (occasionally 175 m.). Max. draft alongside berth 22 ft. 6 in.

HEALTH: Health Authorities board in roads. Health form obtainable from Agent or doctor. Yellow Fever Certificates required for ships coming from Far East and Red Sea. Owners should check with Agents respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members.

RADIO: Cables via Beirut Radio to and from Agent.

VHF: Harbour Master on Channels 16 and 6.

BERTHING: New pier about 600 m. length. 2 berths. 20 cranes, capacities 5 tons – 100 tons. 2 forklifts with capacity 20 tons each. Lighters available for discharging alongside vessel. Ship's gear often used for discharging. There is a grain silo with capacity of 4,000 tonnes. 30 steel barges of 350 tons capacity each. 40 wooden and steel barges of 200 tons capacity each. All cranes, forklift and barges are privately owned. 50 ton floating crane available, owned by port company.

STEVEDORES: Ordered by Agent. No ETA to stevedores necessary. Working hours, 0700 – 1500, otherwise overtime included on Sundays and on official holidays.

MEDICAL: Master to advise Agent by cable prior to arrival if medical attendance required. Hospitals available.

DENSITY: 1025.

FRESH WATER: Available by barge.

FUEL: Available alongside by tanker trucks.

REPAIRS: Possible.

GANGWAY/DECK WATCHMEN: Available and recommended.

OPENING/CLOSING HATCHES: For liners by stevedores, otherwise per agreement.

CUSTOMS ALLOWANCES: Tobacco. 40 cigarettes per crew member. Customs very strict, checking crew cabins. Regulations are as follows:

1. That the quantity of tobacco to be allowed on board vessels upon their arrival at a Lebanese port will be fixed on the basis of 2 packets per crew member, passenger per day, and to be calculated on a maximum period of 4 months, if the vessel emanates from an American, Asian or African port – not Central Africa; and for 2 months if the vessel's last port of call is in Europe, Central Africa or Mediterranean, which will be deducted from the quantity, and on the same basis the consumption by the crew members and passengers during their trip, and this to start from the last port of call until arrival at a Lebanese port.

Radio Orient Beirut, call sign ODR, transmits (CW) on 8702 kHz and 13101 kHz simultaneously half-past each hour beginning at 0630 until 2130 hrs. GMT, the traffic list; 524 kHz each hour beginning at 0600 hrs. until 2100 hrs. GMT, the traffic list. Listens on 8534–8374 kHz and 12531–12561 kHz for replies and calls each hour from half-past the hour until the hour; 500 kHz 0600 to 2200 hrs. GMT and 425, 454, 468 and 480 kHz from the hour until half-past the hour for replies and calls. Keeps watch only between 0600–2200 hrs. GMT on 500 kHz.

(b) Advice of Arrival. It is important that ships establish radio contact with "ODR" when 3 days distant from Sidon and maintain this contact at regular intervals until just prior to arrival at the terminal. All ships should send a 72-hour ETA message to Tapline, giving the best estimate of ship's arrival time, a statement of bunker requirements and other relevant information. Shorter notice may result in berthing delay. Further ETA messages should be sent when vessel is 24 hours and 12 hours distant and to cover any other time changes occurring in the original ETA or those subsequent thereto. The 12-hour ETA should include a statement regarding "ship's readiness to load" on arrival, and time required to discharge clean ballast after ship is moored. A further contact when 4 hours away is desirable for exchange of weather data and mooring schedule. Vessels failing to give minimum of 12 hours arrival notice may be subject to delays in acceptance.

(c) Ship-to-Shore Communications. Ship-to-shore communications, while ships are in moorings, will be by portable VHF radio units used by the Mooring Master only. The use of the ship's radio station (except Channels 16-14) and/or battery charging equipment is prohibited for safety reasons during cargo transfer operations.

In the event of normal ship-to-shore communications failure, the (ship's) emergency whistle signal should be used.

VHF: Tapline VHF radio telephone system operates on international Channels 14 and 16, 156.7 MHz and 156.8 MHz respectively. Channel 16 used to establish contact while all traffic handled on Channel 14. Tapline guards these channels on a 24 hour basis, and contact can generally be made at distances up to 100 miles from terminal. Conversations on these channels will be carried out in English language only.

Mooring Master only will be in direct charge of portable VHF ship-to-shore radio communications.

HEALTH: Rules governing quarantine of vessels are same as found in other ports.

BERTHING: 7 buoys at Berth No. 2. Berths numbered 1 to 4 from South to North. Vessels moored on 1 heading (West) basis using both bow anchors with max. possible spread of anchors to increase ship's anchor beam holding components. Ship's stern moored to cylindrical buoys fitted with release hooks, using 7 ropes (or wires) to respective mooring buoys. Permanent moorings consist of 7 steel cylindrical buoys in each berth.

Certain mooring buoys in all berths fitted with 1.5 in. diameter preventer wires, one end of which is secured to mooring buoys. When required, other end is brought on board vessel by a messenger line after ship moored in position. Preventer wires supplemental to ship's regular moorings during adverse conditions. Ships should have chain stoppers for handling these wires.

BALLAST: Masters are warned that no dirty ballast or bilge water may be discharged within an area extending 100 nautical miles seaward of the Lebanese coastline. All pipe-lines, sea suctions, strainers and pumps that are to be used for the discharge of clean ballast must be flushed clean prior to entering the 100 mile zone. Except for oil retrieved under "load-on-top" procedures, Masters must assure themselves that all oil tanks, pipe-lines and pumps are free of all traces of oil.

The terminal has no facilities for receiving oily ballast. A vessel must have sufficient ballast for safe manoeuvring. However, by carefully watching the weather, especially in the Summer months, by frequent interchange of weather information and berthing instructions, and, by a knowledge of the behaviour of his own vessel, a Master may desire to arrive at the terminal with minimum ballast thereby lessening any possibility of infringement of the pollution restrictions of this section, and also reducing time in berth.

As soon as practicable after arrival and prior to acceptance, all the vessel's tanks will be inspected for evidence of oil in ballast tanks. Inspection will continue during discharge of ballast. If evidence of oil appears at either of these inspections, the ship must return at once to a point not less than 100 miles from the coastline and there accomplish the necessary tank cleaning. Any vessel required to return to a position at least 100 miles offshore for the purpose of discharging dirty ballast, cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered, and at the same time loses any priority held for loading. On return from sea, vessel will be entered for loading at the time of the second arrival, when a new Notice of Readiness will be tendered.

Vessels discharging dirty ballast within the prohibited 100 mile zone may be subjected to action by the Lebanese Government. In addition, ship's owners and charterers will be promptly notified of any violation.

Masters are also warned that ship's garbage or trash should not be dumped within 50 miles from the Lebanese coast.

LOADING: *(a) Readiness:* Tenders to load will normally be accepted and berths assigned to vessels in order of arrival, provided vessels have nominations for cargo valid at the time, carry clean ballast and are in all respects equipped and ready to moor. In event berthing delayed on account weather, vessels will ordinarily keep their loading priority in order of arrival. Vessels required to leave port area on account of weather (port closed), should keep in contact with terminal via VHF in order that they will be available when weather moderates. Company will make every effort to load vessels on arrival, or as promptly as berth is available, weather permitting. Notice of readiness will not be accepted unless vessel ready to load. Arrival time will be considered as time Mooring Master boards vessel underway or time vessel anchors, whichever occurs first.

(b) Connecting-up. Ships loaded by means of submarine pipe-lines. Weight of the 16 in. hose in No. 2 Berth about 6.5 tons. Hoses lifted by ship's gear on port side. Detail of flange templates shown in drawing below. Ships should provide manifold fittings to allow connection to flanges shown in "Plan Section".

Mooring Master advises ship's personnel in lifting, connecting, disconnecting and lowering of hoses. A ship's deck officer must be present, and must direct ship's crew in all hose handling. There must be sufficient crew on deck to perform this work.

(c) Rates: Loading is by gravity flow from tank farm which is approximately 360 ft. above sea level. Loading rates as follows (approximate maximum):

	Rates (BPH)	
Berth	*With 1 Hose*	*With 2 Hoses*
2	40,000	70,000 (16 in. hoses)

Order save ship's time and to ballast vessel as quickly as possible as well as to make berth available for others, it is requested that ships receive oil as fast as it can be delivered, with due regard for safety. The removal of any restrictions, such as strainers, etc., is recommended.

DISCHARGING: Ships unloading crude or refined products in Tapline Seaberth must:

1. Be able to discharge at least 1,000 t.p.h.
2. Be equipped with centrifugal cargo pumps only. Piston pumps will NOT be accepted due to the damaging effect they have on the submarine hoses.
3. Ships without permanent ballast tanks must be able to discharge cargo and load ballast simultaneously.
4. Vessels must NOT strip (drain) their cargo tanks into the sealine. Air injected by this operation may cause the line to float and buckle.

Report: 1983. Cargo discharged through 8 in. line (old bunker line).

MEDICAL: Neither medical nor hospital facilities provided by Tapline. Private doctors and hospital facilities available at Sidon and Beirut. Agents acquainted with situation and can make necessary arrangements.

If unable make radio contact, then vessels requiring emergency medical assistance should hoist International Code Flag "W" in daylight and at night, send "W" (· – –) on blinker light to attract immediate attention, the same signal "W" (· – –) should be given on ship's whistle in either day or night hours. Signal should be repeated until acknowledged visually by either another ship in berth; from shore station or from Company launch. As soon as signal is received, terminal officials will advise ship's Agent as soon as possible of the emergency medical aid required.

DENSITY: Salinity of the sea is same as open Atlantic Ocean. Temperature ranges from 60°F. to 85°F. (15.6°C. to 29.4°C.) depending on season.

FRESH WATER: Not available.

FUEL: Bunker fuel loaded at rate of 3,000–5,000 bbls.p.h. through 8 in. deck hose. Bunker connection should be located near ship's cargo manifold. Ships calling at Sidon to load crude oil should arrange their bunker fuel nominations through one of the offtaker companies well in advance of arrival. Bunker fuel will not be delivered until Tapline has received a firm nomination. Bunker fuel will be loaded as promptly as circumstances permit, but Tapline assumes no liability for any delay incurred by a vessel in berthing or loading bunker fuel. Maritime lubricants available, through marketing representatives in Beirut by arrangement through Agents.

PRECAUTIONS: *(a) Valve Control.* Ship's valves must not be closed against the oil stream.

(b) Emergency Signal. When, and if normal ship-to-shore communications fail, the emergency signal to stop oil flow will be continuous blast on ship's whistle, until oil ceases to flow. Steam or air should never be shut off from the whistle during loading. Whenever emergency whistle is used, all loading operations in all berths will be shut down until communications can be established with vessel giving the signal. For this reason, it is requested that ships in the area refrain from using their whistles for other purposes.

(c) Readiness to Leave Berth. Port is considered an "open roadstead" and under no circumstances may engine be shut down for repairs while ships moored in submarine berths. Vessels in submarine berths must be able to clear, and shall clear immediately upon advice of Mooring Master. Ship's engine and gear must therefore be ready at all times with full power for immediate use.

(d) Loading and Deballasting Simultaneously. Properly equipped vessels will be encouraged to discharge clean ballast and load oil simultaneously. This capability is especially necessary during unsettled weather order keep vessel reasonably ballasted.

CONSULS: Italy and Norway. Consular or diplomatic representatives for most nations maintain offices in Beirut.

REPAIRS: No facilities.

SURVEYORS: Available from Beirut. Saybolt also available.

OFFICIALS: Lebanese officials, such as Customs Director, Quarantine Officer, Immigration Officer, Captain of the Port and Police, stationed at Sidon. Should Customs guards be stationed on board while in berth, it is expected that ship will provide food for these guards and other officials.

STORING: See "Prelims".

1. Barge only. 4. Open sea-berth.
2. No storing during loading/ 6. No.
discharging.
3. Open sea-berth.

SHORE LEAVE: Arranged between Agent and Lebanese Security Officer aboard vessel. Ship's personnel (other than emergency medical cases) not allowed to disembark at terminal. All personnel going ashore must land at Sidon where small boats must cross a shallow and sometimes impassable bar. Delays have been caused to vessels when personnel have been unable to rejoin their ship. Sufficient personnel must be aboard at all times for letting go lines so that vessel can clear berth whenever required.

ENERAL: *(a) Mooring Wires and Winches.* Use of mooring wires to owered drums for all vessels calling at Sidon is strongly recommended. ecause there are no mooring tugs available, a ship's ability to moor uring marginal weather conditions is dependent upon its ability to warp elf into position. Vessels with capable wire winches and deck mooring quipment that are able to place 1 or 2 mooring ropes on a windward ooring buoy, usually able to moor without difficulty. Vessels over 0,000 d.w.t. should have mooring wires to powered drums, 1 on aft ell deck and 3 on poop deck. The wires should be 200 fathoms in ength and so secured as to be easily let go from ship if necessary.

) *Ropes.* Vessels should have 2 suitable, best quality mooring ropes f 200 fathoms each located on aft part of after well deck for use on ther port or starboard side, 3 (min.) suitable, best quality mooring ropes f 200 fathoms each and 3 additional ropes of 150 fathoms each on oop deck plus properly located warping winches and bitts. Vessels quipped with mooring wire winches on poop deck may reduce required dditional" ropes accordingly. Wires are not used on port side of aft ell deck due to possible fouling of wire with hose or pipe-line nderwater facilities. In this position a suitable, best quality mooring rope ust be used. 2 ropes of 200 fathoms each recommended, to be used n either side while mooring, and used on port side only for securing hip in berth.

HIPMASTER'S REPORT: February 1983.

ankers: The following notices are presented to the Master on arrival at e terminal.

TRANS-ARABIAN PIPE-LINE COMPANY
SIDON, Lebanon
Tanker Loading Advice

aster..19............

Your vessel is scheduled to moor in Berth No.............at.............
ours.............................19.........

A Mooring Master will board your vessel prior to this hour. Engines, eck machinery, mooring lines and crew should be in readiness to roceed to berth.

The cargo (a 5 ton lift) and fuel hose will be picked up on the PORT IDE.

The Mooring Master advises ship's personnel regarding the lifting and onnecting of the submarine hoses, and after loading is completed, egarding the disconnecting and lowering. In this connection, he acts in n advisory capacity and assumes no liability on behalf of the Company. A ship's deck officer must be present, and he must approve the hose onnection on board. The ship's crew will do the actual connecting and isconnecting of the hose.

The Mooring Master will be in charge of all ship to shore ommunications.

One prolonged blast of ship's whistle is the emergency signal to shore to op the flow of oil to the ship and apply vacuum on the submarine lines.

SHIPS MUST NOT CLOSE VALVES AGAINST INCOMING OIL. hips will be held liable for damage resulting from such closures.

Vessels in submarine berths must be able to clear immediately upon structions from the Mooring Master.

CAUTION: It is the ship Master's responsibility to see that no oil (crude, unker C, diesel or bilges) is pumped or spilled overboard from his ship ther in the vicinity of the Company's Terminal area or within the area f 100 miles from the Lebanese coast. In the event of any oil spillage r loss from your vessel as the result of any act or omission of the essel, such as but not limited to, pumping of oily water over side from allast or bilge, or oil spill during loading, the vessel shall be responsible r all costs and expenses of clean up, or for any damages to property r injury to persons resulting from such spillage or oil loss. Tapline eserves the right to take all reasonable measures to clean up any esulting pollution or contamination on land or sea and will charge to essel for all costs and expenses incurred thereby. In addition, since apline, as operator of the Terminal, is responsible (as a guarantor of e ship) for any damages to property of or injury to third persons, esulting from such spillages or oil losses, in the event Tapline pays or ettles valid claims of third parties for such damages or injury, Tapline hall have the right to recover from the vessel all costs and expenses ising from its handling, payment and settlement of such third party claims.

The Port Authorities are very strict in this matter and a written report s submitted to ship's owners. WELL DECK SCUPPERS MUST BE LUGGED DURING LOADING.

Please sign the attached duplicate of this notice, acknowledging eceipt of same.

TRANS-ARABIAN PIPE LINE COMPANY.

TRANS-ARABIAN PIPE LINE COMPANY
SIDON, Lebanon

aster..19.........
idon, Lebanon

ear Sir,

It is the ship Master's responsibility to assure that no oil including ithout limitation crude, bunker C, diesel or bilges is pumped or spilled verboard from his *vessel* in the vicinity of the Company's Terminal area r within the Prohibited Zone offshore Lebanon as defined in the ternational Convention for the Prevention of Pollution of the Sea by il, 1954, as amended in 1962. In the event of any oil spillage or loss om your vessel including but not limited to spillage due to pumping of ly water over the side from ballast or bilge or oil spill during loading, e vessel and her owners, operators, *Agents, and Master* shall be esponsible for all costs and expenses of cleanup and for any injury to ersons or damage to property, *including Tapline employees and operty*, resulting from such oil spillage or loss. Tapline reserves the ght to take all reasonable measures to clean up any resulting pollution r contamination on land or sea, but only as a contractor on behalf of ur vessel and/or her owners, operators, *Agents or Master* and will arge the vessel and/or her owners, operators, *Agents or Master* for l costs and expenses incurred thereby. Tapline, as operator of the terminal, is responsible as a guarantor of the ship for any injury to third persons or damage to property resulting from such oil spillage or losses. The Port Authorities are very strict in this matter and a written report is submitted to *the vessel's owners, operators, Agents or Master* for any such incidents. In the event Tapline settles or is required to pay valid claims of third parties for such injury or damage, Tapline shall have the right to recover from the vessel and/ or from her owners, operators, *Agents or Master* all costs and expenses arising from its handling, settlement and payment of such third party claims.

Tapline guards these channels on a 24 hour basis, and contact can generally be made at distances up to 100 miles from terminal. Conversations on these channels will be carried out in English language only.

Mooring Master only will be in direct charge of portable VHF ship-to-shore radio communications.

HEALTH: Rules governing quarantine of vessels are same as found in other ports.

BERTHING: 7 buoys at Berth No. 2. Berths numbered 1 to 4 from South to North. Vessels moored on 1 heading (West) basis using both bow anchors with max. possible spread of anchors to increase ship's anchor beam holding components. Ship's stern moored to cylindrical buoys fitted with release hooks, using 7 ropes (or wires) to respective mooring buoys. Permanent moorings consist of 7 steel cylindrical buoys in each berth.

Certain mooring buoys in all berths fitted with 1.5 in. diameter preventer wires, one end of which is secured to mooring buoys. When required, other end is brought on board vessel by a messenger line after ship moored in position. Preventer wires supplemental to ship's regular moorings during adverse conditions. Ships should have chain stoppers for handling these wires.

BALLAST: Masters are warned that no dirty ballast or bilge water may be discharged within an area extending 100 nautical miles seaward of the Lebanese coastline. All pipe-lines, sea suctions, strainers and pumps that are to be used for the discharge of clean ballast must be flushed clean prior to entering the 100 mile zone. Except for oil retrieved under "load-on-top" procedures, Masters must assure themselves that all oil tanks, pipe-lines and pumps are free of all traces of oil.

The terminal has no facilities for receiving oily ballast. A vessel must have sufficient ballast for safe manoeuvring. However, by carefully watching the weather, especially in the Summer months, by frequent interchange of weather information and berthing instructions, and, by a knowledge of the behaviour of his own vessel, a Master may desire to arrive at the terminal with minimum ballast thereby lessening any possibility of infringement of the pollution restrictions of this section, and also reducing time in berth.

As soon as practicable after arrival and prior to acceptance, all the vessel's tanks will be inspected for evidence of oil in ballast tanks. Inspection will continue during discharge of ballast. If evidence of oil appears at either of these inspections, the ship must return at once to a point not less than 100 miles from the coastline and there accomplish the necessary tank cleaning. Any vessel required to return to a position at least 100 miles offshore for the purpose of discharging dirty ballast, cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered, and at the same time loses any priority held for loading. On return from sea, vessel will be entered for loading at the time of the second arrival, when a new Notice of Readiness will be tendered.

Vessels discharging dirty ballast within the prohibited 100 mile zone may be subjected to action by the Lebanese Government. In addition, ship's owners and charterers will be promptly notified of any violation.

Masters are also warned that ship's garbage or trash should not be dumped within 50 miles from the Lebanese coast.

LOADING: *(a) Readiness:* Tenders to load will normally be accepted and berths assigned to vessels in order of arrival, provided vessels have nominations for cargo valid at the time, carry clean ballast and are in all respects equipped and ready to moor. In event berthing delayed on account weather, vessels will ordinarily keep their loading priority in order of arrival. Vessels required to leave port area on account of weather (port closed), should keep in contact with terminal via VHF in order that they will be available when weather moderates. Company will make every effort to load vessels on arrival, or as promptly as berth is available, weather permitting. Notice of readiness will not be accepted unless vessel ready to load. Arrival time will be considered as time Mooring Master boards vessel underway or time vessel anchors, whichever occurs first.

(b) Connecting-up. Ships loaded by means of submarine pipe-lin Weight of the 16 in. hose in No. 2 Berth about 6.5 tons. Hoses lifted ship's gear on port side. Detail of flange templates shown in drawin below. Ships should provide manifold fittings to allow connection flanges shown in "Plan Section".

Mooring Master advises ship's personnel in lifting, connectin disconnecting and lowering of hoses. A ship's deck officer must b present, and must direct ship's crew in all hose handling. There mu be sufficient crew on deck to perform this work.

(c) Rates: Loading is by gravity flow from tank farm which approximately 360 ft. above sea level. Loading rates as follo (approximate maximum):

	Rates (BPH)	
Berth	*With 1 Hose*	*With 2 Hoses*
2	40,000	70,000 (16 in. hoses)

Order save ship's time and to ballast vessel as quickly as possib as well as to make berth available for others, it is requested that sh receive oil as fast as it can be delivered, with due regard for safety. Th removal of any restrictions, such as strainers, etc., is recommended

DISCHARGING: Ships unloading crude or refined products in Taplin Seaberth must:

1. Be able to discharge at least 1,000 t.p.h.
2. Be equipped with centrifugal cargo pumps only. Piston pumps w NOT be accepted due to the damaging effect they have on t submarine hoses.
3. Ships without permanent ballast tanks must be able to dischar cargo and load ballast simultaneously.
4. Vessels must NOT strip (drain) their cargo tanks into the sealin Air injected by this operation may cause the line to float and buckle.

Report: 1983. Cargo discharged through 8 in. line (old bunker line).

MEDICAL: Neither medical nor hospital facilities provided by Taplin Private doctors and hospital facilities available at Sidon and Beir Agents acquainted with situation and can make necessa arrangements.

If unable make radio contact, then vessels requiring emergen medical assistance should hoist International Code Flag "W" in daylig and at night, send "W" (· – –) on blinker light to attract immedia attention, the same signal "W" (· – –) should be given on ship's whist in either day or night hours. Signal should be repeated un acknowledged visually by either another ship in berth; from shore stati or from Company launch. As soon as signal is received, terminal offici will advise ship's Agent as soon as possible of the emergency medic aid required.

DENSITY: Salinity of the sea is same as open Atlantic Ocea Temperature ranges from 60°F. to 85°F. (15.6°C. to 29.4°C.) dependin on season.

FRESH WATER: Not available.

FUEL: Bunker fuel loaded at rate of 3,000–5,000 bbls.p.h. through 8 i deck hose. Bunker connection should be located near ship's car manifold. Ships calling at Sidon to load crude oil should arrange t bunker fuel nominations through one of the offtaker companies well advance of arrival. Bunker fuel will not be delivered until Tapline ha received a firm nomination. Bunker fuel will be loaded as promptly a circumstances permit, but Tapline assumes no liability for any dela incurred by a vessel in berthing or loading bunker fuel. Maritim lubricants available, through marketing representatives in Beirut t arrangement through Agents.

PRECAUTIONS: *(a) Valve Control.* Ship's valves must not be close against the oil stream.

(b) Emergency Signal. When, and if normal ship-to-sho communications fail, the emergency signal to stop oil flow will be continuous blast on ship's whistle, until oil ceases to flow. Steam or a should never be shut off from the whistle during loading. Whenev emergency whistle is used, all loading operations in all berths will b shut down until communications can be established with vessel givin the signal. For this reason, it is requested that ships in the area refra from using their whistles for other purposes.

(c) Readiness to Leave Berth. Port is considered an "open roadstea and under no circumstances may engine be shut down for repairs whi ships moored in submarine berths. Vessels in submarine berths mu be able to clear, and shall clear immediately upon advice of Moorin Master. Ship's engine and gear must therefore be ready at all times wi full power for immediate use.

(d) Loading and Deballasting Simultaneously. Properly equipp vessels will be encouraged to discharge clean ballast and load t simultaneously. This capability is especially necessary during unsett weather order keep vessel reasonably ballasted.

CONSULS: Italy and Norway. Consular or diplomatic representativ for most nations maintain offices in Beirut.

REPAIRS: No facilities.

SURVEYORS: Available from Beirut. Saybolt also available.

OFFICIALS: Lebanese officials, such as Customs Director, Quarant Officer, Immigration Officer, Captain of the Port and Police, stationed Sidon. Should Customs guards be stationed on board while in bert is expected that ship will provide food for these guards and other offici

STORING: See "Prelims".

1. Barge only.
2. No storing during loading/ discharging.
3. Open sea-berth.
4. Open sea-berth.
6. No.

SHORE LEAVE: Arranged between Agent and Lebanese Secu Officer aboard vessel. Ship's personnel (other than emergency medical cases) not allowed to disembark at terminal. All personnel go ashore must land at Sidon where small boats must cross a shallow sometimes impassable bar. Delays have been caused to vessels wh personnel have been unable to rejoin their ship. Sufficient perso must be aboard at all times for letting go lines so that vessel can c berth whenever required.

GENERAL: *(a) Mooring Wires and Winches.* Use of mooring wires to powered drums for all vessels calling at Sidon is strongly recommended. Because there are no mooring tugs available, a ship's ability to moor during marginal weather conditions is dependent upon its ability to warp itself into position. Vessels with capable wire winches and deck mooring equipment that are able to place 1 or 2 mooring ropes on a windward mooring buoy, usually able to moor without difficulty. Vessels over 40,000 d.w.t. should have mooring wires to powered drums, 1 on aft well deck and 3 on poop deck. The wires should be 200 fathoms in length and so secured as to be easily let go from ship if necessary.

(b) Ropes. Vessels should have 2 suitable, best quality mooring ropes of 200 fathoms each located on aft part of after well deck for use on either port or starboard side, 3 (min.) suitable, best quality mooring ropes of 200 fathoms each and 3 additional ropes of 150 fathoms each on poop deck plus properly located warping winches and bitts. Vessels equipped with mooring wire winches on poop deck may reduce required "additional" ropes accordingly. Wires are not used on port side of aft well deck due to possible fouling of wire with hose or pipe-line underwater facilities. In this position a suitable, best quality mooring rope must be used. 2 ropes of 200 fathoms each recommended, to be used on either side while mooring, and used on port side only for securing ship in berth.

SHIPMASTER'S REPORT: February 1983.

Tankers: The following notices are presented to the Master on arrival at the terminal.

TRANS-ARABIAN PIPE-LINE COMPANY
SIDON, Lebanon
Tanker Loading Advice

Master .... 19............

Your vessel is scheduled to moor in Berth No.............at ....
hours.................................19.........

A Mooring Master will board your vessel prior to this hour. Engines, deck machinery, mooring lines and crew should be in readiness to proceed to berth.

The cargo (a 5 ton lift) and fuel hose will be picked up on the PORT SIDE.

The Mooring Master advises ship's personnel regarding the lifting and connecting of the submarine hoses, and after loading is completed, regarding the disconnecting and lowering. In this connection, he acts in an advisory capacity and assumes no liability on behalf of the Company. A ship's deck officer must be present, and he must approve the hose connection on board. The ship's crew will do the actual connecting and disconnecting of the hose.

The Mooring Master will be in charge of all ship to shore communications.

One prolonged blast of ship's whistle is the emergency signal to shore to stop the flow of oil to the ship and apply vacuum on the submarine lines.

SHIPS MUST NOT CLOSE VALVES AGAINST INCOMING OIL. Ships will be held liable for damage resulting from such closures.

Vessels in submarine berths must be able to clear immediately upon instructions from the Mooring Master.

CAUTION: It is the ship Master's responsibility to see that no oil (crude, bunker C, diesel or bilges) is pumped or spilled overboard from his ship either in the vicinity of the Company's Terminal area or within the area of 100 miles from the Lebanese coast. In the event of any oil spillage or loss from your vessel as the result of any act or omission of the vessel, such as but not limited to, pumping of oily water over side from ballast or bilge, or oil spill during loading, the vessel shall be responsible for all costs and expenses of clean up, or for any damages to property or injury to persons resulting from such spillage or oil loss. Tapline reserves the right to take all reasonable measures to clean up any resulting pollution or contamination on land or sea and will charge to vessel for all costs and expenses incurred thereby. In addition, since Tapline, as operator of the Terminal, is responsible (as a guarantor of the ship) for any damages to property of or injury to third persons, resulting from such spillages or oil losses, in the event Tapline pays or settles valid claims of third parties for such damages or injury, Tapline shall have the right to recover from the vessel all costs and expenses arising from its handling, payment and settlement of such third party claims.

The Port Authorities are very strict in this matter and a written report is submitted to ship's owners. WELL DECK SCUPPERS MUST BE PLUGGED DURING LOADING.

Please sign the attached duplicate of this notice, acknowledging receipt of same.

TRANS-ARABIAN PIPE LINE COMPANY.

TRANS-ARABIAN PIPE LINE COMPANY
SIDON, Lebanon

Master .... 19.........
Sidon, Lebanon

Dear Sir,

It is the ship Master's responsibility to assure that no oil including without limitation crude, bunker C, diesel or bilges is pumped or spilled overboard from his *vessel* in the vicinity of the Company's Terminal area or within the Prohibited Zone offshore Lebanon as defined in the International Convention for the Prevention of Pollution of the Sea by Oil, 1954, as amended in 1962. In the event of any oil spillage or loss from your vessel including but not limited to spillage due to pumping of oily water over the side from ballast or bilge or oil spill during loading, the vessel and her owners, operators, *Agents, and Master* shall be responsible for all costs and expenses of cleanup and for any injury to persons or damage to property, *including Tapline employees and property,* resulting from such oil spillage or loss. Tapline reserves the right to take all reasonable measures to clean up any resulting pollution or contamination on land or sea, but only as a contractor on behalf of your vessel and/or her owners, operators, *Agents or Master* and will charge the vessel and/or her owners, operators, *Agents or Master* for all costs and expenses incurred thereby.

Tapline, as operator of the terminal, is responsible as a guarantor of the ship for any injury to third persons or damage to property resulting from such oil spillage or losses. The Port Authorities are very strict in this matter and a written report is submitted to *the vessel's owners, operators, Agents or Master* for any such incidents. In the event Tapline settles or is required to pay valid claims of third parties for such injury or damage, Tapline shall have the right to recover from the vessel and/or from her owners, operators, *Agents or Master* all costs and expenses arising from its handling, settlement and payment of such third party claims.

Please sign and return the attached duplicate of this notice acknowledging receipt of same.

TRANS-ARABIAN PIPE LINE COMPANY.

AUTHORITY: 1. Zahrani Terminal, Lebanon, P.O.Box 28, Sidon, Lebanon.

2. Trans-Arabian Pipeline Company, P.O.Box 11-1348, Beirut, Lebanon. *Tel:* Beirut 341270-5. *Telex:* 20769 Le Taplin. *Cables:* Tapline Beirut. *Contact:* Captain K. E. Hopen, Asst. Terminal Superintendent.

AGENT: See "Beirut".

TRIPOLI: 34.28 N. 35.49 E. (See Plan)

(a) DRY-CARGO PORT (b) OIL TERMINAL

(a) DRY-CARGO PORT.

Manifests should be visaed by Lebanese Consul at ports of shipment or at any port *en route* where there is a Lebanese Consul. If on account of non-existence Lebanese Consul at ports of shipment or at any ports *en route* the manifests are not visaed, then such consular visa dues are collected at Beirut.

Non-Liner vessels calling at Tripoli, are to present on arrival to the local Customs' authorities, one copy of each manifest of cargo on board (even "IN BALLAST" manifests), DULY STAMPED AND SIGNED by the Customs' Authorities at the Loading Ports.

Otherwise, the vessel is subjected to a Customs' FINE.

DOCUMENTS:

1 Legalised copy of Cargo Manifests.
5 copies of Cargo Manifests.
2 Store Lists.
5 Passenger Lists.
2 Lists of Cigarettes and Tobacco (see "Customs Allowances").

In addition to documents listed, 2 copies of each Bill of Lading are to be handed over on arrival to the Agents, for Local Customs' Authorities control and check.

PILOTAGE: Compulsory. Agent arranges with Harbour Master, therefore keep Agent closely advised ETA. Harbour Master may also be contacted on VHF Channel 16.

Pilot boarding position: Lat. 34° 29.6′ N., Long. 35° 49.5′ E.

APPROACHES: Sunken wreck in position Lat. 34° 30′ N., Long. 35° 49′ E.

Depth in channel 9.0 m.

ANCHORAGE: Good anchorage.

MAX. SIZE: Max. LOA 150 m. (occasionally 175 m.). Max. draft alongside berth 22 ft. 6 in.

HEALTH: Health Authorities board in roads. Health form obtainable from Agent or doctor. Yellow Fever Certificates required for ships coming from Far East and Red Sea. Owners should check with Agents respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members.

RADIO: Cables via Beirut Radio to and from Agent.

VHF: Harbour Master on Channels 16 and 6.

BERTHING: New pier about 600 m. length. 2 berths. 20 cranes, capacities 5 tons – 100 tons. 2 forklifts with capacity 20 tons each. Lighters available for discharging alongside vessel. Ship's gear often used for discharging. There is a grain silo with capacity of 4,000 tonnes. 30 steel barges of 350 tons capacity each. 40 wooden and steel barges of 200 tons capacity each. All cranes, forklift and barges are privately owned. 50 ton floating crane available, owned by port company.

STEVEDORES: Ordered by Agent. No ETA to stevedores necessary. Working hours, 0700 – 1500, otherwise overtime included on Sundays and on official holidays.

MEDICAL: Master to advise Agent by cable prior to arrival if medical attendance required. Hospitals available.

DENSITY: 1025.

FRESH WATER: Available by barge.

FUEL: Available alongside by tanker trucks.

REPAIRS: Possible.

GANGWAY/DECK WATCHMEN: Available and recommended.

OPENING/CLOSING HATCHES: For liners by stevedores, otherwise per agreement.

CUSTOMS ALLOWANCES: Tobacco. 40 cigarettes per crew member. Customs very strict, checking crew cabins. Regulations are as follows:

1. That the quantity of tobacco to be allowed on board vessels upon their arrival at a Lebanese port will be fixed on the basis of 2 packets per crew member, passenger per day, and to be calculated on a maximum period of 4 months, if the vessel emanates from an American, Asian or African port – not Central Africa; and for 2 months if the vessel's last port of call is in Europe, Central Africa or Mediterranean, which will be deducted from the quantity, and on the same basis the consumption by the crew members and passengers during their trip, and this to start from the last port of call until arrival at a Lebanese port.

That the number of passengers to be taken into account on a tourist vessel will be the number of berths the vessel can accommodate and not the number of passengers on board. As to cargo vessels, the actual number to be accounted for will only be the crew members and the Master of the vessel.

2. In the event that it is the first call of the vessel, at a Lebanese port and not aware of such regulations, and it was found on board her an excess quantity to the actual one allowed, as indicated above, a Process Verbal will be established for the excess quantity found and the cigarettes placed under seal. An undertaking is also to be obtained from either the Owners and/or her Agents to the effect that they will submit a certificate, within one month, to be issued by the relevant Customs Authorities of the next port of call of the vessel after a Lebanese port. While the seizure of the vessel will be lifted when the Bank guarantee equalling the amount of fine and dues is placed, or a Personal Guarantee from the Agent – if solvable – and in the event that the undertaking is not fulfilled, the usual penalties will be inflicted according to the law.

3. In the event the vessel is aware of such restriction, and for one reason or another she is carrying an excess quantity, this excess must be, as per official regulations, be shown on the manifest legalised and issued at the last port of call touched by the vessel prior to Beirut.

Any excess found over and above such declaration will be considered as smuggling and the law will be applied.

Wine and/or spirits: 1 bottle per crew member; Master allowed 3/4 bottles.

CARGO GEAR: Ship's gear to be used.

CONSULS: Most countries have consulates in Beirut.

AIRPORT: Beirut International Airport is 100 km. from Tripoli.

TIME: GMT plus 2 hours. Summertime, GMT plus 3 hours.

HOLIDAYS:

Holidays	*Date*	*Days*
New Year's Day	January 1st	1

Moslem New Year's Day	Varies	1
Achoura	Varies	1
Independence Day	November 22nd	1
Prophet's Birthday	Varies	1
Christmas Day	December 25th	1

BANKS:

The British Bank of the Middle East, Mina Street, Tripoli, Lebanon. Telex: 21850 Bbme.

Banco di Roma, Tell Street, Tripoli, Lebanon. Telex: 21818 Romtri.

STORING: See "Prelims".

1. Cargo ships can be stored by barge and truck and tankers by supply launches.
2. Cargo ships Yes. Tankers can be stored only at anchorage.
3. Yes.
4. Yes.
5. Storing can be done around the clock.
6. Storing is done by ship chandlers or their Agents.

SURVEYORS:

1. Cargo inspectors are available in Tripoli.
2. Surveyor's (Lloyd's and A.B.S.) are also available in Tripoli.

IDENTIFICATION CARDS: Shore pass given to each crew member. Passport and seaman's book to remain in Master's care.

AUTHORITY: The Harbour Master, Ministry of Public Works and Transport, El-Mina, Tripoli, Lebanon. *Tel:* 600283 (Harbour Master). *Telex:* 46030 LE A/B Tihama. *Contact:* V. Ghazi, Harbour Master.

AGENT: Gulf Agency Co. (Lebanon) Ltd., P.O.Box 2575, Zeilaa Building, 1st Floor, Tripoli El Mina (3100), Lebanon. Cables: "Gacship", Tripoli/Lebanon. Telephone: 600101, 600102, 600146, After hours 601515. Telex: 44874 or Athens 216344, 218687, 214548. Head Office: Beirut (which see).

(b) OIL TERMINAL.

Note: Terminal storage tanks were partly destroyed in late 1983. Sea berths were re-commissioned in March 1984.

DOCUMENTS: See "Section A – Dry-cargo Port".

PORT LIMITS: There are three spar-buoys to indicate the limits of the Company's Sea Terminal boundaries.

The location of these buoys is as follows:

1st. Lat. 34° 30′ 03″ N. Long. 35° 52′ 30″ E.
2nd. Lat. 34° 29′ 42″ N. Long. 35° 52′ 26″ E.
3rd. Lat. 34° 29′ 03″ N. Long. 35° 51′ 04″ E.

PILOTAGE: The company's Mooring Masters will meet tankers 2 miles N.E. of Tripoli Breakwater Head. Tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft. above water. This can be adjusted to suit conditions. A pilot ladder should be rigged immediately abaft the accommodation ladder, to within 2 ft. above the water. This will enable Pilot to ascend pilot ladder clear of launch and then step on to the lower platform of the accommodation ladder. United Kingdom Merchant Shipping (Pilot Ladders) Rules are relevant.

ANCHORAGE: Good anchorage immediately W.N.W. of No. 4 sea berth buoys.

MAX. SIZE: Least depth of water available in berth, and swinging circle after deducting 6 ft. for the height above sea bed of the sea line and cradle is as follows: No. 1 Berth, 62 ft.; No. 2 Berth, 66 ft.; No. 3 Berth, 53 ft.; No. 4 Berth, 38 ft. The swinging circle is defined as 1.5 ship's lengths from dropping position of ship's inshore anchor. The approximate draft limits quoted are based on an under-keel clearance, in the berths, of 6 ft.

VLCCs will be handled in Berth No. 2 and loaded to a draft of 60 ft. During the period April to October, and subject to the Master and Mooring Master being satisfied that weather conditions permit loading to a reduced under-keel clearance of 4 ft., then the loaded draft may be increased to 62 ft.

HEALTH: See "Section A – Dry-cargo Port".

RADIO: The Lebanese Oil Installations Limited, Tripoli, must be informed 48 hours prior to arrival of a vessel's ETA, quantity of cargo required, maximum loading rate, SWL of derrick for lifting hoses and confirming that the ballast for discharge in port waters is clean. Communication with Iraq Petroleum Company, Limited, should be by cable addressed to "Petriraq, Tripoli, Lebanon", or direct to Tripoli Terminal Radio Station.

Tripoli Terminal Radio Station. Call Sign – ODC 8.

Waveband	*Hours (GMT)*	*Watch Details*
	0800–0830	ODC 8 Broadcast Traffic List and calls ships on 8514 kHz. Listens on 8354–8374.
	1200–1230	Will transmit on 12831 kHz on request.
High Frequency	1600–1630	
	2230–2300	
	0000–2400	Monitor 500 kHz for calls and answers only.
	0730	Broadcast on 500 kHz QSW 442 kHz.
	0730–0800	Transmit Traffic List on 442 kHz, receives ship frequencies – 425, 454, 468, 480 and 512 kHz.
	1130	Broadcast call on 500 kHz, QSW 442 kHz.
	1132–1200	Transmit Traffic List on 442 kHz, receives on normal ship frequencies – 425, 454, 468, 480 and 512 kHz.
Medium Frequency	1530	Broadcast call on 500 kHz QSW 442 kHz.
	1532–1600	Transmit Traffic List on 442 kHz, receive on normal ship frequencies – 425, 454, 468, 480 and 512 kHz.
	2200	Broadcast call on 500 kHz, QSW 442 kHz.
	2202–2230	Transmit Traffic List on 442 kHz, receive on normal ship frequencies – 425, 454, 468, 480 and 512 kHz.
	2232	Broadcast call QSY QSX 500 kHz.

Cables to Agents may be routed through Beirut Radio.

VHF: Tripoli:

Equipment: Fixed Station sited in Terminal Building and used by Control Room.
Call sign: Tripoli Control
Range: Approximately 15 miles.
Frequency: Transmitting on 163.6 MHz. Receiving on 159.1 MHz.
Watches: Continuous.

Mobile Station

Equipment: Portable, battery operated, carried aboard vessel with Mooring Master.
Call sign: Ship's name (before mooring), or Berth No. (after mooring).
Range: Approximately 8 miles.
Frequency: Transmitting on 159.1 MHz. Receiving on 163.6 MHz.
Watches: Continuous, whilst Mooring Master on board.

Notes

1. Tripoli also keeps a continuous watch on the international calling frequency of 158.8 MHz. This has a range of approximately 15 miles and its call sign is "Tripoli Control".
2. The VHF System is not connected to the main telephone switchboard and only selected shore stations have access to it.

TUGS: There is no tug at Tripoli.

BERTHING: *Sea Line Berths.* 5 berths numbered from N.E. to S.W. specifications as follows:

Berth No.	*Max. t.p.h.*	*Fixed Sea Line*	*Strings of Flexible Hoses*	*Approximate Limits Draft*	*Approximate Limits Deadweight*
1	5,000	2×24 in.	2×16 in.	56 ft.	140,000
2	6,000	1×32 in.	2×16 in.	60 ft.	250,000
3	5,000	1×32 in.	2×16 in.	47 ft.	87,000
4	Products	2×16 in.	2×12 in.	32 ft.	25,000
5	LPG	1×6 in.	1×6 in.	30 ft.	5,000
		1×3 in.	1×3 in.		

As loading is by gravitation, the maximum rates are dependent upon availability of suitable shore tanks and loading lines.

LOADING:

1. *Readiness to Load,* will be received by the Mooring Master, who is the Company Representative on board. The advice from the vessel which states she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard the vessel has been completed. As soon as possible after such a signal has been received and without further advice, loading will commence. Damage to hoses can occur if ship's valves are not open at the start of loading.

2. *Derricks*
(a) Two hoses are connected on the port side amidship.
(b) Derricks or cranes reaching over the hose connection should be capable of lifting the flexible hose from the sea-bed to a height of up to 30 ft. above the deck.
(c) A minimum SWL of 5 tons is required for 12 in. hoses.
(d) The faster loading berths equipped with 16 in. hoses are available only to vessels with derricks and tackle with a minimum "Safe Working Load of 7 tons". Such vessels will be given berthing priority when queuing occurs and these berths are free but other vessels have not the capacity to handle the larger hoses.

3. *Hose Hang-off Bitts* are required at about 10 ft. from the ship's rail at the loading manifold to secure the submarine hoses on the port side.

4. *Hose Connection/Disconnection.* Ship's crew with a responsible officer in charge to perform all operations as advised by the Mooring Master, to lift, connect, disconnect and lower hoses.

5. *Ship's manifold* – to be prepared for the connection of 12 in. or 16 in. hoses with flanges of 150 series, dependent on berth allocation.

6. *Loading – Supervision and Commencement*
(a) All operations in connection with starting of loading, discharging, switching of tanks on board and topping-off must be directly and personally supervised by a responsible ship's officer.
(b) The advice from the vessel that she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard the vessel has been completed. As soon as such a signal has been received, and without further advice, loading will commence. Damage to hoses can occur if ship's valves are not open at the start of loading.
Caution: The oil loading stream to the ship is controlled on shore and it is extremely dangerous if a ship's valve is closed against the flow of oil.
To prevent excessive pressure from surge in ship and shore lines, ship's valves must not be shut-off against the stream, and when switching tanks, ship's valves must be closed slowly. Vessels will be held liable for damages resulting from any mal-operation of valves on board.

7. *Tank Dips.* During loading frequent checks should be made by the responsible ship's officer to ensure that cargo is entering the designated cargo tanks only and that there is no escape of oil into pump-rooms or through sea and overboard discharge valves. Particular care must be exercised by ship's personnel in "Topping-off" tanks and towards completion of loading to ensure that the terminal is given timely advice of any decrease in loading rate required. Adequate "standby" notice must be given before the final "stop".

8. *Loading Operations*
(a) The Mooring Master will not transmit any loading instructions to the shore until the responsible ship's officer is satisfied that the hoses are connected correctly and that all valves have been set for receiving cargo.
(b) Loading rates requested by the vessel or quoted by the terminal will be the peak or maximum rate at any time during the loading period.
(c) While in berth, ships should be ready to move under their own power in the event of their breaking adrift, catching fire, fire in adjacent berths or other emergency. No repair should be carried out while in berth which would immobilize the ship or impair her fire-fighting efficiency.
Failure to vacate the berth on completion of loading may result in delays to other vessels, demurrage, and loss of throughput which shall be accountable to the vessel.
(d) The Mooring Master will advise the Master of the ship as to any signals needed for local requirements.
(e) The Mooring Master brings a portable radio on board for ship to shore communication.

Products: *Requirements for a Product Delivery Vessel:*
1. The discharge berth is an open sea berth.
2. Tripoli Terminal Call Sign is ODC 8 and Master's ETA should be sent at least 48 hours prior to vessel's arrival on 500 kHz.
3. Vessel to be equipped with centrifugal pumps capable of maintaining a ship's rail pressure of 120 p.s.i. (reciprocating pumps are totally unacceptable).
4. Max. draft loaded 32 ft. in Berth No. 4 and 62 ft. in Berth No. 2.
5. 5 ton derrick SWL.
6. 6 mooring ropes 120 fathoms each.
7. Port and starboard anchors to have a minimum of 8 working shackles each.
8. Midship connection (Portside 1×12 in. 150 ASA).
9. Pumping is against a head of 270 ft.
10. Laytime to be calculated at an average discharge rate of 250 t.p.h.

DENSITY: 1025.

FRESH WATER: May be available at anchorage before berthing, but it is expensive.

FUEL: Fuel oil is available at Berths 2 and 3. The 12 in. bunker hose is raised on the port side of the vessel. Bunkering rates are 100 t.p.h. to 350 t.p.h.

CUSTOMS ALLOWANCES: See "Section A – Dry-cargo Port".

GENERAL:

1. *Ballast*
(a) Vessels should arrive with sufficent clean ballast for safe handling of vessel under prevailing weather conditions.
(b) Ballast water must be clean and a declaration signed by the Master and delivered to the terminal to this effect. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard.
(c) *Pollution of the sea – warning.* It is an offence to discharge dirty ballast or pump out bilges. The authorities are very strict and your attention is drawn to the Lebanese Notice to Mariners No. 23/1 of 29th July 1965, and to the volume entitled "International Conference on Prevention of Pollution of the Sea by Oil", issued by IMO London.
In the event of your vessel discharging dirty ballast or spilling oil, cost for cleaning the pollution, third party claims and port fines shall be borne by the vessel.
It is recommended that vessels carry an adequate amount of dispersants with means of application in case of oil spills.

2. *Gear to be provided by the ship*
(a) Anchor to be fitted with marker buoys and 20 fathoms line.
(b) 4 good mooring lines of not less than 150 fathoms each and of suitable size for the vessel. 2 additional 150 fathoms lines securely tailed to the first lines for cases where 150 fathoms may not reach to the stern buoys initially.
(c) For vessels of 50,000 d.w.t. and larger, powered mooring winches with 200 fathoms of wire rope.
(d) 4 suitable rope stoppers to be available aft.
(e) 2 good chain stoppers for use on 5.5 in. circumference wires (preferably carpenter's patent stoppers).
(f) 2 good 4.5 in. circumference boat ropes 200 ft. long placed one on each side of the vessel.
(g) 2 good ropes, 15 fathoms × 3.5 in. circumference and 2 heaving lines for lowering hoses.

3. *Lighting.* Manifold and poop mooring areas should be adequately lit to enable night mooring and loading operations to be carried out with safety. Sea area around the ship to be illuminated.

4. *Deck Watch.* A deck watch must be maintained at all times the vessel is in berth. In addition to its normal duties, the watch must inspect the hose connections and area around the ship against oil spillage, pollution, and prevent unauthorised persons from boarding your vessel.

5. *Boarding of vessel.* The control of persons boarding your vessel is the ship's responsibility. Boarding should be restricted to Company employees on duty and to persons authorised by the Port Authorities as advised by your Agents.

6. *Stores/Provisions* or other items should not be received or discharged whilst loading is in progress. Launches other than the Company's mooring launch, should not lie alongside the vessel.

7. *Tanker Safety.* Masters are at all times responsible for the application of all safety precautions as prescribed in the International Oil Tanker and Terminal Safety Guide.

8. *IOTTSG Safety Check List.* The Tanker Safety check list must be completed after inspection of each item prior to commencement of and during loading. The Mooring Master is authorised to stop all loading operations should he consider that the safety of lives and property is endangered by the infringement of safety rules.

9. *Action in case of Emergency.* In the event of a fire, oil spillage or other emergency on the vessel,

The Emergency Signal is:—

3 or more blasts of not less than 10 seconds duration each on whistle or siren supplemented by a continuous ringing of the general alarm bells.

SHIPMASTER'S REPORT: February, 1983.

Documents:
1 Copy Cargo Manifest.
3 Copies Crew Lists.
1 Copy Personal Effects Declaration.
1 Copy Bonded Stores List.

Approaches: Admiralty Chart No. 2903 – Tripoli Roadstead.

Ramkin Isle Light visible on approaches to the port but cannot be relied upon for full power.

Fairway Light Buoy (flashing green every 4 seconds):
Position: Lat. 34° 30′ 00″ N.
Long. 35° 52′ 28″ E.

N.B. – The Fairway Buoy has been removed.

All buoys should be treated with caution as some removed and all unlit. Breakwater and mooring buoys give good radar targets.

Pilotage: Pilotage is compulsory. In an emergency, vessel could dock/undock without Pilot. Area on chart marked 'Pilots' should be avoided due to a wreck with only 21 ft. clearance. Most suitable position for boarding is 1 mile East of this area.

It is requested that tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft. above the water. A pilot ladder should be rigged immediately abaft the accommodation ladder, to within 2 ft. above the water (U.K. Merchant Shipping – Pilot ladders – Rules 1965 is relevant).

Pilot ladder used for boarding. Accommodation ladder unsuitable due to swell.

Anchorage: Area for boarding Pilot is also suitable for anchoring, if awaiting berth due to adverse weather, and for approaches to the sealine berths. Good holding with 7 shackles of cable.

Restrictions: No night navigation.

Max. Size: Draft restricted to 62 ft. No restrictions on length or beam.

Health: Pratique granted on arrival.

Radio: Initial ETA sent to Beirut via Portishead Radio.
(a) Advice of ETA, is required 48 hours prior to vessel's ETA stating quantity of cargo required, max. loading rate, SWL of derrick for lifting hoses, and confirming that the ballast for discharge in port waters is clean.
(b) Lines of Communication:
  i. Tripoli Terminal Radio Station. Call sign ODC8.
  ii. By cable to "Petriraq Tripoli – Lebanon".
  iii. International VHF 156.8 MHz – range approx. 15 miles. Call sign "Petriraq Tripoli".

Tripoli Oil Installations – Lebanon.

Station: Tripoli Oil Installations – Lebanon, Tripoli Lebanon, private station for communication with tankers bound Tripoli, Lebanon.

Call sign: ODC8. Address: Toil, Tripoli Lebanon.

Periods open for traffic: ODC8 keeps a continuous 24 hours watch on 500 kHz for calls and answers only.

Medium Frequency Schedules: ODC8 transmits traffic list on 442 kHz and listens in the band 425-512 kHz.

0750 – 0800 hrs. GMT. 1530 – 1600 hrs. GMT.
1130 – 1200 hrs. GMT. 2200 – 2230 hrs. GMT.

High Frequency Schedules: ODC8 transmits traffic list on 8514 and 12831 kHz simultaneously and listens in the band 8554 – 8374 kHz:

0800 – 0830 hrs. GMT. 1600 – 1630 hrs. GMT.
1200 – 1230 hrs. GMT. 2230 – 2300 hrs. GMT.

Note: In addition to above, Tripoli Terminal keeps a continuous watch on the international calling frequency of 156.8 MHz. This has a range of approximately 15 miles and its call sign is "Toil, Tripoli Lebanon". *It is essential* that tankers bound Tripoli Lebanon, communicate with station ODC8 at least 48 hours before arrival, and thereafter maintain contact (It may, at any time, be necessary to change orders regarding port of loading).

Radio station reported to be operating at reduced power but no contact made at all to date. Reasons given: No operators, no technicians, no maintenance, to name but a few. Contact made by VHF to 'Tripoli Oil Terminal', range varies from 15 miles down to 3 miles.

VHF: See "Radio". Pilots Channel 16, Port Channel 16, Agents' Channels 16 and 14.

Tugs: Not available. Vessels can dock/undock without tugs under favourable weather conditions.

Conditions of Use:

Notice: The facilities and assistance provided by TOIL to ships visiting the port for any purpose whatsoever are subject to the following conditions whether or not any charge is made therefor:

1. Assistance, Advice or Instructions.

   Neither the TOIL (which expression shall hereafter include any other owner of property used in conjunction with the property of TOIL) nor its servants or agents (in whatever capacity may be acting) shall be responsible for any loss, damage, injury or delay from whatsoever cause arising out of any assistance, advice or instruction whatsoever given or tendered in respect of any vessel. In all circumstances the Master of the vessel shall remain solely responsible on behalf of his Owners for the safety and proper navigation of his vessel, and the vessel and her Owners shall indemnify TOIL or its agent against all loss or damage sustained by TOIL or its servants or its agents, or for which TOIL shall be legally liable by reason of negligent navigation of the vessel.

2. Use of Sea Berths, Sea Loading Lines, Harbours, Jetties and Gear.

   (a) While TOIL has taken all reasonable care to ensure that the berths, facilities and other premises of TOIL and the gear and equipment used in connection therewith are safe, TOIL does not represent or warrant that the sea berths, sea loading or bunkering lines, harbours and jetties of TOIL or the gear and equipment (including gangways where provided) used in connection therewith are safe or suitable for any vessel, and any vessel using them or any of them shall be and remain at the sole risk of the Owners or Master thereof and in particular (but without prejudice to the generality of the foregoing) the safety or suitability of the gangway is the sole responsibility of the Master.

   TOIL does not warrant the seaworthiness of any craft hired or used by any vessel nor its fitness for any particular purpose.

   (b) TOIL will not be responsible for the acts or defaults of any of its servants or agents or of any Port Authority or its servants or agents nor for any loss, damage, injury or delay from whatsoever cause arising that may occur to the vessel or her cargo or equipment or to the Master or any member of her crew whether on board or otherwise, or in the course of mooring or unmooring or raising or lowering of the loading or bunkering lines or loading or discharging or otherwise howsoever, or to any third party, and the vessel and her Owners shall hold TOIL or its servants or agents harmless and indemnified against all claims, damages, costs and expenses arising therefrom.

   (c) TOIL will not be responsible for any loss, damage, injury or delay directly or indirectly caused by or arising from strikes, lock-outs or labour disputes or disturbances whether TOIL or its servants or agents are parties thereto or not.

   (d) If during or by reason of the use of the vessel of the sea line terminals, harbours or jetties or other premises of TOIL or its agents or the gear or equipment used in connection therewith or any craft of TOIL, any of them shall be damaged or become dangerous or unusable and irrespective of whether or not such damage has been caused or contributed to by the negligence of TOIL or its servants or agents or of any Port Authority or its servants or agents, the vessel and her Owners shall hold TOIL or its servants or agents harmless and indemnified against all loss arising therefrom.

3. These conditions shall be construed according to the law of Lebanon and if so required by TOIL the vessel and her Owners shall submit to the jurisdiction of the Lebanese Courts.

Notice of Readiness: Notice of Readiness accepted by Mooring Master at his time of boarding.

Ballast: Our vessel required a minimum of 6,000 tons of ballast on sailing light.

No facilities for dirty ballast or slops.

Loading: Mooring Master remains aboard at all times. Mooring boat and crew also stand-by throughout. Meals to be provided for the extra personnel.

Loading/Discharge Operations: Ship's pumping pressure not to exceed 120 p.s.i.

Discharging: Reducers supplied by terminal. No problems for 10 in. manifold.

Programme of operations:

During Mooring Operations:	*Action*
1. Ullage, Water Dip and Sample Ship's Tanks.	Terminal for Refinery
2. Labelled Samples ex ship and any forwarded from loading port to Refinery for checking prior to commencement of discharge.	Terminal for Refinery
3. Authority to discharge cargo after testing of ship's samples.	Refinery
General Sequence of Operations:	
1. Ship to pump sea water to clear into shore tanks the amount of gas oil contained in the sea and shore lines.	All concerned
2. When advised follow up with ship's cargo, warning of any stoppages in the ship's pumps is essential.	All concerned
3. On completion of discharge, ship to pump sea water, as required, to clear sea/shore lines.	All concerned
4. Sea/Shore Pipe-line systems to be left with sea water.	All concerned
Prior to commencement of Discharge:	
1. Pressure gauge to be fitted at hose on ship's manifold connection.	Marine Supervisor
2. Discharge pressure at ship's manifold not to exceed 120 p.s.i. (9 kgs.).	Mooring Master
3. Refinery to gauge tanks and prepare lines for the reception of gasoline (estimated at 180 long tons) and to confirm to Terminal Shift Supervisor when ready to receive the stream (time to be logged).	Refinery
4. Terminal Supervisor to ensure shift attendants are on duty to operate and supervise the booster pump at the transfer manifold.	M.M.S. and Terminal Supervisor
5. A Fireman will be required to be in attendance at the Booster Pump Manifold throughout discharge operations.	Refinery
Commencement of Discharge:	
1. Vessel to commence pumping sea water, gradually increasing pressure to maximum when all the system to the shore tank is checked and shore tank is receiving stream.	Mooring Master on board, also Ref. and Terminal Shift Supervisor
2. The booster Pump will pick up the stream at the Transfer Manifold, Pump attendants must be instructed to maintain a minimum positive suction pressure of 5 p.s.i. and operate within permissible amperage readings.	M.M.S. and Terminal Supervisor
It is VERY IMPORTANT that ship/shore operations be co-ordinated to ensure that the Booster Pump is never on stream when the ship's pumps are stopped, as this would cause DANGEROUS overheating conditions, especially dangerous in low flash point refined products.	Mooring Master (Terminal Shift Supervisor for immediate instructions to Pump Attendant).
3. Pressure readings at ship's manifold and at Foreshore Manifold to be recorded hourly by Foreman.	Mooring Master and Terminal Foreman
During Ship's Pumping/Discharge:	
1. Refinery to sample at manifold of Tank 39 or any other points and advise when the line content of gas oil has been displaced and pumping of sea water by the ship should stop.	Refinery to Terminal Shift Supervisor
2. Refinery to advise when vessel may commence pumping its cargo.	Refinery to Terminal Shift Supervisor
3. Refinery to sample stream at Manifold of Tank 39 etc., where sea water would be drained out and switch stream into appropriate storage tanks when the required product appears in the sampling.	Refinery
4. IMPORTANT: Comply with Safety Code precautions when gauging receiving tank, especially when the oil level is below roof supports, to avoid the discharge of static electricity by the introduction of any "Conductors", such as a metal gauge tape and weight, into the space between the roof and level of the oil being received.	Refinery
Completion of Cargo:	
a) Mooring Master to advise when cargo discharge is completed and ship's tanks are dry.	Mooring Master
b) When advised, vessel to resume operations by pumping sea water to displace the line content of Blend Stock.	Mooring Master Terminal Shift Supervisor
c) Refinery to advise when pumping of sea water may be stopped.	Refinery to Terminal Shift Supervisor
d) Refinery to gauge tanks and prepare certificate of quantity for cargo received in accordance with general procedure.	Refinery Terminal
e) Shore line to be re-set to "CLOSED" and to be left with sea water up to Tank 39.	Refinery to Terminal Shift Supervisor

Also see "Loading".

Density: 1025.

Fresh Water: Available by barge. Arranged through ship's Agent.

Fuel: Fuel oil is available in Berths 2 and 3 through a 12 in. hose lifted on the port side. Rates may vary between 100 and 350 t.p.h.

Diesel and lubrication oils not available.

Consuls: Nearest British Consul at Beirut.

Repairs/Dry Dock: Not available.

Surveyors: Lloyd's.

Gangway/Deck Watchmen: Due to attempted theft of paint stores by armed men, security guards recommended at the anchorage and on the berth.

Shore Leave: Not permitted.

Customs Allowances: Bond checked by Customs but not sealed.

Airport: Nearest at Beirut.

Services: Available: Laundry service, telex (unreliable), doctor, hospital, provisions, recovery of anchors, etc.

Not available: No facilities for discharge of slops or dirty ballast.

NOTICE: Responsibility for the safe conduct of operations on board your ship while at our terminal rests with you as Master. Nevertheless since our personnel, property and other may suffer serious damage in the event of accident aboard your ship, we wish before operations start, to seek your full operations and understanding on the safety requirements set out on the Ship/Shore Safety Check List.

The Safety requirements have been drawn up by ourselves in conjunction with other Terminal Operators in Middle East and representative section of the International Tanker Industry.

They are based upon the provision of the codes of safe Practice currently accepted by the Oil and Tanker Industries. We therefore expect you and all under your command to adhere strictly to them, throughout your stay in this Terminal. We, for our part, will ensure that our personnel do likewise and co-operate fully with you in the mutual interest of safe and efficient operation.

In order to assure ourselves of your compliance with these Safety requirements we have instructed our Mooring Master to report to you or your deputy and join one of your officers in a routine inspection of Cargo Decks and accommodation spaces.

If you observe any infringement of these requirements by Terminal or any other personnel on board your ships, please bring this immediately to the notice of our representative. Should you consider any immediate threat to the safety of your ships arises out of any action on our part or equipment under our control, you are fully entitled to demand an immediate cessation of operations.

Our Mooring Master is the Company Representative on board. WE RESERVE THE RIGHT IN THE EVENT OF CONTINUED OR BLATANT DISREGARD OF THESE SAFETY REQUIREMENTS IN YOUR SHIP, TO STOP ALL OPERATIONS AND ORDER YOUR SHIP OFF THE BERTH FOR APPROPRIATE ACTION TO BE TAKEN BY THE CHARTERERS AND THE OWNERS CONCERNED.

For TRIPOLI OIL INSTALLATIONS – LEBANON

AUTHORITY: *Operator:* Tripoli Oil Installations Lebanon, P.O.Box 150, Tripoli (via Beirut), Lebanon. *Tel:* 601995, 620501/2/3/4. *Telex:* 46313, 46069. *Cables:* Petriraq Tripoli. *Contact:* Captain George Abed, Terminal Manager.

AGENT: See "Beirut".

NOTES

Please also advise Shipping Guides Ltd.

Liberia

GENERAL

COURTESY FLAG: Masters of vessels should check with the Pilot the correct times for raising and lowering (0600 – 1800 hrs.) the courtesy flag as heavy fines are imposed if raising and lowering is carried out at the wrong time. It is also advisable to carry a spare courtesy flag aboard the vessel.

BUCHANAN: 05.52 N. 10.02 W. (See Plan)

PORT LIMITS: A vessel shall be considered to have arrived at Port of Buchanan when she enters a circle with a 3 nautical mile radius from the beacon on the main breakwater head (Fl.G.3 sec.). The above does not affect present stipulations of ore ships' Notice of Readiness, which remain unchanged nor does it limit Port Authorities exclusive right to decide in which order ships shall be worked.

Notice of Readiness: Notice of Readiness will not be accepted from vessels anchored more than 3 miles off the head of the main breakwater.

DOCUMENTS:

1 copy Clearance from last Port of Call.
1 copy Health Declaration.
6 copies Number of Passengers.
4 copies Ports of Call
6 copies Cargo Manifest (even in ballast).
7 copies Crew List.
3 copies Stores List (ship).
3 copies Personal Effects List.
1 copy Vaccination List.

Customs, health and passport inspection normally takes place at the berth.

It is recommended that the Master of the ship himself attends at the boarding party to clear the ship upon arrival and that the above documents are prepared upon the ship's arrival.

PILOTAGE: Lamco provides pilotage. Pilot boarding approximately 1.5 miles off the main breakwater, bearing 095°/110°. Pilot to be provided with a clean and safe ladder on the lee side. Buchanan Pilot on VHF Channel 16.

ANCHORAGE: If waiting for Pilot, anchor off main breakwater on bearing 090° – 110°, 1.5 miles – 2.5 miles off main breakwater (South).

Exit Channel: Anchoring is prohibited within a sector with a bearing of 060° – 080° to the head of the main breakwater, as this is the exit sector.

RESTRICTIONS: Harbour traffic hours – towage and pilotage (ore ships), 0000 – 2400 hrs. General cargo ships (tankers), 0700 – 2300 hrs.

MAX. SIZE: See "Bulk Handling Facilities", "Berthing" and "Tankers".

Arrival Draft: Maximum arrival draft for ore carriers must not exceed 8.85 m. and air draft should not exceed 15.0 m. Maximum arrival draft for cargo vessels must not exceed 9.15 m.

HEALTH: Customs, health and passport inspection normally takes place at the berths. Quarantine signal must not be hauled down before "Free Pratique" is received. If diseases are suspected on board contact the Port Authorities or Agents by radio for instructions. After call at other Liberian ports where Free Pratique has been granted, Port Health will also board here.

RADIO: Buchanan Harbour will call on 6520 kHz, 4 days before ETA, between 0800 hrs. and 0830 hrs. GMT, or when within 200 miles call Buchanan Harbour on 2182 kHz at 0800 hrs. GMT. Communications with ore ships per HF, call 2182 kHz. Traffic, 2638 kHz, 2738 kHz. VHF, call Channel 16. Traffic, Channels 6, 9, 12 and 14.

Contact immediately before arrival:

Watch schedule of Buchanan Harbour:

From about 2 hours before expected arrival of an ore ship, the LAMCO Clearing Office is keeping continuous radio watch on VHF Channel 16 and call frequency 2182 kHz, for possible subsequent switching over to VHF Channels 6, 9, 12 or 14 and 2738 kHz or 2638 kHz.

The call sign is "Buchanan Harbour", ELM 1.

All ore ships heading for Buchanan are requested to establish radio contact with "Buchanan Harbour", ELM 1, using the above frequencies approximately one hour before estimated time of arrival.

Contact 24 Hours Before Arrival:

Whenever an expected ore ship is to arrive in the Port of Buchanan within about 24 hours, the LAMCO Clearing Office will for the purpose of securing timely and accurate information on the ETA of the ship, maintain the following radio watch schedule.

Morning watch	:	0800 – 0900 GMT
Afternoon watch	:	1500 – 1600 GMT

Frequencies:

The radio watch is kept on call frequency 2,182 kHz for subsequent switching over to 2638 kHz, or 2738 kHz, or 6520 kHz (0830 – 0900 and 1530 –1600 GMT).

The radio set used on shore has a reach of approximately 600 miles. In accordance with the above, ore ships heading for Buchanan and having radio sets operating on frequencies listed are requested to establish radio contact with "Buchanan Harbour" and give ETA message as soon as possible after they have come within 600 miles distance from the port.

Contact at a distance of approximately 1,400 miles and on sailing from last port:

Sailing from last port: On sailing from last port for Buchanan, the owner or the Master shall telegraph to "GIMSALES", Stockholm (Telex No. 17549) and to "LAMCO", Buchanan (Telex No. 44260) stating expected date of arrival and furthermore indicate to the latter the vessel's preferred radio working frequency in the 4000 kHz – 8000 kHz range.

Radio watches: Starting 4 days before the vessel's ETA at Buchana "Buchanan Harbour", ELM 1, will call the vessel on 6520.0 kHz betwee 0830 – 0900 GMT and 1530 – 1600 GMT.

Every day, except on holidays and Sundays, Buchanan Harbou keeps watch on 2182.0 kHz between 0800 – 0830 GMT and 1500 - 1530 GMT and on 6520.0 kHz between 0800 – 0830 GMT and betwee 1530 – 1600 GMT. These watches will also be kept on holidays an Sundays in case a vessel is expected on those days or the followin workday.

Notice in advance: The Master shall give telex or cable notice 72 hou and 36 hours prior to the vessel's expected arrival at Buchanan t LAMCO, Buchanan, if no radio contact has been established previous

TUGS: Lamco provides towage with two tugboats 1,640 h.p. and on tugboat 3,300 h.p. Tugs join vessel about 0.5 mile North of red buoy

BERTHING: Ore Quay: Length 257 m., depth alongside 14.0 m.

Commercial Quay: Length 320 m., depth alongside 10.0 m.

Tug Quay: Length 126 m., depth alongside 10.0 m.

Storage: A commercial warehouse with a storage capacity o 2,300 sq.m. built on the harbour along with the Customs warehouse o 1,000 sq.m.

Iron ore storage capacity: 1.7 million tons on shipping stockpile 0.4 million tons on feed stockpiles.

CRANES: 1×150 ton derrick crane and 1×20 ton portal crane at th Commercial Quay.

BULK HANDLING FACILITIES:

Instructions for the handling of ore ships with a draft of 39 ft. or mor

The departure shall be arranged in such a way that the followin conditions are fulfilled:

1. *Minimum clearance "C"* under the ship's keel shall be 3 ft. exce for ships having a beam "B" exceeding 125 ft., for which minimu clearance required shall be calculated by the following formula:

$$C = \frac{B}{125} \times 3\text{ ft.}$$

2. *Maximum advisable draft "D" Max* in the basin shall at any time b based on the actual height of the sea level "H" at that time (measure from the project O-level) and on the required minimum clearanc "C" under the keel shall under normal conditions be estimated a follows (for – 12.95 area):

   D max = 42.5 + H – C (all measurements in feet).

3. *Departure on falling tide* is permitted only when it can be shown tha the minimum clearance "C" as per above will be maintained durin a period of at least 2 hours from the time the tugs start pulling. (Th means as a consequence that for a ship that commences departu less than one hour *before* high water the draft shall be based o estimated level of the falling water 2 hours after commencement.

   Note that the level one hour after high water has sunk about 7% and the level 2 hours after high water 25% of the total tidal range

Deep Water Basin at Buchanan Ore Loading Quay: With the completio of the deep water basin at the Ore Loading Quay, the water dept alongside the quay is increased from 12.95 m. to 14.00 m. below th zero level of the General Elevation System.

The required keel clearance is 3 ft. for ships up to 125 ft. beam. Th max. permissible draft alongside the quay is thus:

$$46\text{ ft.} - \left(\frac{\text{beam in ft.}}{125} \times 3\right)\text{ ft.} + \text{tide}$$

Tidal range:
MHWS = +1.18 m. above zero level of the General Elevation Syste
MLW = +0.05 m. above zero level of the General Elevation Syste
MLWS = – 0.15 m. below zero level of the General Elevation Syste

Because of the necessity to save a rock shelf to support the sheetpilin of the cells when blasting and dredging the deep water basin, ne fenders have been installed at the quay in order to keep the bilges o the vessels well clear of those rocks. The new fenders have a diamete of 1.20 m. A ship loaded to maximum permissible draft can have a lis of 5° without touching the rock slope but since she would touch th bottom with a list of about 3° such lists will not be tolerated.

Height of Shiploader: 17.0 m. above the water level at MHWS A 1.0 m. safety margin is normally sufficient.

Maximum shiploader outreach (including throw) from the new fende line is 24.0 m. whereby a max. 48 m. wide vessel can be loaded. Loadin rate 6,000 t.p.h. (3,000 t.p.h. July 1987).

It must be clearly understood that the sailing drafts are unchange The width of the deep water basin is only 60 m. It gives however, th great advantage of being able to continue loading without stopping fo low water, whereby loading can often be completed 12 hours earlie than without the deep basin.

An even greater advantage is probably the increased safety, shou a large ship develop engine trouble after she has exceeded the forme maximum permissible low water draft, in which case operators have n alternative but to pull vessel out at HW as "dead ship" which could ve easily result in a major accident with enormous econom consequences. Now operators can let vessel remain alongside over th next low tide without any risk.

Vacation of Berth: Vessels should vacate their berths immediately aft completion of loading or discharging.

Ore carriers are allowed a maximum stay of 30 minutes, wherea U.S.$1,000 per hour or any part thereof will be levied at the Harbo Master's discretion. (This may be exempt if vessel on max. draft awai high water sailing.)

EVEDORES: As early as possible advance notice of ETA required est by 1500 hrs. on day preceding arrival if a weekday. Or Saturday ore noon if arrival on Sunday.

Shore working hours: Ore handling: 24 hours a day.

eneral *cargo handling:*

Saturday 2300 – 0700
ntainer vessels/Ro-Ro vessels (Sundays and Holidays):
Sundays &
Holidays 0700 – 0700

EDICAL: Hospital and medical care is provided; advance notice ould be given in serious cases. Yellow fever and cholera vaccinations e compulsory to enter the Republic. Vaccination book is required.

ANKERS: One tanker berth with 1×8 in. pipeline for discharging only. ose connections are 6 in. and 10 in.

Max. size: 8.2 m. draft if length 170 m. or less and 7.0 m. if length er 170 m.

Oil depot capacity:
22,000 cu.m. diesel oil.
1,000 cu.m. gasoline.
15,000 cu.m. heavy oil.
Various storage tanks:
1,500 cu.m. diesel oil.
450 cu.m. heavy fuel.

ENSITY: Varying but around 1020/25.

RESH WATER: Fresh water is available, ex-quay only, rate is 20 t.p.h. ubject to availability.

UEL: No bunker facilities available.

ANGWAY/DECK WATCHMEN: Agent strongly recommends mployment of night watchmen as thieving is commonplace.

PENING/CLOSING HATCHES: Performed by stevedores.

ONSULS: Swedish Vice-Consul only; however, most countries are epresented either by Embassy or Consul at Monrovia.

EPAIRS: No commercial facilities available. In cases of emergency amco might assist with minor repairs.

USTOMS ALLOWANCES: Direct sales from ships are strictly orbidden.

EPATRIATION: Can be arranged.

IRPORT: Roberts International Airport about 1 hour ride by car; several onnections to the rest of the world.

IME: GMT; no alterations during the year.

OLIDAYS: January 1st; February 11th; Second Wednesday in March; arch 15th; April 12th; May 14th; July 26th; August 24th; First Thursday November; November 29th; December 1st; December 25th. Special olidays as proclaimed from time to time by the Liberian Government. o work will be performed on January 1st, July 26th and December 5th.

OLICE/FIRE/AMBULANCE: No phone available; however the Lamco ant Protection Force should be contacted; one Officer is normally signed to each quay/gate.

HORE LEAVE: Apart from South African citizens, who are not allowed shore, no restrictions.

ENTIFICATION CARDS: Not required.

ELAYS: Generally, no major delays have occurred. For ore carriers nd tankers the tide may occasionally involve 24/36 hours waiting time epending on the size of ships expected to load: general cargo ships; o delay.

ENERAL: *Customs:* Two Customs Officers stay on board the ship uring ship's entire stay and they should be given meals in the Officers' ess and if necessary night quarters.

abins: It is recommended to keep all cabins locked during the stay in ort.

rovisions: There are some chandlers in Buchanan for fresh fruits, fish, tc. No duty free or wholesale facilities provided.

de: Range of tide 0.90 m. – 1.50 m. (3 ft. – 5 ft.)

UTHORITY: *Port Operators:* Lamco J. V. Operating Company, o Roberts International Airport, Robertsfield, Liberia. *Tel:* Monrovia 24238 (local), Monrovia 221190 (overseas), Buchanan 1545, 1546. *elex:* 44260, 44293 Lamco. *Cables:* LAMCO Buchanan (Liberia) KTB. *ontact:* Harbour Master.

GENT: All ore carriers must employ LJVOC as their Agent.

ther vessels:

canship (Liberia) Inc., P.O. Box 19, Lower Buchanan. Tel: 32.32.36, 2.11.73. Telex: 44544, also via Monrovia 44281/44344.

GREENVILLE: 04.59 N. 09.03 W.

PORT LIMITS: Sea Buoy: 04° 58.27′ N., 09° 04.27′ W.

DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
4 Customs and Crew Declaration.
2 Vaccination Lists and valid Cholera/Yellow Fever Certificates.
2 Copies Manifests.
2 Copies, Bills of Lading.
Load Line and Safety Construction Certificates.
Licences of Officers (for Coast Guard).
Cargo Gear Certificate.

PILOTAGE: Compulsory. Pilot embarks in position of Sea Buoy or at the authorised anchorage. Boarding is done from a launch painted black and white with the word "Pilot" inscribed. Contact can be established on a normal working day between 0730 – 1700 hrs., on Saturdays 0730 – 1200 hrs., holidays and Sundays – Office not open, but should a vessel be expected the Pilot can be contacted during the expected time of arrival on VHF Channel 16 or 12.

ANCHORAGES: Indicated on the Chart by a dotted line commencing in position Lat: 4° 58.8′ N., Long: 9° 03.4′ W. running in a direction 309° for 11 cables thence 092° for 10 cables then 188° for 7 cables with a minimum depth of 6.5 fathoms. Care should be exercised as there exists a 4 fathom patch at the edge of the anchorage area. Vessels proceeding to the anchorage area should proceed with the Sea Buoy and the North Point Lighthouse, bearing 059° to within a distance of one mile from the breakwater, thereafter altering course for the anchorage.

RESTRICTIONS: Pilotage is carried out between 0500 hrs. and 2300 hrs. daily. Under extenuating circumstances pilotage can be done after 2300 hrs., if previous arrangements are made.

MAX. SIZE: Length 156 m., beam no restriction, draft 7.31 m.

HEALTH: Pratique granted by Port Health Officer on arrival at berth, no Radio Pratique granted.

RADIO: None, ETA's should be routed to Agents via telex or cables.

VHF: Contact can be established with the Marine Office or the various Agencies during normal working hours Monday – Friday 0730 – 1700 hrs., and on Saturdays 0730 – 1200 hrs. on Channel 16 VHF.

RADAR: No Port Control radar.

TUGS: One twin screw tug of 1,450 b.h.p. available for assisting vessels. This tug is equipped with modern fire fighting appliances, and can also execute coastal towage of vessels if required. Ship's lines are preferable for towing, but if not available then tug's line can be used.

Two 192 h.p. launches are available for assisting coasters, and the towing of logs when rafting is being done.

BERTHING: One jetty 585 ft. in length with a depth of 8.1 m. Smaller jetty for vessels not exceeding 180 ft. in length with a depth of 4.9 m. alongside. In addition vessels loading floating logs can be berthed safely in the middle of the basin parallel to the main jetty with a depth of 8.1 m. Under favourable weather conditions (November – April) a third vessel can be accommodated at right angles to the jetty in a similar depth to the inner basin. All loading and discharging must be done by ship's gear.

CRANES: None presently available, but plans are underway to purchase a 70 ton mobile crane.

BULK CARGO FACILITIES: Cargo handled-forestry products only i.e. logs, boules, sawn timber and plywood.

SPECIALISED CARGO HANDLING FACILITIES: None.

BRIDGES: None.

STEVEDORES: Arrangements can only be made on vessel's arrival as this depends on the availability of the logs and sawn timber to be loaded. The required loading rate for vessels alongside the jetty is 800 cu.m. per 24 hours and vessels in the basin 500 cu.m. per 24 hours.

MEDICAL: One Government owned hospital with 50 beds, and one private clinic, both with limited facilities available.

TANKERS: Facilities for small coastal tankers only, but larger tankers loading palm oil can use the large jetty with portable hoses/pipes connected from the permanent installation.

DENSITY: November-April 1025; May-October 1010.

FRESH WATER: Available at berth or by tug.

FUEL: Small amounts of diesel can be delivered by truck.

FIRE PRECAUTIONS: Usual precautions.

CONSULS: Nearest at Monrovia.

REPAIRS: No facilities.

DRY DOCKS: None.

SURVEYORS: All classification societies are represented at Monrovia. Surveyors will travel to Greenville if arrangements are made by Agents.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

HATCHES: Opening/closing carried out by crew but alternative arrangements can be made for shore labour.

CUSTOMS ALLOWANCES: 200 cigarettes/1 bottle spirits per crew member, but depending on duration of stay.

CARGO GEAR: Ship's gear only.

REPATRIATION: Carried out via Monrovia.

AIRPORT: Small domestic airport 5 miles from the port with two flights daily to Monrovia, approximately 45 minutes flying time.

TIME: GMT is observed throughout the year.

HOLIDAYS: There are 13 National Holidays, January 1st, New Year's Day; February 11th, Armed Forces Day; 2nd Wednesday in March, Decoration Day; March 15th, J. J. Roberts' Birthday; Good Friday; 2nd Friday in April, Fast and Prayer Day; April 12th, National Redemption Day; July 26th, National Independence Day; August 24th, National Flag Day; 1st Thursday in November, Thanksgiving Day; November 29th, Tubman's Birthday and December 25th, Christmas Day.

No work is permitted whatsoever on January 1st, New Year's Day; April 12th, Redemption Day: July 26th, Independence Day and December 25th, Christmas Day.

POLICE/AMBULANCE/FIRE: Within reach. Not available by telephone.

TELEPHONES: Not available.

SERVICES: No facilities exist for tank cleaning or compass adjusting.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not required.
REGULATIONS: No unusual regulations.
DELAYS: Can be expected during the rainy season (April-November) when adverse weather conditions (heavy swell) exist causing vessels to part their moorings. This usually lasts not more than 2 days in any given period. At such times, vessels are moved to the inner basin or to the roadstead until the conditions improve.
GENERAL: The port designed for the handling of logs and related wood products has just completed a re-habilitation project which included the dredging of the basin and approaches, new rafting and lighting facilities, also the placing of both fresh and salt water mains to the quay. Feasibility studies are now underway with a view to increasing the length of the Main Quay by 33 m. Despite the fact that the present facilities are for vessels of 156 m., vessels of 160 m. were safely berthed in the past year.

Navigational aids installed in 1987 as follows:

Sea Buoy R. & W. HOR. bands, Posn., 04° 58.27′ N., 09° 04.27′ W. Fl. W. ev. 10 secs.

Buoy marking mutine patch R. & W. HOR. bands, Fl. W. ev. 6 secs.

Red Buoy bearing 337° × 2 cables from the breakwater marking the Northern extremity of the Harbour, Fl. R. 3 ev. 8.5 secs.

North Pt. Lt. Ho. Sectored Fl. R. & W. 2 ev. 11 secs.
130° – 310° Obscured
310° – 040° Red
040° – 080° White
080° – 130° Red

Light at the Northern extremity of Jetty, Fl. G. ev. 3 secs.

AUTHORITY: National Port Authority, Port of Greenville, P.O.Box 165, Greenville, Sinoe County, Liberia. *Tel:* 9538/9. *Cables:* "Sinoe Port". *Contact:* Captain S. L. Wynter, Chief Pilot.

AGENT: See "Monrovia".

MONROVIA: 06.20 N. 10.50 W. (See Plan)

DOCUMENTS:
4 Crew Lists.
4 Passenger Lists or Statements "Nil" if none aboard.
2 Manifests for Customs. This should state ballast if no cargo aboard.
4 List of Ports of call from commencement of voyage with date of calls.
1 International Health Declaration.
1 List of dates of yellow fever and cholera vaccination.
4 Stores Lists.
2 Crew Customs Declarations.

Immigration now stamp all seamen's Discharge Books or Passports.
2 Livestock Lists.

Notice:

The National Port Authority have issued Circular No. 1/1988 which reads:

"The National Port Authority, Freeport of Monrovia, is herewith announcing the following:

1. Ship's ETA, draft – and corrected ETA – shall be furnished to the Harbour Master in writing, minimum 24 hours prior to ship's arrival.
2. The following cargo documents shall be furnished minimum 48 hours prior to ship's arrival to the Operations Manager (with the exception of those cargo documents of last coastal port in West Africa, which shall be made available at ship's arrival).

Import:
6 complete and legible sets of Cargo Manifests, classing separate:
– containers (size and type to be indicated)
– rolling units
– general cargo (loose)
– LCL-container manifest (separate per unit)
– summary.
2 Manifests of cargo to be shifted via quay
1 Stowage/bay plan
3 List of Dangerous Goods (as to IMDG-codification) for Monrovia
1 List of Dangerous Goods (as IMDG-codification) in transit

Export:
2 copies of the provisional Booking List shall be furnished minimum 48 hours prior to ship's arrival to the Operations Manager
3 complete and legible sets of Export Manifest classed as the Import Manifests – Customs passed and stamped, shall be furnished minimum 48 hours after ship's departure to the Operations Manager.

All cargo documents shall use metric system in weight and measurement.

3. As from 1st May, 1988 a new billing procedure has been established. As from this date, vessel's billing shall comprise of 2 invoices of same old form.

The first invoice shall cover marine services and facilities including water supply only, while the second invoice shall cover Operations Department tariff items i.e. shift surcharges for gangs, overtime, etc.

Payment is expected within 14 days after receipt of invoice, thereafter, port's services shall be suspended, until payment has been effected completely."

PILOTAGE: Pilot is compulsory. Pilotage available day and night, except for vessels berthing at the oil jetties. Pilot ordered through local Agent. 24 hours or minimum 12 hours notice of ETA by Radio Telephone on 2182 kHz. Pilot instructs ship through signal tower or direct on VHF Channel 16.

Pilot comes out from inside breakwaters by pilot launch, displayin "H" flag by day and white over red light at night and "Pilot" in larg black letters on side of the launch. Pilot will inform ship by VHF whi direction to proceed to meet the pilot launch by the Fairway Buo Vessels should always keep clear of the Fairway Channel, as very larg bulk carriers sail on deep draft.

APPROACHES: The artificial harbour is protected by 2 rock breakwat extending 1.25 miles out into the open sea, encompassing som 750 acres of protected waters. The distance between the breakwat entrance is 970 ft. and in the centre of the opening a 500 ft. wide chann marked by buoys has been dredged to 49 ft. MLW. This channel 1.33 miles long with a 30° turn half way and marked by means of lighted channel buoys. North and South Mole ends of the breakwat are marked by red and green rotating light beacons respectively. Th channel within the breakwaters gradually widens into a turning bas whose depth towards the Iron Ore Piers is dredged to a depth of 45 MLW and 30 ft. off the General Cargo Pier.

ANCHORAGE: Recommended anchorage is 3 miles from breakwat (45 ft. – 60 ft.) in roadstead is to the South of the buoyed channel whi provides goods holding ground on a sand and mud bottom. Vessels a not anchored within the Inner Harbour except for very short periods time.

RESTRICTIONS: Pilot service is day and night. Loaded oil tankers ber in daylight hours only. Deep loaded vessels i.e. 40 ft. draft and over a restricted to tide for berthing and sailing. Maximum draft for main o piers is 45 ft. Vessels up to 860 ft. length can be accommodated a these piers. No restriction on beam except that carriers with beam excess of 126 ft. may experience difficulty in loading with present loadin gantries. Bulk carriers of 90,000 d.w.t. and over will berth only in dayligh hours.

MAX. SIZE: Vessels loading at the Iron Ore Piers are limited to max. draft of 45 ft. and sail from 2 hours before HW up to the time of HW At the bunker pier vessels are limited to a draft of 32 ft. and at th marginal cargo wharf to a draft of 30 ft. Vessels exceeding these draf can be heavily fined.

Also see "Restrictions" and "Berthing".

HEALTH: Vessels entering must fly International Code flag "Q". Po Health Officials board upon berthing. Pratique automatic for vessel having cleared at other Liberian ports, but vessel must still clea Customs.

RADIO: ETA messages from ships are received in the Freeport throug Liberian Government Radio Station, Monrovia and through French Cab Station, Monrovia.

Monrovia Radio call sign ELC-2150 (6° 17′ N., 10° 48′W.) is fitted wit VHF and HF radio at the Freeport, working from 0800 hrs. to 2400 hrs The VHF is of the Marine type with Channels 6, 8, 9, 10, 11, 12, 13, 14 15 and 16. Also transmits on 482-500-512 kHz and receives on 500 kHz A1 2.5 kW.

Other Frequencies:
8518 (8 MHz Channels 5 & 6) A1 2.5 kW
12709 (13 MHz Channels 5 & 6) A1 2.5 kW
16983 (16 MHz Channels 5 & 6) A1 2.5 kW
17146 (17 MHz Channels 5 & 6) A1 2.5 kW
22491 (22 MHz Channels 5 & 6) A1 2.5 kW

Telex Address: National Port Authority - NATPORT 44275.

VHF: Vessels arriving or sailing must make contact with Freeport Contro Tower on Channels 16 and later 14 or 12 within the port area and Pilots Office and for manouvering Channel 9.

TUGS: Use of tugs compulsory. 3 tugs available. 'Nana Kru' an 'Stockton Creek' 1,700 h.p. each and 'Bentol' 3,900 h.p. Join vesse just inside breakwater entrance. For berthing, tug lines used; for sailin ships lines often used.

BERTHING: *Cargo Wharf:* The marginal cargo wharf is 2,000 ft. lon (230 ft. leased to Amoco) and 36 ft. wide with 8 transit warehouses. The wharf has a concrete deck and has a depth alongside of 30 ft. at MLW All cargo is discharged and loaded by ship's gear. Sufficient amount o cargo handling equipment is available such as forklift trucks rangin from 4 tons to 35 tons capacity. Tractors and trailers are availab A 40 ton capacity steam crane is available at No. 2 Berth for heavy lifts There are also 2 mobile cranes with capacities from 25 tons to 35 tons but they are not suitable for ship discharge. Fresh water is available a this wharf, loading rate is approximately 25 t.p.h.

Bunker Pier: This is a "T" jetty on the South edge of the dredged basi with a depth of 34 ft. at MLW. No fresh water is available at this pier.

Port Authority Circular: October 1985.

"The maximum Summer deadweight of vessels allowed to berth a the Bunker Pier should not exceed 30,000 tonnes. The vessel must b provided with a minimum of 10 manila mooring ropes and under n circumstances will wire mooring lines be accepted especially those fro auto-tension winches. It is also recommended that special shackles b provided by the vessels to be used in case of any unfavourable weathe that will endanger the safety of the vessel while she is berthe alongside."

The bunker pier can accommodate vessels of max. LOA 700 ft. an draft 32 ft.

LPRC Crude Oil Discharging Berth: This is situated between the Bon Mine and NIOC Ore Piers and consists of one breasting dolphin and a after mooring dolphin. Tankers discharging crude oil are moored b means of 2 anchors with starboard side to the dolphin and the ste made fast to the mooring dolphin. Discharge is by means of submar and floating pipe-lines connected on the starboard side amidships Tankers are limited to a length of 700 ft. and draft of 40 ft. Fresh wat is available at this pier.

Fish Pier: A pier with its own dredged channel and turning basin is use by fishing vessels to discharge cargo into cold storage. This pier i situated on the Northern Breakwater with the Cold Storage Facili located on the inshore side of the breakwater. Fresh water is availab at the pier. The channel to the fish pier is 90 ft. wide and dredged t 20 ft. MLW. Size of vessels using this pier is limited to 240 ft. length an 19 ft. draft.

Iron Ore Piers:

Bong Mining Company Pier:

Approaches max. draft on MLW	45 ft.
Alongside max. LOA of vessel	900 ft.
Max. beam of vessel	125 ft.
Max. draft on HW	45 ft.
Alongside pier length	886 ft.
Depth alongside MLW	45 ft.
Loading boom height above HWOST	45 ft. 6 in.
Loading boom outreach from fenderline	57 ft.
Pier length covered by loading boom	750 ft.
Loading rate	3,200 t.p.h.

National Iron Ore Company Pier:

Approaches max. draft on MLW	45 ft.
Alongside max. LOA of vessel	1,000 ft.
Max. beam	114 ft.
Max. draft on HW	45 ft. North side 42 ft. South side
Alongside Pier length	900 ft.
Depth alongside MLW	45 ft. North side 42 ft. South side
Loading boom outreach from fenderline	60 ft.
Loading boom height above HWOST	43 ft.
Pier length covered by loading boom	640 ft.
Loading rate	1,200 t.p.h.

Fresh water available at this Pier.

Liberia Mining Company Pier: (Now used to accommodate vessels).

Approaches max. draft on MLW	45 ft.
Alongside max. LOA of vessel	830 ft.
Max. beam	130 ft.
Max. draft on HW	45 ft. North side 38 ft. South side
Alongside Pier length	825 ft.
Depth alongside MLW	45 ft. North side 42 ft. South side
Loading boom outreach from fenderline	61 ft.
Loading boom height above HWOST	46 ft.
Pier length covered by loading boom	560 ft.
Loading rate	2,000 t.p.h.

Fresh water available at this Pier.

BRIDGES: None.

STEVEDORES: Several stevedoring companies. Port Authority handles all cargo on shore and accepts cargo ex-ship's hook only.

A daily meeting with all ship's agents is conducted by the Operations Manager regarding the arrivals and departures of ships and to arrange for required gangs to load or discharge ships including requests for overtime and night work.

Stevedores gangs have to be ordered the day before required, therefore essential for Agents to receive ETA messages in sufficient time.

Working Hours: Monday-Friday: 0800-1200 and 1300-1600. Saturday: 0800-1200. Overtime is permitted at night, Sundays and Holidays if requested.

MEDICAL: Whenever possible Masters should cable Agents if require medical attention especially when arriving week-ends or during night. Hospital facilities available. Port Health require yellow fever vaccinations for crew members.

TANKERS: See "Restrictions" and "Berthing".

DENSITY: Density varies with the tide. Also varies during rainy season as river flow increases. Varies from 1009 to 1024 oz. per cu. ft. with average of approx. 1019 oz. per cu. ft.

FRESH WATER: Available (See "Berthing"). Average rate of delivery approx. 20 t.p.h.

FUEL: Light diesel oil and heavy fuel oil available and these can be blended to specification by supplying oil company. Fuel and diesel only available on bunkering pier.

CONSULS: Majority of foreign countries have Consuls.

REPAIRS: Limited deck and engine repairs can be carried out by private companies.

DRY DOCKS: One very small floating dock capable of lifting 300 tons with max. draft of 8 ft. This dock is used for small coastal craft and only accepts very limited outside work. There is also a synchrolift of about 250 tons, owned by private fishing company.

GANGWAY/DECK WATCHMEN: Private security men are engaged by the Agent. Port Security also maintain regular patrol.

OPENING/CLOSING HATCHES: Normally done by stevedores.

CUSTOMS ALLOWANCES: Tobacco, reasonable quantities for consumption while in port. Wine and/or Spirit, as tobacco.

REPATRIATION: Repatriation of crew is possible.

AIRPORT: Roberts Field International Airport 45 miles distant. Served with daily international flights to Europe and America.

TIME: GMT.

HOLIDAYS: Many official holidays during year but cargo work carried out those days on overtime rates. Port closes 3 times a year: 26th July (Independence Day), Christmas Day and New Year's Day.

POLICE/AMBULANCE/FIRE: Port Authority have own Security Force and Fire Service, situated in port area. There is also an ambulance service.

TELEPHONES: There are no facilities for telephones on board.

SERVICES: Hull, deck and engine surveys can be obtained through Lloyd's, German Lloyd, B.V., Norske Veritas, America Bureau Agents and most of the other classification societies.

Provisions are available from duty-free bonded warehouses in the Freeport area. These include frozen, chilled and tinned food, spirits and tobacco products. A wide variety of housekeeping items, such as soap, paint, etc. are also available. Fresh vegetables and fruits are available through ship chandlers. 1×100 ton capacity lighter available.

WEATHER: *Tides and Currents:* The rise of tide varies from 2.0 ft. to 3.9 ft. from neaps to springs. The flood tide runs in a north easterly direction at approximately 1 knot and the ebb to the S.W. at approximately 1 knot. Inside the harbour a tidal flow of 0.5 – 1.0 knots is experienced. There is no prediction of the directions of flow as the water circulates around the harbour sometimes in one direction and sometimes in the opposite. The currents along the coastline are variable and not predictable.

Prevailing Wind: The prevailing wind is West to Southwest during the dry season. A Northerly wind is sometimes experienced for 2 or 3 weeks. The stronger winds are experienced during the wet season of April to November and during this period the average wind force is about Force 4 (Beaufort Scale). The wind usually rises in the afternoon or early evening and falls off during the night. During the dry season the wind is usually Northerly during early mornings and backs to the S.W. by late afternoon. Dangerous winds are revolving line squalls of intense force and usually of very short duration. Heavy rain/winds normally comes from the landside. These conditions are considered dangerous to vessels only during the process of berthing, but cause no danger to vessels in port securely moored. These infrequent tornadoes occur during the seasonal transition months of March/April and October/November.

Vessels alongside piers will sometimes experience a surge, which may part mooring lines. This is due not to the wind, but to a swell entering the harbour and is a condition which seldom occurs.

SHORE LEAVE: No restriction on shore leave.

IDENTIFICATION CARDS: Not required, but Seaman's Books are endorsed aboard by Immigration.

PIRACY: Acts of piracy have taken place at the port.

SHIPMASTER'S REPORT: February 1983.

Pilotage: Pilot launch has black hull, white housing and green housing top. The word "Pilot" is painted in large white letters.

Pilot boards near the Sea Buoy, 7.3 cables from Southern Breakwater.

Health: 2 Coastguard Officials and 1 Immigration Official board with the Pilot to complete formalities. We do not think that this is the case for all vessels.

Radio: The Freeport of Monrovia no longer maintains a watch on HF 2182 kHz.

Tugs: 3 tugs available.

When sailing, vessel takes 1 tug at stern, using 2 ship's lines.

Gangway/Deck Watchmen: Port security personnel maintain continuous watch while vessel is berthed.

Opening/Closing Hatches: Normally done by ship's crew.

AUTHORITY: Office of the Port Manager, National Port Authority, Freeport of Monrovia, P.O.Box 14, Monrovia, Liberia. *Tel:* 221577. *Telex:* 44275. *Cables:* "Natport".

AGENT: Scanship (Liberia) Inc., P.O. Box 209, Bushrod Island, Monrovia. Tel: 22.28.32, 22.17.50, 22.21.33 and 22.21.30. Fax: 231 225 300. Telex: 44281 and 44344. Fax: 22.53.00. Cables: "Scanship Monrovia".

Socialist People's Libyan Arab Jamahiriya

GENERAL: All ports:

NAVIGATION REGULATIONS: The following telex received from Libyan Marine Department on 21st October 1985.

Quote:

Please be advised that the following general information to be added to next edition of "Guide to Port Entry".

1. The following is a resume of instructions issued by the Libyan authorities to which all ships must abide in Libyan territorial waters (limited by 12 nautical miles and in Gulf of Sirte by parallel 32° 30′ N.).

2. Ships bound for Libyan ports must inform the authorities of the port by writing or telegram 24 hours prior to entering the Libyan territorial waters including name, flag, nationality, destination, cargo, agent, date of arrival, duration of stay in the port, port of origin and the approach route to Libyan port and the port of destination after leaving Libyan waters, they must insure continuous monitoring on Channel 16 and contact the port authorities on Channels 16, 11 or 12.

3. Commercial ships may pass on innocent passage within territorial waters only during day time provided they inform the Libyan authorities at least 12 hours prior to entering and giving the latitudes and longitudes of the points of entering and leaving, duration of stay in territorial waters, courses and speed.

4. All ships must keep to the anchorage areas shown in charts and strictly refrain from causing pollution of waters.

5. The following are declared as prohibited areas:

(A) 32° 52.8′ N., 13° 24.5′ E.
32° 57.7′ N., 13° 24.5′ E.
32° 57.7′ N., 13° 18.0′ E.
32° 53.8′ N., 13° 22.3′ E.
(B) 32° 53.7′ N., 13° 20.6′ E.
32° 55.9′ N., 13° 18.0′ E.
32° 55.9′ N., 13° 15.0′ E.
32° 54.5′ N., 13° 15.0′ E.
(C) 31° 09.0′ N., 19° 42.0′ E.
31° 09.0′ N., 19° 19.0′ E.
31° 56.0′ N., 19° 42.0′ E.

32° 58.0′ N., 12° 48.0′ E.
32° 52.0′ N., 12° 44.0′ E.

6. Ships that violate the instructions and the prevailing laws will be subject to punitive penalties, including opening fire at the ship and forcing her to obey the orders of the Libyan Arab Fleet.

7. All ships shall proceed to any of the following ports through the approaching point and shall inform the Port Control of her course and speed.

Tripoli Port:
(A) 33° 00′ N., 12° 58′ E
(B) 33° 07′ N., 13° 10′ E
(C) 33° 05′ N., 13° 19′ E
(D) 33° 05′ N., 13° 04′ E
Benghazi Port:
(A) 32° 03′ N., 19° 50′ E
(B) 32° 09′ N., 19° 49′ E
(C) 32° 17′ N., 19° 53′ E
(D) 32° 20′ N., 20° 06′ E
Zwara Port:
(E) 33° 03′ N., 12° 15′ E
Misurata Port:
(F) 32° 34′ N., 15° 16′ E
Oil Terminals (Gulf of Sirte):
(G) 32° 22′ N., 18° 30′ E
Derna Port:
(H) 32° 58′ N., 22° 42′ E
Tobruk:
(K) 32° 10′ N., 24° 02′ E

8. All ships shall maintain communication with the coastal stations.

9. All ships shall follow the instructions of the Port Authority about the anchorage position.

10. No ship shall have the right to change her anchorage location without port authority permission.

Unquote.

CLEARANCE: ETA to be advised to Port Authority 24 hours before arrival, including the following information: Ship's Name, type, Nationality and port of Registry; Owner, Master and Agent names; Gross and Net tonnage; Ship's length and draft forward and aft; Expected duration of stay in the port; Last port of call, tonnage, quantity and kind of cargo for discharging and loading; Full details of any dangerous liquids or cargo; Number of passengers and crew; Health situation.

Before arrival at the outer limits of the port, vessel requested to hoist the following signals: Flags of her call-sign; Flag of Quarantine; Flag of ship's Nationality; The Libyan Flag on the foremast; Red Flag during daylight and Red light during night-time, if carrying explosives or any inflammable cargo; Pilot Flag and the international flag code signals must be respected.

PORT LIMITS: As shown on Admiralty charts.

DOCUMENTS: *On Arrival:* Last Port Clearance; Full sets of cargo documents; Copies covering consignment; Certificate of Origin; Bills of Lading, etc. Not less than 7 copies of Crew and Passenger Lists. Other documents as required at each port.

Ship's Certificates should be delivered to the Marine Inspection Office at the port.

During the First 24 Hours of Arrival: Valid certificates to comply with all the International conventions in force for the State whose flag the ship is flying. Certificate of Registry. For the National ships, moreover, the official log book, engine log book and ship's articles.

Agency Requirements: The following agency requirements in respe of pre-arrival notices and documentation in addition to official documen and certificates needed for ordinary port clearance should be complie with. Pre-arrival notice to be communicated by telex to Agents containin following information:

(a) vessel's name and flag;
(b) g.r.t./n.r.t./s.d.w. and nature of cargo;
(c) ETA and quantity of cargo to be handled;
(d) exact address to whom disbursements accounts should be sen

For dry cargo vessels further information should be submitted:

(e) conditions of stevedoring, whether basis liner terms or F.I.O.S.
(f) net freight earned along with all cargo details specifically each Bi of Lading.

Upon arrival the following documents are to be handed over:

1. Masters of tankers should produce and hand over to Por Authorities 'Certificate of Discharge' pertaining to previous calls (non compliance will cause delay in berthing);

Following only applying to dry cargo vessels:

2. 14 copies of Cargo Manifest (clearly stating measurements an weights);
3. 2 copies of Freight Manifest;
4. 2 copies each Bill of Lading;
5. 2 copies Cargo Plan.

Report: May 1984. From State Agent.

Agent to submit all ship's documents/certificates, cargo documen and crew documents and/or any other declarations connected theret in the Arabic language. This is effective from 1.6.84, noting until th date, we shall arrange for the required translation as a transitional perio after which and effective from the above mentioned date, all ships sha arrive with all above said documents/certificates/ declarations, etc. in the Arabic language.

Your full and strict adherence to the above is required avoiding unnecessary inconveniences to all parties concerned as any failure o your part shall never be tolerated by the concerned authorities.

Report: June 1984. From State Agent.

Please note: Temporarily vessels should arrive with the following shi certificates already translated into Arabic, otherwise vessels shall b delayed in sailing. The other documents we shall arrange for translatio of same at our end on a temporary basis:

Certificate of Registry.
Safety Construction Certificate.
Safety Equipment Certificate.
Radio Telegraphy Certificate.
Load Line Certificate.

Report: September 1984. From State Agent.

Following documents imperative to be translated at your end, an not by Agent:

1. Ship's documents:

Registry Certificate.
Load Line Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Safety Radio – Telegraphy Certificate.

2. All Cargo Manifests.

3. All other lists and declarations such as Crew List, Officers' Lis Stores, etc.

Note that the competent authorities at our end (namely the Ports an Lights Department of Tripoli) are presently insisting on collecting fro ship direct all the documents in question in Arabic translation upo vessel's arrival thus leaving no possibility whatsoever for any assistanc previously rendered by the Agent.

PILOTAGE: Pilotage is compulsory for all vessels. Pilot boat will mee ships outside the harbour. Ships should wait for Pilot at anchor outsid the harbour if weather is good. In case of bad weather, after gettin permission from Harbour Master ships may enter the harbour at the own risk and anchor inside.

ANCHORAGES: *Benghazi:* Area between Lat. 32° 11′ N. an 32° 07′ N. and Long. 19° 56′ E. and 19° 59.2′ E.

Derna: Within 1.5 miles radius of position Lat. 32° 49.3′ N. and Lon 22° 39′ E.

Es Sider: Area between Lat. 30° 41.5′ N. and 30° 43.0′ N. and Lon 18° 22′ E. and 18° 25′ E.

Misurata: Within 1.5 miles radius of position Lat. 32° 23.0′ N. and Lon 15° 18′ E. (about 4.7 miles from main lighthouse).

Tobruk: Area between Lat. 32° 03.7′ N. and 32° 05.5′ N. and Lon 24° 02.0′ E. and 24° 03.0′ E.

Tripoli: Area between Lat. 32° 55.5′ N. and 32° 56.5′ N. and Lon 13° 09.8′ E. and 13° 11.7′ E.

Zuara: Within 1 mile radius of position Lat. 32° 57′ N., Long. 12° 10′ E (in direction 065° from main lighthouse).

Also see individual oil terminals.

HEALTH: The following documents to be provided for the doctor: A vali Fumigation Certificate; International Vaccination Certificate for ever person on board; Health Certificate for any animal or bird on boar No automatic Free Pratique between the Libyan Ports.

TUGS: Tugs are available at all Libyan Ports.

BERTHING PRIORITY: The berthing priority scheme, according to la as follows: (1) Passenger ships. (2) Animal ships. (3) Liner and ma ships. (4) Cargo ships. (5) Tankers and dangerous cargo ships. Shi with cargo of less than 300 tons, may not have to comply with th scheme; subject to Harbour Master's decision.

CONSULS: Embassies in Tripoli. No consuls at any ports.

SURVEYORS: The following addresses are Agents for the mentione Classification Societies and may be contacted for the necessary survey on request:–

Lloyd's Register of Shipping: P.O.Box 111115 Tripoli. Telephon 74383. Telegraphic Address: Lloydsreg Tripoli Libya.

Bureau Veritas: Tripoli: Orfelli Agencies, 109 – 1st September Stre P.O.B. 2283, Telephone: 35338 and 37398, Telegraphic address: She Tripolilibia.

American Bureau of Shipping: Tripoli: Libyan Arab Shipping, Baghdad Street, Andalus Building, P.O.B. 882, Telephone: 41712 and 39358, Telegraphic Address: Arabship Tripolilibia, Telex 20033 Arabship.

Registro Italiano Navale (RINA): Tripoli: Mr. Mahmoud Gamar, c/o Libyan Arab Shipping Co., Baghdad Street, Andalus Building, P.O.B. 2325, Telephone: 41712 and 39358, Telegraphic address: Gamarin Tripolilibia.

OPENING/CLOSING HATCHES: To be done by crew.

CUSTOMS ALLOWANCES: 200 cigarettes for each crew member or passenger. All kinds of alcoholic drinks are forbidden, even wine and beer, and to be kept in the store under the Customs seal. Also arms, perfume, saccharine and all kinds of anaesthetic. The sum of 10 Libyan dinars allowed for each crew member. All Libyan and Foreign currency to be declared in the Currency Declaration. All personnel effects and electronics to be declared in the Crew Declaration.

BLACK LIST: Libyan law prohibits vessels from having on board any goods or containers of Israeli origin. Any vessel having such goods or containers on board on arrival in the harbour will be liable to heavy fine and confiscation of the goods or containers. The Libyan Authorities may, moreover, refuse to clear the vessel.

TIME: Local time at all the seasons is GMT plus 2 hours.

HOLIDAYS: Friday is the weekly day off. 2nd March; Revolution Day (1st Sept. yearly); Evacuation Days (28th March, 11th June, 7th October; yearly), Syrian Revolution Day (8th March, yearly); Sudanese Revolution Day (25th May, yearly); Egyptian Revolution Day (23rd July, yearly); Hijra New Year (1st Moharam, Muslim year); Ashoura (half day, 10th Moharam, Muslim Year); Mohammadan birthday (12th Rabih Awel, Muslim Year); Israa Wa Merag (half day, 26th, Rajeb, Muslim Year); Eid El-Fitr (1st, 2nd & 3rd Shawal, Muslim Year); Eid El-Adha (9th, 10th. 11th, & 12th Zi Al-Heja, Muslim Year).

TELEPHONES: All calls through Tripoli and Benghazi Coastal Stations - No calls allowed when the ship is alongside.

SHORE LEAVE: Crew members permitted ashore during daytime. Shore leave not permitted at oil terminals.

IDENTIFICATION CARDS: Seaman's Book or Discharge Book, Passports, Identity Cards — all should be valid.

IDENTIFICATION CARDS: Shore passes issued and Seaman's Book to be kept at the gate at port entrance.

MINE FIELDS: The following areas are prohibited area and dangerous for navigation due to mines:

(1)	Lat. 32° 52.78′ N.	Long. 13° 24.6′ E.
	Lat. 32° 57.67′ N.	Long. 13° 24.46′ E.
	Lat. 32° 57.67′ N.	Long. 13° 18.00′ E.
	Lat. 32° 53.82′ N.	Long. 13° 22.30′ E.
(2)	Lat. 32° 53.70′ N.	Long. 13° 20.61′ E.
	Lat. 32° 55.93′ N.	Long. 13° 18.00′ E.
	Lat. 32° 55.93′ N.	Long. 13° 15.00′ E.
	Lat. 32° 54.45′ N.	Long. 13° 15.00′ E.
(3)	Lat. 32° 37.00′ N.	Long. 23° 13.00′ E.
	Lat. 32° 14.50′ N.	Long. 23° 31.00′ E.
	Lat. 32° 10.50′ N.	Long. 23° 28.50′ E.
	Lat. 32° 37.50′ N.	Long. 23° 7.50′ E.

ATTENTION: It is imperative that vessels contact the wireless stations on the Libyan coast at a distance of 30 miles from the proceeding port, giving the ship's position. Ship's winches and cargo gear should be in good order otherwise they will be liable to heavy fine if any delay occurs.

FLOATING DOCK: See "Tripoli".

REGULATIONS: Foreign currency not to be taken ashore. Crew members' visits between ships are not allowed without the prior permission of Customs and Immigration. Ship's lifeboats are not to be used within harbours limits without the prior permission of the authorities. No engine repairs to be carried out in port whilst alongside or at anchor in the port without prior permission of authorities. Movements of ships in the port are not allowed without instructions. Using ship's propellers whilst in port is not allowed without permission. Ship's whistles not to be used without good reason. Cleaning funnels or making smoke whilst in port is strictly forbidden. Ship's gangway to be in position at all times whilst alongside. Rat guards to be fixed all times on every rope. Painting or scraping the outer hull of the ship not to be carried out without prior permission of authorities. Duty officer to be on board all the time accompanied by sufficient crew.

For tankers or vessels laden with dangerous cargo; moreover, the mentioned hereabove: Red flag to be hoisted in daylight and red light to be on in the night-time. No movements allowed between sunset and sunrise for such ships. Electricity to be off from ship's holds whilst loading or discharging. Towing wires with suitable shackle to be ready fore and aft. Smoking and any kind of fire are strictly forbidden on deck. All steps for safety to be carried out.

POLLUTION: Pollution of any kind is strictly forbidden. Any ship causing any kind of pollution will be liable to heavy fine.

DELAYS: Delays in berthing and load/discharging can normally be expected.

F.J. No. 3	135	8.0

Note: F.J. No. 3 not in use at the present time.

CRANES: Electric floating crane available up to 200 tons.

STEVEDORES: All stevedoring operations and formalities to be done by Agent, 2 stevedoring companies will be formed in the near future.

MEDICAL: All facilities available.

TANKERS: *Ras al Mingar:* The jetty is near Benghazi.

One side of the jetty handles dirty products and LPG.

Max. d.w.t.: 10,000 tonnes.
Max. draft: 22 ft. in Summer and 21 ft. in Winter.
Max. LOA: 140 m.

The other side handles clean petroleum products.

Max. d.w.t.: 9,000 tonnes.
Max. draft: 21 ft.
Max. LOA: 120 m.

A derrick with SWL of 5 tonnes is required. The derrick must have a minimum outreach of 2.7 m.

FRESH WATER: Available by barge and alongside. Should be obtained from Port Authority through ship's Agent.

FUEL: Available through Agents. A notice of 48 hours needed, advisable for Chief Engineer to check what grades are available.

CONSULS: None.

REPAIRS: Minor repairs are possible. Also see "Tripoli".

WATCHMEN: Compulsory, provided by Port Authority.

REPATRIATION: Facilities exist without difficulty.

AIRPORT: Benina Airport situated 29 km. away.

POLICE/AMBULANCE/FIRE: Police 99, Ambulance: 2131, 2132, 2281, Fire: 5555, 5599.

SHORE LEAVE: Allowed after Free Pratique, Customs and Immigration formalities completed.

DEVELOPMENTS: Port extension project underway.

AUTHORITY: Port Manager and Harbour Master.

AGENCY: See "General" before first port.

BOURI: 33.54 N. 12.39 E. (See Plan)

LOCATION: The position of the AGIP NAME FSO "Sloug" is:
Lat. 33° 54′ 32.94″ N., Long. 12° 39′ 19″ E.

The FSO is moored to a single point mooring structure by a rigid bracket. The water depth is 166 m.

FSO "Sloug": LOA 348.9 m.; Length between perpendiculars – 330.7 m.; Moulded depth 25.5 m.; Moulded breadth 51.8 m.; Max. draft 20.012 m. and Minimum draft 10.0 m.

DOCUMENTS: Documents required to obtain clearance are as follows:
5 copies Crew List.
5 copies Passenger List.
2 copies Tobacco/Spirits Declaration.
2 copies Personal Effects Declaration.
2 copies Stores Declaration.

Following certificates will also be inspected by the Libyan authorities:
Clearance from Last Port.
International Maritime Health Declaration.
Animal List, with proper Health Declaration.
Entering and Leaving Territorial Waters Certificate.
Report Inwards Certificate.
Report Outwards Certificate.
Boycott Certificates.
Tankers Characteristics Certificate.
Certificate of Discharge, signed by the discharge port authorities, of the last port (cargo) loaded in Libya.
Tovalop Certificate.

Port Entry: Offtaking Vessel's Free Pratique, Customs Entry and Clearance, Immigration inspection and documentation for the loading operation will be arranged by vessel's agents.

Agency: An Agency representative is stationed on the FSO for ship's Clearance.

PILOTAGE: The Mooring Master will board the Offtaking Vessel in the "Waiting Area" which is located 2 miles South of the FSO. Depth of water 166 m.

Also see "Mooring/Unmooring".

APPROACHES: Two production platforms (DP4, DP3) are situated respectively in position Lat. 33° 55′ 23.38″ N., Long. 12° 40′ 50.96″ E. and Lat. 33° 53′ 39.45″ N., Long. 12° 36′ 23.83″ E.

Subsea lines run between the 2 platforms and the FSO. All ships are warned that it is strictly forbidden to anchor within 0.5 miles of the line joining the two platforms. Furthermore it is forbidden to steam across the same line.

No ship should approach any of the structures closer than 0.5 miles and should proceed to the "Waiting Area" (2 miles South of the FSO) adhering strictly to this regulation, and await for further instructions from the FSO.

RADIO/VHF: *ETA:* Vessels will inform "Agip Name Tripoli", through their local agents, of their ETA at the designated "Waiting Area" located about 2 miles South of the FSO "Sloug" Terminal.

Notices Procedure: All vessels destined to load Crude Oil at the Bouri Field are requested to inform "Agip Name Tripoli" of their ETA 72 hours, 48 hours and 24 hours prior to their arrival at the "Waiting Area".

The "72 hour notification" must include the following information:

1. Firm ETA (local time and date).
2. Name of tanker and Master's name.
3. Flag.
4. Gross tonnage.
5. Nett tonnage.
6. DWT.
7. Quantity of cargo required.
8. Confirm 2×16 in. connections (ASA 150) on port side manifold.
9. Confirm existence of a Smit Bracket forward.
10. LOA and Draft.
11. Distance from bow to manifold and stern to manifold.
12. Minimum vessel's speed and equivalent RPM.
13. Confirm availability of at least 6 mooring lines forward and 6 mooring lines aft (mooring lines should be suitable for the intended service).
14. Shipper.
15. Agent.
16. Consignee.
17. Destination.
18. Last port of call.
19. Any requirements needing early attention.
20. Confirm inert gas system operating correctly and that vessel will maintain a maximum oxygen content of 8% in the tanks throughout berthing, deballasting, loading and unberthing operations.

The 48 hour and the 24 hour notification shall specify only the latest ETA, plus any amendments to the details already advised under the "72 hour Notification".

After the initial notification has been made, any change in ETA of more than 12 hours must be immediately communicated to "Agip Name Tripoli" through the ship's agent.

Radio Contact with the FSO "Sloug": Vessels in VHF range of the FSO will call "Bouri Terminal" on Channel 16, working on Channel 17. Once in contact, a mutually agreed upon channel will be used.

A private channel will normally be used between the FSO and the Offtaking Vessel during operations. The Mooring Master will supply portable sets equipped with this channel for operations use.

Communications during Loading Operations: Medium and high frequency radio systems are to be shut down during cargo transfer and deballasting.

Communications Failure: Should communications fail during any part of the operation (mooring, cargo transfer, unmooring), the party affected shall sound the International Code Signal "K" on her whistle and cargo operations, if in progress, will be stopped until normal communications are re-established.

RESTRICTIONS: Mooring operations normally take place durin daylight.

MAX. SIZE: 35,000 d.w.t. – 150,000 d.w.t. Max. LOA 283.0 m Max. beam 44.0 m. Draft – no limit.

MOORING/UNMOORING: To ensure coordination between the FS and Offtaking Vessel, a Mooring/Loading Master will be in attendanc to advise the operational procedures necessary to ensure a saf accident and pollution-free operation.

Mooring Master: The Mooring Master will board the Offtaking Vessel a the "Waiting Area" by a tug that will remain in attendance. Necessar mooring gear (when applicable) will be transferred to the Offtakin Vessel.

Lifting Gear: The Offtaking Vessel must have her own lifting gear rigge and ready for use on her port side *but not swung out.*

Accommodation Ladder: The Offtaking Vessel must have he accommodation ladder and pilot ladder, rigged in combination, on he starboard side and lowered to about 1.5 m. above the water level. Crew in attendance should be in radio contact with the vessel's bridge.

Lee Side: The Offtaking Vessel shall manoeuvre in a way to make a lee on her starboard side, to allow the Mooring Master and othe Terminal personnel to board the vessel.

Mooring Master's Station: The Mooring Master shall be stationed o the bridge of the Offtaking Vessel and advise the Master on the moorin procedures. Safety Check List(s) must be signed by the vessel's Maste prior to the beginning of any operation.

Aborting of Mooring Operation: The Mooring Master will always b prepared to abort the mooring operation, either on his own initiative o upon instructions of the Master of the Offtaking Vessel. The decisio should be taken in ample time whilst the situation is still under contro If, for any reason, the Operations Head on the FSO requires to abor the operation, he will inform the Offtaking Ship immediately.

Mooring Master's Duty: The advisory service of the Mooring Master wil continue until the Offtaking Vessel is safely secured to the FSO, either alongside or in tandem and will resume during the unmooring and departure operations, until the Offtaking Vessel is at a safe distanc from the FSO (i.e. in the Waiting Area).

Mooring Monitoring on the FSO: A second Mooring Master, based o the FSO, will monitor the mooring of the Offtaking Vessel until vessel i securely tied-up and preparations for loading have begun. At that time he will assume the advisory control of the operation, including the riggin and connection of the FSO loading arms/hoses.

Fenders: The fendering system of the FSO consists of 5 "Yokohama" rubber fenders, secured to the FSO's side prior to the beginning of the operation. Offtaking Vessel must be ready to use her own secondar fenders.

Mooring Operations Hours: Mooring operations will normally take plac in daylight hours only. In special cases the Terminal Superintenden may authorise the Operations Head to perform mooring operation during night hours.

Mooring Manoeuvre (Side to Side): The Offtaking Vessel will manoeuvre in a safe way so as to approach the FSO's starboard side, making use of her engines and *if necessary* utilising the services of the tug i attendance, under the Mooring Master's advice. A rope suitable fo towing should be made ready and lowered from the starboard bow t the water level when approaching the FSO until securely moored, to b used by the tug *if necessary.*

Caution: No anchors must be used. Anchors must be secured in such a way as to avoid accidental release.

Line Throwing Device: A pneumatic line throwing apparatus will be *if necessary,* used by the FSO to establish contact with the Offtakin Vessel.

Number of Mooring Lines (Side to Side): A minimum of 6 suitable lines will be secured fore and 6 aft, 2 of them must be spring lines at each end.

Unmooring Manoeuvre (Side to Side): The unmooring manoeuvre wi again be monitored by one of the Mooring Masters, stationed on the FSO. The tug will be in attendance. A rope suitable for towing shoul be made ready and lowered, from the Offtaking Vessel's starboard bow to the water level, to be used by the tug *if necessary.*

Mooring Manoeuvre (Tandem): The Offtaking Vessel will manoeuvre i a safe way so as to approach the FSO's stern, making use of her engine and, *if necessary,* utilising the services of the tug in attendance unde the Mooring Master's advice.

Caution: No anchors must be used. Anchors must be secured in such a way as to avoid accidental release. A rope, suitable for towing, shoul be made ready and lowered from the stern central fairlead to abou 1.0 m. from the water level, but *no further,* unless so instructed.

The tandem mooring assembly floating pick-up rope will be heave up from the Offtaking Vessel's bow Panama Fairlead by a polypropelen messenger rope of 1.5 in. diameter and at least 300 ft. long, that mus be made ready while approaching. The Mooring assembly will then b heaved up and the chafing chain stoppered in the bow Smit Bracket. I case no suitable Smit Bracket is available, the chafing chain will b stoppered by 2 wire snotters made fast on the ship's bollards (wir snotters and necessary gear will be supplied by the FSO when the vess is at the "Waiting Area").

Immediately after the chafing chain is made fast, the tug will pick-u the stern towing rope, which should be paid out until ordered to be mad fast to one of the stern bollards.

Care should be taken not to move the propeller during this operatio The towing rope must be of a "floating" type.

The tug will remain in attendance during the whole time the vessel i in "tandem", in order to avoid any contact between the Offtaking Vess and the FSO's stern.

Caution (Tandem and Side-to-Side Mooring): Offtaking ship's mai engines must be ready to manoeuvre on 10 minutes notice during th whole time spent moored at the FSO.

Tandem Mooring Assembly Composition: The system is composed of:

1. About 30 ft.×3.5 in. diameter chafing chain, stoppered by a Smit Bracket on the FSO

connected to

2. About 200 ft.×20 in. circumference nylon rope

connected to

3. About 30 ft.×3.5 in. chafing chain that will be stoppered on the Offtaking Vessel by a Smit Bracket or by 2×2.75 in. diameter (approx.) wire snotters. The chafing chain is held afloat by a metalic buoy connected by a 1 in. "O" Chain, about 9 ft. long, to the extremity of it

connected to

4. About 600 ft.×15 in. polypropelene floating pick-up line.

LOADING: Max. loading rate 9,000 cu.m.p.h. (56,610 bbl.p.h.).

Crude Oil: Name: Bouri. Pour Point: About 21°C.
API: 23.5. Loading Temp: +40°C. or more.

Hydrogen Sulphide: Masters are warned that Bouri Crude might contain Hydrogen Sulphide (H_2S). Crew members involved in cargo operations should be warned of the hazard that can be faced and how to deal with it.

Loading Operations at the FSO: Loading operations will be carried out either:

1. Side-by-Side: Export tanker moored to the FSO's starboard side by her own mooring lines (minimum 6 lines forward and 6 lines aft, of which 2 must be spring lines each end)

or

2. Tandem: Export tanker moored to the FSO's stern by the FSO's mooring assembly. Export tankers should have a Smit Bracket fitted. In case no Smit Bracket is available, suitable wire snotters and ancilliary equipment will be supplied by the FSO to allow the mooring.

Check List: Before commencing any loading operations a Check List will be completed and signed by the Offtaking Vessel's Master and retained by the Mooring Master.

Mooring Arms or (alternative) Hoses: The FSO is equipped with 2×16 in. (150 ASA) loading arms and alternatively with 2 suspended 16 in. (150 ASA) hoses strings. The Offtaking Vessel could be requested to use her own lifting gear to connect and hold suspended the (alternative) cargo hoses.

Stern Loading Hose: The FSO is equipped with 1×16 in. hose floating string, about 950 ft. long, connected to the stern for "Tandem loading". The string end will be picked-up after the completion of stern mooring, by the ship's own lifting gear and connected to the port side manifold.

Deballasting: The Offtaking Vessel must be able to load while discharging ballast from her clean ballast tanks to the sea. In case the Offtaking Vessel could not load while discharging ballast, she should be prepared to load part cargo before discharging ballast, in order to maintain a proper draft and trim, while always ensuring that no oil pollution could arise.

Commencement of Loading: Loading operations will start as soon as the mooring arms (or hoses) are connected and as soon as agreed between the Offtaking Vessel's Master/Chief Officer and the Mooring Master, who will assist with the whole operation.

Loading Rate: Loading will start at low pumping rate to ensure the tightness of the system and will then be brought to the maximum *previously agreed upon* rate.

Watches during Loading: Manifolds and mooring line watches will be continuously kept on the Offtaking Vessel during the whole loading operation.

Lack of Communications: Communications between the Offtaking Vessel and the FSO will be ensured by means of portable radio sets supplied by the Mooring Master. In no case should there be a breakdown in communications during the loading operations. In event of such breakdown, the International Morse Signals, letter "K", will be blown by the Offtaking Vessel or by the FSO whistle. Loading operations will be stopped until communications have been re-established.

Completion of Loading: As soon as the loading operation is completed the loading arms/hoses will be disconnected and the Offtaking Vessel will be unmoored and sailed to a safe distance from the FSO, with the advisory services of the Mooring Master. Cargo documents will be brought to the vessel later by the tug, unless an "Early Departure Procedure" has been agreed upon.

Early Departure Procedure: Masters will be asked to agree to the "Early Departure Procedure". Should they accept they will be requested to sign in advance all "Bills of Lading" and other shipping documents, in blank. Cargo figures and other entries to be filled in the cargo papers will be communicated later, either by VHF, telex or radio message. This procedure will expedite ship's departure.

BALLAST: There are no facilities for receiving clean/dirty ballast at the Terminal. Only clean ballast can be discharged overboard.

MEDICAL: In case of need of medical attention, the following information should be sent to the Agents:

1. Name, rank, nationality and passport number of the crew member.
2. General symptoms and/or any particular requirements.

FRESH WATER/FUEL: Available in cases of emergency only.

SHORE LEAVE: Crews are not allowed shore leave, however sick crew members can be repatriated or go ashore for medical attention. In case of repatriation, the Master must agree the correct procedure with his agents.

WEATHER: *Winds:* Radial distribution shows an increase of wind blowing from N.W. and a decrease when blowing from E.S.E. Maximum observed wind speed can reach gale Force 8 (sometimes more) from N.W. during Winter time.

Waves: Waves are mainly from West to North and from East to S.E.

Waves generated by cyclonic disturbances come from N.W. to S.E. across the Thyrrenean Sea. High pressure in the Bouri area direct waves from E.S.E. to North.

Currents: The prevailing current is flowing Eastward with a maximum rate of about 1.5 knots.

Miscellaneous:

Max. sea surface temperature: 31°C.
Min. sea surface temperature: 7°C.
Max. air temperature: 33.5°C.
Min. air temperature: 5°C.

Rain:

Annual average is about 381 mm. Significant periods are January – February with 68 mm. and November – December with 80 mm.

Max. tide range: 0.95 m.

Bottom conditions: 18 m., thick top silty carbonate sand.

GENERAL: *Flag:* All ships calling at Bouri Field must fly the Libyan flag and the Quarantine signal must be displayed upon the authorities visit.

Gangway: Normally no gangway will be rigged between the FSO and the Offtaking Vessel. Should one be used, a safety net must be fitted underneath.

Visitors: Unauthorised personnel are not allowed to visit the FSO or the Offtaking Vessel.

OPERATOR: AGIP, Tripoli. *Telex:* 20282 Agip Ly.

DERNA: 32.45 N. 22.40 E. (See Plan)

Also see "General" before first port.

PORT LIMITS: (a) The water area existing within the actual breakwater and an imaginary line connecting the end of the breakwater and the damaged breakwater existing at the Southern side.

(b) The water area known as the navigational channel outside the harbour commencing as from harbour entrance for a distance of 1 km.

ANCHORAGE: See "General" before first port.

RESTRICTIONS: Vessels are not permitted to enter harbour between 2100 hrs. and 0600 hrs.

MAX. SIZE: Depth of Inner Bay – 8 m., Entrance – 9 m. and Outer Channel 10 m.

RADIO: Recommended that radio messages for Agents be sent via Malta Radio or any other near coast station.

VHF: Port Control on Channel 16.

TUGS: 3 tugs available.

BERTHING: Old Quay, Length 120 m., depth 6 m. New Quay, length 950 m., depth 9 m.

CRANES: 3 cranes available.

STEVEDORES: All stevedoring operations and formalities to be done by Agent. Two new companies will be formed in the near future.

MEDICAL: Available.

TANKERS: Max. size 18,000 d.w.t. Max. draft 11.5 m. if weather conditions permit.

FRESH WATER: Available alongside, to be supplied by Port Authority through ship's Agents.

FUEL: Available through Agents, a notice of 24 hours needed. Advisable for Chief Engineer to check what grades are available.

CONSULS: None.

REPAIRS: Not available. See "Tripoli".

WATCHMEN: Compulsory, provided by Port Authority.

REPATRIATION: Available via Benghazi.

POLICE/AMBULANCE/FIRE: Call Port Manager, 2063 and 2074.

SHORE LEAVE: Allowed after Free Pratique, Customs and Immigration formalities completed.

DEVELOPMENTS: New port facilities to include 1 quay, length 280 m. for general cargo and container vessels, depth alongside 9 m. – 10 m.

One quay, length 500 m., depth alongside 9 m. – 10 m. This quay will have 4 berths, one for grain cargoes, one for the Port Police, one for vessels loading and for mooring of a dry dock.

AUTHORITY: Port Manager and Harbour Master.

AGENCY: See "General" before first port.

ES SIDER: 30.38 N. 18.22 E. (See Plan)

Also see "General" before first port.

DOCUMENTS: Waha acts on behalf of tankers loading at Es Sider and shall prepare all crude oil loading documents. Germa Shipping and Stevedoring Co. is contracted by Waha for all normal agency duties. This agency is currently the only agency used by the four Owner Companies.

After a tanker arrives at the anchorage or is moored in a berth, an agency representative will come aboard, accompanied by Jamahiriya Customs Officials and Immigration Police. The agency representative will present certain clearance forms to the Master, which should be completed as soon as possible. After these forms have been signed by the Master, they shall be returned to the agency representative, who shall make the necessary distribution.

Crude oil loading documents shall be prepared by the Waha documentation group prior to and during loading operations, to expedite their final completion. When the tanker has been loaded, the documents shall be completed and endorsed by the Customs Officer and by the representative of the Secretariat of Petroleum. The documents shall then be distributed aboard the tanker and elsewhere, in accordance with previously arranged standard documentation schedules.

The tanker shall be considered clear to depart Es Sider when the crude oil loading documents have been delivered to the Master.

Jamahiriya Customs Authorities:

- *(a)* List of the crew with a declaration of their personal belongings (Form supplied by the Customs Authorities).
- *(b)* List of tanker's stores.
- *(c)* List of passengers.
- *(d)* Six copies of Cargo Manifest for cargo to be discharged at Es Sider.
- *(e)* One copy of Cargo Manifest for cargo in transit.

Blank copies of "Certificate of Discharge" are placed on board every vessel at Es Sider. These certificates must be endorsed by the Customs, or other recognised authority, on completion of discharge. One completed certificate must then be forwarded to the Libyan Customs Authorities according to the instructions contained in the "Certificate of Discharge". At least one further copy should be retained on board, to be produced to the Customs on any subsequent voyage to a Libyan port. Failure to produce the certificate may result in delays to loading, or even rejection of the vessel by the Libyan authorities.

PILOTAGE: Vessels to be moored, anchored or manoeuvred will only be boarded within the recommended anchorage area (Pilot boarding area centred at Lat. 30° 41′ 54″ N., Long. 18° 23′ 30″ E.). A vessel is not considered arrived until it is in the recommended anchorage area. The Mooring Master will advise the Master on approaches to berths, mooring, unmooring, connecting and disconnecting the hoses and in all operations within the anchorage or berthing area. All manoeuvring of ships shall be done only in accordance with the advice of a Waha Mooring Master, subject to the understanding that in all cases and circumstances the Master shall remain solely responsible for the safety and proper manoeuvring of the tanker. The Master or one of his qualified deck officers must be on the bridge at all times while the tanker is being manoeuvred.

Tankers not equipped with pilot hoists shall provide a pilot ladder, or ladders, constructed and placed in accordance with latest Safety of Life at Sea Convention. Tankers having a large freeboard are requested to use a combination of pilot ladder and accommodation ladder, which is also in accordance with the above Convention. A ship's officer, plus the necessary crew members, shall be present at the ladder or hoist to ensure the safe embarkation and disembarkation of Mooring Masters and Port Authorities. All such ladders and hoists shall be thoroughly tested and inspected before the vessel arrives in the recommended anchorage.

The Mooring Master shall be in direct control of all tanker communications while in the Terminal area. Any unauthorized communications will result in the immediate cessation of all operations excepting clearing of the berth. Such tanker immediately nullifies its Notice of Readiness.

APPROACHES: Coastal landmarks in the area are as follows:

- *(a)* The most prominent landmark is a water tower in the terminal area which is painted white and is 180 ft. above sea level. This water tower is located at Lat. 30° 38′ 00″ N., Long. 18° 21′ 01″ E. and displays a fixed red light at night.
- *(b)* A communications tower in the Terminal area is a most conspicuous landmark. It is located at Lat. 30° 37′ 59.5″ N., Long. 18° 20′ 54.5″ E. Approximate height above chart datum of this tower is 246 ft. It is lighted at night with 2 vertical red lights, and has a height above ground of 200 ft.
- *(c)* A radio antenna tower which is 395 ft. above sea level is located at Lat. 30° 36′ 56″ N., Long. 18° 16′ 55″ E. At night this tower is lighted by an occulting red light, flash two seconds, eclipse one second, and there is a fixed red light halfway up the mast. It is flanked by two dish shaped aerials.
- *(d)* There is a water tower at Ras Lanuf Terminal with a highest elevation of 179.5 ft. above sea level located at Lat. 30° 30′ 42″ N., Long. 18° 32′ 22″ E. It is white in colour. A white light, characteristics:– flash two every 5 seconds, height above sea level 163 ft., is mounted on the seaward side. There is also a fixed red air warning light on the top of the structure.
- *(e)* An omni-directional aircraft radio beacon is situated at Lat. 30° 37′ 29.8″ N., Long. 18° 21′ 07.7″ E. transmitting "OJ" 5 times every 60 seconds on 300 kHz.

Range lights and mooring buoy marker lights will appear and disappear with unscheduled frequency. These lights are for the use of the Mooring Masters at the Terminal and should be disregarded by any tankers using the Terminal.

ANCHORAGE: The recommended anchorage area is within an area centred on Lat. 30° 41′ 54″ N., Long. 18° 23′ 30″ E. with a radius of 1,000 m. The anchorage area has a sandy bottom with a depth of approximately 110 ft.

Great care should be taken approaching anchorage from the North or N.W. to give mono-moorings a wide berth.

MAX. SIZE: The following are the approximate berth limitations:–

	Length	*Draft*
No. 1 Berth	920 ft.	51 ft.
No. 2 Berth	890 ft.	51 ft.
No. 3 Berth	950 ft.	51 ft.
No. 4 Mono-Mooring	1,150 ft.	62 ft. 6 in.
	Max. beam 158 ft.	Max. d.w.t. 250,000
No. 5 Mono Mooring	1,165 ft.	73 ft.
	Max. beam 184 ft.	Max. d.w.t. 300,000

Note: No. 4 Mono-Mooring: The max. length overall is 1,150 ft. The max. draft to which vessel can load in good weather is 62 ft. 6 in., and when vessel lies within 30° of loading line. During adverse weather causing vessel to roll and pitch, draft may be restricted to 58 ft. The max. draft limitation in good weather is due to depth to top of loading line being 63 ft. at distance of 1,900 ft. from buoy.

Length, beam and d.w.t. could all be extended provided draft does not exceed 62 ft. 6 in.

All the above limitations are based upon standard tankers in normal weather conditions.

Waha reserve the right to vary the above limitations, depending on vessel's freeboard, (OBO's – ore/oil vessels, etc.) and also the prevailing weather conditions.

RADIO/VHF: Waha maintains direct communication with Tripoli Radio details of which are shown in publication 205 of the U.S. Hydrographic Office and are included in the Berne Lists. Waha also maintains a VHF station at Es Sider Terminal.

Cables should be addressed to: Wahaoil Pipeline Tripolilibya. Cables addressed in this manner will be received directly by the Waha Communications Centre in Tripoli and relayed immediately by voice radio or teletypewriter to the terminal at Es Sider. Vessels with a telex facility on board should telex directly to 20158 Wahalibya, Attention Marine Superintendent.

Within 6 hours of clearing its last port for its voyage to Es Sider, each tanker shall provide the Terminal with the following information by cable addressed to Wahaoil Pipeline Tripolilibya:

- *(a)* The name of the tanker.
- *(b)* The name of the port from which the tanker last cleared.
- *(c)* The date and hour of the ETA at Es Sider Terminal.

When the Master of the tanker en route to Es Sider is of the opinion that his tanker is within 72 hours of arrival at Es Sider, he shall notify the Terminal by cable addressed to Wahaoil Pipeline Tripolilibya, or telex as above, providing the following information:

- *(a)* The name of the tanker.
- *(b)* ETA at Es Sider.

When the Master of the tanker en route to Es Sider is of the opinion that his tanker is within 24 hours of arrival at Es Sider, he shall notify the Terminal by cable addressed to Wahaoil Pipeline Tripolilibya, providing the following information:

- *(a)* The name of the tanker.
- *(b)* ETA at Es Sider.
- *(c)* Quantity of cargo required, maximum draft on departure Es Sider, and deballasting time required before vessel can commence loading.

When the Master of the tanker en route to Es Sider is of the opinion that his tanker is within 12 hours of arrival at Es Sider, he shall notify the Terminal by cable addressed to Wahaoil Pipeline Tripolilibya, or telex as above, providing the following information:

- *(a)* The name of the tanker.
- *(b)* ETA at Es Sider.

4 hours before the Master expects to arrive at Es Sider to receive a Mooring Master on board, he shall notify the Terminal by cable addressed to Wahaoil Pipeline Tripolilibya, or telex as above, and also pass the same by VHF radio, providing the following information:

- *(a)* The name of the tanker.
- *(b)* Precise ETA at Es Sider.

If the tanker is equipped with a FM radio-telephone in the 156–162 MHz band, communications may be established with the Es Sider Terminal Dispatcher by calling on Channel 16, 156.8 MHz. This frequency is monitored continuously. The range of the Terminal station is approximately 100 miles.

VHF Channel 12 is also available for use as a marine working frequency, although it is not monitored.

When the Master submits his first estimated time of arrival to the Terminal, he shall indicate if the vessel is to load a part cargo, in which case it should be stated clearly whether it is first or second part of loading.

Jamahiriya Local Time is GMT plus 2 hours (GMT plus 1 hour in Winter).

N.B. Vessels are requested to refrain from using VHF Channel 8, as this is used as a tanker loading frequency, until such time as other frequencies are available and equipment is installed.

ARRIVAL PROCEDURE: Tenders to load crude oil cargo will normally be accepted and berths will be assigned to tankers in order of arrival, provided they have valid nominations for cargo and carry clean ballast, if any, and are in all respects equipped and ready to berth. In the event that berthing is delayed on account of weather, tankers will normally keep their position in line. Tankers required to leave Terminal area on account of weather (port closed) shall maintain contact with the Terminal via Tripoli Radio or VHF so they will be available when the weather moderates. Waha reserves the right to decline to berth a specific tanker if its condition or facilities are unsafe for berthing or loading, even though the Terminal may be open to other tankers. Waha Marine Superintendent's decision shall be final.

As soon as practical after arrival, all tanks will be inspected for evidence of oil in ballast. Similar inspections will continue during discharge of ballast. If evidence of oil appears at any time, the tanker shall be rejected forthwith and shall not again be accepted until it is shown the ballast can be properly discharged.

If during inspection or during progress of loading it is revealed that tanks are not tight or that oil is leaking from the tanker, it shall be rejected from further loading. Tanker shall not be later accepted for loading unless satisfactory evidence of repair is submitted, duly certified by Lloyd's or ABS Surveyors, or other recognised surveyors.

Upon arrival at the Terminal of Es Sider, the Master shall give Notice of Readiness to load by wireless or VHF but not before one or other of the following events shall have transpired:

- *(a)* The Master shall have received the Mooring Master on board; or
- *(b)* The Master shall have dropped anchor in the anchorage.

However, the Notice of Readiness shall not be accepted unless the tanker is in every respect ready to load.

In reporting readiness to load, the Master of any vessel arriving at Es Sider for the first time shall state whether the flanges on the manifold of his vessel are such as to permit hose connections without modification.

A tanker shall have sufficient ballast for safe handling. Careful watch of the weather, frequent interchange of information between the tanker and the Terminal and the knowledge of the behaviour of his tanker may permit the Master to bring his tanker with minimum of ballast and thereby reduce the possibility of violating sea pollution requirements.

HEALTH: Tankers shall fly "Q" on arrival by day and display a red light over a white light at night to indicate quarantine conditions.

VHF: Tankers shall keep continuous watch on VHF Channel 16 when at anchor in the anchorage. Failure to keep watch on Channel 16 may lose them their berthing turn.

TUGS: Not required. Waha maintains launches to assist in berthing tankers. These are under the direct supervision and control of the Mooring Master.

BERTHING: The 3 (7-Buoy) conventional berths are approximately 1 mile from shore and in approximately 65 ft. of water. Central Spar Buoys of these 3 berths are:

Berth No. 1 (Easternmost)
Lat. 30° 38′ 58″ N. Long. 18° 22′ 43″ E.
Berth No. 2 (Middle)
Lat. 30° 39′ 06″ N. Long. 18° 22′ 06″ E.
Berth No. 3 (Westernmost)
Lat. 30° 39′ 35″ N. Long. 18° 21′ 53″ E.

To the West of the 3 conventional berths is a mono-mooring berth. It is about 2 miles from shore in approximately 80 ft. of water.

Berth No. 4
Lat. 30° 40′ 31.5″ N. Long. 18° 21′ 43.7″ E.

To the East of the 3 conventional berths is a second mono-mooring berth. It is about 3.5 miles from shore in approximately 100 ft. of water.

Berth No. 5
Lat. 30° 39′ 55.95″ N. Long. 18° 25′ 19.13″ E.

Three lightbuoys have been placed on the North, East and West Cardinal points of the manoeuvring circle for Berth No. 5. The manoeuvring circle circumscribes an area 4,000 ft. from the berth centre.

Conventional Berths:

The Mooring Master may reject a tanker if he deems that the tanker is not properly equipped; or that the tanker fails to have a full complement of trained personnel capable of carrying out all the berthing procedures and in particular the hose connecting as directed by him; or that the tanker has dirty ballast; or that the tanks are not suitable for carrying crude oil. Tankers having a separate system of ballast tanks shall be permitted to discharge ballast and load oil simultaneously; however, approval shall first be obtained from the Waha Marine Superintendent.

Tankers shall be equipped with an adequate propulsion unit as certified by an appropriate Survey Society. Tankers with inoperative or partially inoperative propulsion units shall be rejected. No repairs shall be made while the tanker is in or near a berth.

Tankers shall have 2 bower anchors and ground tackle in good working condition and in sizes and class to qualify under either Lloyd's or ABS ratings, even though they may have been classified by other Societies, Vessels should be capable of running out a minimum of 165 fathoms (11 shackles) of chain on each anchor in order that they may be berthed at one of the sea loading berths.

Tankers shall have at least one winch, in good working order, on the poop deck capable of heaving on two ropes simultaneously. The winch drums must be of such a size to be able to take at least 5 turns of mooring rope.

Tankers shall have one winch on the after end of the main deck, so sited that ropes led through the fairleads at the after end of the main deck, port and starboard, can be hove on. The winch drum must be of such a size to be able to take 5 turns of mooring rope.

All tankers shall have suitable stoppers for all lines and stoppers for wire ropes. Wire ropes are a part of the permanent berths and all tankers shall pick up the wire ropes unless an exception is approved by the Marine Superintendent. The exception may be based upon tanker having suitable wires with nylon or synthetic rope tails for ease of handling by launch and launch crews. These tails should be of appropriate strength and of a suitable length to enable them to be manhandled on to the mooring buoy hooks. Constant tension winches may not be used except where they can be solidly locked and the constant tension feature not used. The making fast of berth mooring wires on ship's reels will be treated as a last resort to be used only in the absence of sufficient bitts.

Tankers shall have at least 9 good synthetic fibre lines of not less than 9 in. circumference and at least 120 fathoms in length, with an eye spliced in each end. These lines shall be placed out free for running; 3 on the after end of the main deck, and 6 on the poop deck. The 3 lines on the after end of the main deck shall be married together so that if the need arises the double length can be run on either side of the tanker. The Mooring Master may require the use of additional ropes or wires to effect a safer mooring, and these are to be supplied on his advice.

Tankers shall be equipped with blocks, tackle, booms, runners, and sundry equipment to efficiently hoist the submarine hoses (5 tons at conventional berths and 10 tons at monobuoys) from the sea bottom. Other necessary equipment includes wrenches, gaskets, nuts, bolts, strops, drip pans, sawdust, drift pins, etc. The derrick should be rigged with a single wire runner of sufficient strength to be able to lift 10 tons.

After the tanker is securely berthed, the submarine hoses shall be lifted amidships on the port side. The base lift may weigh up to 10 tons. Hoses shall be lifted and connected by the tanker crew. The Mooring Master shall advise the tanker's officer-in-charge concerning lifting techniques; however, the responsibility for all operations shall remain with the officer.

It is believed that the facilities at Es Sider are similar to those of other Mediterranean Terminals, and that, generally speaking, no unusual or unique equipment shall be required by the tankers.

Shore Stops: If it is requested by the Master of the tanker that the cargo flow should be stopped from the shore at a predetermined tonnage, it must be clearly understood that Waha Oil Company of Libya, Inc. will not be held responsible for any error, and that in the case of overloading, the excess cargo cannot be pumped back ashore.

Vessels are encouraged to load and deballast at the same time providing that segregated ballast tanks or double valve separation exists.

Mono Moorings: Nos. 4 and 5 Berths are single point buoy moorings. The body of the buoy is secured in a fixed position by means of 8 moorings, whilst the top of the buoy is in the form of a turn-table, allowing the ship's moorings and hoses to rotate and take up the position the vessel naturally lies due to wind, sea and current conditions.

Vessels are normally moored by 2 bow lines only, these being provided by Waha. A selection of wire strops and shackles will also be placed on board for mooring purposes. The 2 mooring lines are hove in until the length of chafing chain to O.C.I.M.F. standards is brought inboard. According to the mooring arrangements, the Mooring Master will advise on the method of securing the vessel. Ship's wires or ropes may be required to back up mooring equipment supplied by Waha. Smits towing brackets will be utilised when fitted in suitable position and if they are of adequate strength and size. Other O.C.I.M.F. standards chain compressors and fittings are acceptable. However, it should be noted that 2 ropes are provided and therefore 2 chafe chains must be hove inboard and properly secured. Under no circumstances shall the ship be moored with the lead-in ropes.

On advice from Waha that a vessel is to load at the mono moorings, she will have the following ready before the Mooring Master boards:

(a) Port side derrick to be rigged ready to lift various wire strops, shackles, and hose securing equipment. This equipment will be placed on board at the same time as the Mooring Master boards, or as soon as possible thereafter, who will advise on its disposition.

(b) Forward, the vessel should have ready 2 good synthetic fibre mooring lines, at least 9 in. circumference, 2 good 4 in. circumference rope messengers at least 400 ft. long, or two 3 in. wire messengers of the same length, each fitted with a suitable screw shackle. Also a crowbar, spikes and hammers.

(c) No moorings will be required aft.

(d) The vessel shall make a good lee on the port side, taking due care that ladders and accommodation ladders are clear of the tanker's manifold area and overboard discharges.

It is essential on this berth that the hoses be picked up immediately mooring operations are complete. On advice from the Mooring Master, part of the ship's crew must be standing by at the port manifold for this operation.

Hose lifting and connecting operations are basically the same as in conventional berths, except that hose strings are floating and therefore may require bowsing in rough weather.

Vessel's engines must be ready at all times, and under no circumstances is the propeller to be turned ahead without prior consent of the Mooring Master. Failure to comply with this may result in cessation of operations, and possible rejection as being unsuitable for a single point mooring. Any damage caused to the berth or hoses as a result of turning the propeller ahead without consent will be charged against the vessel.

In adverse weather, a continuous lookout will be required on the forecastle head, by responsible persons, to keep watch on the moorings, manifold and hoses.

In adverse weather the Mooring Master may require cargo to be loaded, in the initial stages, into the forward compartments and this should be complied with when requested.

Vessels are encouraged to load and deballast at the same time, where this is possible. In the case of vessels with permanent ballast tanks, this ballast should not be started without first consulting the Mooring Master.

LOADING: Raising, lowering, connecting and disconnecting of submarine hoses, as well as all other labours and duties on shipboard, shall be performed entirely by the ship's crew. Lack of co-operation by the crew in this operation will result in the rejection of the tanker, her return to the anchorage and any consequent loss of loading turn until crew are prepared to perform this work.

Mooring Masters shall report unsatisfactory conditions to the Waha Marine Superintendent, who may reject the tanker until corrections are made. All costs accruing from these conditions shall be for the tanker's account.

Loading Rates:

Conventional Berth Nos. 1, 2 and 3	40,000 b.p.h.
No. 4 Mono-Mooring	30,000 b.p.h.
No. 5 Mono-Mooring	50,000 b.p.h.

BALLAST: 4 hours deballast time (before commencing loading) is the maximum time allowable in consideration of the open and exposed nature of the berths. Vessels which take longer to deballast put the berth at unacceptable risk if the weather deteriorates. Should a tanker be unable to comply with this stipulation, Waha Marine Superintendent may berth more suitable vessels ahead of her if poor weather conditions dictate. Vessels with an unduly long deballast time may be rejected.

There are no facilities at Es Sider for the discharge of dirty ballast, and vessels arriving with dirty ballast will not be authorised to deballast in the vicinity of the Terminal. Any tanker rejected because of dirty ballast or sea pollution will automatically nullify its Notice of Readiness to load and thereby relinquish any right to priority of loading position.

It is the Master's responsibility to see that no oil of any kind is pumped or spilled overboard from his tanker. This includes oily water from bilges, residuals from previous voyages or any other matter that may result in pollution of the sea. Owners and Masters are invited to examine all laws concerning pollution of the sea, especially in regard to the Mediterranean Sea area. Inspections may be made by the Libyan Ports & Lights Authorities, whose opinion of the cleanliness of the ballast shall be final.

The waters in and adjacent to the Terminal of Es Sider must not be polluted, and only clean oil-free ballast may be discharged anywhere inside of a line 100 miles to seaward and roughly parallel to the Libyan Coastline.

Prior to acceptance all tanks will be inspected for evidence of oil in the ballast and during discharging similar inspections will continue.

Masters are warned that when disposing of dirty ballast outside Libyan waters, all pipe-lines, sea-suctions, strainers and pumps that are later to be used to discharge clean ballast, must be flushed clean so that there will be no chance of even a small amount of pollution when the clean ballast is pumped out.

Any vessel required to return to a position at least 100 miles offshore for cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered and at the same time loses any priority held for loading. On return from sea, vessel will be entered for loading at the time of the second arrival, when a new Notice of Readiness will be tendered.

Master's attention is directed to Es Sider Notices concerning oil pollution and to the serious consequences of discharging dirty ballast, besides having his tanker rejected.

MEDICAL: Medical assistance shall be on an emergency basis only. The Doctor will only board a vessel if it is physically impossible for the patient to attend the clinic ashore and there is no priority need for the Doctor's services on shore. Normally the Doctor will require the accommodation ladder rigged for boarding.

If it is necessary to land a patient at Es Sider, he must be accompanied by an officer able to speak English or Arabic. Patient and accompanying person must have their Passports and International Certificates of Vaccination and Immunisation, and the Authorities must be advised prior to their leaving the ship.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: Consulates are located in Tripoli, which is approximately 650 km. by road from Es Sider. Some countries having Consulates are: Algeria, Argentina, Belgium, Brazil, Chad, Czechoslovakia, Denmark, Finland, France, Germany F.R., Ghana, Greece, India, Italy, Japan, Jordan (represented by Indian Embassy), Kuwait, Lebanon, Morocco, Nigeria, Nationalist Republic of China, Pakistan, Saudi Arabia, Spain, Sudan, Syria, Sweden, Switzerland, Tunisia, Turkey, Union of Soviet Socialist Republics, Venezuela and Yugoslavia.

REPAIRS: When a tanker is in or near the berth, its engines shall remain ready with full power for immediate use. Engine repairs shall not be performed near any berth.

WATCHMEN: Not less than one capable deck officer and three able seamen shall be available on the deck at all times. No person under the influence of alcohol shall be allowed on deck. The Mooring Master's opinion on the sobriety of an individual shall be final.

CUSTOMS ALLOWANCES: Cigarettes, cigars, matches, tobacco, spirits, wines, beers, perfume, arms, ammunition, saccharine, and certain other items shall be placed under Customs seal from the time of arrival in port until such time as the tanker has left territorial waters.

Each officer and crewman is allowed the following ration for each day the tanker is in port: *(a)* 25 cigarettes per day, or 25 grammes of tobacco or 25 grammes of cigars. *(b)* One litre of beer or 0.5 litre of wine. *(c)* Special provisions are sometimes made for the Master.

REPATRIATION: No facilities exist for crew changes or repatriation.

TIME: GMT plus 2 hours.

SHORE LEAVE: None of the officers and none of the crew of any tanker shall be permitted shore leave at Es Sider.

GENERAL: The Terminal of Es Sider operates 24 hours a day, 7 days a week, while weather permits.

Range lights and mooring buoy marker lights will appear and disappear with unscheduled frequency. These lights are for the use of Mooring Masters at the Terminal, and should be disregarded by any tankers using the Terminal.

Waha maintains launches to assist in berthing tankers. These are under the direct supervision and control of the Mooring Master. Any service and facilities provided by Waha, including the services of the Mooring Masters, launches, or berthing equipment, are at the vessel's risk. The furnishing of a Mooring Master, launches, or other services and facilities shall not be construed to be, or give rise to, a personal contract. Waha shall have benefit of all exemptions from the limitations of liabilities to which an owner or a vessel is entitled under the laws of the United States of America.

When a Mooring Master and his assistants, possibly apprentice Mooring Masters, are assigned to a tanker, the tanker shall supply them with accommodation of the same standard and meals in the same manner as comparable personnel of the tanker. No special meals or special foods shall be required unless to comply with Moslem religious teachings. The intent is that the furnishing of meals to Waha personnel be kept to the minimum, compatible with the ordinary working of the Terminal.

No boats may be lowered into the water, except in an emergency.

Adequate deck lighting must be available for night mooring and loading. A good floodlight will be required to illuminate the area around the submarine and cargo hose connections during hosing and loading operations. During the discharge of ballast at night, the sea area around the vessel must be adequately lighted. If vessel is berthed on mono-mooring buoy, in addition to the foregoing, lights MUST be provided on forecastle head and over bow to facilitate supervision of moorings.

Stores of any sort shall not be handled while tanker is under "Notice of Readiness". No stores shall be handled while the tanker is in or near a berth.

Use of anchor marker buoys recommended.

Should any tanker or craft become an obstruction in any part of the Terminal or approaches thereto, or in any area of the submarine pipeline. Waha shall be empowered and shall have the right to take any steps it may deem necessary to remove the obstruction without notice to the Owners. All expenses of such removal shall be borne by the tanker or craft or by those owning it at the time of the accident causing the obstruction, and Waha shall be entitled to reimbursement by them for any such expenses incurred by it.

Power must be available at all times on all deck winches and on anchor windlass while the vessel is in the moorings.

If mooring wire winches are used, wires should be secured so as to enable them to be quickly let go from the vessel without damage.

Only in an emergency shall the tanker manifold valves be closed against crude flow, and then only with the Mooring Master's consent.

Should communications fail, the cessation of loading may be effected by a continuous sounding of the ship's whistle. This procedure will then stop the loading of all tankers in the area.

The bridge and/or control area shall not be locked nor otherwise arranged to prevent immediate entry at all times by the Mooring Master.

In adverse or marginal weather conditions Mooring Master may request that extra personnel be placed on duty on deck for tending moorings or hoses as required. Masters are advised to comply with this request.

The Mooring Master shall witness the plugging of all scuppers. Failure to plug scuppers shall result in the tanker's rejection.

The presence of unauthorised craft alongside a tanker will render i unacceptable. It shall be the duty of the tanker's personnel to clear al such craft away from the tanker.

When tankers are loading or discharging crude oil or ballast, and while tank tops are open or ullage plugs are open, boiler tubes shall not be blown. Every precaution shall be exercised to prevent sparks escaping through the funnel or stack or from the galley stack. The Mooring Master may demand all fires extinguished if he deems it necessary for safety.

Under the interpretation accorded to the Libyan "Boycott of Israel" Law, it is considered to be a violation thereof if a vessel calling at a Libyan terminal has on board any item of Israeli origin, irrespective of the nature thereof, including but not limited to manufactured products, fruit and vegetables, as well as empty crates, cartons, bottles and paper wrappings, regardless of the country where any of the foregoing was obtained. The law is strictly enforced, and the minimum penalty for violation thereof normally includes a fine and confiscation of all such items. Fines can exceed $1,000.

Charts: B.A. 3344 and Italian No. 431.

SHIPMASTER'S REPORT: May 1987.

Prior to arrival *all* storerooms were thoroughly checked to ensure that no produce, tools or equipment indicated that they were of Israeli or South African origin. "Magazines", Time, Newsweek, old newspapers etc., were put out of sight as many of these publications contain political cartoons. Israeli and South African national flags were removed from the flag locker together with their respective name tags. ALL alcohol placed in the bonded store and listed. An *accurate* Stores List of selected items together with a comprehensive *accurate* Crew Declaration List were prepared.

Fifteen minutes after berthing, Agent, Customs, Immigration and Port Captain boarded. Immigration checked Crew List against Passports. Customs checked Bonded Stores List against Bond Locker. Customs checked coffee and sugar against Stores List. No discrepancies were found and all other items were accepted. Port Captain checked vessel's trading certificates and had to be convinced why the vessel could not produce the trading certificates translated into Arabic. This could cause a delay on any subsequent voyage to Libya.

As stated in "Guide to Port Entry", Master has to sign a Declaration of Discharge, which *must* be endorsed by the Customs at the Port of Discharge and *must* be posted back to Libya, a copy *must* remain with the vessel. Failure to comply with the regulation will automatically mean a long delay and possible rejection of the vessel on any subsequent visit to Libya.

As all the necessary papers were in order and no discrepancies found all official were polite and quite happy.

There were no problems with mooring, loading cargo, figures, etc. However, this vessel does not have the required number of mooring ropes to berth as per port requirements. (9 ropes required Aft). See "Plan Section".

AUTHORITY: Waha Oil Co., P.O.Box 395, Tripoli, S.P.L.A.J. *Tel:* 31116 29 (ext. 6-212). *Telex:* 20158 Wahalibya. *Cables:* Wahaoil. *Contact:* Marine Superintendent.

AGENCY: See "General" before first port.

MARSA AL HARIGA: 32.04 N. 24.00 E. (See Plan)

Also see "General" before first port.

LOCATION: Marsa al Hariga Oil Terminal is located on the South side of the harbour of Tobruk, approximately 1 mile Eastward of Marsa al Hariga.

APPROACHES: Vessels bound for the terminal should approach the harbour of Tobruk from the North-East with the lighthouse on Tobruk Point bearing 238° (true). In daylight this lighthouse should be kept i line with the conspicuous German War Memorial on the South side o the harbour.

When about 4 miles from Tobruk Point, course should be altered t 224.5° (true) to bring the leading lights on Marsa Umm esc-Sciausc i line. This course should be maintained until the vessel is close to the outer buoy, where one of the company's Berthing Masters will board.

Deep-draft vessels sailing from the terminal should avoid navigating North-Westward of the leading line from Marsa Umm esc-Sciausc, owing to the presence of shoal water off Tobruk Point.

DOCUMENTS:

A. Customs Requirements. On the arrival of a vessel, the Tobruk Customs Authorities will require from the Master of the vessel:

4 copies of a Crew List.
2 copies of a List of Ship's Stores.
2 copies of a Declaration of the Crew's Personal Belongings, including currency, cigarettes, gifts, etc.
4 copies of a Passenger List.
Last Libyan (cargo discharge certificate) to be checked for validity o boarding, if not correct vessel has to wait outside for ship's purposes.

8. Harbour Master's Requirements. On the arrival of a vessel, the Tobruk Harbour Master will require from the Master of the vessel:

1 copy of a Crew List.

1 copy of a Passenger List.

1 copy of the Ship's Manifest.

1 copy of a Port Declaration (form will be made available to each vessel on arrival).

PILOTAGE: Vessels coming to and departing from the Terminal will be berthed and unberthed by Berthing Masters provided by the company, subject to the understanding that in all circumstances the Master shall remain solely responsible on behalf of his Owners for the safety and proper navigation of his vessel.

Berthing Masters will board at the Outer Buoy.

The Pilot and Loading Master are to be provided with cabins whilst the vessel is alongside.

ANCHORAGES: If a berth is not immediately available on a vessel's arrival off the harbour of Tobruk, the vessel will be advised by the company where she is to anchor.

Anchorage position for tankers waiting to be berthed is 1.5 miles N.E. of the Outer Buoy.

MAX. SIZE: Max. Summer deadweight 150,000 long tons and Max. draft 56 ft. at No. 1 and Max. Summer deadweight 130,000 long tons and Max. draft 52 ft. at No. 2. The berths are located at the end of a T-head jetty which extends some 700 ft. from the shore. There is a minimum depth alongside of 60 ft. and approach to and departure from the berth can be made in not less than this depth of water. Freeboard at any time whilst deballasting must not exceed 55 ft.

HEALTH: The Libyan Authorities will grant clearance by radio of a vessel coming to the terminal. Radio messages requesting clearance should be sent not earlier than 48 hours prior to vessel's arrival off the harbour of Tobruk and should give the details required in the Maritime Declaration of Health which must also be completed.

COURTESY FLAG: On entering the territorial waters of the Libyan Arab Republic which commence 6 miles off the coast of Libya, vessels should if possible, hoist the Libyan flag, and in any event the Libyan flag must be hoisted before entering the harbour of Tobruk. Should a vessel arrive without a Libyan flag on board, one may be obtained from the Company's Berthing Master when he boards at the Outer Buoy.

ARRIVAL MESSAGES: In addition to their arrival messages to Agent, vessels must pass an arrival message to the terminal via the company's radio station giving at least 72 hours notice of ETA and advising their estimates of:

(a) The quantity of cargo (in long tons) to be loaded at the terminal.
(b) The cargo loading rate (in long tons) per hour.
(c) The quantity of ballast (in long tons) to be discharged ashore at the terminal.
(d) The ballast discharge rate (in long tons).

If, subsequent to advice of their ETA there is any material change, a further ETA message must be passed via the company's radio station.

RADIO: Tobruk Radio 5 A1 (MF & HF). Position: 32° 02′ N. 24° 00′ E. Frequency: 420, 500 A1, A2, 0.5 kW. 4241 kHz at 2130 GMT, 8480 kHz at 1730 GMT, 16963 kHz at 0930 and 1330 GMT. All using A1 0.5 kW. *Note:* Station owned by Arabian Gulf Oil Company. Company telegraphic address: "Injaz Tobruk". Telex: No.: Agoco Ly 50023. All times given are GMT. Station keeps watch on 500 kHz during 24 hours.

TUGS: For berthing and unberthing at the terminal, vessels will be required to use the 2 diesel tugs which are available at the terminal. Each of these diesel tugs has a bollard pull of approximately 25 tons.

BERTHING: *Jetty:* Vessels will berth on the jetty starboard side alongside, depending on the prevailing weather conditions, though starboard side alongside is preferred. Each berthing head is "T" shaped and is protected by 4 breasting dolphins.

Moorings: Normal requirements are 4 head ropes, 3 breast ropes and 2 springs (springs to be ropes whenever possible).

All moorings, except the backsprings to the outer breasting dolphins at Jetty Berth No. 1 attached to quick release hooks.

Buoy Berth: Removed.

HOSES: New loading arms installed (balanced type) are Woodfield Mark 4, manifold size 16 in. ASA. Loading rate is maximum of 4,000 t.p.h. per hose.

OIL BARRIER: "Gemlen" floating anti-pollution booms on reels at jetty heads. Boat with chemical dispersants standing-by. Anti-pollution barge with floating boom and oil skimmer is available.

BALLAST: Vessels should make every effort to arrive at the terminal with clean ballast and with the minimum quantity for safe handling under prevailing weather conditions.

All ballast must be discharged into shore tanks provided by the company, unless it is clean ballast, carried in tanks which are completely isolated from the vessel's cargo system. However, the discharge of such ballast into harbour waters must not be commenced until the ballast has been inspected by a company official, and he has certified that it is in order to commence discharge.

Ballast can be accepted into the Company's store tanks at rates up to 4,500 t.p.h. from the jetty berths. Ballast is discharged ashore over the jetty by way of a loading boom. Max. quantity 35,000 tons.

LOADING: Cargo loading at each jetty berth is by means of four 16 in. Woodfield Mark 4 loading arms. Cargo loading at the buoy berth is by means of a 34 in. submarine line to which two 12 in. flexible hoses are attached.

This system permits a max. loading rate of approximately 8,000 t.p.h. over each jetty berth. The actual loading rate for a particular vessel will be determined prior to the commencement of loading by agreement between the Master and the Company.

Jetty: Method: gravity loading, max. head 360 ft. rate regulated to requirements. Loading rates: 2 lines each 4,000 t.p.h. Two 8,000 t.p.h. maximum.

FRESH WATER: Not available.

FUEL: Not available.

SAFETY: A copy of the Regulations will be given to Master when Company's Berthing Master boards at outer buoy. Masters should make themselves thoroughly acquainted with these Regulations, strict observance of which is required by the Company.

In the event of any infringement of the Regulations, operations may be stopped and, if so, will not be recommenced until the Company is satisfied that appropriate action has been taken by the Master to comply with all the Regulations. The Company also reserves the right to unberth a vessel in the event of a continued or blatant disregard of any of the Regulations. Any loss or expense to the Company resulting from an infringement of the Regulations and, in particular, in the event of an infringement leading to an interruption of operations and/or unberthing of a vessel, will be for the account of the Owners.

CONSULS: None.

REPAIRS: No shore facilities for carrying out repairs to vessels either at the terminal or at Tobruk.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beer, perfume, arms, ammunition and saccharine have to be locked up under Customs' seal from time of vessel's arrival in harbour of Tobruk until time of departure.

Whilst in harbour, each member of crew allowed following: 200 cigarettes. All spirits, beer and wines to be placed under seal.

No fixed allowances for cigars and tobacco.

Libyan law prohibits vessels from having on board any goods or containers of Israeli origin. Any vessel having such goods or containers on board on arrival in the harbour of Tobruk will be liable to a heavy fine and confiscation of the goods or containers. The Libyan Authorities may, moreover, refuse to clear the vessel.

REGULATIONS:

1. *Ship's Garbage.* Whilst within limits of harbour of Tobruk the throwing overside of ship's garbage is prohibited.
2. *Ship's Radio.* Once vessel berthed at Terminal the use of her radio will not be permitted.
3. *Ship's Boats.* Use of ship's boats not permitted within limits of harbour of Tobruk.

SHIPMASTER'S REPORT: April 1983.

Anchorage: Anchorage position for tankers is from 1.5 miles – 2 miles N.E. of the Outer Buoy. Holding ground is bad. As soon as wind increases up to Force 7 and swell grows, it is best to heave up the anchor and to proceed to sea and wait, keeping watch on VHF Channel 16.

Many vessels have lost anchors.

Max. Size: Berth No. 1 – Max. draft 56 ft. Berth No. 2 – Max draft 52 ft.

AUTHORITY: General Ports and Lights Administration, P.O.Box 648, Tripoli, Libya.

Operator: Arabian Gulf Oil Co., P.O. Box 44, Tobruk. *Tel:* 87-22044/7. *Telex:* Agoco Ly 50023. *Cables:* Injaz Tobruk. *FAX:* 22044 Tobruk. *Contact:* Marine Department or Terminal Manager.

AGENCY: See "General" before first port

MARSA EL BREGA: 30.25 N. 19.34 E. (See Plan)

Also see "General" before first port.

SIGNALS/FLAGS: The Libyan maritime authorities require all vessels conducting business with Libyan ports, or plying the Libyan territorial waters, to strictly comply with the following standing international maritime practices:

1. To sound whistle signals appropriate to the different vessel manoeuvres, as well as during entering and leaving ports.
2. To fly the flag of the country of registration when approaching port(s) of destination, and during vessel's stay in port.
3. To salute Libyan navy vessels upon approaching such vessels.
4. All ships must fly the Libyan flag when inside territorial limits.
5. Libyan Law does not permit ships using Libyan waters to retain Israeli flags, stores or literature pertaining to Israel on board, even though these may be normally part of the vessel's navigation equipment.

Failure to adhere to the above may result in penalties by the Authorities.

LOCATION: Marsa-el-Brega is located in the South-Eastern part of the Gulf of Sirte in Lat. 30° 25′ 0″ N., Long. 19° 34′ E. It is an open bay contained between Ras Magdar and an unnamed headland some 3 miles to the West.

Vessels calling at Brega should have on board B.A. Charts No. 3350 and 3354, or H.D. Chart No. H203. No charts are available at Brega.

The Brega Sea Buoy is located in Lat. 30° 27.55′ N., Long. 19° 35.1′ E. A white flashing light is exhibited on a orange/white pillar buoy at a height above the water of 6.1 m. The light's characteristic is one flash every ten seconds (Fl. 10 sec.).

Single point mooring Berth No. 5 (SPB 5), is located in position Lat. 30° 26′ 45.26″ N., Long. 19° 34′ 7.4″ E.

Single point mooring Berth No. 6 (SPM 6), is located in position La. 30° 26′ 17.3″ N., Long. 19° 33′ 1.3″ E. The mooring buoys exhibit a white flasing light (characteristic "U").

Bow mooring (out of service) in position Lat. 30° 26′ N., Long. 19° 33.9′ E. with a flash red light (2 ev. 5 sec.) at a height of 28.34 m. above sea.

Radio beacon (Aero) is located in Lat. 30° 25′ N., Long. 19° 34′ 14″ E. Call sign is "MB" and operates continuously on a frequency of 403 kHz.

A single flare is located in Lat. 30° 24′ 31.9″ N., Long. 19° 35′ 49.7″ E. Three other flares are located approximately 2,213.36 m. to the West and Southwest. The flares, when burning, can be seen at extreme distances.

Numerous lit and unlit buoys are located within the restricted area shown on B.A. Chart No. 3350. Vessels are cautioned that these buoys may change position due to weather. Vessels are not permitted to enter restricted area shown, without a Brega pilot on board.

Brega is radar controlled with scanner in position Lat. 30° 25′ 02.5″ N., Long. 19° 34′ 55.6″ E. Height of tower 34.19 m.

Berth No. 2 (Naphtha) consists of 5 mooring buoys in position Lat. 30° 25.30′ N., Long. 19° 35.45′ E.

DOCUMENTS: Customs and Immigration Officials will board the vessel, except in adverse weather. All relevant documents are supplied by the Agent. The Master will sign and stamp the papers. These will then be handed over to the Authorities before clearance for loading is granted.

When ships clear inwards, they should complete the necessary forms for members of the crew, and all goods held (e.g. liquor, cigarettes, cameras, money, etc.) with the crew members' signature and rank. This form is ordinarily supplied in advance, however ships making their first call at Libya will receive advance forms for future calls.

Customs, Immigration and Lights Authorities Forms:

Port Declaration – Form P.L. 7 (1 copy).
(Title in Arabic) Inward Report – Form C.L. 128 (3 copies).
Cargo Manifest Inward – Form C.L. 1 (3 copies).
Report Outwards – Form C.L. 4 (3 copies).
Crew Manifest Inwards – Form C.L. 31 (2 copies).
Export Manifest Form C.L. 155 (6 copies).
Certificate of Discharge (see below).

Ship's Forms:

Crew List (3 copies) (also 1 copy to be handed to Pilot).
Stores List (2 copies).
Clearance from Last Port (1 copy).
Certificate of Discharge (Tankers only) from last Libyan Cargo.

Certificate of Discharge: If vessel has not called at a Libyan port since October 18th, 1973, then a letter is required from the Master, addressed to the Secretariat of Petroleum, stating that he undertakes to mail the Certificate of Discharge, for the present cargo, from the port of discharge and retain one signed stamped copy on board. It is essential that the Certificate of Discharge for any petroleum cargo loaded after that date, be on board the vessel and it must be clearly signed and stamped by the Authorities at the port receiving the last Libyan cargo. Vessels may incur delays or be refused loading permission where this is not complied with.

One copy to Secretariat of Petroleum, P.O.Box 2655 and 5335, Tripoli.
One copy to Marine Superintendent, Sirte Oil Co., Sirte Field, P.O.Box 385, Tripoli.

PILOTAGE: The services of a Pilot/Mooring Master are provided. He will normally board the vessel in the vicinity of the Brega Buoy and will advise the Master on approaches to the berths, mooring and unmooring, connecting and disconnecting cargo hoses, and all other operations within the berthing area. Vessels are cautioned not to enter the restricted area without the services of a Brega Pilot. Pilot ladder must conform to international safety standards.

The Master of the vessel shall notify the Pilot of any special conditions, difficulties or peculiarities, such as defective equipment, lines or gear, which might impose special hazards in connection with handling, mooring or loading the vessel.

The pilot will decline to moor vessels if they are not equipped with satisfactory mooring equipment, lines, gear, etc.

Vessels must be moored to the entire satisfaction of the Pilot, and must be ready at all times, to put out more lines or to adjust the lines as required by any change in the weather, or as requested by the Pilot. Masters are responsible for the frequent monitoring and careful tending of moorings throughout period on the berth.

Masters of vessels are reminded of their obligation to comply with statutory rules, and are requested to comply with the following:

The officer responsible for the embarkation or disembarkation of the Pilot must be a *Watchkeeping Officer*.

The pilot ladder must be properly secured and adequately illuminated.
The ladder must be in good condition.
The length of the ladder should not exceed 30 ft.
For vessels loading Crude/Naphtha, a combination accommodation/pilot ladder should be used.

Spreaders are to be positioned at intervals of not more than 10 ft.

Two manropes in good condition should be ready but not lowered, unless so instructed by the Pilot.

A lifebuoy with a safety line and self-illuminating light must be available at the embarking area.

If, in the opinion of the Pilot, the pilot ladder is not safe, the Pilot may refuse to board the vessel, and thus cause delay to the ship. Such delay would be for ship's account.

Vessels are cautioned not to enter the restricted area without the services of a Brega Pilot.

ANCHORAGE: Suitable anchorages are located 0.5 miles – 2.0 miles Northeast to East of the Brega Buoy in 22 m. – 23 m. depth.

Vessels are not permitted to anchor within 0.5 miles of the channels into the inner harbour, and are to keep clear of the 143° 41′ leads.

RESTRICTIONS: Shahat Shipping Co., Benghazi, advised in January 1984 that only tankers and self-equipped Ro/Ro vessels with forklift and drivers are acceptable at the port, due to non-availability of labour.

No conventional general cargo ships can be discharged until further notice.

In February 1984 Shahat further advised that receivers may discharge cargo by their own labour.

MAX. SIZE: Maximum draft for vessels entering or sailing from the inner harbour is 10.0 m.

Also see "Berthing".

TUGS: Marsa-el-Brega Port maintains tugs and mooring launches t assist vessels to moor and unmoor.

HEALTH: Quarantine signals must be displayed upon entering Brega port limits in accordance with international practice, and shall b continuously displayed until Pratique is granted.

RADIO: *Arrival Advice:* The Owner, Master, Charterer or Agent shou cable the following information to Brega Marine, P.O.Box 385, Tripo Libya, S.P.L.A.J. (Telex 30120/21/22 SIRTCO LY or 50557 SIRTCO LY through Tripoli or via Malta, if beyond communication range of Tripo 72 hours in advance, and at least 48 hours with subsequent upda message 24 hours before arrival.

The cable/telex office is closed between 1900 hrs. and 0700 hrs allowance for delays due to this, and other causes, should be allowe for.

ALL VESSELS:
Name of vessel.
Flag.
Gross tonnage.
Nett tonnage.
Summer deadweight.
Anticipated draft at loaded condition.
Last port.
Next port.
ETA at Brega (local time).
Agent.
Length of vessel.

TANKERS LOADING CRUDE:
Distance bow to manifold.
Segregated ballast or deballast time required.
Size of manifold (1×16 in. American Standard).
Safe working load of derrick.
Inert Gas System working and tanks inerted.
Vessel fitted with bow chain stopper (AKD).
Certificate of Discharge on board from last Libyan cargo, and if por of discharge same as port cleared for.
Cargo required by vessel.

TANKERS LOADING NAPHTHA:
Segregated ballast or deballast time.
Size of manifold (1×12 in. American Standard).
Minimum of 10×10 in. circumference fibre or synthetic moorin ropes (for use at after end of ship).
Safe working load of port derrick.
Certificate of Discharge on board from last Libyan cargo, and if por of discharge same as port cleared for.
Inert Gas System working and tanks inerted.

CARGO SHIPS:
Amount of cargo on board for discharge.
Receivers of cargo.
Advise number of stevedore gangs required.

Latitude 32° 30′ N.:

As a rule, vessels are no longer required to receive permission prio to crossing Lat. 32° 30′ N. en route to Brega. It is sufficient to contac Maritime Radio Tripoli or Benghazi giving ETA at Lat. 32° 30′ N. and proceed to Brega. Should permission be denied, vessels will be contacted accordingly.

VHF: *Port Control:* Marsa-el-Brega Port Control is equipped with VHF radio.

The following communication procedure should be adhered to:

Vessels approaching Brega should call Brega Port Control o Channel 16, at least 1 hour before arrival.

Prior to Pilot boarding, the vessel will be allocated one of 5 workin channels (6, 9, 12, 13, 14). Sirte Co. vessels are equipped to opera on these channels.

Note: Whilst in Libyan Territorial waters, it is prohibited for vessels t use Radio and Wireless Telegraphy. However, VHF communications between vessels and Libyan Ports Authorities are not affected by this prohibition.

BERTHING: *Crude Oil Berths, SPM No. 5 and SPM No. 6:*

Maximum size of vessel: 300,000 d.w.t.
Length and draft unrestricted.
Flowrate: 48,000 bbls./hr.
API approximately 40.5.

Mooring consists of a monobuoy to which are attached 2×15 in Samson lines. These are shackled to a single 3 in. Chaffing chain, which is attached to a pick-up line.

1. The ship's Panama lead should have minimum inside dimensions o 40 cm. high and 60 cm. wide. In the event that a vessel is not equipped with a suitable Panama lead, alternative fairleads will be examined. Should the alternative fairleads be considered insufficie to accommodate the 3 in. Chaffing chain, the vessel will not be berthed.
   In case of vessels without Chain stoppers (AKD) fitted, strops and shackles will be placed on board. *PLEASE ADVISE.*
2. The vessel is required to have ready a good 3.5 in. – 4 in. messenger line ready, and at least 137.25 m. in length.
3. Port derrick should have a S.W.L. of 10 tons, and be ready on arrival
4. Vessels berthing at the SPM's must have their anchors secured, due to underwater PLEM and pipelines.
   Floating hose is 24 in. with a 16 in. over-the-rail hose. Ship's manifold should be ready to receive 1×16 in. hose (American Standard).
5. All mooring, unmooring and hose operations are done by the ship's crew as indicated by the Mooring Master.
   Notice of Readiness will be accepted only when the Pilot boards the vessel in the vicinity of Brega Buoy.

Naphtha Berth No. 2:

Maximum size of vessel: 55,000 d.w.t., in good weather.
Maximum length: 244 m.
Maximum draft: 12.8 m.
Maximum flowrate: 21,000 bbls./hr.
API approximately 70.

1. Ships should have ready aft, a minimum of 10×10 in. circumference fibre or synthetic mooring ropes in good condition, each not less than 230 m. (120 fathoms) in length. Mooring wires are not normally acceptable. It is recommended that 4 ropes be ready on the main deck, two on each side.
2. Port derrick to be ready to receive one 12 in. hose.
3. Both anchors to be ready and working.
4. Mooring and hose operations by ship's crew.

Product Dock:
Maximum draft: 7.92 m.
Jetty length: 260 m.
Loading arm 129 m. from corner.
Vessels loading or discharging refined petroleum will be berthed at the product jetty.
Vessels cannot remain alongside the Breakwater except in fine weather.

LNG Jetties A (North) and B (South):
Head, stern and breast lines to dolphins.
Springs are secured to the central pier, and in addition shore springs from the pier are taken on board.
Vessels must be ready to leave at short notice.
LPG Jetty A: Connection on East Breasting Dolphin.
LPG Jetty B: Connection on centre berth position.
Caustic Jetty A: Connection on North Breasting Dolphin.

Cargo Quay – West Side (Sirte Oil Co.):
Maximum size of vessel: 152.5 m.
Maximum draft: 7.92 m.
Ships must have adequate unloading gear.
The following restrictions and conditions shall be observed by Masters, consignees and Agents:

1. The permission of the Operations General Manager must be obtained before a ship can berth to handle cargo that is non-Sirte Oil Co.
2. Unloading must be from ship to truck, and no marshalling arrangements can be made available inside the area.
3. Unloading operations may not be performed, except during daylight hours as determined by the Marine Superintendent.
4. Loading trucks will adhere strictly to Sirte Oil Co. safety rules.
5. Arrangements for the entrance and movements of stevedoring personnel must be coordinated with Sirte Oil Co. Security Division.
6. The stevedores will be held responsible for cleaning up after unloading the vessel, under direction of Sirte Oil Co. Materials Division.
7. Ten (10) days advance notification must be given to the Marine Division.
8. All vessels with or loading Sirte Oil Co. cargo will be given priority, even if this requires interruption of the unloading operations of other cargo vessels.

Ro-Ro facility can be used by suitable vessels when Product Jetty is not occupied.
Height of jetty above sea level approximately 1.5 m.

East Side of Inner Harbour (NAPETCO):
Jetty No. 1: Ammonia and methanol.
Jetty No. 2: Ammonia, methanol, acid and caustic.
Maximum size of vessel: 30,000 d.w.t.
Overall moorings: Jetty No. 1 – 334 m. Jetty No. 2 – 341 m.
Load section: 42 m.
Maximum draft: 10 m.

Urea Berth:
Overall length: 200 m.
Yokohama fenders in centre, 62.5 m. from each end.
Draft restriction: 8.8 m. (29 ft.) even keel.

East Cargo Quay:
Length of Quay: 394 m.
Maximum draft: 9.2 m.
Height of Quay: 2.7 m.
Maximum size of vessel: 15,000 d.w.t.
Suitable Ro-Ro vessels may berth stern on to the quay.
Ships using the Eastern part of the harbour are controlled in the same manner as in the Western part of the harbour, together with any particular rules concerning the individual berths therein, that the National Petrochemical Co. may apply.

TANKERS: *Communications:* During loading offshore communications between ship and shore is via VHF. In the event of a breakdown in communications, the ship should sound the emergency signal, comprising a succession of short blasts on the ship's whistle. All loading will then cease until radio contact with the shore has been re-established.

Safety Rules: Safety rules for tankers are as the "International Safety Guide for Oil Tankers and Terminals." and IMO Recommendations on the Safe Transport, Handling and Storage of Dangerous Substances in Port Areas (Assembly Resolution A.435 (XI)).

The Mooring Master is authorised to suspend operations in any cases where dangerous conditions or practices are deemed to exist, and if need be removed from berth.

Vessels at Sea Berths are not to adjust mooring lines before consulting the Pilot/Mooring Master.

Ballast: As soon as practicable after arrival and prior to acceptance, ballast will be inspected for evidence of oil. Samples will be sent ashore for testing. Inspection will continue during discharge of ballast.

If evidence of oil appears, the vessel may be returned to sea, or made to keep the dirty ballast on board.

Any vessel required to return to sea for the purpose of cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness, and at the same time loses priority held for loading. On return, a new Notice of Readiness must be tendered.

Vessels not having sufficient illumination will not berth if discharge of ballast continues after dark.

Loading Precautions: Masters are responsible to see that no oil is spilled from their ship.

If during inspection while loading, it is revealed that the ship's hull is not oil-tight, the ship will be rejected and refused further loading.

Vessels will be encouraged to discharge ballast and load oil simultaneously, subject to the loading rate.

Vessels Loading Crude and Naphtha: Inert Gas/Closed Ullage Requirements: It is a requirement of the amendment to "International Convention for the Safety of Life at Sea 1974", Regulation 60, that the vessel be fitted with an Inert Gas System. It is also a requirement of the same convention and the "International Safety Guide for Oil Tankers and Terminals" (ISGOTT) that, prior to loading, the cargo tanks must be inerted in accordance with the guidance laid down in Chapter 9 of ISGOTT and the I.M.O. Publication "Inert Gas Systems" 1983 edition.

Unless vessel's cargo tanks have been inerted to the required standards, that is, not more than 8% oxygen content by volume, the terminal operators will not commence loading and any delays arising, until such time tanks are inerted to the required oxygen level, will be to vessel's own account, and Notice of Readiness will not be accepted.

Furthermore, it is also a requirement of Regulation 60 that the vessel is fitted with a Closed Ullaging System. The use of which, during loading, will ensure that the inert gas/hydrocarbon vapour mixture is expelled only through the venting system designed for the purpose, and not through the ullage/sighting ports or any other deck openings.

These requirements are necessary to comply with "SOLAS" requirements, and to protect the terminal facilities and Sirte Oil Co. require vessel to confirm that they will in fact be met by signing and stamping last page of the terminal booklet.

SPM Berths No. 5 and 6, (Crude Cargo): Forecastle Head Watchman: A watchman *must* be stationed on the forecastle-head at all times to report any failure of moorings. He should also report immediately if the vessel tends to "ride-up" to the buoy.

He should be equipped with the appropriate means to communicate with the Officer of the Watch.

INSPECTION/POLLUTION: *Arrival*: As soon as practicable after arrival and prior to acceptance, all of the vessel's tanks will be inspected for evidence of oil in ballast tanks. Inspection will continue during discharge of ballast. If evidence of oil appears at either of these inspections, the ship must return at once to sea and clean tanks, etc., in accordance with the procedures as laid down in the booklet entitled "Clean Seas Guide for Oil Tankers – The Operation of Load on Top" as issued by the International Chamber of Shipping – Oil Companies International Marine Forum.

Any vessel required to return to sea for the purpose of cleaning tanks or for any similar reason automatically nullifies any Notice of Readiness already tendered, and at the same time loses priority held for loading. On return from sea, vessel will be entered for loading at the time of the second arrival when a new Notice of Readiness will be tendered.

In addition to the lights usually displayed, vessels discharging ballast or loading cargo during darkness, will illuminate the area round the ship to the satisfaction of the Mooring Master in order that any oil on the surface of the sea may be readily detected and appropriate action taken. Vessels not having sufficient illumination will not berth if discharge of ballast continues after dark. Vessels having sufficient illumination will take precedence in berthing order. Vessels should provide suitable floodlights for working on deck during night operations, and should designate a responsible person to keep a continuous watch on hoses and moorings at all times during sea berth occupancy.

Loading Precautions: Masters are responsible to see that no oil (crude, bunker, diesel or bilge) is pumped or spilled overboard from their ships. Cargo hose should be inspected to ensure proper connection; drip pans should be in place, especially when disconnecting hose; scuppers should be plugged tight to contain possible spills; loading valves should be checked and tested to ensure proper operation and tight shut off; unused cargo and bunker connections should be blanked off; stern discharge line, if any, should be closed and blanked off; all sea valves should be closed and lashed shut upon completion of deballasting; the ship should provide sufficient staff (a minimum of one officer and three other crew members are recommended) to ensure proper supervision of loading and topping off operations.

If, during first inspection or during progress of loading, it is revealed that ship's hull is not oil-tight, ship will be rejected and refused further loading. Ship will not later be accepted for loading unless satisfactory evidence, duly certified by Lloyd's or American Bureau of Shipping or other recognised survey agency, of effective repair is submitted.

Contamination of the Sea: In the event any vessel should discharge dirty ballast or spill oil in the vicinity of the Brega Terminal area, Sirte Oil Co. retains the right to take any action that may be necessary to clean up the contaminated area whether the contamination is upon the sea or the shore, or upon any structures or properties located in or upon the sea or upon the shore. In addition, Sirte Oil Co. shall have the right to settle any claims of third parties arising from such contamination. All costs and expenses incurred by Sirte Oil Co. to carry out the cleaning up of such contamination, or the settlement of third party claims, shall be borne by the vessel or by those owning the vessel at the time of the said contamination, and Sirte Oil Co. shall be entitled to reimbursement by said owners for any such cost and expenses.

FRESH WATER: No fresh water is available.

FUEL: No bunkers are available.

REPATRIATION: Crew members cannot pay off or leave the vessel at Marsa el Brega except in cases of emergency. Even in an emergency, it should be noted that Seamen's Books are not valid under the Libyan law. A valid passport is required, and with adequate notice by radio it is possible to obtain an exit visa for a crew member leaving in an emergency.

SAFETY: The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Mooring Master, having in mind the hazards of the operation because of the product being loaded, weather conditions and any other circumstances requiring special care or caution.

While a vessel is moored, all the vessel's personnel and vessel's operations must comply with or be in accordance with the following

Safety Rules:

(a) *Smoking is prohibited on the open decks of vessels. Smoking is permitted on board vessels only in enclosed spaces specifically assigned by the Master as Smoking Areas.*

(b) Before any loading commences all scuppers on the loading deck through which oil might escape overside must be tightly plugged and must be so maintained throughout the period the vessel remains within the limits of the harbour.

(c) The Master is responsible to see that oil from the vessel is neither spilled nor pumped into the water. At all times while loading cargo, all openings to the loading deck from crew, engine, galley and other dangerous areas shall be tightly closed.

(d) Boiler tubes are not to be blown. Every precaution must be taken so that sparks do not at any time escape from the funnel or stack.

(e) Ship's wireless is not to be operated while vessel is in the berth.

(f) Two hoses with spray nozzles to be laid out near manifolds and pressure maintained on fire mains at all times. Two suitable portable fire extinguishers (foam or dry powder) should also be available and bags of sand kept near manifold to contain any small oil spillage.

(g) Please note carefully that the Mooring Master is authorised to suspend operations in case any of the foregoing Safety Rules are not observed and in all cases where dangerous conditions or practices are deemed to exist.

Shore Alarm Signals:

Category 2 (Serious Incident): Three 2 second blasts of the District siren.

Category 3 (Major Disaster): A series of three Category 2 alarms.

Ships:

Fire: Six (6) or more short blasts, followed by a long blast repeated until shore contact, and continuous ringing of vessel's fire alarm system.

VHF Radio: *All* vessels to stand by Channel 16.

Fire or Explosion on Board Crude Vessel Berthed Offshore:

A. Responsible officer to man bridge, engines to be put on standby and crew to disconnect hoses as soon as possible.

B. Loading to be stopped on other vessels berthed offshore. Hoses to be disconnected and hung off, engines put on standby and crew standing by to vacate berth if necessary.

C. Vessels at anchor in the vicinity of the Brega Buoy to have engines on standby, with crews ready to heave up and put to sea if need arises.

Fire or Explosion on Board Ships in Inner Harbour:

A. Master to call Port Control on VHF Channel 16 with details.

B. Loading arms or hoses to be disconnected as soon as possible.

C. Loading or discharging to cease immediately on other vessels in harbour and offshore berths. Vessels to standby to vacate berths if necessary.

Fire extinguishers and hoses with nozzles capable of projecting a fine spray (fog) should be rigged in the vicinity of the loading/discharging manifold with fire mains pressurised at all times. (See 13.2.2.3 of I.O.T. & T.S.G., 2nd Edition).

Crude Oil Health Hazards (Hydrogen Sulphide Content)

A sour crude can be defined as one containing Hydrogen Sulphide (H_2S) within the range of 0.05 cu.ft. to 8.8 cu.ft. per 100 gallons or capable of generating atmospheric Hydrogen Sulphide concentrations of 5 to 1,000 p.p.m. Hydrogen Sulphide vapours in air are extremely toxic and the Maximum Allowable Concentrations (MAC) for personnel exposure throughout an eight hour day is 10 p.p.m. The gas is highly odorous and a particular hazard is its special effect of causing paralysis of the olfactory nerve, thus destroying the sense of smell.

Escape of Hydrogen Sulphide vapours from crude oil is relatively facile and due to a heavier than air effect (S.G. 1.19) may justify additional precautions under some atmospheric conditions.

The following medical effects on personnel exposed to Hydrogen Sulphide represent an indication of the degree of vigilance necessary to prevent or minimise exposure:

	Atmospheric Concentration Range	*Personnel Reaction*
(i)	50–100 p.p.m.	Slight irritation after exposure for 1 hour.
(ii)	200–300 p.p.m.	Marked irritation after exposure for 1 hour.
(iii)	500–700 p.p.m.	Loss of consciousness after exposure of 30–60 minutes.
(iv)	700–900 p.p.m.	Rapidly produces unconsciousness and death occurs a few minutes later.

The particular hazards introduced by the carriage of crudes containing Hydrogen Sulphide may be restricted by observing the following practices:

(1) Every opportunity should be taken to utilise closed loading facilities to discharge displaced gas remote from deck areas.

(2) During loading operations, where large volumes of gas are discharged to atmosphere, regular observations should be made of gas concentrations about the decks.

(3) Any persons engaged in sampling, gauging, sighting open cargo tanks or disconnecting cargo hoses, should work windward of the vapour source and should be kept under surveillance from a safe area.

(4) In the event of a person being rendered unconscious by vapours with high Hydrogen Sulphide content, urgent removal to a safe area and application of artificial respiration is of prime importance, followed by the early attention of a qualified medical practitioner.

(5) In respect of loading crude with a high Hydrogen Sulphide content, it is not necessary to take water dips after loading and ullages as indicated by "Whessoe" or other automatic gauges are acceptable on vessels fitted with this type of equipment. Cargo samples taken from the shore meter battery are acceptable.

(6) In respect of transporting crudes with a high Hydrogen Sulphide content, one day prior to arrival at the discharge port, the pressure/vacuum valves should be jacked open to allow gas concentrations to escape to atmosphere at the masthead; then prior to berthing those valves should be reset in the operating position.

The degree of sourness is normally indicated by the Hydrogen Sulphide content in p(arts) p(er) m(illion) *liquid measure.* The Hydrogen Sulphide contents of various types of sour crudes so defined are as follows:

Crude	*Hydrogen Sulphide (p.p.m. Liquid Measure)*
Agha Jari	20
Jambur/Bai Hassan	40
Kirkuk	40–70
Gach Saran	70
Brega	260
Qatar	200–300

The *Atmospheric* Hydrogen Sulphide concentration varies materially with atmospheric conditions. Particular caution should be exercised when petroleum vapours generally tend to concentrate about the decks. H_2S is readily detected with a MSA Toxic Gas Detector.

The precautions referrred to above should be carefully observed at all times.

MEDICAL: There are limited medical and dental facilities at Marsa el Brega. Personnel requiring urgent medical treatment may obtain it, but this will only be undertaken in serious cases. The cost of transport and treatment will be charged to the vessel. A form entitled "Charges for Ship Account" must be completed in quadruplicate and sent ashore with the person requiring treatment. This form can be obtained from the ship's Agent.

Masters of vessels arriving at Marsa el Brega who require medical treatment should give advance notice of their requirements by radio whenever possible.

REPAIRS: No repairs are allowed to ship's engines while vessels are moored in the berths. Ship's engines should be ready for use on short notice in case the vessel has to vacate the berth suddenly because of bad weather. There are no repair facilities for ships available at Brega.

SHORE LEAVE: Ship's personnel are not permitted ashore, nor on the wharves or jetties for any purpose whatsoever.

WEATHER: *Meteorologic and Oceanographic Information:*

1. Sea conditions: Mid December to mid April, maximum wave height 25 ft. – 30 ft. Late April to early November wave height can reach 12 ft., particularly during afternoons, when winds can attain a velocity of up to 35 knots.
2. Wind direction and velocity: Late December to end of February wind direction mostly North-Westerly with a velocity of up to 75 knots. March to May wind direction varies with land/sea breeze effect with a velocity up to 15 – 35 knots. June to August mainly Northerly sea breezes. September to early November mainly light winds but with occasional gales and sand occurring. Maximum wind velocity 45 knots.
3. *Vessels should not remain at Anchor in bad weather.*
4. All berths in the inner harbour are adversely affected during periods of bad weather, particularly when the prevailing wind is from the North-West.
5. All vessels in the inner harbour are therefore required to be ready to proceed to sea, as directed by the Marine Superintendent or his representative, when adverse weather prevails or is expected. One hour's notice will be given to Masters, should it be deemed necessary to vacate the berth.
6. Masters of cargo/product vessels are cautioned that seaweed in suspension is present in the inner harbour area, and all precautions should be taken to avoid blockage of main engine intakes.

Weather:

Rain and thunderstorms	September – April
Sand storms	March – June
Fine with mostly little cloud	June – August.

Temperatures: May to October: Maximum temperature 120° F. Normal day temperature 95° F.

November to April: Minimum temperature 35° F. and maximum 85° F.

Humidity: Generally low during periods of maximum temperature.

PORT REGULATIONS:

Cargo Vessels: Also see "Max. Size".

The following restrictions, conditions, rules and priorities shall be observed by Masters, Consignees and Agents of Non-Sirte Oil Co. cargo vessels calling at Marsa el Brega and berthing at the Sirte Oil Co. cargo jetty.

1. The permission of the Operations General Manager must be obtained before a non-Sirte Oil Co. cargo vessel can discharge. The Operations General Manager also designates certain priorities which may change from time to time. Agents of cargo ships must keep in touch with Marine Superintendent who will advise them of the priority assigned to their vessel.

2. Maximum vessel draft 26 ft.

3. Maximum length overall 500 ft.

4. No repairs may be carried out to the propulsion machinery during the unloading operation and the ship must remain mobile and be ready to manoeuvre at all times.

5. Vessels must be equipped with their own unloading Gear.

6. Unloading must be from ship to truck and no marshalling arrangements can be made available inside the reserved area. The unloading operations must be completed rapidly.

7. Unloading operations may not be performed except during daylight hours as determined by the Marine Superintendent.

8. Loading trucks will be required to adhere strictly to Sirte Oil Co.'s safety rules, particularly while operating within the limits of the Industrial area.

9. Arrangements for the entrance and movement of the stevedoring personnel must be coordinated with Sirte Oil Co.'s Industrial Security Division. No housing or victualling will be provided for stevedoring personnel. All expenses, costs, remunerations and compensations associated with this activity will be borne directly by the company concerned.

10. The stevedores will be held responsible for cleaning up after completion of unloading.

11. No victual, water supply or bunkering service is available for vessels calling at Brega.

12. Advance notification must be given to Sirte Oil Co. Marine Division at least 10 days prior to arrival of vessel at Marsa el Brega. ETA of vessel to be notified 72 hours prior to arrival and confirmation and reconfirmation 48 hours and 24 hours respectively prior to arrival.

13. A system of priorities for cargo vessels entering Brega is in operation as follows: 1st – Sirte Oil Co. cargo, 2nd – N.O.C., 3rd – other vessels. This system will apply even though this requires interruption of operations of vessels already berthed.

14. Weather and sea conditions, particularly during the period December to April of each year, impose severe restrictions on the cargo pier usage. Among these restrictions are the discontinuation of unloading and the unberthing of the ships as a safeguard against ship and berth damage.

One hour's notice will be given to Masters should it be deemed necessary to vacate the berth due to bad weather.

15. Sirte Oil Co. shall not be held reponsible for any waiting period or delay (demurrage) related to the entry of cargo ships, nor be liable for any costs or compensation in that connection, regardless of the circumstances.

16. Sirte Oil Co. shall not be held liable for any loss, damage or injury that may occur to any property or persons whatever the cause thereof as long as they are related to or resulting from the use of the port. Such loss, damage or injury shall be the liability of the Master, Consignee or Agent irrespective of whether they are real or alleged. The above named shall also undertake to indemnify Sirte Oil Co. for any such losses and damages and to hold Sirte Oil Co. harmless from any liability that may arise as a result thereof.

17. All vessel movements will be subject to the control and direction of Sirte Oil Co. Marine Division Superintendent.

Tankers: Permission for overside painting is to be obtained through the Agent before painting can be started.

No repairs are allowed to ship's engines while vessel is moored in the berths. Ship's engines should be ready for use on short notice, in case the vessel has to vacate the berth suddenly because of bad weather.

Vessels should have sufficient ballast aboard for safe manoeuvring, but should not arrive excessively ballasted. The propeller should be submerged, and vessel trimmed not more than 2.43 m. by the stern.

Vessels not properly ballasted will not be berthed in turn, and will not have their Notice of Readiness accepted.

There are no facilities for the discharge of dirty ballast. *All Ships must arrive with clean Ballast.*

All tank lids must be closed and vented to the atmosphere via the agreed system.

GENERAL: *Provisions:* There are no fresh or dry provisions available at Marsa el Brega.

Mail: The Ship's Agency will handle all official and crew ship's mail.

Harbour Work: Dredging is in continual progress in the vicinity of the inner harbour. Vessels are cautioned not to enter the restricted area (B.A. Chart 3350) without the services of a Brega Pilot/Mooring Master.

All mooring lines to be fitted with adequate ratguards.

All berths in the inner harbour are adversely affected during periods of bad weather, particularly when the prevailing wind is from the North-West.

All vessels allocated berths in the inner harbour are therefore required to be ready to proceed to sea as directed by the Marine Superintendent or his representative when adverse weather prevails or is expected.

Smoking is strictly prohibited on board all tankers except in locations approved by the Masters of the vessels. No smoking on deck even if gas free.

Full power must be available for all manoeuvring to and from all berths. During deballasting and loading, vessels must maintain engines and propulsive machinery in readiness at all times to leave the berth on short notice.

No repairs are permitted which will delay or interfere with this contingency. Contravention of this ruling constitutes a serious safety hazard and will entail towage from the berth and possible delay to the vessel for which Sirte Oil Co. will accept no responsibility.

It is the responsibility of the vessel, before arriving, to see that ballast water is free of oil and to *discharge ballast water through ballast discharge lines* prior to arrival to ensure their cleanliness.

All tankers for sea berths must have port derrick ready for use.

Masters are warned that no contaminated ballast or bilge water may be discharged within Libyan territorial waters. It is the responsibility of the vessel before arriving to ensure that ballast water is free of oil, and that all pipe-lines, sea suctions, strainers and pumps have been flushed clean of oil.

SHIPMASTER'S REPORT: August 1984.

Charts: British Admiralty 3354, 3350. French 5792.

Approach: Refinery buildings are radar identifiable at over 20 miles and the fairway buoy (Lat. 30° 27.55′ N., Long. 19° 35.1′ E.) at over 6 miles, also at about this distance it is possible to make out the shape of the harbour breakwaters on radar. The line of soundings is very sharp on the echosounder, and the 50 m. line 7 miles out when coming from the North was raised very easily.

Pilotage: Pilot boarded at the fairway buoy from a large tug (Dutch company contracted to the port). Vessels are not allowed to proceed into the restricted area 0.5 miles South of the fairway buoy without a Pilot. The area inside the restricted zone having several tanker SPM's and other obstructions.

The Pilot was immediately concerned about the vessel's air draft for berthing at the Urea Berth. After berthing I made a rough calculation and would say a vessel with a main deck air draft of over 38 ft./40 ft. would have great difficulty accommodating them. Our main deck air draft at the time was 31 ft. When asked the Pilot stated that the maximum departure draft was 29 ft.

To approach the berth vessels enter with 2 tugs (2,000 h.p.) fast on the starboard shoulder and quarter, berthing being port side alongside. When the breakwater has been rounded vessel is headed East until clear of the Fl. 5 sec. elbow buoy when the swing to starboard with engines and tugs is started (starboard anchor ready in case of emergency). Once vessel is swung until heading about S.W., tugs then push her alongside as near into the corner with the general cargo berth as she she will go, in our case about 8 m. (this is also to facilitate the after elevator being used to work No. 1 Hatch, on this vessel LOA 169.1 m.).

Survey/Loading: Shippers are National Petroleum Co. and all cargo survey work is done by Societe Generale de Surveillances S.A. The surveyor was very helpful. Stowage factor for treated urea is approximately 48/49.5 cu. ft. per ton. The loading rate stated was 400 tonnes p.h. although in actual fact we never achieved an average of more than 300 tonnes p.h. Treated urea is very hydroscopic, with the climatic conditions in Libya, it is impossible to load if the relative humidity is over 75%. This usually involved stopping in the evenings around 1800/1830 hrs. and restarting in the morning 0800/0830 hrs., although on one occasion we did manage to work all night.

The elevator is self-trimming and does a reasonable job, however, with the high stowage factor some hatches were filled but because of the restricted height of the elevator, it proved impossible to get the loading chute high enough to fill the coamings as we would have liked, and thus our intake per hatch was reduced.

Clearance/Customs formalities: Libyan Government have issued a statement that from 7th June, 1984, all incoming ships must have all ship's papers and documents translated into Arabic. This we managed to have done but only because of the length of stay in the previous port. In actual fact the Agent took no notice of these translations, they wanted their own forms filled in by the Master. The Customs Officials were very courteous. No alcohol is allowed, also all cameras had to be locked in the bond as El Brega is a restricted port because of the oil installations, and hence no shore leave. The main transmitter was also sealed.

SHIPMASTER'S REPORT: November 1987.

Vessel: 95,000 d.w.t. tanker.

We were advised by Charterers to inform Germa Shipping, Tripoli of our ETA and other relevant information. They in turn advised us that we should contact Shahat Shipping, Brega, but they were in fact already receiving all ETAs.

We were unable to contact the terminal until some 2 hours off as they were in the process of moving their VHF aerial. When re-sited, communications are likely to be much improved.

No information is passed by the terminal to the pilots until just prior to arrival of the vessel. It is therefore a good idea to send a 24 hour ETA to Sirte Oil Company (Telex No. 30120, 30121, 30122) who will pass messages to the pilots.

Samples were taken of all ballast tanks (even segregated ballast) for analysis ashore. If excess oil is found, vessel will be ordered off the berth for extra cleaning.

Maritime Declaration of Health not required. Pilot grants Pratique on boarding. Pilot also carries out safety and anti-pollution check lists.

Tug does not usually tow astern as an on/off shore breeze keeps the vessel clear of the buoy, however engines are to be kept on 10 minutes notice in order to give stern power.

After berthing, the Pilot gives papers to the Master, 2 of which have to be completed and signed. The remaining papers have to be signed and are taken away by the Agent. The ship's stamp is to be placed on all papers.

Libyan Discharge Certificate: It is essential that the discharge figures inserted at the discharge port are exactly the same as the Bill of Lading figures.

The Crew Declaration has to be transferred to a local form and signed by each crew member. If some of the crew members are too busy to sign this form and in order to avoid delays to the Customs, it is in order for the Master to sign on their behalf.

On departure, call Port Control and give time of departure, course, speed and destination.

A new SBM is being laid in a position 242° True × 1.04 nautical miles from the existing SBM.

AUTHORITY: Brega Marine, Sirte Oil Co., P.O.Box 385, Tripoli, Libya, S.P.L.A.J. *Tel:* 021-602052-56. *Telex:* 30120, 30121, 30122 Sirtco Ly, or 50657 Sirtco Ly. *Contact:* Marine Superintendent – Brega.

AGENCY: Universal Shipping Agency. Telex: 50635.
Shahat Agency. Telex: 50635 Shahat Ly.
Also see "General" before first port.

MISURATA (Qasr Ahmed): 32.22 N. 15.13 E.

(See Plan)

Also see "General" before first port.

GENERAL: The harbour is enclosed by 2 rubble mound breakwaters armoured by tetrapods. The North Breakwater extends 1,400 m. due East from Ras Zarrugh Lighthouse and East Breakwater extends 1,800 m. due North from the shore near the prominent radio station about 2 km. South of the Ras Zarrugh Lighthouse. There are lights on the breakwater roundhead. On the North Breakwater a green flashing light (0.3 secs.) every 3 secs. and on the Eastern Breakwater a red flashing light (0.3 secs.) every 3 secs. The Ras Zarrugh Lighthouse at the foot of the North Breakwater is a square tower with black and white vertical stripes. The structure is 8 m. high and is on the top of a 16 m. hill. The light is flashing white (0.5 secs.) every 5 secs. with a range of 8 miles.

On the South side of harbour there is Steel Mill Harbour which is under construction.

There is a radio mast 7.6 miles W.N.W. of Ras Zarrugh with fixed red flashing lights.

For Harbour Entrance there are guides, 2 fixed red lights and 1 green flashing light, bearing 273° N.W. from breakwater roundheads. The Harbour Entrance Channel is 150 m. wide and 12 m. deep.

Inside the entrance there is a turning circle, diameter 470 m., depth 12 m. and the harbour dredged area 920 m. × 200 m. to a depth of 11 m. leads due South alongside the berth. A 500 m. × 300 m. dredged area to a depth of 8 m. leads to the West alongside the North Breakwater.

Directions: Keep 2–3 miles offshore before turning due West for entrance.

Currents: Predominantly N.W. at mean rate of 0.5 to 0.75 knots but in Winter winds can reverse the flow and induce S.E. set in excess of 1 knot.

DOCUMENTS:

Maritime Declaration of Health (to be completed on arrival).
Crew List.
Passenger List (if any).
Ship's Stock.
Stores List.
Animals Aboard List.
Ship's Log.
Last Port Clearance.
Safety Certificate Certificate.
Construction Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Radio Certificate.
International Oil Pollution Prevention Certificate.

Where possible Cargo Manifests and Stowage Plans should be forwarded by airmail to the local Agent, ahead of the vessel's arrival.

PILOTAGE: Compulsory, Pilot will board about 1 mile outside the port entrance.

ANCHORAGES: Bearing approximately 273° to lighthouse on Ras Zarrugh 13 m. depth 1 mile (2 km.) offshore but holding ground is poor and it is advisable to leave anchorage at signs of onset of bad weather.

RADIO: "Misurata Port Control" should be worked as early as possible.

VHF: A high powered base station operates at the top of a 16 m. hill at the foot of the lighthouse at Ras Zarrugh. A continuous watch is maintained round the clock on Channel 16. All other Authorities such as Harbour Master, Customs, etc., should be contacted through "Radio Misurata Port Control" on Channel 16. Channel 10 can be used inside the harbour.

TUGS: Join the vessel outside the Harbour Entrance. The tugs are m.t. "Sorman", m.t. Kiklah", each 565 b.h.p. and m.t. "Al-Keriat", 2,520 b.h.p.

BERTHING: There are 6 berths, totalling 1,120 m. of concrete quay dredged to 11 m. with timber and rubber fenders and bollards at 15 m. intervals, the quay deck is at an elevation of 2.25 m. The berths include a Ro/Ro facility at Berth No. 1.

CRANES: The following types of shore cranes are available and in the near future, a floating crane of 100 tons will be available. Capacity of cranes are 57, 45, 35 and 25 tons.

STEVEDORES: *Working Hours:* 0630 to 2400 hrs., even on holidays.

MEDICAL: Full hospital facilities are available without prior notice.

TANKERS: Tankers berth at Berth No. 28. Depth alongside 11.0 m.

FRESH WATER: Available alongside and by barge.

FUEL: Available.

CONSULS: Nearest consuls are at Tripoli.

REPAIRS: See "Tripoli".

REPATRIATION: Possible.

AIRPORT: Tripoli Airport situated about 220 km. from Misurata.

TIME: Local time GMT plus 1 hour from 1st day of October until 31st March, and GMT plus 2 hours from 1st day of April to 30th September.

HOLIDAYS: Fridays; 1st day of Lunar calander year; Idd-ul-Ahada, 4 days; Idd-ul-Zoha, 4 days; 2nd March; 8th March; 28th March; 11th June; 23rd July; 1st September; 7th October. Even on holidays cargo work continuously maintained.

POLICE/AMBULANCE/FIRE: Call Port Manager Tel: 21101 & 21094.

SERVICES: All kinds of food and soft drinks are available except alcoholic drinks and pork.

SHORE LEAVE: Allowed after Free Pratique, Customs and Immigration formalities completed.

DEVELOPMENTS: Grain silos are under construction.

Stage II (Berths No. 7 – 18) has already been started for 1 passenger berth, 4 general cargo berths, 4 container berths, 2 Ro/Ro berths and sheds, etc.

SHIPMASTER'S REPORT: December 1977.
Chart: British Admirality Chart No. 3353 "Ras Ashdir to Sirte".

A mole has been constructed from Ras Zorog in an East direction the length of which is approximately 1,100 m.

A second mole extends from the shore in a Northerly direction approximately 1,800 m. in length. Entrance to the harbour is between the outer ends of both moles.

Wharves and sheds are being built along three quarters of the length of the Northerly direction mole, and around the South part of the inner harbour perimeter. At the time of the visit by this vessel about 350 m. of quay was completed, with depth alongside of 11 m.

All the construction work appears to be done by Yugoslavian labour. The "Overseer" acted as Pilot and was a very able and pleasant person. All questions regarding cargo and fresh water, provisions, etc., were dealt with by him. He supplied 10 tons of fresh water by road tanker and organised a visit from a ships' chandler for a small quantity of fresh salad and potatoes.

There are 2 small tugs which were used in berthing under the Pilot's direction. These were very necessary owing to a number of obstacles in the harbour (divers boats, pipes, etc.). The Pilot's knowledge of English was limited and it is most necessary for the ship's Master to judge his intentions carefully.

Without a doubt the Port of Misurata when open for commerce will be a very useful port, although a small port (inside harbour space was roughly estimated to be about 1,500 m. × 700 m.). The Pilot advised that it was expected to be opened about the middle of 1978.

The vessel anchored off the port entrance at 0800 hrs. and Pilot boarded at 1100 hrs., vessel berthed shortly afterwards. Discharge of 208 tons of construction material from No.1 hold commenced at 1330 hrs., and ceased at 2400 hrs. for the day. Work resumed at 0930 hrs. on the following day, and was completed at 1330 hrs. A mobile shore crane was used throughout for discharge into lorries.

All Agency work was attended to by our Tripoli Agent, who arrived onboard at 1700 on day of arrival. As Tripoli was our next port, he was most helpful in advising our berthing prospects at that port, and delivering ship's mail.

The entering and clearing formalities were attended to by 2 Customs Officers. They advised that there was strictly no shore leave for the crew. All accommodation was diligently searched including the Master's for alcohol, and none whatever was allowed to be in crew's possession. However when all was found to be in order, on request a small amount of bond stores was released for Christmas.

The vessel departed at 1600 hrs. for Tripoli where the Agent's estimate of 2 – 3 days waiting (although there were 50 ships at anchor) proved to be correct.

SHIPMASTER'S REPORT: March 1978.

Work is still in progress on the Southern Mole. More warehouses are to be erected there, also a grain silo. On the Western shore of the harbour more berths are to be constructed possibly for containers, but nothing finalised yet.

Misurata is to be principally a Ro/Ro port specialising in transit cargoes. A nearby motorway runs in a Southerly direction for 1,000 miles into Central Africa.

There will be facilities for conventional cargoes. Dredging is in progress in the Western part of the harbour in preparation for the new berths. The area is being marked by red marker buoys. The port is scheduled to open in June/July this year and to date there are no services excepting Customs who attend to all the Entering and Clearing formalities. All pilotage being performed by the Master, the contractors work boats will act as tugs if requested.

Documentation is similar to requirements for other Libyan ports also the same strictness regarding alcohol. All Officers and Ratings were allowed to retain a small quantity of beer, all other alcoholic drinks being placed under Seal.

SHIPMASTER'S REPORT: February 1988.
Chart: B.A. Chart No. 3353.
Documents:

8 copies Crew List.
2 copies Crew Declaration (on Libyan forms).
2 copies Manifest.
1 copy Health Declaration.
2 copies Currency Declaration (on Libyan forms).
All Passports.
1 copy Arms and Ammunition List.
1 copy Drugs List.
2 copies Cargo Manifest.

Cameras placed under seal. No cigarette issue allowed. Bond remains sealed if proceeding to another Libyan port. Definitely no alcohol. Customs would not allow beer issue. Ship's Certificates to be in Arabic. Passports exchanged for Landing Cards at the gate. All stores checked for signs of South African and Israeli produce.

Approaches: The name Qasr Ahmed is not used. All local people use the name Misurata and all Libyan Customs and cargo documents refer to Misurata.

The harbour area and power stations (32° 20′ N., 15° 13.5′ E.) were identified on the radar at 24 miles.

There are two harbours, the older general cargo and tanker port of Misurata and the recently constructed Steel Harbour which is about one mile to the South.

On approach, the power station chimneys and the gantry crane on the new Steel Harbour breakwater and the grain silo at Misurata are visible. At night, the flashing red lights on the power station chimneys and the horizontal red flashing lights between the chimneys are very conspicuous.

There are 2 sets of antenna dishes (32° 21.25′ N., 15° 13.3′ E.) just South of Misurata Harbour which are conspicuous.

Anchorage: Vessels may anchor anywhere off the breakwaters but not within 2 miles of the port. Anchorage exposed to heavy swells.

Channel: The leading line to Misurata Harbour is 270° and is indicated by leading marks/lights (red and white horizontal, inverted triangles and a front light exhibiting flash green every 5 seconds and the rear green light flashing green every 12 seconds). The front daymark is barely visible.

The Fairway Buoy has been removed.

The Pilot advises that the depth at the tanker berth is 38 ft. and eventually all the harbour will be the same depth. The maximum draft permitted at the tanker berth is 36 ft. and this was confirmed by the echo sounder.

2 sets of buoys and a Fairway Buoy in position 32° 30.9′ N., 15° 19.0′ E. mark the channel to the Steel Harbour. The leading light is 253°. There are no leading marks or lights visible. The Channel depth is believed to be 50 ft. and this was confirmed in part by echo soundings. The channel width is approximately 200 m.

Pilotage: The Pilot boards outside Misurata Harbour entrance from a small grey tug. Pilot normally boards between 0800 hrs. and 2000 hrs. Normally there are no movements on Friday.

Tugs: There are 2 tugs available, the larger tug being approximately 2,000 h.p.

VHF: On arrival, vessels should call Misurata Port Control on Channel 16, working Channel 12. On approach all the usual details are required (see "Tripoli – Shipmaster's Report" dated March 1988). Misurata Port Control on Telex No. 90130221 PORTMSLY

Harbour: The harbour is being extended beyond the existing breakwaters. New berths are under construction to the West of the existing Eastern breakwater berths.

The new oil terminal in position 13° 22.3′ N., 15° 13.2′ E. is capable of taking product tankers up to about 30,000 d.w.t.

All charted buoys inside the harbour have been removed.

The new Steel Harbour appears to be completed and has conveyors which are adjacent to the steel mills and one gantry type grab crane.

Within the Steel Harbour there is a service harbour with control tower.

Tanker Berth: The tanker berth is on the N.W. corner of Misurata Harbour. Vessels berth port side alongside.

The newly constructed concrete berth is a pier with outlying mooring dolphins each end, which are connected to the pier by steel walkways. The mooring points and fendering are very good.

This berth handles product imports for the local area including the steel mills and the power station. The products are LPG for cooking and heating fuel, jet fuel/Avgas, gas oil and fuel oil.

At the present time, there are no bunker or fresh water facilities, however, we understand that IFO and gas oil and fresh water pipelines are to be laid to the pier.

The gangway was easily landed.

Moorings: The moorings consisted of 2 head/stern lines, 1 breast line and 2 springs at each end. The starboard anchor with one shackle in the water was used for approaching the berth and a mooring boat assists with running lines.

Cargo: LPG is handled by a 6 in. Chicksan arm with clamps, the shore required a 6 in. spool. The pipeline is 8 in. diameter and runs a distance of 5.3 km. to 5 spheres with a total capacity of 8,000 cu.m.

The terminal requires cargo at 0°C. Max. pressure 8 kg./sq.m. Maximum pumping rate 145 cu.m./h. The shoreline relief valves are set at 16 kg./sq.m. and the maximum pressure in the shore tanks is 7 kg./sq.m. The average discharge is 68 t.p.h.

There was no surveyor in attendance and no shore calculations made. The Receivers, "Breganaft" checked the ullages.

The pipeline was hot gassed for 45 minutes.

Gas oil and Avgas are handled through 2×10 in. Chicksans and fuel oil is handled through 1×12 in. Chicksan.

Fresh Water: Fresh water is available by barge and should be ordered well in advance. While we were in port the barge was moored astern of us at the Port Authority Jetty. The capacity of the barge is 200 tonnes. It will also take water to vessels at anchor in calm weather.

Customs: Customs authorities make a very thorough search of the vessel.

Shore Leave: Not permitted.

General: Friday is a holiday so there is very little movement on that day.

AUTHORITY: Port of Misurata, P.O.Box 18218, Misurata, Libya. *Tel:* (051) 24457, 29428. *Telex:* 30221 Port Ms Ly. *FAX:* (051) 22492. *Contact:* The General Manager.

RAS LANUF: 30.31 N. 18.35 E. (See Plan)

(A) VEBA OIL OPERATIONS (V.O.O.)
(B) RAS LANUF OIL & GAS PROCESSING CO. INC. (RASCO)

(A) VEBA OIL OPERATIONS (V.O.O.)

Also see "General" before first port.

DOCUMENTS: Customs will require:

4 Crew Lists.
1 Crew Declaration of personal belongings (including cigarettes, etc.)
2 Stores Lists.
1 Passenger List.

Crew Lists and Crew Declaration of personal belongings must be on the approved Libyan Government Documents. Vessels are advised on their initial visit to the port to obtain sufficient forms for future visits. Also required are:

6 Copies of Cargo Manifest for Ras Lanuf Discharge.
1 Copy of Cargo Manifest for transit cargo with a summary.
1 Copy of Passenger Manifest.

A copy of a Certificate of Discharge of the last cargo loaded at a Libyan port is required. Said Certificate to be duly signed and stamped by Customs Authorities at the discharge port. Blank forms will be delivered with the cargo documents.

Clearance from the last port of call will be required by the Government authorities. The police will require 4 copies of a Crew List and a Passenger Manifest if any passengers on board.

PILOTAGE: It is most important that ships establish communications with the terminal not less than 72 hours prior to arrival, giving estimated time of arrival. Further ETA signals should be sent when the vessel is 24 hours, 12 hours and 4 hours distant or any time a change of 1 hour in original ETA occurs. These messages should state specifically whether ETA is given in GMT or local time. The 72 hour signal should include the following: ETA, last port of call, if any sickness on board and if vessel has clean bill of health. Cargo quantity and grades expected to be lifted in net long tons at 60°F. The 12 hour signal should include definite indication as to whether the vessel is ready to load or not and should also include information on the time she will require to discharge ballast after arrival. Precise time of arrival should be given when the ship is 4 hours distant from the terminal.

Vessels to be moored at Ras Lanuf will be boarded by Mooring Master in the close vicinity of the suggested anchorage area mentioned below. The Mooring Master will advise the Ship's Master on approaches to berths, mooring, unmooring, connecting and disconnecting the hoses and in all operations within the mooring area.

NAVIGATION AIDS:

Seabuoy, red with white quick flash is located in approximately Lat. 30° 32.8′ N., Long. 18° 34.9′ E. Vessels in the vicinity should not navigate or anchor inshore of a bearing 120° – 270° running through this Light Vessel position.

A Fairway Channel Entrance Buoy flashing white every 2 secs. is located in a position approximately 30° 30′ 46″ N., 18° 37′ 44″ E.

A Channel Buoy flashing red every 5 secs. is located in a position approximately Lat. 30° 30′ 17″ N., Long. 18° 36′ 16″ E.

North Breakwater Light with occulting light green 2 every 10 secs. is located in a position approximately 30° 30′ 38″ N., 18° 35′ 43″ E.

East Breakwater Light with occulting light 2 red every 10 secs. is located in a position approximately 30° 30′ 29″ N., 18° 35′ 24″ E.

A Rear Range Light with a fixed white light is located in a position approximately Lat. 30° 30′ 56″ N., Long. 18° 34′ 09″ E.

A Front Range Light with a fixed white light is located in a position approximately Lat. 30° 30′ 54″ N., Long. 18° 34′ 17″ E.

An Unlit Spar Target Buoy, colour white is located in a position approximately Lat. 30° 31′ 20″ N., Long. 18° 35′ 21″ E.

An Unlit Spar Target Buoy, colour white is located in a position approximately Lat. 30° 31′ 12″ N., Long. 18° 35′ 35″ E.

The Mooring Area has been swept to a depth of 73 ft. in Berth Nos. 1, 2 and 3, at the SPM to a depth of 96 ft.

There are very few coastal landmarks in this area. The following should prove helpful to visiting mariners:

The Terminal Water Tower with highest elevation of 179 ft. 6 in. above sea level is located in Lat. 30° 30′ 42″ N., Long. 18° 32′ 22″ E. It is coloured white. A white light (characteristics: flash 0.2 secs., eclipse 1.05 secs., flash 0.2 secs., eclipse 3.55 secs.) is mounted on the seaward side of the structure at 163 ft. above sea level. There is also a fixed red warning light on top of the tower.

Large oil storage tanks with highest elevation 376 ft. above sea level are located in approximately Lat. 30° 27′ 24″ N., Long. 18° 29′ 58″ E. They are coloured white.

ANCHORAGE: Suggested anchorage area is within a 3,000 ft. radius of position Lat. 30° 33.5′ N., Long. 18° 36′ E. in approximately 90 ft.

MAX. SIZE: Conventional berths: Up to 56 ft. draft; up to 130,000 d.w.t.
Single Point Mooring: Up to 75 ft. draft, up to 265,000 d.w.t.

HEALTH: By day – fly flag "Q" and by night display red light over white light for Quarantine Service.

Libyan Customs, Federal Police and Immigration Officials will board the vessel as soon as possible after arrival to give inward clearance and "Pratique" services. Libyan Government Regulations are strictly enforced. The vessel should have a clean Bill of Health or equivalent document from the last port of call.

RADIO: Direct communication by radio between ship and shore is by VHF International Maritime Mobile Radio-telephone Service to Ras Lanuf Oil Movements Control Centre. All communication between ship and terminal should be by way of this station. ETA messages to Veba Oil Operations, Tripoli, Libya, via Tripoli Radio (call sign 5AT). Ras Lanuf Oil Movements Control Centre keeps continuous watch on VHF Radio-telephone Channel 16 (156.80 mHz), Channel 14 (156.70 mHz) and Channel 11 (156.55 mHz). Vessels approaching the port should make contact on Channel 16 when shore will request her to switch to Channel 14. This Channel will also be used by terminal Marine Section for internal use and tanker mooring control. Channel 11 is reserved for communications between ships in mooring and Terminal Oil Movements Control Centre and should only be used for general purposes after obtaining clearance from Oil Movements Control on Channel 16. This is a safety measure since oil flow to ships is controlled through Channel 11 and therefore it must be clear at all times in case of need to stop oil flow for any cause. Channel 16 is for calling and safety use only.

TUGS: 2×730 h.p. The company maintains launches (3×360 h.p.) to assist in mooring and unmooring vessels. These are under the direct supervision and control of the Mooring Master.

BERTHING: There are 4 submarine loading pipe-lines which terminate in the following approximate positions which are each marked by an unlit white spar buoy.

Berth No. 1: Lat. 30° 31′ 35″ N., Long. 18° 34′ 37″ E., from which a submarine pipe-line runs to shore on a bearing of approximately 224°. Depth of water at spar buoy 70 ft.

Berth No. 2: Lat. 30° 31′ 55″ N., Long. 18° 33′ 58″ E., from which a submarine pipe-line runs to shore on a bearing approximately 197°. Depth of water at spar buoy 70 ft.

Berth No. 3: Lat. 30° 32′ 18″ N., Long. 18° 33′ 19″ E., from which a submarine pipe-line runs to shore on a bearing of approximately 198°. Depth of water at spar buoy 73 ft.

Berth No. 4: Lat. 30° 31′ 50″ N., Long. 18° 36′ 06″ E. – a Single Point Mooring buoy in 96 ft. of water.

Raising, lowering, connecting and disconnecting of submarine hoses, as well as all other labours and duties on shipboard, will be performed by the ship's crew under direction of the Mooring Master.

LIFTING HOSES: After the vessel is securely moored the submarine hose will be hoisted on the port side. Berths No. 1, 2 and 3 are each equipped with 2×12 in. loading hoses, the weight being approximately 5 long tons. Berth No. 4 (SPM) is equipped with 2×16 in. loading hoses the weight being approximately 5.75 long tons. Therefore, all lifting equipment and tackle should have a safe working load of at least 6 long tons. Hoses are lifted by ship's gear and crew, and all connecting of hoses will be done by them. The lifting derrick, equipment, tackle, etc., should be topped off and ready on arrival.

MEDICAL: No medical services (except in case of emergency and subject to a doctor being available) or other services are to be expected at Ras Lanuf.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: The only consulates are located in Tripoli which is 670 km. by road from Ras Lanuf.

REPAIRS: When a ship is in the moorings or vicinity, its engines must remain on standby with full power for immediate use. Deck machinery shall be kept in instant readiness. *Positively no repairs of any sort will be permitted in the moorings.*

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beers, perfume, arms, ammunition, saccharine and possibly other items have to be locked up under Customs seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed 25 cigarettes per day of stay or 25 grams of tobacco or cigars in lieu. Each man allowed 1 litre of beer or half litre of wine per day. Special allowances are made for Master under special circumstances.

REPATRIATION: Crew members cannot pay off or leave the vessel at Ras Lanuf except in cases of extreme emergency. Even in an emergency it should be noted that Seamen's Books are not valid under the Libyan law. A valid passport is required.

BALLAST: Positively no provision is made for dirty ballast. Any ship arriving with dirty ballast will be rejected and all costs accruing therefrom will be to the ship's account. Notice of Readiness shall not be accepted until vessel returns with clean ballast and tanks fit to receive cargo. She will on second arrival tender a new Notice of Readiness to load.

TIME: Libyan local time is GMT plus 2 hours (1st April to 30th September) and GMT plus 1 hour (1st October to 31st March).

SHORE LEAVE: Not allowed.

GENERAL: No stores, foodstuffs or goods whatsoever of Israeli origin may be on board any ship calling at Ras Lanuf.

Penalties: Fine, confiscation of goods and possibly more. The Libyan Government strictly enforces this law.

Whilst arriving fly the Libyan Ensign (plain green).

Due to the existence in these waters of the fish commonly called "Weaver" fish, ship's crew are urged to exercise extreme caution in fishing whilst lying off the port area. There have been several cases of poisoning by these fish, all of which were distressingly painful, caused by contact with the fins.

AUTHORITY: Veba Oil Operations (V.O.O.) – Ras Lanuf (V40), P.O.Box 404, Tripoli, S.P.L.A.J. *Tel:* Tripoli 30081 (ext. 4116). *Telex:* 20260. *Cables:* Pegasus Tripolilibya. *Contact:* Captain B. Michels – Ras Lanuf Marine Office.

AGENCY: See "General" before first port.

(B) RAS LANUF OIL AND GAS PROCESSING CO. INC. (RASCO)

PORT LIMITS: Southward of area bound by Latitude 30° 32.7′ N. and between Longitudes 18° 34′ E. and 18° 39′ E.

DOCUMENTS: 4 copies of Crew List on approved Libyan government document. (Vessels are advised to obtain sufficient forms for future visits during their stay).

1 Copy of Personal Effects including cigarettes, etc.

2 Lists of Stores.

1 List of Passengers.

6 Copies of Cargo Manifest for cargo to be discharged at Ras Lanuf Harbour.

1 Copy of Cargo Manifest for cargo in transit.

Copy of Certificate of Discharge (of the last cargo) at Libyan port duly signed and stamped by the Customs Authority at the discharge port. Blank forms will be delivered with the cargo documents. If not done on board the Ship's Purser should make request for them to be provided.

Clearance from the last port of call is required by the Government Authority.

4 Copies of Crew List and the Passenger Manifest are required by the Police.

PILOTAGE: Ras Lanuf Harbour (RASCO) should be advised by tele (Telex: Ras Lanuf 50618, 50650 – Rasco Ly). Cable: Rasco, Ras Lan (Telephone via Tripoli 49994-99: via Benghazi 86744-48) at lea 72 hours in advance, the ETA at RASCO Anchorage. It should b constantly updated/confirmed when 24 hours, 12 hours, and 4 hou distant. If more than 1 hour change in ETA occurs, the new ETA mu be given. Clear specification should be made if ETA is in GMT or loc Libyan time. The information in the ETA cables should be completed a per the terms of the charter party. The 72 hours message must inclu the ETA, last port of call, if any sickness on board, and if vessel ha clean Bill of Health and cargo quantity expected to be lifted in net metr tons at 60°F (15.6°C). The 12 hour message should include defin indication as to the vessel being ready to load or not and should als include information on the time she will require to discharge ballast afte arrival. Precise time of arrival should be given when ship is 4 hou distant from the terminal. On arrival at the anchorage, the vessel mu contact RASCO Port Control on VHF Channel 16 to register herself.

Also see "Anchorage".

ANCHORAGE: Vessels to be secured alongside will be boarded by th Pilot in the anchorage or in its vicinity. The vessel should not manoeuv or navigate in the vicinity of any sea buoys but should make directly t the anchorage which is a circle of diameter 1 nautical mile with cent in position Lat. 30° 32′ N., Long. 18° 38.09′ E., in more than 30 m. o water. For shallower draft vessels it is permissible to anchor du Southward as close as possible to this position, in an adequate and saf depth, Northward of the Fairway Buoy (position: Lat. 30° 30.6′ N. Long. 18° 37.7′ E.),leaving seaway free for approaching an manoeuvring. If need be vessels may anchor in safe waters Eastwar of this anchoring area. Anchoring Westward of this area is prohibited.

MAX. SIZE:

a) Tankers 3,000 – 50,000 d.w.t. will be catered for on finger jetties 1A and 1B which have a dredged depth of 14.0 m. Tankers 3,000 – 30,000 d.w.t. will be catered for on Berths 2A and 2B whic have a dredged depth of 12.5 m. and Berths 3A, and 3B whic have a dredged depth of 11.5 m. The quay wharf has a dredged depth of 11.5 m., on which 3 dry cargo ships of 5,000 – 20,00 d.w.t. can be berthed at one time. The quay wharf is 672 m. i length with a 35 ton multi-purpose crane to be installed and abl to run the entire length of quay wall. Caustic soda dischargin facilities are also available on the wharf, but the LOA of the vess is limited as the distance between the ship's manifold and th extreme part of the vessels' stern should not be more than 48 m

b) *Max. Size:*

Jetty 1-A, 1-B:	
Max. LOA	250 m.
D.w.t.	50,000 tons
Max. Draft	12.5 m.
Jetty 2-A, 2-B:	
Max. LOA	189 m.
D.w.t.	30,000 tons
Max. Draft	10.5 m.
Jetty 3-A, 3-B:	
Max. LOA	189 m.
D.w.t.	30,000 tons
Max. Draft	9.5 m.
Quay Wharf:	
Max. LOA	177 m.
D.w.t.	20,000 tons
Max. Draft	9.5 m.

c) Hooks have been provided on dolphins which are of 100 tons capacity. All bollards on the quay wharf fitted on the finger jetties are of 100 tons capacity. Other bollards are of 50 tons capacity.

HEALTH: For quarantine services:

a) By day: Flag "Q" (yellow flag).

b) By night: Red light over white light.

c) Libyan Customs and Immigration Officials will board the vessel as soon as possible after arrival to give inward clearance and Pratique services. Libyan government restrictions are strictly enforced. The vessel should have a clean Bill of Health or equivalent documen from the last port of call.

RADIO/VHF: Direct communication between ship and shore will be made by VHF. RASCO Communication Centre maintains a continuous VHF watch on VHF channels. On approaching, vessels should make contact on VHF Channel 16 when they will be requested to switch over to another channel. ETA messages can presently be received only o telex (see "Pilotage"). When 4 hours distant arrival messages are to b passed on VHF in addition. VHF Simplex Channels allotted to thi harbour are 10 and 12. The Duplex Channel allotted is 22. Vessels mus confine themselves to the channel ordered by Port Communications.

RADAR: There is no radar in operation.

TUGS: The harbour will maintain 2 coastal tugs (approx. 2,000 h.p each) with anti-pollution and fire-fighting capabilities, 2 dual purpos launches and 3 mooring launches, when the harbour is fully operationa Vessels are, however, presently berthed by hiring of tugs.

MEDICAL: Medical service can be provided in the event of a emergency. For an emergency having occurred at sea the termina should be informed by quickest means. The patient should be kept read for evacuation with his gear, CDC, Passport and one person i attendance.

There are limited hospital and dental facilities available at a distanc of about 30 km. from the harbour. During working hours, at a distanc of about 3 km. medical facilities are available.

DENSITY: 1027.

FRESH WATER: Not available.

FUEL: Not available.

FIRE PRECAUTIONS: Fire precautions are strictly enforced. Any laxit on this account will cause stoppage of operations.

CONSULS: Consulates are located at Tripoli 670 km. away by road from Ras Lanuf.

REPAIRS: When the ship is berthed, its engines must remain on standby with full power for immediate use. No repairs of any kind will be permitted when alongside.

BERTHING: There are presently 6 finger jetties and a quay wharf (see "Max. Size"). Berthing will be done at the instructions of the Pilot who will board at the anchorage or in the vicinity. Vessels are to have their berthing gear in readiness well before berthing. 2 good lines forward and 2 lines aft will be required for passing to the tugs. Vessels must keep their fire-fighting and emergency system in operational readiness for their own use.

Hoses and Fuel Connections: No dirty ballast facilities at present.

All work on the ship is to be carried out by harbour staff.

BERTHING: Arrangement of Facilities at Quay Wharf and Finger Jetties

Berth No.	Product	Parcel Size (Tonnes)	Loading Arm No.	Loading Arms Which Can Connect Simultaneously	Loading Arm Size/But Can Fit Without Spool	Maximum Working Rate of Loading Arm (cu.m./hr.)	Expected Loading Rate Approx. (cu.m./hr.) Offload Rate (cu.m./hr.)	Remarks

* Other sized spools are provided.

** Jetties assigned for cryogenic products (Ethylene, Propylene, Butadine (C4)) now in operation. Vessels should arrive ready to load – cooled down with cargo vapour in vessels's tanks similar to the cargo to be loaded.

SURVEYORS: No facility for surveying will be provided by the terminal.

GANGWAY/DECK WATCHMAN: Vessels are to employ their own watchman on the gangway.

HATCHES: Where hatches are required to be opened, the crew will be required to open them.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beers, perfumes, arms, ammunition, saccharine and other items have to be locked up under Custom's seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed 25 cigarettes per day of stay or 25 grams of tobacco or cigars in lieu. Liquor is not allowed to be possessed or consumed by any member of the crew.

CARGO GEAR: The vessel's cargo gear is to be ready in all respects. The cargo gear may be augmented from shore. The Notice of Readiness will not be considered valid if cargo gear is not ready for instant use.

REPATRIATION: Crew cannot sign-off except in the event of extreme emergency. Even in an emergency it should be noted that Seaman's Book (CDC) are not a valid document under Libyan law. A valid Passport is needed.

TIME: Libyan time is GMT plus 2 hours (1st April to 30th September) and GMT plus 1 hour (1st October to 31st March).

AIRPORT: Although the nearest airport is about 10 km. from the terminal the flight schedules are irregular, and are operated by private airlines. Regular flights operate from Tripoli 670 km. and Benghazi 375 km. by road.

HOLIDAYS: Notice of Readiness will be accepted and cargo work will be carried out on holidays. Fridays are weekly holidays.

POLICE/AMBULANCE/FIRE: In the event of an emergency, the Duty Loading Supervisor on the berth is to be contacted.

EMERGENCY CO-ORDINATION: Call Duty Loading Supervisor.

TELEPHONES: At present no facility exists for making a local call or international telephone calls from the vessel. Telex facility is available if arranged with the agent.

BALLAST: Presently there are no facilities to handle dirty ballast. Any ship arriving with dirty ballast will be rejected and all costs accruing therefrom will be to the ship's account. Notice of Readiness shall not be accepted until vessel returns with clean ballast and tanks fit to receive cargo. She will have to tender a fresh Notice of Readiness to load on the second arrival. Tank cleaning and gas freeing alongside will not be permitted under any circumstances.

SERVICES: No special service is available.

BANKS: No banking or exchange facilities are available.

STORING: No storing facilities are available.

SHORE LEAVE: Not allowed.
GENERAL: (a) No stores, foodstuffs or goods of Israeli or South African origin may be on board any ship calling at Ras Lanuf. Penalties are fines, confiscation of goods and possibly more. The Libyan government strictly enforces this law. (b) On arrival fly Libyan ensign: plain green flag. (c) Once the ship is berthed, there is likely to be no delay in commencement of operations.
DEVELOPMENTS: The port is under development and more information, if needed, is obtainable from the Loading Supervisor on duty.

SHIPMASTER'S REPORT: October 1987.
Documents:
5 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest.
1 copy Health Declaration.
1 copy Currency List.
2 copies Arms and Ammunition list.
2 copies Drugs List.

All alcohol is placed in bond and seals are checked during vessels stay. Vessels should not have on board any produce from Israel or South Africa.

This was the vessel's first call and Arabic documentation was not required.

Certificate of Discharge of previous Libyan cargo is required.

The figures for the bond are required in bottles and not litres or weight. For first Libyan call the Master is to make a declaration that the vessel has not called before and that a Negative Certificate of Discharge is held.

Charts: BA. Chart No. 3343 and 3354.

Approaches: Vessels are to approach and report to Libyan coastal station on reaching position Lat. 32° 30′ N., Long. 18° 30′ E.

On approach we used Benghazi Radio (5AB) on M/F-R/T (The ship does not have W/T). Service was clear and prompt.

The first radar target sited was the tanks at Es Sider (Lat. 30° 37′ N., Long. 18° 17′ E.). These tanks were sighted at 80 miles.

The wreck in position (Lat. 30° 49′ N., Long. 18° 05′ E.) was conspicuous at 29 miles.

Anchored vessels at Es Sider and Ras Lanuf also make a good target. Ras Lanuf RASCO Harbour was picked up at 24 miles.

An ETA was sent to RASCO and Benghazi Radio 4 hours before arrival.

Anchorage: The anchorage is that indicated on the BA. Chart No. 3343 (Lat. 30° 32′ N., Long. 18° 38.09′ E.)

If vessels have to wait for departure documents and are required to vacate the berth they anchor 0.5 miles east of the main breakwater.

Pilotage: Pilots for RASCO Harbour are available 24 hours. There are no night restrictions.

The Pilot boards from a tug near the Sea Buoy and on departure the pilot leaves just inside the breakwater heads.

VHF: Channel 12 is used for communicating with the Pilots. RASCO Port Control on Channel 16 after which communications are on either Channel 10 or Channel 22. Port Control normally gives 1 hours notice for raising anchor and berthing.

Tugs: At the present time there are 3 tugs in operation in RASCO Harbour. 1 × 3,000 h.p., 1 × 2,500 h.p. and 1 × 500 h.p.. Ship's lines are used to the large tug. The small tug pushes alongside.

Berthing: Vessels normally berth head out at all berths, port side to. However, if vessels manifold is in an awkward position vessel can berth starboard side to. The depths are as charted on BA. Chart No. 3343. Pilots report the maximum Winter draft at Gas Berths No. 3A and 3B as being 9.5 m. In Summer a slightly increased draft is allowed.

The very large breakwaters afford the vessel good shelter.

Gas carriers berth at the innermost berths - Berth 3A and 3B. Berth 3A handling propylene and butadine (C4) and Berth No. 3B handles ethylene and straight LPG.

Moorings consist of 2 head/stern lines, 1 breast line and 2 springs fore and aft. The finger piers are well fendered. Ship's gangway used. A mooring boat assists with running the ship's lines.

Berths 1A, 1B, 2A and 2B are for products.

Cargo: Vessel loaded propylene at Berth No. 3A. Largest vessel handled to date was 30,000 cu.m., which was a full load of propylene. The average sized vessel handled is 4,000 cu.m.

Export of ethylene and propylene commenced in May 1987 and C4 shortly thereafter. LPG production is to start in the near future. The plant which is immediately behind the general cargo berth produces 1,000 tonnes of ethylene, 500 tonnes of propylene and 300 tonnes of C4 per day.

At Berth No. 3A the propylene Chicksans are 8 in., 300 ASA for liquid and vapour. The maximum pressure on the liquid line is 5 kg./sq.cm. and on the vapour return line 1.2 Kg./sq.cm. Connection is by hydraulic clamps and shore reducers are provided.

Maximum propylene loading rate is 450 tonnes per hour.

The supply line is 3 km. in length and this causes a warm initial "slug". The coldest temperature achieved was −45°C for propylene (Terminal written advice), we got down to −44°C. There is no recirculation line. The pier staff who were mainly Yugoslavians were very co-operative. The SGS/Redwood Surveyor was from Belgium.

There is no nitrogen for purging at the present time as the plant uses the total supply capacity. It is believed that additional nitrogen production is planned.

Fresh Water: Not available.

Agent: We used Universal Tripoli who are the Government Agent. The local representative will have his own telex by November, telex number will be 50608 Uniship. We used the plant telephone to contact the agent, number being 3331/3332.

General: There is a general cargo quay called "Marginal Quay" inside of Berths No. 3A and 3B. The quay is well fendered and has a large flat quayside.

The LPG plant is immediatley behind with tanks to the South and 2 conspicuous flares in positions Lat. 30° 28.35′ N., Long. 18° 34.95′ E and Lat. 30° 29.40′ N., Long. 18° 34.30′ E.

The breakwater lights are flashing (not occulting).

Further expansion is taking place to the South of the harbour i position Lat. 29° 12′ N., Long. 18° 35.5′ E.

No services are available at RASCO.

No alcohol is allowed in cabins. Everything is to be placed in bond Customs check the seals at odd times.

We were advised that regular traders are sometimes made a specia concession and are allowed beer and wine but only after arrival.

Positively no South African or Israeli produce to be on board. Large fines are imposed for contravention.

Ship's Certificates should be in Arabic for regular traders. However this is not necessary for the first call.

The Discharge Certificate is to be endorsed by the Customs at the port of discharge. Two copies are to be mailed to Libya and one cop is to be retained on board for the vessels next visit to Libya.

Passes are required if crew members wish to travel in the area. These are frequently and carefully checked.

AUTHORITY: Owners of the harbour: The Ras Lanuf Oil & Ga Processing Co. Inc., Ras Lanuf, Libya.
Postal address:
(i) P.O.Box Tripoli 75071 (Ghout el Shaal).
(ii) P.O.Box Benghazi 1971.

TOBRUK: 32.04 N. 24.00 E.

Also see "General" before first port.

PORT LIMITS: The complete water area existing within Tobruk Bay that water area existing to the West of an imaginary line commencing as from Tobruk Peninsula up to the coast to the South.

It is formed by 3 areas inside the Bay, namely Marsa Tobruk, the proposed naval base and Marsa Al-Hariga Oil Terminal.
ANCHORAGE: See "General" before first port.
MAX. SIZE: Max. draft: 29 ft. Max. length: 400 ft.
RADIO: Tobruk Radio (Station operated by Arab Gulf Oil, Operating times 0900/0930, 1300/1330, 1700/1730, 2100/2130 hrs.) 5AL: 420, 42 and 500, VHF (24 hours) Channels 12, 16 and 19.
BERTHING: Berths in Tobruk Harbour:
Quay No. 3: Length 82 ft., draft 11 ft.
Quay No. 4: Berth 1: Length 560 ft., draft 20 ft.
Berth 2: Length 395 ft., draft 28 ft.
Berth 3: Length 410 ft., draft 30 ft.
STEVEDORES: All stevedoring operations and formalities to be done by Agents. 2 companies to be formed in the near future.
MEDICAL: Available.
TANKERS: Refer to "Marsa Al Hariga".
FRESH WATER: Not available.
FUEL: Not available.
REPAIRS: Not available; see "Tripoli".
REPATRIATION: Available via Benghazi.
DEVELOPMENTS: Port extension project underway.
AUTHORITY: Port Manager and Harbour Master.
AGENCY: See "General" before first port.

TRIPOLI: 32.54 N. 13.13 E.

Also see "General" before first port.

PORT LIMITS: (a) The water area existing inside the actual breakwat and that which may fall within any new breakwaters eventual constructed in accordance with the Port Developments Project.

(b) The outer water area known as the navigational chann commencing as from the harbour entrance along the distinguishin marks of the channel for a distance of about 1 mile.
PILOTAGE: Compulsory Pilot boards at entrance of channel.
ANCHORAGE: See "General" before first port.
RESTRICTIONS: Any containers arriving on Ro/Ro ships should be o trailers.
MAX. SIZE: All types of ships with 28 ft. draft and less are safe i harbour.
RADIO: Tripoli Radio (coast station – 24 hours), 5AT, 476 and 500 kH R/T 2182 and 2197, VHF Channels 16 and 6.

Tripoli Port Radio (24 hours), 5AI, 500 kHz, R/T 2182, VHF Chann 8, 12 and 16 and in an emergency Channel 14. Tripoli Port Radio Tele No. 20464.
CRANES: 2 floating cranes, 100 tons and 200 tons capacity. 25 elect cranes 5 tons - 30 tons capacity. 67 cranes of various capacities up t 50 tons.
STEVEDORES: Two companies available. Working hours: 0700-200

RTHING:

EDICAL: All facilities available.

RESH WATER: Available by barge and alongside. Passenger vessels 00 tons maximum and cargo vessels 50 tons maximum.

UEL: Available through Agent. A notice of 24 hours needed, advisable r Chief Engineer to check what grades are available.

ONSULS: Algeria, 34631; Belgium, 37797; Bulgaria, 35733; China, 2300; Denmark, 39413; France, 33526 & 33527; Germany F.R., 33827 30554; Pakistan, 40072; Poland, 31768; Saudi Arabia, 30486; Spain, 5463 and 33275: Sudan, 39181 and 39182; Sweden, 32343; witzerland, 32416; Greece, 36978 and 36689; India, 41835; Iraq, 4235; Italy, 34131; Jordan, 32707; Kuwait, 40282 and 40281; Lebanon, 3733 and 32289; Malta, 38081 and 38082; Morocco, 34239 and 40188; etherlands, 41549 and 41550; Syria, 31783; Tunisia, 31051/2; Turkey, 7728; U.S.S.R., 30554; Venezuela, 36838; Yugoslavia, 34114 & 3392.

RY DOCK: *Floating Dock:*

Length over platform	136.700 m.
Length over pontoon	121.200 m.
Moulded outer breadth	30.600 m.
Inner clear breadth	23.400 m.
Depth of pontoon at centre line	3.100 m.
Height of keel blocks	1.200 m.
Depth of water above keel blocks	6.400 m.
Lifting capacity	5,000 tons

Spare parts to be supplied by ship's owner. 3 kinds of marine paint e available.

ATCHMEN: Available.

EPATRIATION: Crew changes are possible.

IRPORT: A number of major air lines operate to and from Tripoli Airport hich is about 27 km. from the city.

OLICE/AMBULANCE/FIRE: Main port call; 39111, 35010, 31518. aramanly Wharf call: 30378, 35010, 31518.

HORE LEAVE: Allowed after Free Pratique, Customs and Immigration rmalities completed.

EVELOPMENTS: 2.6 km. of new quays under construction with depths f 10.0 m. – 12.0 m. The second phase of new construction will include erths for container vessels and Ro/Ro vessels.

HIPMASTER'S REPORT: March 1988.

hart: BA. Chart No. 248.

ocuments:

8 copies Crew List.
2 copies Crew Declaration (on Libyan forms).
2 copies Manifest.
1 copy Health Declaration.
2 copies Currency Declaration (on Libyan forms).
All Passports.
1 copy Arms and Ammunition List.
1 copy Drugs List.
2 copies Cargo Manifest.

Cameras are placed under seal. No cigarette issue allowed. Bond emains sealed if proceeding to another Libyan port. Definitely no lcohol, Customs would not allow beer issue. Ship's Certificates to be n Arabic. Passports exchanged for Landing Cards at the gate. All stores hecked for signs of South African and Israeli produce.

pproaches: Vessels are to contact Tripoli Radio on 2182 kHz. at least hours before arrival and obtain current navigational warnings. At the ame time advise Tripoli Radio of vessel's ETA and inward course and peed.

Tripoli Radio normally uses 2197 kHz. as the main M/F transmitting equency. Their reply was prompt and English was good.

Tripoli Radio has Telex Nos. 90129515 AT TPLY and 90120300 TAT PLY.

Tripoli Port should be contacted on VHF Channel 12 as early as ossible, giving ETA Tripoli and inward course and speed.

Tripoli Port will require the following information: LOA, Beam, Gross onnage, Nett Tonnage, Draft, Cargo Tonnage, Agent, Charterer, wner, Flag, Number of Crew and Nationality, Last Port of Call and ext Port of Call.

Tripoli Port Control has Telex No. 90120464 TRIPORTHLY.

On approach, Tripoli Port shows up well on radar at 30 miles when here are ships anchored off.

D/F Station "Tarabulus" was not obtainable.

The N.E. Breakwater and Tarabulus High Light Tower were onspicuous but the light was weak.

All Channel Buoys except No. 3 have been withdrawn. Only the eacons are in position.

ilot: The Pilot may be contacted through Tripoli Port Radion on VHF hannel 16, working on Channels 12 and 8. The Pilot boards from a grey tug near Beacon No. 2. If the weather is poor, Pilot may board inside the breakwaters. The Pilots speak good English and are competent.

When leaving the Port, the Pilot disembarks in the Outer Harbour before reaching the new Breakwater's entrance.

Entry: Maximum draft handled to No. 3 Pier and Karamanli Mole is 29 ft. Tidal range 1 ft. 6 in. Minimum depth found at Karamanli Mole Oil Berth was 32 ft. There are no tanker movements from 30 minutes before sunset until 0730 hrs. the next day.

Generally, cargo vessels are not handled at night, however, movements may be undertaken if absolutely necessary.

In Winter the Port is often closed due to bad weather which causes very heavy N.W. swells across the breakwater entrance near Buoy No. 3.

Anchorage: The anchorage is that indicated on BA. Chart No. 248. Anchored vessels were spread out to the East of the limits on the chart but West of the Channel Leading Line. The anchorage is unprotected from all winds except those off the land. We anchored with Tarabulus Lighthouse bearing 165° × 1.5 miles for a period of 12 hours in a Force 9 wind from the W.N.W. and whilst trying to get underway we parted our cable.

Tugs: Tugs are not used by small vessels. Pilot reports that only 2 tugs are in operation at the present time.

Berth: LPG imports are handled at the outer end of Karamanli Mole. This berth only handles LPG. The old oil product pipelines are no longer in use.

The berth face consists of old sheet piling and is in a poor state of repair, protected by old tractor tyres. Inner Karamanli Mole is generally used by bulk carriers discharging grain, this can restrict the size of ships using the oil berth. Normally LPG is handled by small vessels.

Vessels normally berth port side alongside but can berth starboard side alongside if required and if space permits.

Mooring/Gangway: There are very few bollards on the berth and only breast lines can be run. Insufficient room to run stern lines. Ship's gangway was used and it was easy to land.

Cargo: LPG mix. Normally 75% Butane and 25% Propane, but this depends on the season (cooking fuel, etc.).

Liquid and vapour lines were 3 in. rubber hoses which were connected to 6 in. and 4 in. lines respectively. The distance to the pressure tanks (20 tonnes each) is 4 km. Pressure tanks product is bled off to road tankers and also piped inland. Discharge pressure was 9 kg./sq.cm. and the minimum temperature −2°C. via ship's heater and booster pump.

The line pressure fluctuates when product is bled off to road tankers. The liquid shore line is to be hot gassed/blown clear for 2 hours on completion of liquid discharge.

Vapour is returned to ship, only opened 2 tanks for this operation, which reached 3 kg./sq.cm.

Average rate 40 t.p.h.

No surveyor attended. The receiver "Breganaft", also the shipper, was in attendance at the start and on completion and was of assistance.

Tank Dry Certificate required on completion.

Fresh Water: Fresh water is available by tanker truck of 10 tonnes capacity or by barge of 200 tonnes capacity. 2 self propelled barges were observed in the harbour. Cost of delivery inside the harbour is U.S.$10.0 per tonne.

Agent requires 48 hours' notice for fresh water in order to prepare paperwork.

Fresh water also obtainable at the outer anchorage in calm weather but cost is high.

VHF: Tripoli Radio on VHF Channel 26 but also uses Channel 22 and others as per ALRS. The Ship's Radio Station was sealed by Port Police whilst in Port.

International calls by vessels at anchor to Italy and Greece were handled quickly.

Customs: Officials visited the vessel 17 hours after arrival. As we were under seal on coastwise voyage from Zuetina they only checked seals on the bond. We were given a cigarette issue but no alcohol of any description was issued. All alcohol remains under seal whilst on the coastal trade. All radios and cameras were manifested so were allowed to be kept in cabins.

Agent: Vessel handled by "Universal". Agent attended with Customs 17 hours after arrival and was helpful with regard to ordering stores. If vessel finishes overnight she has to wait for clearance until 1000 hrs. the following day as the Customs House does not open until 0800 hrs.

Stores: Imported stores not available. Fresh produce available but dependent upon the season, prices are high. Basic items are obtainable.

Bunkers: Most grades available by road tanker through "Breganaft".

Forms: Also see "Documents". Crew Manifest and Money List to be on Libyan forms but if first visit to Libya, international forms are acceptable. All Ship's Certificates to be in Arabic.

Crew Manifest.
8 copies Crew List on IMO Forms acceptable.
2 copies Cash in Master's Safe.
2 copies Ship's Fixture List.

Port Clearance and Customs Clearance from Last Port (very important).

General: Vessels on coastwise trade must keep at least 12 miles offshore.

The local currency is the Libyan Dinar and 1 Dinar = U.S.$3.5 (official).

Mail can be sent out via the Agent.

Repatriation and crew changes are possible but outward tickets must be paid for in Tripoli (not PTA) by remittance of hard currency. There are nearly always vacant seats on all outward flights. All crew joining require a visa.

Shore leave is only allowed during daytime. Passport is handed in at the gate and a local I.D. card is given in exchange.

Friday is the Moslem holiday. March 2nd was a Public Holiday.

AUTHORITY: Port Manager and Harbour Master.

AGENCY: See "General" before first Port.

ZAWIA (Azzawiya): 32.48 N. 12.42 E. **(See Plan)**

Also see "General" before first port.

LOCATION: Zawia Offshore Oil Terminal is situated about 50 km. West of Tripoli.

PORT LIMITS: Seaward limits extend from 32° 50′ 30″ N. to the coastline between 12° 40′ 00″ E. and 12° 44′ 00″ E. (refer Port Plan on B.A. Chart No.3353). Vessels are considered to be "Arrived Ships" and (subject to charter party terms) laytime will commence, when the ship is approximately 2 miles off the S.A.L.M. berths. The port is operated by the National Oil Corporation of the Socialist Peoples Libyan Arab Jamahyria.

DOCUMENTS: Masters are advised to have the following documents prepared before arrival in order to expedite ship's inward clearance:

6 copies Crew List.
2 copies Stores Manifest.
2 copies Personal Declaration (Crew).
Health Documents.
Cargo Documents (Cargo Inwards).
Ship's Papers.
Ship's Certificates.
Discharge Certificate (of last cargo loaded at any Libyan Port - duly authenticated at port of discharge. Loading cannot be undertaken until document presented to shore official via ship's Agent.).

PILOTAGE/APPROACHES: Vessels are advised to anchor Westwards of a position about 1 mile Northwards of Berth No.1 and not closer than 7.5 cables from any berth or to approach any berth closer than 7.5 cables without having received Harbour Master's or Duty Pilot's permission.

S.A.L.M. Berth No.1: 32° 48′ 18″ N., 12° 42′ 00″ E.
C.B.M. Berth No.2: 32° 48′ 06″ N., 12° 42′ 38″ E.
S.A.L.M. Berth No.3: 32° 48′ 12″ N., 12° 41′ 12″ E.
Flare Stack (2 Flares in North/South orientation)
North Flare: 32° 47′ 24″ N., 12° 42′ 00″ E.

Azzawiya Oil Terminal is adjacent to the flares. Tankers are warned that it is unsafe to remain at anchor during adverse weather conditions. The bottom is sand, overlaying bed-rock and the depth of water about 35 m. When unable to remain at anchor vessels are to keep Northwards of Lat. 32° 52′ N.

RESTRICTIONS: Whilst at a berth, tankers must have main engines ready for immediate use at all times. Sudden and often violent changes of weather may occur without prior indication at any time and vessels may be required to curtail cargo operations, disconnect hoses and vacate the berth at very short notice, the Loading Master will advise accordingly.

The Pilot (Loading Master) and when appropriate a Cargo Surveyor will be in attendance prior to berthing and until berth vacated, suitable accommodation, etc., and normal courtesies to be provided. The Pilot may on occasions be detained on board. Pilot, Agent and Port Officials and Service craft are available during daylight hours only. Cargo documentation and outward clearance for vessels loaded will be completed during normal daytime working hours.

Vessels must have sufficient ballast for safe manoeuvring with propeller immersed and trimmed to about 8 ft. by the stern. If in the opinion of Harbour Master/Pilot the ship has insufficient ballast she may not be allowed to berth.

The discharge of dirty ballast is strictly prohibited. There are no facilities for the reception of water ballast or tank washings ashore. In the case of crude oil vessels Crude Oil Washing is not permitted.

HEALTH: Local Officials will board vessels to grant Free Pratique. Vessels must report any suspected disease or fever to local Authority prior to being boarded by Agent or Pilot. There are facilities to treat serious injuries or illness. Inoculations and vaccinations cannot be dealt with.

VHF: Call sign: "Zawia Port Control".

Zawia Port Control keeps 24 hours watch on Channels 16, working channels 22 and 27. Vessels approaching the anchorage must give the following information when possible:

(a) Ship's name and flag.
(b) Up-dated ETA.
(c) Cargo nomination, grade and quantity.
(d) Vessels discharging to give grade and Bill of Lading figures.
(e) Distance between Ship's rail and manifold, manifold size and derrick SWL.

For cargo operations Ship/Shore communication is maintained by Loading Master via Walkie-Talkie radio or by VHF Channel 12, Call sign "Tank Farm".

Service launches operate on Channel 12, though all are equipped with standard Ship VHF sets.

Link calls may be established via Tripoli Radio.

BERTHING: Prior to berthing, vessels should have the port derrick rigged with a SWL of 10 tons if nominated for SBM No.3 (Crude Oil discharge), 7 tons for SBM No.1 (Fuel loading and Crude Oil/Reduced Crude Oil discharge) and 5 tons for CBM No.2 (Vessels handling White Oils, Vacuum Gasoil, Lubricating Oils).

Vessels proceeding to SBM's will have 2 wire rope strops with shackles placed on board to secure chafing chain ends of nylon mooring ropes.

Vessels loading Fuel Oil or discharging Reduced Crude Oil will have a special device placed on board to accommodate 2 hoses connected to one ship's manifold.

Hose handling, connecting and disconnecting to be carried out by ship's crew under the supervision of a Deck Officer to Mooring Master's advice.

Masters are requested to have available adjacent to port side manifold:

2×15 m. lengths of synthetic fibre rope 127 mm. circumference.
1×14 lb. (6 kilo) and 1×7 lb. (3 kilo) hammer.
2×1.5 ton chain blocks and/or suitable rope tackle.
Large Shifting Spanner.
1 Wire strop of 20 mm. – 25 mm. diameter, about 2 m. – 3 m. lengt
Rope lashings.

S.A.L.M. Berth No.1: Buoy is moored approximately 1,400 m. offshor with a least depth of 22 m. in a position 32° 48′ 18″ N., 12° 42′ 00″ E The berth can accommodate vessels of 15,000 d.w.t. to 100,000 d.w.t. max. draft 17.0 m. The vessel is secured at the bow with 2 nylon moorin ropes. Chafing chain ends are secured by shackles and wire strop The floating hose strings on vessel's portside terminate in 12 in. diamete flanges, A.S.A. 150, fitted with neoprene 'O' ring gaskets. Minimu distance 3.5 m. between manifold and ship's hose rail. Cargo boo 7 tons SWL.

C.B.M. Berth No.2: "See Plan". CBM No.2 is approximately 1,100 m offshore with an average depth of 21 m. in position 32° 48′ 06″ N 12° 42′ 38″ E. (approx). The berth can accommodate vessels o 5,000 d.w.t. to 25,000 d.w.t. maximum 175 m. LOA and max. dra 10.0 m. The vessel is berthed heading about 310° (T) with 2 bow ancho and 3 buoys (one stern, one starboard quarter, one port quarter).

One 8 in. diameter hose (one hose each for leaded and unleade products) terminating in an 8 in. diameter flat face bolted flange. On 10 in. diameter hose (for lubricating oils only) terminating in a 10 in diameter flat face bolted flange.

For those vessels discharging Lub oils, a spherical device (pig) wi be placed on board with air compressor.

Two refinery employees will oversee the discharge operation, contro line clearing procedures and will remain on board. Food will be supplie from ashore.

S.A.L.M. Berth No.3: Buoy is moored approximately 1,350 m. offsho with a least depth of 24 m. in position 32° 48′ 06″ N., 12° 42′ 38″ E (approx). The berth can accommodate vessels of 25,000 d.w.t. t 140,000 d.w.t., max. draft 19.0 m. The vessel is secured at the bow wi 2 nylon mooring ropes. Chafing chain ends are secured by suitab shackles and mooring strops (supplied). Two floating hose strings ar taken on vessel's port side, terminating in 16 in. diameter flanges A.S.A. fitted with neoprene 'O' rings and 'Camlock' bolts. Cargo boom 10 ton SWL.

No lights have yet been installed to mark CBM No.2.

SALM Berths No.1 and No.3 are each equipped with radar reflecto installed at top buoy and lights mounted on the buoy deck with th following characteristics: Colour White Fl. "U" ev. 12 secs (unreliable

A light Fl.R.G. ev. 7 secs. is exhibited on Eastern end of small cra harbour breakwater.

Tidal streams are generally weak and ineffectual. Sub-sea and surfac currents often run in differing directions. Current strengths of abou 2 knots are not uncommon and are largely influenced by the wind.

SAFETY: *Fire and Safety:* Fire and Safety Regulations will be *strictl* enforced at all times and regular checks will be made by the responsib Refinery Official. A safety check list is to be completed and signed b the Master, the Chief Officer and Loading Master. Anti-pollution of th sea precautions are to be observed at all times. A pollution control vess is available for use in the event of accidental spillage.

GENERAL:

No fuel or diesel bunkers available.
No fresh water available.
No provisions or supplies available.
No shore leave or crew changes possible.
No cranes or lighters available.
No repair facilities available.
No lifeboats or other craft to be lowered in to water.
No swimming over the side allowed.

AUTHORITY: Azzawiya Refinery, P.O.Box 15715, Azzawiya. P.O.Bo 6451, Tripoli. *Tel:* Tripoli 605389/90/91/92/93. *Contact:* Mohamed M.Zerti, Marine Co-ordinator.

AGENCY: See "General" before first port.

ZUARA: 32.55 N. 12.07 E.

Also see "General" before first port.

PORT LIMITS: (a) The water area existing between the actua breakwater and that which may fall within any new breakwater eventual constructed.

(b) The water area known as the navigational channel existing outsid the harbour entrance for a distance of about 0.5 miles (1 km.).

APPROACHES: If approaching from the East, vessels are to give th coast a berth of at least 3 nautical miles.

ANCHORAGE: See "General" before first port.

RESTRICTIONS: Port for ships laden with direct delivery cargo only.

MAX. SIZE: Ships up to 13 ft. draft and 65 m. length are safe in th harbour.

RADIO: Tripoli Radio and Port Radio use VHF Channel 16.

BERTHING:

Quay No.	*Length*	*Depth*
Shore quay	2 ships	13 ft.
F.J. Stb.S.	165 ft.	13 ft.
F.J. Pt.S.	165 ft.	13 ft.

STEVEDORES: 2 companies available.

MEDICAL: Available.

REPAIRS: Not available, see "Tripoli".

REPATRIATION: Possible.

AIRPORT: Tripoli Airport situated about 127 km. from Zuara.

POLICE/AMBULANCE/FIRE: Call Port Manager, Tel: 025305.

SHORE LEAVE: Allowed after Free Pratique, Customs and Immigratio formalities completed.

DEVELOPMENTS: 18 berths to be constructed in a new master pla

AUTHORITY: Port Manager and Harbour Master.

AGENCY: See "General" before first Port.

ZUEITINA: 30.51 N. 20.00 E. **(See Plan)**

Also see "General" before first port.

LOCATION: The Terminal Fairway Buoy, moored in position Lat. 30° 55′ 00″ N., Long. 19° 59′ 48″ E., is painted red; it shows at night a white light flashing "Z" every 10 seconds. A prominent landmark is the radio mast (height 451.5 ft. above sea level) in position Lat. 30° 49′ 57.6″ N., Long. 20° 03′ 05.5″ E.; it displays at night 3 red lights in a vertical line – the top light flashing, the 2 lower fixed. The top light is on top of the mast (which is 400 ft. above the base), the middle light is 266 ft. above the base, and the lowest light is 133 ft. above the base. At night flares at the Liquid Petroleum Gas Plant, in position Lat. 30° 54.2′ N., Long. 20° 05.4′ E., can be seen from a considerable distance; by day a column of smoke emanating from this position is also conspicuous. 14 large oil tanks, painted white, near the foot of the Radio mast, are prominent landmarks.

Positions of Moorings:

"Alpatah" berth	Lat. 30° 53′ 30″ N.	Long. 20° 01′ 05″ E.
"Brega" berth	Lat. 30° 52′ 18″ N.	Long. 20° 01′ 24″ E.
"Chahett" berth	Lat. 30° 52′ 08″ N.	Long. 20° 00′ 11″ E.
"Dalila" berth	Lat. 30° 50′ 56″ N.	Long. 20° 00′ 26″ E.
"Echbar" berth	Lat. 30° 50′ 16.4″ N.	Long. 19° 59′ 16.1″ E.

"Alpatah" out of service, marked by navigation buoy.

FLAGS: When arriving at Zueitina by day, ships must display, in addition to their own national ensigns, the Libyan flag and the appropriate quarantine signal. Throughout the ships' stay, during daylight hours, they must display the Libyan flag, their own national ensigns and, when applicable, the International Code signals "B", "H" or "G", and the appropriate quarantine signal.

DOCUMENTS: Soon after vessel's arrival, a Custom's Officer will board, accompanied by a Shahat Agency representative, who will act on behalf of the ship and its Agent, as well as on behalf of the Company, in the execution of essential business. The following documents, signed by the Master and imprinted with the ship's official stamp, are required by the Customs Official for the Customs and Immigration Departments and for the Port and Lights Authority:

2 copies Entering and Leaving Territorial Waters Certificates.
2 copies Report Inwards Certificates.
2 copies Crew Declarations of Dutiable Goods.
2 copies Crew Declaration List.
2 copies Report Outwards Certificates.
3 copies Boycott Certificates.
2 copies Stores Lists.
5 copies Crew Lists.
1 copy Clearance from Last Port of Call.
2 copies Tanker Characteristics Certificates.
1 Copy Certificate of Discharge, from the Discharge Port Authorities, of the last cargo loaded in Zueitina.

With the exception of the Crew Lists and the Stores Lists and the clearance from the Last Port, the above forms will be provided by the Company clerk.

It is important that the Master should be able to produce a properly authenticated certificate of discharge covering the last cargo loaded into the ship in Zueitina. If for some reason he is not in possession of such a certificate, he must write a letter of explanation which includes the pertinent extracts from the ship's log book, append his own signature to it and stamp it with the ship's official seal, and address it to the Secretariat of Petroleum, Es Zueitina, SPLAJ. If the explanation for failure to produce the certificate is considered satisfactory the ship may be permitted to load. If there appears to be any suspicion that the last port was not as stated, the ship will be turned away.

If the vessel has not previously loaded in Zueitina, the Master is required to confirm this fact in an official letter, stating also the ship's last port of discharge and giving an undertaking that the cargo about to be loaded will not be discharged in any of the countries to which the Arab embargo extends.

The Mooring Master will, after boarding, lose no time in informing Zueitina Marine that he has received one or other of these foregoing documents from the Master, which he will, at the first opportunity, send ashore for delivery to the Secretariat of Petroleum representative. This will ensure that there is no unnecessary delay in the commencement of loading.

On completion of loading, the Shahat Agent will again board the ship with the cargo documents which are to be signed by the Master. The clerk has to deliver to the Master one copy of each document for his own use and one copy for consignee and bring the rest of documents ashore with him.

1. Bill of Lading
2. Cargo Manifest
3. Time Sheet
4. Certificate of Origin
5. Master's Receipt
6. Export Manifest

All of which forms are provided by the Company or by the Agency. He will also take ashore any letters to be posted. On occasions, a Customs Official will visit the ship with the documentation clerk prior to sailing to ensure that the seals which were put on the bonded stores lockers have not been tampered with before the ship has left Libyan waters.

The documentation formalities prior to the ship's departure, are usually completed whilst the ship is unmooring from the berth, or just after it has left the berth, hove to with the Mooring Master still aboard. Sometimes, however (and particularly after the loading of "Agip" cargo), the processing of the papers ashore may take longer than usual, and the ship may have to anchor to await the clerk's eventual arrival, in which case the Mooring Master will direct it to a safe anchorage before disembarking. Zueitina Marine will then inform the Master when the launch bearing the clerk is about to leave the Small Craft Harbour, in order that the anchor may be weighed, and a lee side presented to the launch.

ACCEPTANCE PROCEDURE: *Notice of Readiness, Laytime, etc:*
Vessels Loading Crude Oils: A vessel for which a berth is available on arrival will be boarded by the Mooring Master at the Terminal Fairway Buoy and, providing that the vessel is in all respects ready to commence loading (except for the necessary de-ballasting time), the Notice of Readiness will be accepted at the time of the Mooring Master boarding, subject to the provisos – a, b, c and d, below.

If the vessel is not in all respects ready to proceed to the berth, with main engine and auxiliaries fully manoeuvrable, mooring ropes on deck, anchors, windlasses, winches, etc., in good working order and readiness, it will not be accepted until the Mooring Master is satisfied that all these conditions are met.

A vessel which has been instructed by Zueitina Marine to anchor in the roadstead on arrival should, after doing so, inform Zueitina Marine of the precise anchorage time, which time will, for the purposes of berthing order and the Port Log, be considered as the vessel's arrival time. According to the practice of the port, acceptance of the Notice of Readiness will coincide with this arrival time, providing:–

(a) that it is within the hours of daylight – deemed to be from 0600 hrs. (local time) to 1800 hrs. (local time),
(b) that it is not a Public Holiday, or a Friday (the Libyan Sabbath), unless the vessel is actually handled on that day,
(c) that the port is open, and
(d) that the vessel has been nominated to load.

An exception to clause (a) above, is when conditions allow night berthing, in which case the vessel will be accepted when the Mooring Master boards, or, should the vessel have been at anchor, when the anchor is aweigh, providing that the Mooring Master is then on board.

In the case of a vessel arriving without nomination, the Notice of Readiness will be accepted when notification of her nomination has been received at the Terminal, subject to provisos (a), (b) and (c) above, and instructions from the Company's Operations Department. On occasions when the Company deems it advisable to berth a vessel prior to the date of the nominations, acceptance of the Notice of Readiness will be at the time the Mooring Master boards, providing that the anchor is then aweigh.

In addition to clauses (a), (b) and (c) and (d), above, vessels will not necessarily be accepted when arriving at a time ahead of, or behind, their last scheduled Estimated Time of Arrival, especially if such acceptance would be at the expense of a vessel that has arrived within its nominated period.

Vessels Loading Liquid Petroleum Gas: A Liquid Petroleum Gas Tanker's Notice of Readiness will be accepted on arrival, provided that:

(a) the port is open ("port" meaning, in this case, the LPG berth),
(b) that it is not a Friday (the Moslem Sabbath) or an official holiday, unless the ship is actually handled on that day,
(c) that it is not during the night hours – deemed to be, at the LPG berth, between 1800 hrs. and 0600 hrs. (local time) – unless the ship is actually handled during that period,
(d) that the ship does not arrive on the same day, or clash with the loading of, another LPG tanker chartered under a LINOC contract,
(e) that the ship's tanks are in such a state of readiness, i.e., requiring no cooling, no purging, that loading can be commenced at *full rate* immediately the hoses are connected,
(f) that the arrival time does not differ appreciably, either before or after, from the last signalled ETA sent by the ship and received at the Terminal, and
(g) that the vessel has been nominated to load.

When a Liquid Petroleum Gas tanker does arrive whilst the port is closed, the Notice of Readiness will be accepted at the time of the opening of the port, subject to provisos (b), (c), (d), (e), (f) and (g).

The N.O.R. of an LPG loader arriving on a Friday or on an official holiday, or during the aforesaid night hours, will be accepted at 0600 hrs. (local time) on the first subsequent working day, subject to provisos (a), (d), (e), (f) and (g).

An LPG tanker arriving on the same day as an LPG tanker scheduled to load under a LINOC contract, or whose loading would clash with an LPG tanker scheduled to load under a LINOC contract, will have its N.O.R. accepted on the completion of hose connection, subject to provisos (e) and (f).

PILOTAGE: A Mooring Master will board the vessel in the close vicinity of Terminal Fairway Buoy and advise Master on all manoeuvres relative to berthing, connecting and disconnecting the hoses, and in all operations within the anchorage or berthing area.

Vessels of 40,000 d.w.t. and upwards should have a pilot ladder long enough to reach the Mooring Master's launch rigged just abaft the accommodation ladder, in such a manner that the Mooring Master can transfer to the accommodation ladder when about 10 ft. from sea level. Ladders must be strong, clean, and in good state of repair and conform to international requirements. In cases where the ladder(s) fails to conform with these requirements, the Mooring Master will decline to board until an adequate ladder has been provided. A good lee should be made, to allow the launch to come alongside and the Mooring Master to board safely. (Note: Ships which have been instructed to berth at the S.P.M's, and need to take the Company's gear aboard, should have the ladder(s) rigged on the port side, in order that they may take it aboard from the Mooring Master's launch with the working derrick as soon as the Mooring Master has boarded.)

The Mooring Master may require the vessel to unberth at any time he deems it necessary for the safety of the vessel, or the installations, or both, or because of infringements of the Port Rules by the vessel.

As soon as practicable after boarding, the Mooring Master will inspect the mooring and lifting equipment and the ballast, and not until he has assured himself that the equipment is adequate, and the ballast clean, will the ship be accepted. His opinion of the adequacy of the gear, and of the cleanliness of the ballast, shall be final.

TUGS: One tug ("Saladin") of 4,600 h.p., bollard pull 55 tons now available to assist in berthing at CBM and LPG berths.

One to six mooring launches of 370 h.p. available, normally two launches assist berthing at SBM's.

ANCHORAGE: Vessels awaiting the Mooring Master, whether for berthing in the crude oil berths or alongside the LPG berth, should heave to in the close vicinity of the Terminal Fairway Buoy. If they are obliged, or instructed to anchor, they should do so in the recommended anchorage, which is within the radius of a circle centred in position Lat. 30° 55′ N., Long. 20° 01′ E. Under no circumstances should they anchor South of the 30° 54′ 00″ parallel. Whilst at anchor, they should exercise the utmost vigilance, as they are liable to drag anchor in rough weather, and should keep in VHF radio-telephone with the Terminal at all times. If heavy weather necessitates them heaving up anchor and proceeding to sea, Zueitina Marine must be informed accordingly.

RADIO: 72 hours prior to arrival at Zueitina, Masters should advise the Company of their vessels' ETA via Tripoli and via Portishead Radio. They should subsequently confirm or amend them when they are 48 hours and again when they are 24 hours distant from the Port.

All messages to Zueitina Terminal should be addressed to the Operations Manager, Zuetina Oil Company, with copies to the Terminal Superintendent.

Messages should include the quantity and grade of cargo to be loaded, the last port of call and destination, Bill of Health status and details of any sickness on board. Estimated times of arrival should be given in GMT. (Libyan Standard Time is GMT plus 2 hours.).

Masters of vessels equipped with VHF radio-telephones should contact Zueitina Marine on Channel 13 or Channel 16 when within range, and give a firm calculated time of arrival at the Zueitina Fairway Buoy. They should also again inform Zueitina Marine Duty Officer of the quantity and grade of cargo required, the last port, estimated deballasting time and the destination. They should confirm that they have in their possession a Certificate of Discharge for the last cargo loaded into their ships in Zueitina or, in cases of ships arriving in Zueitina for the first time, that they have ready for the Secretariat of Petroleum a letter which certifies that the cargo which they are about to load will not be discharged in any country against which the Arab Oil Embargo extends. In vessels paying their first visit to the Terminal, Masters should also inform the Duty Officer of the size and type of the manifold connections (i.e. 12 in. ASA, or 10 in. European, etc), and whether or not they have on board heavy wires and shackles for mooring at the mono-buoys.

(N.B. It is important that all ships arriving at Zueitina are fitted with VHF radio-telephones, capable of operating on the main working Channels. Without VHF communications, Zueitina Marine cannot always know with accuracy a vessel's arrival time, and as a result that vessel might well lose its loading turn and be subjected to an appreciable – and, with VHF, avoidable – delay in consequence.)

An aerial radio beacon is located on the North-Eastern arm of the Small Craft Harbour, in position Lat. 30° 54′ 05″ N., Long. 20° 04′ 12″ E., intended as an aid to navigation for aircraft flying to and from Zueitina airstrip. The beacon transmits continually the call sign ZUE, on 369 kHz: the signal, which is omni-directional, has a range in excess of 100 miles.

HEALTH: Pratique will be granted by the Custom's Official. He will examine the ship's logbook, and will inspect and seal the bonded storerooms.

All ships must display the appropriate quarantine signal until given Pratique.

BERTHING: The sea terminal consists of five berths for loading crude oil products, two of which – "Brega" and "Dalila" – are conventional buoy moorings, and the others – "Alpatah" ("Alpatah" buoy at present temporarily removed but position marked by Tower Buoy with same characteristic light) "Chahett" and "Echbar" – are single-point moorings, or mono-buoys. Conventional buoy moorings "Brega" and "Dalila" are approximately 2.5 miles offshore, with an average depth of 70 ft. and 80 ft. respectively. 42 in. (ID) submarine lines connect the berths to the shore installations. To the header at the seaward end of each of these submarine lines are connected two strings of flexible reinforced rubber hoses, laid on the sea bed and buoyed when not in use. The forward of the two strings is made up of (from the header) three 30 ft. lengths of 24 in. i.d. hose, two 30 ft. lengths of 20 in. i.d. hose, and seven 30 ft. lengths of 16 in. i.d. hose. The after string is similar, but with one less length of 16 in. i.d. hose. To the seaward extremity of each hose string is fitted a 16 in. to 12 in. ASA reduction flange. When the ship has berthed, each hose string is towed in to the ship's side below the manifold by the attendant launch, to be hove up by crane or derrick and bolted to the ship's connections, *invariably on the port side*. Where the ship's connections differ from the 12 in. ASA flange on the hose, suitable reduction spools must be fitted. The weight to be lifted on each hose is approximately 7 tons.

Single-point moorings, "Alpatah", "Chahett" and "Echbar" are all approximately 3 miles offshore, in an average depth of 100 ft. of water. The submarine pipe-lines to "Alpatah" and "Chahett" berths are of 48 in. i.d., that to "Echbar" berth, 42 in. i.d. Particulars of the strings of hoses from the header to the ship's manifold are described in detail in the chapter on "Single-point Moorings". As in the conventional buoy berths, *the hoses are always taken up on the port side,* and the connecting flange on the hose is 12 in. ASA pattern. The weight to be lifted is approximately 7 tons, but this is to some extent dependent on the ship's freeboard.

Mooring Equipment: As a guide to Masters who intend to save time and labour, especially in these days of reduced "general purpose" crews, by equipping their ship with the requisite mooring gear, the following standard requirements is suggested:

(a) Two (2) flexible steel slip wires, 1.75 in. dia., 5.5 in. circumference, 130 ft. in length, or longer if the distance from the fairlead to the bitts is such that 130 ft. would be insufficient to make fast safely. Such slip-wires will have an eye spliced in one end only.

(b) Two (2) screw-pin or threaded bolt and nut, bow shackles, bow size 2.5 in., pin diameter 2.75 in., minimum width, jaw to jaw, 4 in.: breaking strain 150 tons.

Vessels fitted with suitable chain stoppers will reduce mooring time.

Single-Point Moorings: The "Mono-buoy" is a large cylindrical buoy (weight 106 tons), divided by steel bulkheads into four water-tight compartments, through the centre of which emerges the loading hose. The perimeter of the buoy, to which the buoy-to-ship moorings are attached, is a turntable which revolves on bogies round the centre hose-supporting – section, in such a manner that the vessel berthed to the buoy will always lie head to wind. The minimum depth of water within the swinging radius of the largest ship envisaged at the buoy is approximately 95 ft.

To the mono-buoy is attached a 240 ft. length of chain cable, made up of 2.375 in. U3 steel studded links, and supported in polyurathene buoyancy collars, at the seaward end of which is a "chafing chain". The "chafing chain" is 20 ft. long and of similar construction to the main chain, but with three open links at the end: it is detachable for periodic renewal. To the end of the chafing chain is attached the "approach rope" – a 200 ft. length of 10 in. circumference plaited polypropylene which, when not in use, is allowed to float out free from the buoy.

The ship approaches the buoy from downwind, taking care to keep the wind right ahead (adequate ballast should be retained aboard to provide manoeuvrability). When sufficiently close, the crew will lower to the attendant launch the end of a good mooring rope, to the eye of which has been attached a stout nylon lashing, about 2 fathoms long. The mooring rope should be passed out through a central panama lead, if a suitable one exists (or from a fairlead on the port bow (when the ship is fitted with a bulbous bow) a line put out through a central lead, should be brought back along the forecastle, clear of the bulbous bow, and then be lowered to the water to avoid the possibility of the launch coming into contact with the bulb when coming in to collect the end of the rope. Meanwhile, two heavy 5.5 in. circumference flexible steel slip wires will have been made fast in readiness, preferably on different sets of bitts, in such a manner that there is an adequate number of turns around the bitts and that the end of the eye reaches to approximately 10 ft. and 10 ft. 9 in. respectively from the panama/fairleads. When the chain comes aboard, it is quickly secured to the wires by two 150 tons B.S. shackles, which are bolted through two of the open links in the chafing chain. The strain on the approach rope (which had followed the ship's rope round the drum-end of the windlass) is now released, and the weight allowed to come on to the wires. The approach rope is then "turned-up" as an additional mooring and the ship is now all fast in the berth. Ship's tension wires, or other mooring lines, should also be shackled or lashed to the chain, for added security.

When leaving the berth, the ship's additional moorings are first detached from the chain, any slack which is in the approach rope is taken in and that rope made fast very securely. The slip wires are then slacked off slowly and carefully until the strain comes on to the approach rope (when strong winds have tightened the mooring, it will probably be necessary to put the engine slow ahead before attempting to do this. The shackles can then be taken adrift, freeing the wires, and the approach rope slacked off until the chain reaches the water – care being taken to ensure that it is not allowed to fall across the hoses. The engine is then put astern, and the rope allowed to pay out easily (with half a turn around the bitts to stretch it clear) as the ship leaves the buoy.

(Reminder – unlash the ship's rope from the approach rope before unmooring from the buoy!).

Loading: Rate of loading is between 32,000 b.p.h. and 36,000 b.p.h.

Conventional Buoy Moorings: In berths "Brega" and "Dalila" the ship is berthed with two anchors streamed out ahead and mooring lines to 5 buoys round the stern and quarters. In addition, to all buoys except No. 3 (right astern) there are attached 5.5 in. circumference steel wires laid on the sea bed, buoyed, when not in use – in all but the most settled weather these are brought into the ship by the mooring launch, hove up and made fast on board. Vessels should have ready a good 3.5 in. rope messenger to take up these wires, and strong chain stoppers, or "carpenter's stoppers", for use when securing them.

Before the ship reaches the berth, there should be three good mooring lines ready on the after end of the main deck, two of which have been securely married in readiness to be sent away first, to warp the ship round. At least seven good ropes should be ready for running out from the poop, with lashings ready in case one rope has to be married to another. Plaited polypropylene ropes, at least 120 fathoms long and of a diameter and strength appropriate to the size of the vessel, are recommended: large manilla ropes, slow and cumbersome to handle, are definitely unsuitable for berthing under these conditions.

Synthetic ropes on automatic winches are favoured in this port, but it is recommended that they be at least 150, and preferably 200 fathoms long. The winches must be capable of being firmly locked when in the moorings – any tension feature is not permissible.

When it has been necessary to slip moorings in order to leave the berth quickly and without the assistance of the mooring launches, the Company will make every effort to recover them and to return them to the vessel as soon as possible. Normally the Company makes no charge for recovering anchors and moorings, but it reserves the right to do so under exceptional circumstances.

In the conventional buoy moorings, in order that ships may be securely moored against beam winds and with sufficient chain leading ahead to ride out heavy swells, it is recommended that they be equipped with ample chain on both bower anchors. Experience gained in sea berths suggests that the chain required on each anchor should be more than the length of the ship. In vessels of 100,000 d.w.t., for which the berths were designed, it is recommended that there should be 14 shackles (1,260 ft.) of chain on each anchor. A minimum acceptable amount of chain is 10 shackles (150 fathoms) for the safety of the ship and the company's installations. Anchor marker buoys should be used.

HOSES: The lifting, lowering, connecting and disconnecting of the cargo hoses will be done by the tanker's personnel in accordance with the advice and directions of the Mooring Master. Ship's derricks and deck winches should be capable of operating with a safe working load of 7.5 tons and preferably 10 tons. Vessels with inadequate hose-lifting equipment will be rejected. All derricks should be fitted with "preventer guys" in addition to normal guy tackles.

The port derrick must be rigged and ready for use on arrival. In addition ships leaving SPM should have the starboard derrick ready, too, in order to facilitate the discharge of the mooring gear on the lee side.

Sets of bitts, or strong staghorns, for hanging off the hoses, must be provided, suitably located near the manifold.

On the surface, extending from the buoy (to which it is connected by a Chicksan swivel (a universal joint)), is a hose string comprised of 24 (at "Echbar") 26 (at "Alpatah" and "Chahett") 30 ft. lengths of 24 in. i.d. floating hose, culminating in a floating junction box: from the other side of this junction box emerge two strings of four lengths of 16 in. i.d. hose. The end ones – the "over-rail" hoses – are fitted with 16 in. to 12 in. ASA reduction flanges, which, after the hose has been hove aboard, are bolted or clamped to the ship's manifold.

For VLCCs, additional lengths of floating hose are inserted if necessary.

LOADING: *Zueitina Crude Oils and Debutanized Condensate:* The principal cargo loaded at Es Zueitina Terminal is Zueitina Field Blended Crude Oil, pumped in from the Company's wells, 212 km. inland, but in addition certain other grades of crude oil are loaded, namely, Zueitina Medium Crude, Zueitina Premium Crude, and Zueitina Debutanised (Stabilised) Condensate. Also loaded are Liquid Petroleum Gas products, Butane and Propane (LPG) see "LPG Loading Berth", and "Agip" Buattifel Crude Oil, from the wells of Agnezia Generale Italiana Petroli, in concession 100.

Virgin naphtha also exported.

The following pertinent data will, we believe, be of interest to tanker owners and operators, Masters and Mates, and to refinery operatives in the discharging ports:-

Zueitina Field Blend
Average A.P.I. 40.1
Average Specific Gravity 0.8246
Pour point +35
Reid Water Vapour Pressure +5.2 p.s.i. at 100°F
H_2S less than 5 p p m.
Flash Point below 60°F
Average loading temperature on board 108°F
Barrels per long ton at 60°F 7.741

Zueitina Medium Blend
Average A.P.I. 36
Average Specific Gravity 0.8448
Pour point +85
Reid Water Vapour Pressure +5.0 p.s.i. at 100°F
H_2S less than 5 p p m
Flash Point below 60°F
Average loading temperature on board 98°F
Barrels per long ton at 60°F 7.582

Zueitina Premium Crude
Average A.P.I. 43.5
Average Specific Gravity 0.8086
Pour point +30
Reid Water Vapour Pressure +5.6 p.s.i. at 100°F
H_2S less than 5 p p m
Flash Point less than 60°F
Average loading temperature on board 108°F
Barrels per long ton at 60°F 7.922

Zueitina Debutanised (stabilised) Condensate and Debutanised Condensate:
Average A.P.I. 78.0
Average Specific Gravity 0.6706
Pour point −60°F
Reid Water Vapour Pressure 11.0 p.s.i. at 100°F
H_2S less than 1 p p m
Flash Point less than 0°F
Average loading temperature on board 75°F
Barrels per long ton at 60°F 9.555

The grades of cargoes to be loaded will affect the berthing schedule, irrespective of the chronological sequence of vessels' arrival times.

It is recommended that vessels take the maximum flow with due regard to safety, in order to both expedite the turn-round time and to obtain the bottom-weight to counteract the possible effect of local winds which frequently spring up with little warning.

Care must be taken not to overload, as there is no provision whatsoever for cargo once loaded to be pumped back ashore.

Warning is given of the danger of closing hoses against an incoming oil flow. Such a procedure may create excessive pressures which result in damage to loading hoses, sea lines, and other Terminal equipment. Vessels which ignore this warning and do in consequence cause such damage will be held responsible for all costs incurred for the renewal or restoration of the damaged equipment.

The attention of Masters is drawn to Safety Precautions, wherein they are reminded of their responsibilities for ensuring that all persons aboard their ships are cognizant with the hazards involved in the loading operations, and with the need for strict observance at all times of the Fire and Safety Rules. Debutanised Condensate, in particular, is a highly volatile fluid which must be treated with the utmost prudence.

(N.B. particulars of cargoes included in the foregoing are for information only and do not constitute a guarantee of quality.).

Loading – A.G.I.P "Buattifel" Crude: Because of its high wax content – 37% – A.G.I.P. "Buattifel" Crude Oil, (hereafter referred to as "Agip") has to be maintained at a very high temperature throughout its entire transit from the wells to the Terminal system, and thence via the sea lines to the berth and the loading vessel: it will arrive on board at approximately 140°F, and the heating coils in the cargo compartments must be motivated in readiness and be capable of keeping the oil at above this temperature.

Two berths "Brega" and "Chahett", have been modified for the loading of Agip cargoes – ships may be moored in either of these berths but because of the considerable heating problem involved only one of the berths at a time can be used for loading Agip cargo. Through the submarine lines to "Brega" and "Chahett" central "gut" lines have been inserted – at "Chahett" berth where the sea line is 48 in. diameter, the gut line is of 18 in. diameter, and at "Brega" – sea line 42 in. diameter – the diameter of the gut line is 16 in. These two gut lines (which are, of course, tied in ashore with the Terminal tank and metering and pumping complex) terminate 20 ft. from the headers at the seaward ends of the sea lines. The area between the outside of the gut line and the interior wall of the sea line is called the "annulus". To the headers (from which emanate the strings of flexible hoses which are ultimately bolted to the ship's manifold connections) are fitted remote control hydraulic valves, operative from the loading station within the Terminal.

Immediately prior to the berthing of the prospective Agip loading ship, hot Zueitina crude oil is circulated from its storage tank, through the gut line, and back through the annulus, heating the entire system. Once the ship is securely moored, preparations are made to replace the hot "Zueitina" oil with hot Agip oil. (60,000 barrels is the full line content at "Chahett", 33,600 barrels at "Brega"). This process will take about four hours, and ship and shore must work in conjunction to ensure that the deballasting and the recirculation of the line with hot Agip oil are completed at about the same time. This is of vital importance, for once the line system is filled with hot Agip cargo it cannot remain in circulation for more than one hour. If the ship is not then ready to receive it, the Agip oil must be replaced by Zueitina oil, and only after this has been circulated round the line can the line be again replenished with another circulation of Agip oil. This entire process may take about 12 hours – a wastage of time which neither the Terminal nor the ship operators can afford to contemplate with unconcern.

When ship and shore are ready to begin loading, the remote control valves are opened and, at a very slow rate, the cold Zueitina oil which has been in the flexible hoses is loaded – 1,500 barrels at "Chahett", 300 barrels at "Brega".

At this point, the loading officer in the ship will transfer the cargo to other tanks to avoid intermingling of the two types of crude, for now hot Agip is entering the ship's system, from the gut line. Loading continues at a slow rate until the contents of the gut line – 6,000 barrels at "Chahett", 3,600 at "Brega" – have been pumped into the ship, after which the loading of the Agip, at normal rate, is through the annulus only. (The gut line is, at this point, filled with Zueitina oil, which will remain static throughout the loading of the Agip cargo).

With about 2,000 barrels of Agip cargo to go to completion, loading is stopped in order that the ship's loading officer may check his ullages and calculations. When, in "Brega" there are 300 barrels to go, in "Chahett" 1,500 barrels, loading is again stopped briefly: this marks the completion ashore of Agip cargo being pumped into the circuit. Now the Zueitina oil in the gut line is pumped into the flexible hose strings, so that when the required quantity of Agip oil has been loaded into the vessels, the hose strings – from the headers to the terminal flanges, disconnected from the manifold – are filled with Zueitina crude oil, which will not solidify whilst the hoses lie dormant under the sea. Similarly, the Agip crude oil in the annulus of the sea line is pumped back into the tank ashore and replaced throughout the system by Zueitina crude.

The foregoing explanation pertains to vessels loading Agip cargo only, taking the minimum essential Zueitina oil solely as a line flush. If, however, a ship requires a part cargo of Zueitina crude, it will load that after completing the Agip cargo, except for that small quantity used as the line flush at the commencement.

A.G.I.P. "Buattifel" Crude, particulars:-
Average A.P.I. 41.0 at 60°F
Average Specific Gravity 0.806
Wax Content 37%
Pour point +95°
H_2S Nil
Flash Point 68°F (ABEL)
Average Loading Temperature on board 140°F to 150°F
Barrels per Long Ton 7.9 (approximate)

(N.B. The above data is for information only and does not constitute a guarantee of quality).

LPG LOADING BERTH: *Berth, Location and Nature:* The LPG loading berth is S.S.W. of the Small Craft Harbour, inside Tre Scogli Reef. It is designed for vessels of approximately 700 ft. in length, with a cargo capacity of 32,000 cu.m. The maximum permissible loaded draft (1977) is 28 ft.

The channel through the reef, between Trinity Buoy (painted yellow, quick flash green, Lat. 30° 53′ 30″ N., Long. 20° 02′ 48″ E.) and Wafeya Beacon – Scoglio Sud – (white skeleton tower, group flash, 6 every 10 seconds) runs in a 315° (T) – 135° (T) direction: it is marked by two leading marks, the front one in position Lat. 30° 53′ 16″ N., Long. 20° 03′ 42″ E., and the rear one 750 m. (2,460 ft.), 135° (T), from this position. Both marks are black steel pylons with black and red oblong grid topmarks: the front one shows at night an amber light flashing every 1.5 seconds, whilst the rear one shows an amber occulting light, the period of light being six seconds every ten seconds. A small white spar buoy, showing at night a quick flashing red light, marks the turning position for ships approaching or leaving the berth.

The loading platform is of structural steel, supported on concrete piles, and faced with heavy rubber fenders. Ships are berthed alongside four breasting dolphins (two of which are incorporated into the loading platform), with other mooring dolphins ahead and astern and on the inside bow and inside quarter. Ships approaching the berth swing round on the port anchor and about six shackles of chain – when moored, the chain is hove tight.

Only one loading line is used, with a connecting flange of 6 in. ASA 1,300 lbs. It is hove on board the ship with the ship's derrick or crane, or radial davit. A 12 in. Chicksan available for large vessels. Vapour line to "flare" only provided.

Such is the location of the berth – fully exposed to winds from most directions but sometimes protected partially by the reef from the worst effects of the swell – that on occasions LPG tankers cannot be berthed although the crude oil berths in the harbour are operational. And vice versa. Consequently, with regard to Port Closure Time, the LPG berth is regarded as a separate entity from the main harbour.

Arrival: On first contacting Zueitina Marine by VHF (Channel 13 or 16), the Master of an LPG tanker should, in addition to giving his ETA at the Terminal Light Float, inform Zueitina Marine of his last port, the intended port of discharge after leaving Zueitina, the quantity and grade of cargo required, the temperature at which he wishes the cargo to be loaded, the size of the ship's manifold connections, and whether or not he has aboard a Certificate of Discharge for the cargo loaded in Zueitina.

If the vessel is to berth on arrival, the Mooring Master will board in the close vicinity of the Terminal Fairway Buoy. If the ship is instructed to anchor, the Master should do so in the recommended anchorage.

Pratique, Customs Formalities: If the ship has been obliged to anchor, Pratique and Customs formalities may be dealt with in the anchorage. Alternatively, they may be attended to on board after the ship has berthed.

For information regarding documents required on arrival, Customs and Immigration procedure see "Documents".

Loading: For a ship which needs tank purging and cooling prior to loading, the minimum rate will be approximately 100 b.p.h. Inert gas is not provided at Zueitina Terminal – the vessel must provide inert gas for purging after previous cargoes other than butane or propane. The ship will not be loaded until the air has been purged to a maximum oxygen content of 0.5%. When loading has commenced, the minimum rate permitted by the Libyan Secretariat of Petroleum is 1,500 b.p.h. The maximum rate available is between 6,000 and 7,000 b.p.h. For "topping off", the rate can, within these limits, be adjusted to the requirements of the loading officer. Arrangements can be made in advance for the LPG plant to stop loading when the desired quantity has been metered into the ship, or alternatively, the ship's loading officer can instruct the Terminal to stop loading when he sees that the correct amount has been received aboard.

Loading operations on board are the responsibility of the ship's personnel. The Master's attention is particularly drawn to the Terms of Acceptance as detailed in the "Tanker Loading Advice" letter which he has signed, and to the "Zueitina Marine Terminal, Fire and Safety Rules".

The loading platform – abreast of the ship's manifold and within easy hailing distance – is manned at all times during loading operations, and the ship *must* maintain a continuous verbal contact with the loading operative. In addition, VHF contact between ship and loading installations must be maintained on Channel 12. In the event of any emergency – fire, leakage, parting of moorings, etcetera – the operative on the platform can stop the loading by remote control.

Unberthing in Bad Weather: Should deteriorating weather conditions necessitate the vessel leaving the berth quickly, a Mooring Master will be speedily available at all hours.

Cargo Particulars: The following data will, we believe, be of interest to Masters and Mates and operators of vessels loading LPG products:-

Propane
Average A.P.I. 146
Average Specific Gravity 0.510 60/60°F
Reid Vapour Pressure 175 p.s.i.g.
Free Water Nil
Copper Strip Corrosion 1a
Flash Point less than 0°F
Average Loading Temperature −40°F (−40°C)
Barrels per Metric Ton at 60°F 12.3 (approx).

Butane
Average A.P.I. 114.2
Average Specific Gravity 0.576 60/60°F
Reid Vapour Pressure 48 p.s.i.g
Free Water Nil
Copper Strip Corrosion 1a
Flash Point less than 0°F
Loading Temperature at Ship's Request, within Ranges +18°F (−8°C) to +35°F (+2°C)
Barrels per metric ton at 60°F 10.8 (approx.)

(N.B. The foregoing data is intended for information only, and does not constitute a guarantee of quality.)

Departure: Immediately after completion of loading, the manifold connections are unbolted and the loading arms retracted. Shortly afterwards the Mooring Master will board and, with the assistance of adequate mooring boats, unberth the ship and pilot it through the reef to a safe anchorage in the outer harbour before disembarking.

When the documents pertaining to the ship's loading have been completed ashore, a clerk will take them out to the ship. (On occasions he will be accompanied by a Customs Official, boarding the ship to ensure that the seals which were put on bonded storerooms on arrival have not been tampered with before the ship has left Libyan territorial water.) It is customary for Zueitina Marine to inform the ship's Master when the documents clerk leaves the Small Craft Harbour, so that the anchor may be hove up and a lee side presented to the launch.

After the documentation formalities have been completed on board, the Master is required to pass by VHF to Zueitina Marine the official sailing time of his ship.

CUSTOMS ALLOWANCES: Each member of the crew is allowed 25 cigarettes, or 25 grammes of tobacco, one litre of beer, or half a litre of wine, for every day of the ship's stay in port. Other tobacco and cigarettes, wines, beers and spirits, as well as matches, arms and ammunition, and saccharine, will be retained under seal whilst the ship is in Libyan waters.

REPATRIATION: Only in an emergency can any crew member be paid off. Seamen's discharge books are not recognised in Libya. Crew members are advised to have a valid passport in their possession in case of emergency.

MEDICAL: Medical facilities are limited to emergency cases only. Und certain circumstances, however, the Terminal medical practitioner w give advice to Masters by VHF in cases where Crew members appe to be suffering from undiagnosed ailments. If it is essential for a si person to be landed, the ship's Agent must first obtain the approval the Government authorities.

The sick person when coming ashore must be accompanied by a officer or other responsible person able to speak English, and both th patient and the person accompanying him must be in possession passports. (Not seamen's discharge books, which are not recognise in Libya).

FRESH WATER: No fresh water available.

FUEL: No bunkers available.

CONSULS: None locally. See "Tripoli".

REPAIRS: There are no engineering repair shops.

BALLAST: Because of the exposed position of the sea berths, it essential that vessels arrive with sufficient ballast for safe handlin having due regard to existing weather and sea conditions. Experien has shown that a fair estimate of the amount required is one third of th summer deadweight. A tanker found by the Mooring Master to b insufficiently ballasted will be rejected. However, it is imperative for th safety of the ship and of the installation that deballasting should be a speedy as possible, to reduce the period wherein the ship is mo vulnerable to any sudden deterioration in the weather. It is, indeed, the advantage of everyone concerned if the ship is able to commen loading as soon as the hoses are connected, deballasting simultaneo with the loading of the cargo. In cases when it is essential to comple the deballasting before loading can start, and deballasting time in exce of 6 hours will be deducted from the lay time.

As there are at Zueitina no facilities for discharging it ashore, vesse must arrive at the Terminal with clean ballast: all lines, pumps, an strainers must have been flushed out prior to arrival within 100 miles the Libyan coastline.

The Mooring Master will inspect ship's ballast on boarding, and h has the power to reject any vessel that he deems would cause polluti in the Terminal waters. A vessel so rejected must proceed to a positio over 100 miles from the coast, re-ballast, and return only when the ballas is completely clean. A new notice of readiness must then be tende and the loading turn will be counted as from this second arrival.

The sea area round the ship shall be adequately lighted, as freque inspection by the Mooring Master will be made during ballast discharg Any pollution whatever, including bilge discharge, will be cause f rejection. Similarly, any hull leaks causing pollution during loading w be cause for rejection – a vessel rejected on these grounds will not b re-accepted until satisfactory evidence of repairs has been certified b a qualified surveyor.

On completion of deballasting, all unused cargo connections must b blanked off, sea valves closed and lashed, deck scuppers secure plugged, and drip pans placed below the cargo hose connections. A the requirements listed on the Company's Safety and Fire Precautio Check Form must be seen to be complied with before loading commenced.

In the event that the Company has to settle any third party claims a a result of damage to property caused by pollution attributable in an way to a vessel, the Company will have the right to reimbursement b those responsible for the vessel for all expenses incurred.

WEATHER: Weather conditions in Zueitina are generally clement. Th temperature during the Winter seldom falls below 10°C (50°F), and i the Summer, even at midday, is rarely in excess of 35°C (95°F). Th prevailing winds are Northwesterly. During the mid-Summer months, th land- and sea-breezes phenomenon is very apparent: a Northweste wind springs up at about 1100 hrs. sometimes to reach near-gale for by late afternoon, then gradually dying away during the evening. At abo 2300 hrs. the wind begins to blow off the land – again sometimes to a fresh breeze or near-gale – before falling away completely around daw

During the Spring and Autumn, and in the early Winter months, the are frequent prolonged periods of calm, tranquil weather. However, Spring especially, and again in the Autumn, such periods may b interrupted by the onset of the "gibli", an off-shore wind which, like th "khamsin" wind in Egypt, springs up with little warning to reach ga intensity, laden with sand and dust to such an extent that visibility reduced to a few yards.

In the Winter months, prolonged periods of strong Northwesterly gales with very heavy seas and high swells, accompanied by frequent ra squalls, are experienced. Even after the strong winds have subside long, high swells may continue for several hours to prevent moorin operations. Such Northwesterly gales are usually accompanied by a sharply rising barometer, and follow the passing of a cold front, wi winds from the West.

Rainfall is confined to the Winter months only. Fog is rare, thoug does occasionally occur in the Spring and Summer around daw generally dissipating after two or three hours.

SURVEYORS: Various companies of cargo inspectors perform dutie at Zueitina, but must be arranged prior to vessel's arrival through U.K. or Paris headquarters. No Classification Societies at Zueitina.

SHORE LEAVE: No shore leave is permitted.

GENERAL: Vessels are advised not to have on board any artic whatsoever of Israeli origin. If anything of such a nature is found it w be confiscated and the ship be liable to a fine and possibly to a del for further investigation.

Goods – and, in particular, alcohol and tobacco – must not be take from ship to shore, or from ship to ship.

Being an open roadstead, vessels must keep engines in a state o immediate readiness. No repairs to main engine may be undertaken i berth. Steam or electric power must be available on deck in cas adjustments to anchor cables or mooring lines are found necessa Power must be available on ship's whistles and sirens. Ship's boa must not be lowered into the sea and detached from the falls. Swimmi is prohibited. The Mooring Master (and, when applicable, hi assistant(s)) assigned to a tanker, will remain on board until after th sel has loaded, unmoored, has completed documentation formalities d has cleared the Company's installations and is safely heading for open sea. During the time he is aboard he is to be provided with ommodation suitable for one of Master Mariner status, and with itable meals.

IPMASTER'S REPORT: March 1988.
art: B.A. Chart No. 3346.
cuments:
3 copies Crew List.
2 copies Crew Declaration.
2 copies Ship's Manifest.
1 copy Health Declaration.
2 copies Currency List.
All Passports.
1 copy Arms and Ammunition List.
1 copy Drugs List.

No alcohol allowed in cabins, all must be place in bond and nifested. "Magazines" and "calendars" must be placed under seal. Money in the ship's safe is to be manifested. If vessel staying in Libyan astal waters the bond remains sealed. Customs may issue a limited mount of beer but for ship use only.

Stores must be checked to make sure that there is no produce from uth Africa or Israel.

The Crew Declaration and the Crew Money List must be on Libyan rms, unless first Libyan port of call.

proach: The harbour area was observed on radar at 24 miles and etina Light was observed at 15 miles. The Light Float light is weak. etina D/F was operational. Taking of soundings on approach can be assistance.

Bengazi Radio should be contacted on 2182 kHz. when inward bound. e Station was difficult to raise but the operators were polite and spoke od English. They require vessel's destination, ETA, position, course d speed.

Zuetina Terminal Telex No. 90120130 ZUELY.

chorage: LPG ships anchor in the anchorage indicated on BA. Chart o. 3346. If the vessel is familiar with the Port she may anchor 0.75 miles W. of Scoglio Sud Reef Lighthouse.

lot: The Pilot/Mooring Master boards at the anchorage from a mooring unch and on departure leaves at the same position. Zuetina Marine is n VHF Channel 13. Pilots stay on board whilst the vessel is at the fshore Mooring but does not normally stay on vessels at the LPG rth unless the weather is poor.

try: Between Scoglio Sud Reef Light and Q.Fl.R. Buoy in position 53.55′ N., 20° 03.40′ E. less water reported. Approach and parture to the LPG Berth is made to the South and West of the Q.R. oy between the buoy and Trinity Shoal. Minimum depth from the Light oat to the berth was found to be 39 ft.

gs: One large tug/mooring vessel of 4,500 h.p. used at the offshore oorings. 3 mooring launches of 350 h.p. used at the LPG berth, these unches also used at the offshore moorings. A total of 4 launches are ailable and a 5th launch is under repair.

erth: Vessels berth starboard side to. The berth is very exposed and ten closed in Winter.

Berthing and unberthing possible at night time if the weather is calm, owever, night berthing and unberthing not carried out if the tanks are ll.

The Radar Station at Zuetina is in the same position as Zuetina Light. The berth flat fender face is 25 m. in length with one breasting dolphin each end. Small vessels tend to lie on the berth flat face. The berth aligned 104° – 284°.

There is a Q.Fl.R. Light on the N.W. breasting dolphin.

Vessels leave the berth as soon as hoses are disconnected and mplete paperwork at the anchorage.

oorings: Moorings consist of 2 head/stern lines, 2 breast lines and springs at each end. The head and stern lines are sent to buoys and e breast lines to the mooring dolphins. Springs are sent to bollards on e berth.

The port anchor was let go to approximately 3 shackles when proaching the berth. The mooring launches push the vessel into the rth and hold her there until all fast.

rgo: The Chicksan arms have been taken down and only rubber oses are used. Liquid hose is 6 in. 300 ASA. A vapour return line is vailable but metered and charged. It was not used.

There is a hydraulic crane on the berth for hose handling. A ship's errick/crane is also required and ship's crew are required to make nnection.

f vessel is handling butane and propane, butane is handled first. here is about 4.5 hours' wait between products whilst the line is cleared. ormal minimum rate is about 55 t.p.h. but can go slower for short eriods while cooling. The normal maximum for hose loading is 200 t.p.h. utane chilled to about −5°C. Beware of pressure reduction on loading illed butane.

No surveyor or terminal representative was in attendance for figures the start or finish.

There is a terminal representative in a hut on the berth during loading th a walkie-talkie on Channel 12. Channel 12 also connects with the PG Control Room and can be contacted if there are any queries. The ll of Lading is on the shore figures and this compares favourably with e ships's figures.

Propane can be loaded first by prior arreangement, however, the erminal is not keen on doing this as the line is normally left under utane.

Average Specific Gravity of butane 0.567 and propane 0.508.

acilities: Emergency medical attention is available at the Terminal inic. Agent advises that there are a few fresh stores available.

ustoms: Beer is sometimes allowed out of bond if the vessel is oceeding outside Libya, but alcohol will not be issued if vessel is on e coastal trade. A cigarette issue is allowed.

If vessel is on the coastal trade, make sure the "Customs Rider" is correct on departure.

Papers: All departure documentation completed at anchorage after loading. The agent attends but no representative of the terminal. Completion of documentation can take up to 3 hours. The Libyan Discharge Certificate is very important and must be properly signed at the port of discharge even if on Libyan coastal trade.

General: The oil company has flights twice a week from Tripoli. Terminal personnel often arrive and leave via Benghazi which is 2 hours by road and take Air Malta flight to Valletta for onward connections.

AUTHORITY: Zueitina Marine Terminal, Zueitina Oil Co., P.O.Box 2134, Tripoli, S.P.L.A.J. *Tel:* Tripoli 38011 (ext. 116-119 Zueitina). *Telex:* 20289, 20130 Zue Ly. *FAX:* 39109. *Contact:* Captain J. Folkestad, Marine Superintendent. M. Oun, Operations Manager.

AGENCY: All ships must have an approved Agent to look after their interests. As from 1st June, 1978, all shipping agencies in the Socialist People's Libyan Arab Jamaharaya have been superseded by one nationalised company, known as The Shahat Shipping Agency.

See "General" before first port.

Cables of estimated time of arrival sent to the Agent should be in addition to, and not in place of, those sent to Oxyport, Oxylibya, Tripolilibya. Total charges are 750 Libyan dinars for the first 30,000 tons summer deadweight, or part thereof, plus 2 dinars 500 Dirhams for every 100 tons or part thereof in excess of 30,000 tons, plus 2% of the total sum in revenue stamps.

Lines From Storage Tanker to Export Tanker
Lines From Export Tanker to Storage Tanker

Forward Lines

First lines are two head lines with their eyes lashed together taken by boat.

Then two wire springs with synthetic tails, from main deck, passed by heaving lines.

Then four head lines from port bow fairleads passed by heaving lines.

Finally, two synthetic lines from Storage Tanker forecastle to Export Tanker forecastle also passed by heaving lines.

Aft Lines

First lines are three wires with synthetic tails passed from Storage Tanker to Export Tanker port quarter by heaving line.

Then four synthetic stern lines from the Export Tanker to the Storage Tanker, passed by boat, two at a time.

Finally, two synthetic lines from the Storage Tanker to the starboard quarter of the Export Tanker, passed by boat.

NOTE: When mooring configuration is suitable one aft wire spring with a synthetic tail will be passed from the Export Tanker's aft main deck to the Storage Tanker amidships.

NOTES:

1. Ship must not present itself for loading with hatch coamings more than 17.4m.(57ft.) above I.S.L.W. and this height must not be exceeded during loading.
2. Working range of boom is horizontal to 11 degrees below horizontal.
3. Maximum throw of trimming machine is 18.3m.(60ft.)
4. Travel range between two loading heads along wharf is 149.4m.(490ft.) and the wharf length is 215m.(704ft.)
5. Depth of water at berth and approaches is 11.4m.
6. Minimum size hatch opening (without prior arrangement) with trimmer is 4.9m. × 4.9m.(16ft. × 16ft.).
7. Maximum length of vessel—dependent on shipping conditions—to be arranged with Harbour Master.
8. All dimensions in metres.

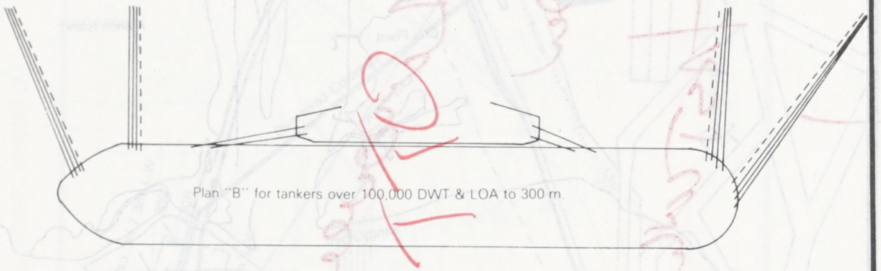
Plan "A" for tankers over 100,000 DWT & LOA to 300 m

- - - - - - - - Shore wires



WESTERN PORT

MOORING DIAGRAM FOR VESSELS AT LONG ISLAND POINT

Oil tankers over 100,000 DWT and departure drafts exceeding 13 metres normally berth starboard-side-to (head out). Usual mooring plan for ships lines each end is:- 2 springs: 4 head-stern lines: 2 breast lines. In addition, all ships must take onboard each end 2 preventer wires (36 mm.) These shore wires have a rope and wire messenger attached and are run by launch. Ship must heave onboard and made tight to bitts. When letting go the shore wires are lowered down to launch, aft shore wires first, which are run back by launch to mooring dolphin. Launch then goes to for'd shore wires and runs them.

PREFERRED MOORING PLAN SEQUENCE (2 Launches and 7 Linesmen)

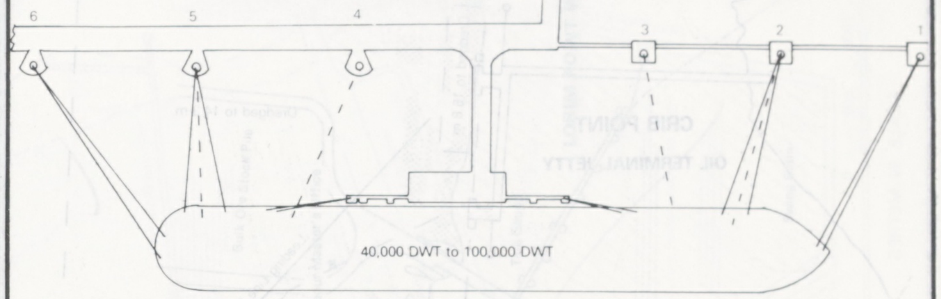
FIRST: Set both springs for'd and aft and position ship on berth.
SECOND: Run head and stern lines to shore.
THIRD: Run breast lines to shore.
FOURTH: Run shore wires to ship. Heave tight onboard and make fast.

WHILST ALONGSIDE VESSELS MUST HAVE READY
Offshore anchor lowered to water.
Offshore ladder rigged and lowered.
Offshore lifeboat at embarkation deck.
Emergency wires rigged and adjusted.

ALL MOORING LINES KEPT TIGHT WITH EVEN STRAIN AND WINCH BRAKES FULLY APPLIED.

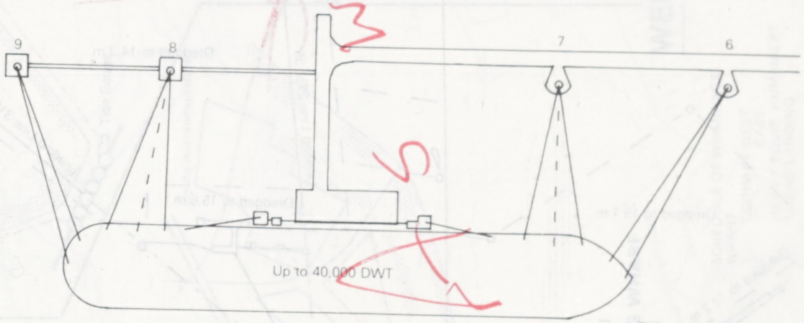
PREFERRED LET GO SEQUENCE (1 Launch and 6 Linesmen) WHEN ENGINE TEST COMPLETED

FIRST: Slack off AFT shore wires and lower to launch, which will tow to dolphin where winched in.
SECOND: Slack off FOR'D shore wires and lower to launch, which will tow to dolphin where winched in.
THIRD: Single up to Pilot's orders Fore and Aft.
FOURTH: Let go to Pilot's orders.



WESTERN PORT

MOORING DIAGRAM FOR VESSELS AT CRIB POINT AND LONG ISLAND POINT



- - - - - - - - - Shore wires

Mooring lines shown are minimum number required.

Avoid mixing moorings if possible.

Shore preventer wires are 36 mm. diameter.

LPG VESSEL BERTHING – PIER 'C'

Berthing arrangement for LPG vessels under normal weather and wind conditions:

Due to the LPG arm's limited work area, it is important that the vessel is very careful during berthing, and during the whole time it is at the berth, that lines be checked and adjusted as required. Should the vessel move along the quay, and the manifold area comes outside the work area of the LPG arm, an alarm of the rapid acting type is activated. Loading discharge operations are stopped immediately, and the vessel is moved back to the original position.

Article 94: Visual Signals

(A) *Signals hoisted to vessels in Port Said Harbour*
(at the automatic signals mast or from the watch tower)

1. General Signals
   Reduce speed – Attention – Movement suspension and authorisation – Cancel previous signal – Passage free for benzene ships
   Authorisation and interdiction to get underway
2. Numerals
3. Berths signals

(B) *Signals made by the pilot vessel at Port Said and Suez*

(C) *Signals displayed on stations signals masts to vessels*

Signal No.
1. Stand by to proceed (general)
2. Proceed (general)
3. Stand by to make fast (signal mast Km. 18)
4. Make fast (signal mast Km. 18)
5. Attention
6. Immediate stopping
7. Make fast (vessels from North)
8. Make fast (vessels from South)
9. Proceed (vessels from North)
10. Proceed (vessels from South)
11. Current signal
12. Port closed
13. W/T watch (vessels from North)
14. W/T watch (vessels from South)
15. Passage authorisation (ferry boats)
16. Isolated signal station

(D) *Special signals used by vessels in ports and in the Canal*
1. Vessels carrying bulkpetroleum flash point between 73°F. and 150°F.
2. Vessels carrying explosives – Not Gas Free
3. Vessels carrying bulk petroleum flash point under 73°F.
4. Vessels carrying radioactive substances
5. I require a Pilot
6. I require Free Pratique
7. Coming from infected port
8. Under quarantine
9. Tug required (in ports)
10. Mooring boats
11. Searchlight
12. Last in convoy
13. Making fast
14. Vessel manoeuvring to sea
15. Vessel manoeuvring to Canal
16. Voluntary stopping (G.V.)
17. Aground
18. I have a Pilot
    a. On board
    b. To disembark

(E) *Signals used by dredgers*

(1) Dredgers working underway

Signal No.
1. Dredging underway
2. Passage clear on side shown
3. Passage clear on both sides
4. Passing not allowed on either side
5. I am going about
6. I am not under command

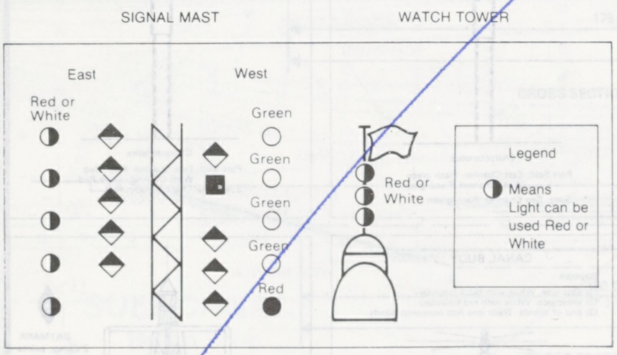
(2) Stationary dredgers and floating equipment

Signal No.
7. Passage clear on side shown
8. Passage clear on both sides
9. Passage clear on side shown, with speed reduction
4. Passing not allowed on either side
10. Passing not allowed: manoeuvring to clear passage
6. I am not under command – passing not allowed

PORT SAID:

(A) *Signals made to vessels*

1. Signals are made from the Automatic Signal Mast or from the Watch Tower (vigie).
2. All signals are shown as they are seen by vessels coming from Sea.



3. The top triangle (or by night the top light) of the Eastern Side of the mast indicates to which vessels the signal is made.
Pointing UP (by night a Red light). It means that the signal is made to vessels moving from:
"Port to Canal or Canal to Port".
Pointing DOWN (by night a White light). It means that the signal is made to vessels moving from:
"Port to Sea or Sea to Port".

(2) Stationary dredgers, floating cranes, etc. – *continued*

MEANING	by Day	by Night
4 Passing not allowed on either side.	 Two drums one over the other at the yard arm.	 A red light at both yard arms.
10 Passing not allowed: I am manoeuvring to make fast to clear the passage.	 A red flag at the masthead and two drums one over the other at the yard arm.	 A red light at the masthead. A red light at both yard arms.
*6 Passing not allowed. I have a breakdown and cannot get out of the way.		 International Signal

*This signal may be hoisted together with the International Signal "K" (sound and visual): "STOP IMMEDIATELY".

(1) Dredgers working underway – *continued*

MEANING	by Day	by Night
4 Passing not allowed either side.	 Two drums one over the other at the yard arm.	 A red light at both yard arms.
5 am going about.	 Flag D hoisted at the yard arm on the side to which she is turning.	 A red light shown at the yard arm on the side to which she is turning. Signal IP by morse lamp.
*6 am not under command.	 Black Black	 International Signal

*This signal may be hoisted together with the International signal K (sound and visual) meaning: STOP IMMEDIATELY"

(2) Stationary dredgers, floating cranes, etc.

MEANING	by Day	by Night
7 Passage is clear on the side shown. (I am at work or moored).	 A drum at the yard arm on the side on which the passage is clear.	 White White White A white light at the yard arm on the side on which the passage is clear. Two white lights along the bulwark on the side on which the passage is clear.
8 Passage is clear on both sides (I am at work).	 A drum at both yard arms.	 White White White White A white light at both yard arms. Two white lights along the bulwark on both sides.
*†9 Passage is clear on the side shown but only proceed at the lowest possible speed.	 A red flag at the masthead. A drum at the yard arm on the side on which the passage is clear.	 White Green White White A white light over a green light on the side on which the passage is clear. Two white lights along the bulwark on the side on which the passage is clear.

*This signal is also used by "Warehouse" string of barges.

†The International Signal TE may also be hoisted. In this case the decrease of speed is imperative. By night the imperative decrease of speed is shown on the Pilot's embarkation order.

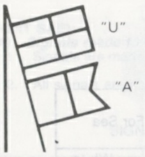
(B) ***Signals to be made in Port Said and Port of Suez by the Pilot vessel***

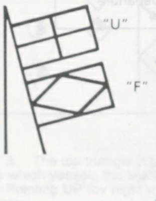
(a) If the weather outside does not prevent the Pilot vessel from going out.



By Day	By Night
A white rocket or U A flashed in morse.	A Pilot vessel is going out to you.

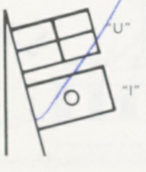
N.B.: On seeing this signal, the vessel concerned should shorten her cable and endeavour to make a lee for the Pilot vessel.

In a rough sea preventing the Pilot from coming aboard, the Pilot vessel will make the following signals on nearing the incoming vessel.



By Day	By Night
A white flare or U F by morse lamp.	Follow the Pilot vessel. The Pilot will come aboard under the lee of the breakwater.

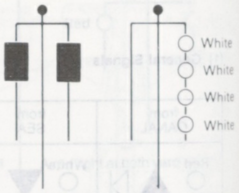
(b) If the weather outside prevents the Pilot vessel from going out.
The Pilot vessel will remain under the lee of the breakwater and make the following signals.



By Day	By Night
A red rocket and if necessary U I by morse lamp.	The Pilot vessel cannot go out.

(C) ***Signals displayed on Station Signal Masts to Vessels***

Signal No. 1 – Stand by to Proceed



White
White
White
White

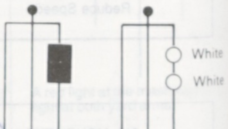
(a) Hoisted on Port Tewfik, Kabrit, Deversoir and Ras El Ech "Stand by to Proceed on signal No. 2".

(b) Hoisted on Ballah and repeated on El Ferdan. "Southbound vessels made fast in Ballah West Branch, Stand by to Proceed".

(c) Hoisted on Ballah and repeated on El Kantara. "Northbound vessels made fast in Ballah West Branch, Stand by to Proceed".

(d) Hoisted on Km. 3 East Branch of Port Said. "Southbound Vessels using Port Said East Branch, Stand by to Proceed".

Signal No. 2 – Proceed



White
White

(a) Hoisted on Port Tewfik, Kabrit, Deversoir and Ras El Ech "Proceed".

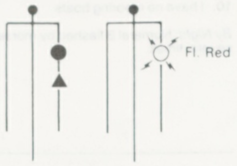
(b) Hoisted on Ballah and repeated on El Ferdan. "Southbound vessels made fast in Ballah West Branch, Proceed".

(c) Hoisted on Ballah and repeated on El Kantara. "Northbound vessels made fast in Ballah West Branch, Proceed".

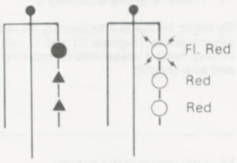
(d) Hoisted on Km. 3 East Branch. "Southbound vessels using Port Said East Branch, Proceed".

(e) Absence of Signal No. 2: "Stay at anchor or made fast and keep continuous W/T watch".

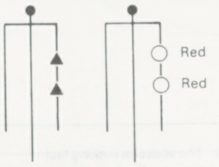
Signal No. 3 – Stand by to Make Fast
Hoisted at Km. 18 mast. "Southbound vessels made fast in West Branch Km. 4 to 14 and Northbound vessels already passed Tineh station. Stand by to make fast".



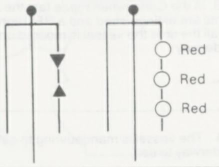
Signal No. 4 – Make Fast
Hoisted at Km. 18 mast. "Southbound vessels in Port Said East or West By-pass and Northbound vessels already passed Tineh station. Make Fast".



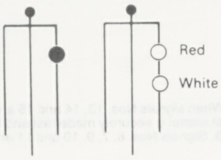
Signal No. 5 – "Attention"
"Southbound and Northbound vessels stand by to make fast or manoeuvre. Keep W/T watch immediately".



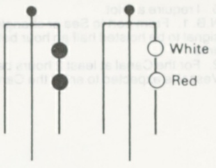
Signal No. 6 – Immediate Stopping
"Southbound and Northbound vessels make fast immediately".
Vessels may proceed when signal is lowered or switched off.



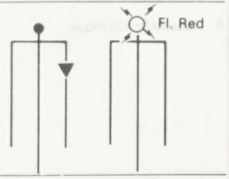
Signal No. 7 – Make Fast
"Vessels from North : Make Fast".
(to be lowered or switched off when all concerned vessels are made fast.)



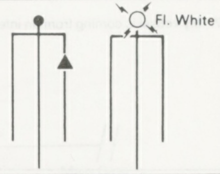
Signal No. 8 – Make Fast
"Vessels from South : Make Fast".
(to be lowered or switched off when all concerned vessels are made fast.)



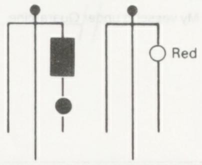
Signal No. 9 – Proceed
"Vessels from North made fast on Signal No. 7 : Proceed".
(Southbound vessels made fast in Port Said West Branch and in Ballah West Branch to Proceed on Signal No. 2.)



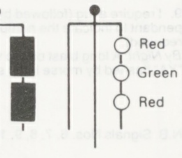
Signal No. 10 – Proceed
"Vessels from South made fast on Signal No. 8: Proceed".
(Northbound vessels made fast in Ballah West Branch to Proceed on Signal No.2.)



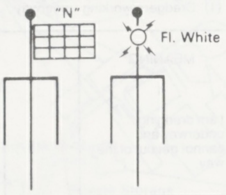
Signal No. 11 – Current Signal
Current indication signal.
Hoisted on Challoufa and Genefa signal masts:
"Current Running North".
Absence of signal: "Current is Running South or Slack Water."



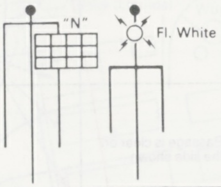
Signal No. 12 – "Port Closed"
"Suez Roads closed for bad weather".



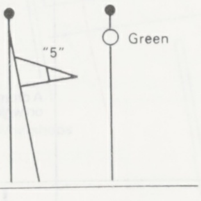
***Signal No. 13 – W/T Watch**
"Vessels from North establish Wireless Telegraphy Watch".



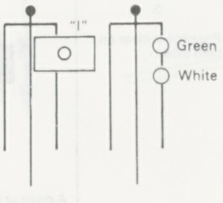
***Signal No. 14 – W/T Watch**
"Vessels from South establish Wireless Telegraphy Watch".



Signal No. 15 – Passage Authorisation
"Ferry Boat not allowed to move".
(By night: Light on wharf.)



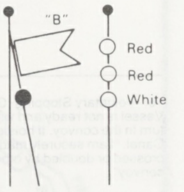
Signal No. 16 – Isolated Signal Station
"This signal station is isolated. All communications are made by Wireless Telegraphy".



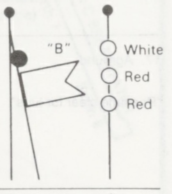
*Signals No. 13 and 14 can be used at the same time addressing both convoys from North and South.

(D) *Special Signals Used by Vessels in Ports and in the Canal*

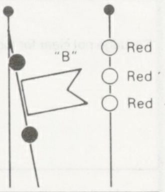
1. Oil tanker carrying bulk petroleum (flash point between 73° and 150°F).



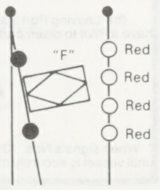
2. Vessels carrying 1st group dangerous goods.
Not Gas Free tankers.
LPG – LNG.
Dangerous chemicals in bulk.



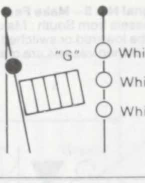
3. Petroleum in bulk. (Flash point below 73°F).



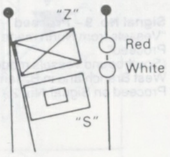
4. Vessels carrying Radio Active substances.



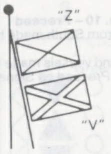
5. I require a Pilot.
N.B. 1. From port to Sea or changing berth, signal to be hoisted half an hour before sailing time.
2. For the Canal at least 2 hours before the 1st Vessel is expected to enter the Canal.



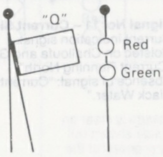
6. I require free pratique.



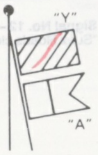
7. My vessel is coming from an infected port.



8. My vessel is under Quarantine.

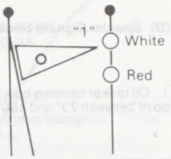


9. I require a tug (followed by a numeral pendant to indicate the number of tugs required).
By Night: A long blast on the whistle and letters "YA" flashed by morse lamp several times.

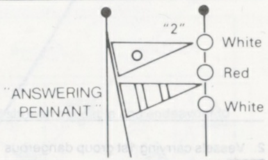


N.B. Signals Nos. 6, 7, 8, 9, 10 and 11 are to be used in Ports only.

*15. The vessel is manoeuvring to get underway to the Canal.

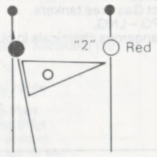


16. Voluntary Stopping (Garage Volontaire). Vessel is not ready and will not maintain her turn in the convoy. If hoisted by a vessel in the Canal, "I am securely made fast and can be crossed or doubled by other vessels in the convoy".

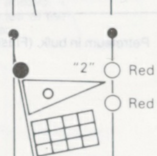


17. Aground:

"Passage clear for tugs".

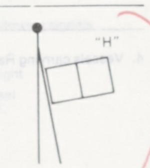


"Passage not clear for tugs"



18. (a) I have a Pilot on board.

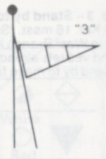
(b) Leaving Port Said and Port of Suez: "I have a Pilot to disembark".



* When signals Nos. 13, 14 and 15 are hoisted, vessels are not authorised to overtake or cross until vessel is securely made fast and Signal No. 16 (G.V.) hoisted.

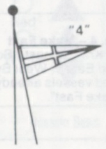
10. I have no mooring boats

By Night: Numeral 3 flashed by morse lamp several times.

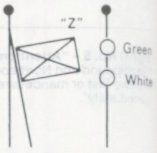


11. I have no shore searchlight.

By Night: Numeral 4 flashed by morse lamp several times. (Signals 10 and 11 can be used in ONE hoist if vessel has no mooring boats and searchlight).

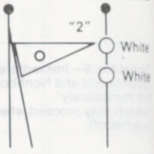


12. Last vessel in the convoy.

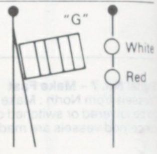


*13. The vessel is making fast.
N.B. In the Canal when made fast the 2 white lights are extinguished and a RED light put on aft all the time the vessel is moored until actually underway.

13 (bis)

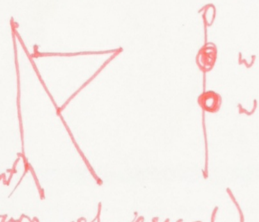


*14. The vessel is manoeuvring to get underway to sea.



* When signals Nos. 13, 14 and 15 are hoisted, vessels are not authorised to overtake or cross until vessel is securely made fast and Signal No. 16 (G.V.) hoisted.
N.B. Signals Nos. 6, 7, 9, 10 and 11 are to be used in Ports only.

(13 bis)
Vessel
doubling
in GBL.
(NUMERAL Pendant)
Indicating New turn of vessel)



(E) ***Signals used by dredgers in Canal Waters***
(1) Dredgers working underway

MEANING	by Day	by Night
1 I am dredging underway and cannot get out of the way.	 International Signal	 *N.B.*: In lieu of the white masthead light.
2 Passage is clear on the side shown	 A drum at the yard arm on the side on which the passage is clear.	 A white light at the yard arm on which the passage is clear. A red light at the yard arm on which the passage is not clear. Two white lights along the bulwark where passage is clear.
3 Passage is clear on both sides.	 A drum at both yard arms.	 A white light at both yard arms and two white lights along the bulwark on both sides.

ESSENTIAL FACTS FOR INCOMING TANKERS

1. Only clean ballast to be discharged overboard. There are no reception facilities for dirty ballast
2. The storage vessel is The Bon Bateau (Call Sign ELCT). Marisat number is 1241411. ETA s required 72/48/24 hours before arrival.
3. Anchorage area is recommended location for vessels awaiting berth.
4. Tankers to have ready:
    a. Windlasses, anchors, winches on forecastle, 3 inch messenger.
    b. on starboard side lifting gear capable of lifting a weight of 10 metric tons.
    c. on port side pilot ladder/accommodation ladder.
    d. reducer to 16 inches for tanker rail hose.
5. Tanker crew will perform all operations aboard the tanker under the mooring master s guidance.
6. Emergency Signal: Rapid & continuous blasts of the ship s whistle.

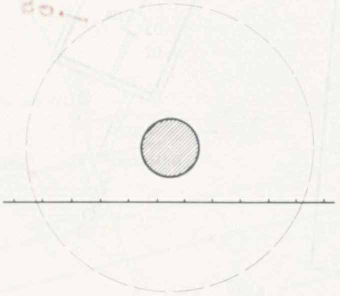
"Plan supplied by Ship's Mast

RIVER ELBE

(PILOTAGE – HELICOPTER)

WINCHING AREA



1. CLEAR ZONE DIAMETER 4,60 M

Full painted circle spot
(white or yellow, non-skid)

2. MANOEUVRING ZONE DIAMETER 30,50 M

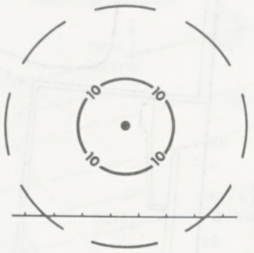
NO OBSTRUCTION HIGHER THAN 3,00 M

Man. zone circle line need not to be marked

Man. zone may extend over the ship's side.

If obstruction higher than 03,00 m, helicopter will hover approx. 03,05 m (10 ft) above the highest obstacle within man. zone.

RESTRICTED LANDING AREA



1. CENTER CIRCLE SPOT DIAMETER 0,50 M

Full painted white or yellow

2. AIMING CIRCLE DIAMETER 10,00 M

NO OBSTRUCTION HIGHER THAN 0,10 M

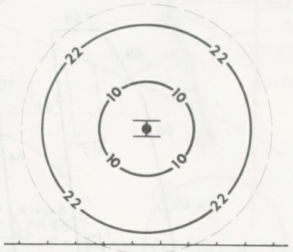
Circle line painted white or yellow, width 0,20 M
Circle diameter to be marked (10)
Non-skid surface

3. MANOEUVRING ZONE DIAMETER 25,50 M

NO OBSTRUCTION HIGHER THAN 1,25 M

Man. zone to be marked with broken circle line, width 0,20 M
Man. zone may extend over the ship's side

FULL LANDING AREA



1. CENTER CIRCLE SPOT DIAMETER 0,50 M

Full painted white or yellow.
"H" symbol may be painted, dimensions see ICS Guide.
"H" symbol may only be marked in FULL LANDING AREA

2. AIMING CIRCLE DIAMETER 10,00 M

NO OBSTRUCTION HIGHER THAN 0,10 M

Circle line painted white or yellow, width 0,20 M
Circle diameter to be marked (10)
Non-skid surface

3. CLEAR ZONE DIAMETER 22,00 M

NO OBSTRUCTION HIGHER THAN 0,25 M

Circle line painted white or yellow, width 0,20 M
Circle diameter to be marked (22)

4. MANOEUVRING ZONE DIAMETER 27,50 M

NO OBSTRUCTION HIGHER THAN 1,25 M

Man. zone circle line need not to be marked
Man. zone may extend over the ship's side

RIVER ELBE

(PILOTAGE – HELICOPTER)

SAFETY CHECK LIST

For use with ICS Guide to Helicopter/Ship Operations

To be checked by the officer in charge. ☐

1. GENERAL

(a) Have all loose objects within and adjacent to the operating area been secured or removed? ☐
(b) Have all aerials, standing or running gear above, and in the vicinity of, the operating area been lowered or secured? ☐
(c) Has the officer of the watch been consulted about the ship's readiness? ☐
(d) Are the fire pumps running and is there adequate pressure on deck? ☐
(e) Are fire hoses ready, (hoses should be near to, but clear of the operating area)? ☐
(f) Are foam hoses, monitors and portable foam equipment ready? ☐
(g) Are foam equipment operators, of whom at least two are wearing the prescribed firemen's outfits, standing by? ☐
(h) Are the foam nozzles pointing away from the helicopter? ☐
(i) Has a rescue party, of whom at least two are wearing firemen's outfits, been detailed? ☐
(j) Is a man overboard rescue boat ready for immediate lowering? ☐
(k) Are the following items of equipment to hand?
  (i) Portable fire extinguishers? ☐
  (ii) Large axe? ☐
  (iii) Crow bar? ☐
  (iv) Wire cutters? ☐
  (v) Red emergency signal/torch? ☐
  (vi) Marshalling batons (at night)? ☐
(l) Has the correct lighting, (including special navigation lights), been switched on prior to night operations? ☐
(m) Is the deck party ready, and are all passengers clear of the operating area? ☐
(n) Have hook handlers been equipped with helmets, strong rubber or suitable gloves and rubber soled shoes to avoid the danger of static discharge? ☐

2. LANDING ON

(a) Is the deck party aware that a landing is to be made? ☐
(b) Is the operating area free of heavy spray or seas on deck? ☐
(c) Have side rails and, where necessary, awnings, stanchions and derricks been lowered or removed? ☐
(d) Where applicable, have portable pipes been removed and have the remaining apex ends been blanked off? ☐
(e) Are rope messengers to hand for securing the helicopter, if necessary? (Note: only the helicopter pilot may decide whether or not to secure the helicopter) ☐

3. TANKERS: Additional Items for Check List

(a) Gas control, ships not fitted with an Inert Gas System: has pressure been released from tanks within thirty (30) minutes of commencement of helicopter operations? ☐
(b) Gas control, ships fitted with an Inert Gas System: has pressure in cargo tanks reduced to slight positive pressure? ☐
(c) All tankers: have all tank openings been secured following venting operations? ☐

4. BULK AND COMBINATION CARRIERS: Additional Items for Check List

(a) Has surface ventilation to dry bulk cargoes ceased, and have all hatch openings been fully battened down prior to helicopter operations? ☐

5. GAS CARRIERS: Additional Items for Check List

(a) Have all precautions been taken to prevent gas emission on deck? ☐

Radio Communication

The helicopter will contact the vessel on VHF FM channel 16 and will request the ship to change to channel 9 or 70.
The vessel shall advise the helicopter pilot of its position, heading, speed and the actual wind direction and speed over the deck.

Bearing Transmissions

After radio contact is established, until the helicopter is over the ship, it is essential that the vessel transmit direction finding signals on 410 kcs. On request of the helicopter pilot an uninterrupted (locked key) transmission should be given.

Wind Conditions Limiting Helicopter Operations

For most purposes the best relative wind is between 35° abaft the beam and ahead with speeds normally from 10 – 50 knots. However, certain sea conditions may make it necessary to obtain a relative wind which is between 35° abaft the beam and dead astern.

Sea and Swell

If possible the master should ensure that spray, roll and pitch are kept to a minimum by selecting a suitable course and speed. This is particularly important in preventing sea and spray from entering the helicopter's engine. The helicopter pilot should be informed of any likelihood of seas or heavy spray on deck.

When personnel are being winched to or from smaller ships the helicopter pilot may request the ship to head into the sea to reduce rolling.

GOVERNMENT MOORINGS

No vessel shall take up any buoy without previous application to the Marine Department. Details of the buoy dues, booking procedures, and the use of Government mooring buoys during typhoon are available from the Port Formalities and Dangerous Goods Office, room 318, Harbour Building, 38 Pier Road, Hong Kong, Tel. : 852 3086. All ships are to secure to Government Buoys by their chain cable. Slip wire should remain slack at all times. Any damage done to Government Moorings will render the ship using the same liable for such damage.

BUCHANAN

(ORE LOADING QUAY)

1. Minimum reach of shiploader outside fendered quayside = 4.50m
2. Maximum reach of shiploader outside fendered quayside = 23.0m (incl. throw)
3. Max. possible beam of ship with 5m symmetrical spout trimming across hatch = 43m
4. Aftermost position of stern, when draft aft exceeds 9.0m
5. Foremost position of bow for acceptable mooring to anchor block
6. Any hatch located more than 245.0m from extreme stern must be loaded before draft aft exceeds 9.0m
7. Min. advisable clearance under keel: $c = \frac{3B \text{ ft.}}{125}$ (B = ship's beam in feet)
8. Max. advisable draft (cargo completed on high tide) is 41½ – 42½ ft. depending on height of tide and required clearance under keel. Ships drawing 39 feet can be handled at all times
9. Free board height under shiploader should not exceed 15m

NOTE: Information on this drawing is given as advice only and does not constitute a guarantee, that ships of indicated max. dimension can always be loaded. In addition, several other factors like trimming, ballasting and deballasting, stresses in the hull etc must be taken into account by the owner or master of the ship.
